

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

pt. 1

REPORT OF THE SECRETARY OF WAR.

WAR DEPARTMENT,
Washington, D. C., November 29, 1898.

To the PRESIDENT :

I have the honor to submit the annual report of this Department:

In my report for last year there were published the report of the Major-General Commanding the Army, and synopses of the reports of chiefs of bureaus, with recommendations for such legislation as would tend to better administration. The full reports are also submitted herewith.

The work for the year was thus reviewed, and as that plan proved satisfactory it is followed this year.

The reports of the Major-General Commanding the Army, of Major-General Merritt, commanding the troops in the Philippines, and of Major-General Shafter, commanding the troops in Cuba, and are published in full in this report, together with correspondence, telegraphic and otherwise, relating to the war. Each tells his story in his own way. The synopses of chiefs of bureaus follow, with such comments and recommendations as are deemed appropriate and necessary; also an extract from the report made by Major-General Breckinridge, Inspector-General, who was sent by the Major-General Commanding the Army to observe the operations of the Army at Santiago and to report thereon.

THE ARMY.

War with the Kingdom of Spain was declared April 21, 1898. By proclamation of April 23 the President called for 125,000 volunteers, and on May 25 he called for an additional force of 75,000. Congress also authorized an increase of the Regular Army to 61,000 men,

and in addition provided for 16 regiments of volunteer infantry (immunes), cavalry, and engineers.

The appropriation of \$50,000,000 for the national defense, made by Congress on the 9th day of March last without a dissenting vote, roused the enthusiasm of the people, fusing all shades of opinion into one patriotic thought.

At that time the defenseless condition of our harbors and ocean cities and towns caused great apprehension among the people along the coast. The hastening of work on fortifications and the placing of mines in our harbors was therefore of the first importance; and, accordingly, every energy was bent from that time forward by the Chief of Engineers and the Chief of Ordnance to that end. In addition to those already in place, 185 guns, including mortars, were mounted; 102 seacoast carriages provided; 13 temporary batteries constructed at important points, and over 1,500 submarine mines planted in 28 different harbors.

On April 15 orders were issued concentrating the Regular Army in camps in the Southern States, where the Volunteers followed, nearly 125,000 having been mustered into service by May 31.

Soon after the declaration of war, a movement was contemplated looking to the investment of Havana, and orders to that effect were issued, and also for a reconnaissance in force along the south coast of Cuba; but the movement of the enemy's fleet changed these plans and culminated in the campaign of Santiago.

SANTIAGO CAMPAIGN.

On June 14 Major-General Shafter, with his command, sailed from Tampa for Santiago. June 22 his first troops landed at Daiquiri. Two days later the engagement of La Guasima occurred; and on July 1, 2, and 3 the battles of El Caney and San Juan Hill, in front of Santiago, were fought. After the cessation of firing about noon on the 3d, the surrender of the Spanish forces was demanded by General Shafter. This being refused, the commanding general of the Spanish forces was notified that the bombardment of Santiago would begin at noon of the 5th, thus giving two days to enable the women and children to leave the city.

On July 3 the Spanish fleet fled from the harbor and was destroyed by our navy. The surrender being again demanded on July 4, negotiations were renewed. No engagement, however, took place until July 10, when at 4 p. m. the Spaniards opened fire, which was soon silenced.

On the morning of the next day the bombardment was renewed, and continued until 2 p. m., when upon another demand for the surrender of the enemy the firing ceased and was not again renewed.

Major-General Miles arrived off Santiago July 11, and that evening communicated with General Shafter by telephone, and on the 12th arrived at General Shafter's headquarters. July 13 and 14 he, with General Shafter, met the Spanish commander under flag of truce between the lines, to discuss the surrender of the Spanish forces. On the afternoon of July 14 General Miles left General Shafter's headquarters and soon thereafter went on board ship, preparatory to sailing for Porto Rico. July 17 the Spanish Commander, General Toral, surrendered the city, including the troops in Santiago and the surrendered district (over 23,000 men) upon our terms, and at noon of that date the American flag was, by order of General Shafter, hoisted over the governor's palace.

Casualties: Twenty-three officers and 237 enlisted men killed; 99 officers and 1,332 enlisted men wounded. Some criticism having been made that there was a lack of surgeons present, it should be stated that there were 74 surgeons in attendance at time of battle, and 70 joined immediately afterwards, and that of 1,431 wounded but 13 died from wounds.

The shipment of the Spanish prisoners to Spain, under the agreement, commenced August 9 and ended September 17. Total number of people shipped was 22,864.

August 4 General Shafter received orders to embark his command for Montauk Point, N. Y. The movement continued until August 25, when he sailed with the last of his troops, except a few left in hospital sick, turning over the command of the department to Major-General Lawton.

PHILIPPINES CAMPAIGN.

The movement of Major-General Merritt's command to the Philippines commenced May 25, the first expedition arriving off Manila June 30. Other troops arrived July 17, 25, 31, August 21, 24, and 31.

General Merritt arrived off Manila July 25, and immediately visited the troops in camp which had preceded him under command of Brigadier-General Anderson. Preparations were at once commenced to attack the enemy holding the city.

On July 31 the Spaniards made a sharp attack on our forces on the *Calla Real*. August 7 the Spanish commander was notified to remove

all noncombatants from Manila within forty-eight hours. On same date he replied that the Spanish were without places of refuge for the wounded and the sick women and children then lodged within the walls.

August 9 a joint demand was made for the surrender of the city, signed by General Merritt and Admiral Dewey. The Captain-General offered to consult his Government, if time were allowed in which to communicate by way of Hongkong. This was refused, on account of the time required, the urgent need of relieving our troops from the trenches, and the great exposure to unhealthy conditions in a bivouac during the rainy season.

August 12 orders were issued for the advance, and on the 13th the combined attack by the Army and Navy occurred, resulting in the capture of Manila the same day. Immediately after the surrender the Spanish colors on the sea front were hauled down and the American flag raised. The prisoners captured at Manila were nearly 13,000; also 22,000 stand of arms.

The cablegram sent August 12 to General Merritt, containing the text of the President's proclamation directing a cessation of hostilities, was not received by him until August 16.

Casualties: 17 enlisted men killed, 10 officers and 96 enlisted men wounded.

PORTO RICO CAMPAIGN.

The Major-General Commanding the Army sailed from Charleston, S. C., July 9, arriving off Santiago July 11. The same day he went on shore, communicated with General Shafter, and arrived at the latter's headquarters on the following day, July 12. On July 14 General Miles returned to Siboney, moved all the troops then on transports to Guantanamo, about 40 miles east of Santiago, where he organized his expedition, and sailed for Porto Rico July 21, landing at Guanica July 25. Other troops under command of Major-General Brooke arrived at Guanica July 27; at Guayama, July 31; at Ponce, August 2; at Arroyo, August 3; and at Ponce, August 16.

July 25, after a short skirmish, the Spanish troops were driven from Guanica, and the American flag was raised on the island. July 26, in an engagement at Yauco, the enemy was defeated. July 27 the navy entered the harbor of Ponce, and the next day the army took possession of the city, the troops being pushed well forward on the San Juan road, whence the enemy had withdrawn.

August 5 the troops under General Brooke had an engagement with the enemy at Guayama, which was finally occupied by our forces. August 8 there was an action near Guayama, the Spanish being driven in the direction of Cayey. August 9 troops advanced from Yauco, occupying, successively, Sabana Grande, San German, Lares, and Arecibo, entering Mayaguez, after an engagement August 10 near Hormigueros. At Coamo an engagement took place August 9, the enemy being defeated and 167 prisoners taken. At Asomanto, August 12, the enemy's position was shelled, and on August 13, the command being ready to move forward, orders were received suspending hostilities.

Prior to the signing of the protocol on the 12th of August, the forces under General Miles in Porto Rico had participated in six engagements, and had occupied a large portion of the island.

The loss of the enemy was reported to be much greater than our own, which was 3 enlisted men killed and 4 officers and 36 enlisted men wounded.

August 30 General Miles sailed for the United States, turning over the command of the troops in Porto Rico to Major-General Brooke. The final evacuation of Porto Rico by the Spanish troops occurred October 18, and on that date the American flag was hoisted over the public buildings and forts at San Juan.

HAWAIIAN ISLANDS.

July 7 Congress ratified the cession of the Hawaiian Islands to the United States. Troops sailed for Honolulu July 29. August 17 our flag was raised over the islands.

MUSTER OUT OF VOLUNTEERS.

August 18 an order was issued to muster out 100,000 volunteers, which is being carried out.

Thus an army of about 250,000 volunteers and recruits for the regulars was called into existence from civil life, which, with the Regular Army, made a total force of 274,717 men. It was organized, armed, and equipped (no supplies being on hand other than those for the regulars, save Springfield muskets), and 50,000 men of this force were transported by land and sea to battlefields in the tropics 12,000 miles apart, where they won their victories without a single defeat, and all within the period of one hundred and thirteen days from the declaration of war to the signing of the protocol.

This great achievement can be credited to no individual; it belongs to the nation. It was accomplished through the intelligence and patriotism of all who served, from the commander in chief to the private in the ranks. It also speaks volumes for the prompt, patriotic, and intelligent assistance of the people who furnished in so short a period the supplies necessary to prepare this great army for the field. To the heroic men who served in distant lands the country will ever offer a true meed of praise; but the mighty army in camp, ready and eager to take the field, should also be given equal credit. It was their presence, ready at an hour's notice for any emergency, that overawed the enemy and proved to him that further resistance would be in vain.

DEATHS IN THE ARMY.

The deaths in the Army from May 1 to October 1, including killed, died of wounds and of disease, were 2,910, the smallest death rate recorded of any army in history, a most gratifying fact when it is considered that over 50,000 of our troops, born and reared in the temperate zone, were campaigning in tropical climates, subject to rain and heat almost unprecedented.

FURLONGHS.

The volunteers mustered out were granted one and two months' furlough before discharge and final payment. In the summer months this was an indulgence. To do so in winter months would, in many of the States, be a hardship. In order that all may be dealt with alike, it is recommended that the officers and men of the volunteer troops yet to be mustered out be given two months' pay at the time of discharge. This would admit of their prompt discharge in their present camps in the South.

INCREASE OF THE PERMANENT ESTABLISHMENT.

In view of the needs of a military force in the islands occupied by the United States it is earnestly recommended that the Regular Army be permanently increased to 100,000 men and the requisite officers; that a portion of this Army be recruited from the inhabitants of those islands, to be mustered into the service of the United States, and commanded by officers of our Army, discretion, however, to be given the President to make appointments of officers from the force so recruited.

These men are acclimated, understand the language and habits of their countrymen, and their enlistment will not only give them employment but also have a tendency to enable the Government to get into closer touch with their people than it would otherwise be able to do. This would also relieve our own people from serving in those climates to a large extent, and would, moreover, enable the volunteers to be mustered out of the service and return to the avocations of civil life.

The distinction between the regular and the volunteer is very sharply drawn. The regular enters the service because he prefers the life of a soldier. Not so the volunteer. He enlists for an active campaign, when that is over and the enemy has laid down its arms, at once desires to return to civil life.

CONSTABULARY FORCE.

In the cities of Cuba, Porto Rico, and the Philippines there should also be employed and sworn into the service of the United States a constabulary force for police duty—men who have had experience and who can speak the languages of those islands, thus relieving our soldiers from that work.

SUPPLIES FOR THE CUBANS.

Under an act entitled "An act to provide assistance to the inhabitants of Cuba, and arms, munitions, and military stores to the people of the Island of Cuba, and for other purposes," approved May 18, 1898, large quantities of subsistence stores, ordnance and ordnance stores, medicines and medical supplies, and engineer property, as contemplated by the above act, were sent to the Island of Cuba under the direction of the Major-General Commanding the Army.

A full and detailed report is now in course of preparation by the Assistant Secretary of War, and will be made the subject of a future communication to Congress.

RELIEF OF THE DESTITUTE.

To supply food for the destitute, especially in Cuba, is a question that must tax this Government greatly, for a time at least. It is a question of humanity to which we can not turn a deaf ear. Employment is essential to contentment; idleness breeds indolence. The effort should be made to aid those people by giving them work, so

they may feel that they are earning their own bread instead of living upon charity.

Would it not be wise economy for the Government of the United States to construct a substantial railroad, practically the whole length of the Island of Cuba, with branch roads to the leading cities on the coast? Such a road would, of course, cost a large sum, perhaps \$20,000,000; but it would give employment to the people of Cuba, teach them habits of industry, be an inducement for them to cultivate their farms, and thus furnish supplies for the laborers and for market when the road is constructed. This, in my judgment, is absolutely essential to the pacification and development of that great island. It will bring its minerals, lumber, and agricultural products to market and open up communication with all parts of the island with the least possible delay. The road would be a good property, and when it had served its purpose for the Government could be sold for its cost. If such an improvement is not made, the Government will no doubt expend fully that amount in charity.

Even if this road be built, there is immediate necessity for a large appropriation to relieve the destitute. Many of the Cubans have no means of support, no homes, little clothing, no animals or farming tools, and no seed for planting.

SANITATION.

The question of sanitation of the cities of Cuba and Porto Rico should have immediate and careful attention, not only for the benefit of the people of the islands, but also to stamp out the scourge of yellow fever which is yearly brought to this country. A sufficient part of the customs duties and other taxes collected in those islands should be expended for this work.

ALASKA.

Military exploring parties have been in the field during the past season and their reports will be transmitted to Congress as soon as received. That country is a vast one and the developments that are constantly being made show that it has great possibilities in store for it. Its mining industries will in the near future call to that Territory a large number of people, and those who go there will need some power to control and to protect them. The Department

has endeavored to meet this need by stationing troops at St. Michaels and also at several points along the Yukon.

Troops were sent there in September, 1897. Some of them were relieved this year and others sent in their places with ample supplies for them until the opening of navigation in 1899, and there has also been shipped quite a large amount of extra supplies for emergencies. The force now stationed in Alaska consists of two companies and a detachment of infantry and one battery of artillery. A sufficient force should be stationed there to guard our interests and to encourage investors to go to that country, and thus aid in its development.

On December 18, 1897, \$200,000 were appropriated by Congress and placed in the hands of the Secretary of War for the relief of people in the Yukon River country or other mining regions of Alaska. Thousands of people and nearly, if not all, boards of trade on the Pacific coast were very strong in their demands for immediate relief to be sent there, as it was believed many thousands were starving.

Reindeer were purchased abroad and shipped to Dyea; supplies were sent there, and arrangements made by various modes of conveyance for getting these supplies to Dawson City and the Yukon country. As reports subsequently received showed that the suffering was not of such a character as had been represented, the expedition was abandoned, most of the reindeer were turned over to the Interior Department, and the supplies sold as provided by the act making the appropriation. The amount expended was \$142,665.73.

A portion of the balance of the appropriation will probably be needed to meet outstanding indebtedness and claims not yet adjusted.

A report in detail will be submitted to Congress as required by the act making the appropriation.

STATUES.

GENERAL GRANT.

In my last annual report the recommendation of my predecessor for the erection of a statue to General Grant was renewed. This can not be too strongly urged, and it is therefore again recommended that provision be made for a suitable monument, which shall be a fitting tribute to the memory of that distinguished soldier.

GENERAL SHERMAN.

A temporary wooden building as a studio for the sculptor has been erected in the northeast corner of the public grounds south of the Treasury Department near the site selected for the statue. The foundation for the pedestal and statue is now being constructed.

GENERAL SHERIDAN.

The statue is to be erected in the plat of ground at the intersection of Pennsylvania avenue and E street NW. The contract for the statue has been let to Mr. J. Q. A. Ward, of New York City, by the committee of the Society of the Army of the Cumberland.

GENERAL LOGAN.

The polished granite base for the pedestal of the statue was erected in September, 1897, in Iowa Circle, upon the foundation constructed, and the bronze pedestal has been received and placed in position upon the base, in readiness to receive the statue when completed. The contract required the statue to be completed in its entirety by December, 1898, but owing to certain changes in the pedestal and the enlargement of the historical figures thereon it was found impossible to complete the statue within the time specified, and upon the recommendation of the Chief of Engineers an extension of one year has been granted the contractor.

CLERICAL FORCE.

The clerical force of the Department was reduced 28 per cent in 1894. This reduction was made at the time the business of the country was very much prostrated. As soon as business revived the force was found inadequate, and when the war commenced it was sadly lacking. An increase was immediately needed, and funds for the purpose were allotted from the \$50,000,000 appropriated for the national defense, supplemented by deficiency appropriations.

CHIEF CLERK.

The chief clerk has served for thirty-four years in the Department and in his present capacity for sixteen years, upon a salary not at all commensurate with his ability and far below what he has fairly earned. I earnestly recommend again that he be commissioned a lieutenant-colonel in the Army, as provided in H. R. 10608, Fifty-fifth.

Congress, second session, which, while it will not increase his pay very materially, will insure to him a comfortable living when, several years hence, he shall have passed the age at which army officers are retired. He has worthily earned this recognition and should receive it for his services in this Department, where in addition to his other duties he has often acted for the Secretary of War, under the act of March 4, 1874 (18 Stat., 19), and for his services in the Army, for which he received a Congressional medal of honor.

SECOND ASSISTANT SECRETARY OF WAR.

Legislation to authorize the appointment of a Second Assistant Secretary of War is again urged.

RECOMMENDATIONS RENEWED.

In addition to those renewed in the body of the report, the following recommendations in the last annual report are again made:

That the law which authorizes the detail of officers to colleges *having a capacity to educate* 150 pupils at one time be amended to authorize the detail at such colleges as have not less than 150 pupils *actually present* for instruction.

That an appropriation be made for the construction of the ship canal to connect Lakes Union and Washington with Puget Sound.

That an annual appropriation of \$150 be made for the purpose of cleaning and preserving the public monuments in the District of Columbia under the control of this Department.

COMMENDATION.

I can not in words express my appreciation for their services, nor can the country overestimate the work of the heads of the several bureaus since war was declared. They knew no hours except all hours, nor days except every day in the week. The Assistant Secretary of War, at his post, day and night, has shared the burden in a very able and conscientious manner; and the clerks of the Department have been untiring and efficient in their efforts to carry their full share of the work. All have been ceaseless in their toil, able and patriotic in their labors, and for it they should receive the grateful thanks of the nation.

EXPENDITURES, APPROPRIATIONS, AND ESTIMATES.

The ordinary expenditures for the fiscal year ended June 30, 1898, the ordinary appropriations for the present fiscal year, and the estimates of amounts required for the fiscal year ending June 30, 1900, are as follows:

General object.	Expenditures from ordinary appropriations for the fiscal year ended June 30, 1898.	Ordinary appropriations for the fiscal year ending June 30, 1899.	Estimates of all amounts required for the fiscal year ending June 30, 1900.
Salaries and contingent expenses	\$1, 449, 035. 40	\$1, 438, 626. 00	\$2, 193, 656. 00
Pay, etc., of the Army.....	14, 488, 336. 28	14, 106, 665. 20	55, 480, 909. 22
Subsistence of the Army.....	1, 574, 276. 80	1, 550, 000. 00	17, 682, 437. 50
Regular supplies, Quartermaster's Department.....	2, 003, 389. 37	1, 800, 000. 00	14, 000, 000. 00
Incidental expenses, Quartermaster's Department...	621, 755. 99	600, 000. 00	3, 900, 000. 00
Barracks and quarters and hospital construction....	858, 979. 34	847, 000. 00	2, 670, 000. 00
Shooting ranges and contingent expenses of the Army.	85, 104. 30	33, 390. 00	469, 890. 00
Cavalry and artillery horses.....	129, 775. 60	130, 000. 00	845, 000. 00
Army transportation	2, 711, 984. 78	2, 300, 000. 00	29, 813, 675. 00
Clothing, etc.....	1, 277, 228. 82	975, 000. 00	14, 744, 431. 00
Medical Department.....	144, 791. 86	130, 000. 00	2, 115, 200. 00
Ordnance Department.....	1, 708, 915. 54	1, 150, 000. 00	2, 940, 100. 00
Fortifications and sea-coast defenses	8, 713, 880. 92	9, 377, 494. 00	12, 151, 898. 00
Arsenals, etc.....	263, 082. 67	324, 225. 00	552, 547. 00
Military Academy	562, 346. 24	458, 689. 23	681, 866. 99
Rivers and harbors	21, 096, 053. 45	14, 854, 459. 56	28, 523, 778. 00
Parks, cemeteries, military posts, etc.....	806, 811. 24	1, 195, 134. 75	1, 467, 744. 00
National Soldiers' Homes	2, 999, 582. 86	3, 666, 021. 00	3, 974, 544. 00
Artificial limbs, appliances, etc	184, 844. 81	127, 575. 00	555, 275. 00
Buildings and grounds in and around Washington...	118, 863. 78	127, 076. 00	127, 126. 00
Miscellaneous items.....	790, 745. 06	460, 680. 00	410, 600. 00
Total.....	62, 534, 784. 61	55, 652, 035. 74	195, 250, 377. 71

Expenditures from permanent annual appropriations and appropriations for war claims are not included in the above statement, but are shown in the appendix to this report.

The expenditures prior to July 1, 1898, the appropriations for the six months ending December 31, 1898, and the estimates for the six months ending June 30, 1899, covering the extraordinary appropriations made necessary by the war with Spain, are as follows:

General object.	Expenditures from extraordinary war appropriations prior to July 1, 1898.	Extraordinary war appropriations made available until Jan. 1, 1899.	Estimates of extraordinary appropriations required for the six months ending June 30, 1899.
Salaries and contingent expenses	\$25, 000. 00	\$312, 000. 00	\$320, 000. 00
Pay, etc., of the Army.....	6, 225, 000. 00	50, 380, 199. 39	18, 823, 475. 84
Subsistence of the Army.....	4, 848, 164. 56	23, 100, 755. 78	11, 876, 025. 00

a \$2,250,000 of the appropriation for barracks and quarters was made available by Congress until June 30, 1899.

There has been allotted to the War Department from the \$50,000,000 national defense fund the sum of \$18,794,627.68 for the purposes indicated in the following tabulated statement:

Condition of the special emergency appropriation for national defense (war) under the War Department.

Allotments.	Amounts allotted to Nov. 22, 1898.	Balances available Nov. 23, 1898.

EXPEDITIONARY FORCE TO CUBA.

The appropriation for the expeditionary force to Cuba was expended under the direction of the Major-General Commanding the Army. His report on the subject follows:

HEADQUARTERS OF THE ARMY, *Washington, D. C., November 25, 1898.*

SIR: In compliance with your directions, received through the Assistant Secretary of War, I have the honor to submit, herewith, a statement relative to the appropriation for the "Expeditionary force to Cuba."

This appropriation was made in two acts; the first, that approved May 4, 1898, appropriated \$150,034, "to be available until expended." The second, that approved June 8, 1898, appropriated \$350,000, to be "available for payment of liabilities which may be incurred to and including December 31, 1898." Both were "to be expended under the direction of the Major-General Commanding the Army."

The expenditures from this appropriation were made in preparing for and in the execution of the operations of the army in Cuba and Porto Rico.

On October 31 there remained on hand \$344,000 of the total appropriation of \$500,034. About \$60,000 (estimated) of this amount will be required to make the final settlement of outstanding indebtedness. The balance remaining will then be returned to the Treasury.

Very respectfully,

NELSON A. MILES,
Major-General Commanding.

Hon. RUSSELL A. ALGER
Secretary of War, Washington, D. C.

REPORT OF THE MAJOR-GENERAL COMMANDING THE ARMY.

HEADQUARTERS OF THE ARMY, *Washington, D. C., November 5, 1898.*

SIR: I have the honor to submit herewith the reports of Maj. Gen. Wesley Merritt, commanding Philippine expedition; Maj. Gen. John R. Brooke (operations in Porto Rico); Maj. Gen. William R. Shafter, U. S. V. (operations at Santiago de Cuba); Maj.

Gen. H. C. Merriam, U. S. V., commanding Departments of California and the Columbia; Brig. Gen. A. C. M. Pennington, U. S. V., commanding Department of the Gulf; Brig. Gen. J. M. Bacon, U. S. V., commanding Departments of Dakota and the Lakes; Brig. Gen. E. V. Sumner, U. S. V., commanding Departments of the Colorado and the Missouri; Brig. Gen. G. L. Gillespie, U. S. V., commanding Department of the East; also reports of the Adjutant-General, United States Army; the Inspector-General, United States Army; the commandant of the Artillery School, Fort Monroe, Va.; the commandant of the United States Infantry and Cavalry School, Fort Leavenworth, Kans., and the commandant of the Cavalry and Light Artillery School, Fort Riley, Kans.

The following reports of corps commanders Maj. Gen. John J. Coppinger, commanding Fourth Army Corps; Maj. Gen. Fitzhugh Lee, commanding Seventh Army Corps; and Brig. Gen. R. T. Frank, commanding Third Army Corps (the only ones received up to the present date) are also submitted.

The reports of operations of the following general officers who served in Porto Rico are also submitted: Maj. Gen. J. H. Wilson, U. S. V.; Brig. Gen. G. V. Henry, U. S. V.; Brig. Gen. Theodore Schwan, U. S. V., and Brig. Gen. G. A. Garretson, U. S. V.

The military operations during the year have been extraordinary, unusual, and extensive.

Early in the fiscal year troops were engaged in transporting supplies to citizens in Alaska, and since then in exploring expeditions through that extensive Territory. These expeditions have been under the direction of Lieut. Col. G. M. Randall, Eighth Infantry (now brigadier-general, United States Volunteers); Capt. P. H. Ray, Eighth Infantry (now colonel Third United States Volunteer Infantry); Capt. W. R. Abercrombie, Second Infantry; Capt. E. F. Glenn, Twenty-fifth Infantry, and Capt. W. P. Richardson, Eighth Infantry, and are still under the direction of Captains Abercrombie and Richardson.

Information recently received from one of the most intelligent frontiersmen and explorers in our service, Mr. Luther S. Kelly, who has been with Captain Glenn's command, indicates that they have successfully explored the country and discovered a route from Portago Bay to the Kaik River, which, connecting with Lieutenant Castner's trail up the Matanuska River, insures a practicable route entirely through our own territory to the Tanana River. A good pack trail or wagon road can be built from Portago Bay to the Kaik, and would be of great service to the enterprising and venturesome prospectors and miners who occupy that region.

THE WAR WITH SPAIN.

At the close of the great civil war the Government had a million veterans in arms, well equipped for war for that time. The great amount of war material then in the possession of the Government was sold or gradually used up by issue either to the militia of the States or to the regular forces that have been engaged in military operations on the frontier for the last thirty years. The supplies and materials that were not sold, but stored, were gradually reduced to the minimum, and the war with Spain found this country with a very small army—25,000 men—with war material sufficient only to equip that force and furnish it with a small amount of ammunition; but the tentage, transportation, and camp equipage was insufficient for any

important military operations; in fact, quite an amount of valuable transportation, including ambulances, had been disposed of within the last few years.

Prior to the passage of the joint resolution of Congress approved April 20, 1898, demanding that the Government of Spain relinquish its authority and government in the Island of Cuba, etc., Congress had appropriated \$50,000,000 for the national defense, and in the interim between this time and actual hostilities efforts were made to have furnished material for military operations on a more extensive scale than had been done in former years. This action of Congress was very important, as that time was most opportune and favorable for securing such munitions of war as were absolutely essential to the proper equipping of an army and to the securing of articles not in demand or available in this country at that time, but which are used in modern warfare; and the purchase of smokeless powder, rapid-fire and machine guns, modern rifles, etc., was urged at that time.

Several bills were pending in Congress during the winter of 1897-98 providing for the increase of the Regular Army, which finally resulted in the act approved April 26, 1898, authorizing an increase in the enlisted strength of the Army to 62,597 men. Congress subsequently authorized the enlistment of 10,000 men "possessing immunity from diseases incident to tropical climates."

On April 9 I recommended the equipment of 50,000 volunteers, and also on April 15 recommended that an additional auxiliary force of 40,000 men be provided for the protection of the coasts and as a reserve. This, with the increase of the Regular Army and the 10,000 "immunes," would have given us an effective force of 162,597, which, with an auxiliary force of 50,000 natives, I considered sufficient, and deemed it of the first importance to well equip such force rather than to partly equip a much larger number.

The following are copies of the two letters above referred to:

HEADQUARTERS OF THE ARMY,
Washington, D. C., April 9, 1898.

SIR: Under the Constitution every able-bodied citizen between the ages of 18 and 45 is amenable to service in the militia of the United States, and liable to be called into service by the President of the United States in time of war, numbering approximately twelve millions of men capable of bearing arms.

Under the provisions of the bill now pending in Congress it is expected that authority will be granted to recruit the infantry companies to 100 men each, and I presume the same rule will be applied to the cavalry and artillery. I therefore recommend that in case of war the batteries of heavy artillery be recruited to their full strength, namely, 100 men to each battery, in order to man the guns for the defense of the coast.

I also recommend that at least 22 regiments of infantry, 5 regiments of cavalry, and the light artillery be mobilized, and placed in one large camp where they can be carefully and thoroughly inspected, fully equipped, drilled, disciplined, and instructed in brigades and divisions, and prepared for war service. This will give approximately a force of 30,000 men.

I further recommend that the President call for a volunteer force from the different States and Territories of at least 50,000 men in addition to the above force, to constitute one army for any offensive movements against the Spanish army in Cuba, estimated at 150,000 men, of which number 80,000 are reported as effective for military service. The entire force should be fully equipped with mountain, field, and siege artillery, and all the appliances and equipments required for actual war service.

In addition to this force, the State troops along the Atlantic, Gulf, and Pacific coasts will be available for any emergency that might arise or threatened attacks upon the towns, villages, or cities that are exposed, or for concentration of the large force that may be required in the future.

Very respectfully,

NELSON A. MILES,
Major-General, Commanding.

The SECRETARY OF WAR.

HEADQUARTERS OF THE ARMY,
Washington, D. C., April 15, 1898.

SIR: Referring to my letter of April 9, I have the honor to submit the following: That in my judgment the available force of the Regular Army should be mobilized in the best and most available healthful position in the Department of the Gulf. I suggest Chickamauga Park, on account of its altitude and advantages for preparing a command for the serious requirements of actual warfare.

The history of the expedition to the Crimea and to Egypt indicate the necessity of complete and perfect equipment of each military organization, and the Army should be thoroughly and effectively organized in every department—infantry, artillery, cavalry, Engineer Corps, Signal Corps, construction train for building wharves, piers, etc., and repairing railway tracks and bridges, corduroying roads, etc., pontoon trains and appliances for depot and reserve trains—in order that upon landing on foreign soil every company, battery, regiment, brigade, and division shall be in perfect condition, fully supplied and equipped to render effective service. Hence the regiments of infantry, cavalry, and light batteries of artillery should be fully supplied with tentage, camp equipage, arms, ammunition, intrenching tools, and transportation, with medical supplies, and rations and food for men and animals for at least six months. The command should also be supplied with field artillery, siege guns, howitzers, and mortars for offensive work against any fieldworks or fortifications of the enemy, or for the protection of camps and depots that might be established.

The amount of ammunition per gun should be 500 rounds.

The amount of small-arms ammunition should be 1,000 rounds per man.

The regulation amount of tentage and transportation: Two wagons per company of infantry; 3 wagons per troop and battery of cavalry and artillery; 12 pack mules per company of infantry; 14 pack mules per troop and battery of cavalry and artillery.

Arms and ammunition and fatigue uniforms should be furnished for 50,000 natives, that should be organized into an auxiliary force.

For the support of the batteries manning the coast defenses along the Atlantic and Gulf coasts, and for the purpose of repelling any landing force or threatened danger to the port cities and towns, there should be at least a force of 40,000 men suitably equipped for that purpose.

The equipment of the 50,000 volunteers, in addition to the regular force, should be in my judgment on the same basis and the same allowances.

Very respectfully,

NELSON A. MILES,
Major-General, Commanding.

The SECRETARY OF WAR.

At the commencement of the war the problem was largely a naval one, and until the question of superiority between our Navy and the Spanish navy, or such naval forces as might be furnished by any other European power or combination of powers supporting the Spanish Government, was determined, military operations had to be determined by the success or failure of our naval forces. I was fully convinced that should our Navy prove superior the position of the Spanish army in Cuba would be rendered untenable with a minimum loss of life and treasure to the United States. There were two most serious obstacles to be avoided—one was placing an army on the Island of Cuba before our Navy controlled the Cuban waters; and the other was putting an army on the island at a time when a large number of the men must die from the diseases that have prevailed in that country, according to all statistics, for the last one hundred years. For the latter reason I addressed a letter to the Secretary of War, under date of April 18, 1898, forwarding a communication from Surgeon-General Sternberg regarding the danger of putting an army in Cuba during the sickly season, and at the same time urged the plan of harassing the Spanish forces and doing the enemy the largest amount of injury during the time necessary for our Navy to demonstrate its superiority—the rainy or sickly season and the time actually required to equip and instruct the volunteer forces with the least possible loss to ourselves. In that letter I also asserted the

belief I have entertained from the first, *that we could secure the surrender of the Spanish army in the Island of Cuba without any great sacrifice of life.*

The following is a copy of the letter referred to:

HEADQUARTERS OF THE ARMY,
Washington, D. C., April 18, 1898.

SIR: Referring to my former letters concerning healthful camps for the troops and the uncertainty of Congress requiring an army to move to Cuba at this season of the year, I would respectfully call attention to the letter of the Surgeon-General of the Army, dated Washington, March 25, of this year, as to the danger of putting an army in Cuba during what is known as the "rainy" or "sickly" season. That opinion is also confirmed by reports of Dr. James Guiteras, of Philadelphia, a well-known authority on yellow fever, and others.

In my opinion it is extremely hazardous, and I think it would be injudicious, to put an army on that island at this season of the year, as it would undoubtedly be decimated by the deadly disease, to say nothing of having to cope with some 80,000 troops, the remnant of 214,000, that have become acclimated, and that are equipped with 183 guns. And still another element of extreme danger would be to place an army there with the possibility of our own Navy not being able to keep the waters between our own territory and that island clear of hostile ships or fleets.

By mobilizing our force and putting it in healthful camps and using such force as might be necessary to harass the enemy and doing them the greatest injury with the least possible loss to ourselves, if our Navy is superior to theirs, in my judgment, we can compel the surrender of the army on the island of Cuba with very little loss of life and possibly avoid the spread of yellow fever over our own country.

There is still time, if this is favorably considered, to put a small force of regular troops, number approximately 18,000 men, in healthful camps until such time as they can be used on the Island of Cuba with safety.

Very respectfully,

NELSON A. MILES,
Major-General, Commanding.

The SECRETARY OF WAR.

In order that the volunteers should as speedily and efficiently as possible soon after the first call for volunteers was made, and that their wants and necessities might be anticipated, the following letter was addressed to the honorable Secretary of War:

HEADQUARTERS OF THE ARMY,
Washington, D. C., April 26, 1898.

SIR: I regard it of the highest importance that the troops called into service by the President's proclamation be thoroughly equipped, organized, and disciplined for field service. In order that this may be done with the least delay, they ought to be in camp approximately sixty days in their States, as so many of the States have made no provision for their State militia, and not one is fully equipped for field service. After being assembled, organized, and sworn into service of the United States, they will require uniforms, tentage, complete camp equipage, arms, and ammunition, and a full supply of stationery, including blank books and reports for the quartermaster's, commissary, medical, and ordnance departments. They will also require complete equipment of ordnance, quartermaster's, commissary, and medical supplies, hospital appliances, transportation, including ambulances, stretchers, etc. The officers and noncommissioned officers will have to be appointed and properly instructed in their duties and responsibilities, and have some instruction in tactical exercises, guard duties, etc., all of which is of the highest importance to the efficiency and health of the command. This preliminary work should be done before the troops leave their States. While this is being done, the general officers and staff officers can be appointed and properly instructed, large camps of instruction can be judiciously selected, ground rented, and stores collected. At the end of sixty days the regiments, batteries, and troops can be brigaded and formed into divisions and corps, and proper commanding generals assigned, and this great force may be properly equipped, molded, and organized into an effective army with the least possible delay.

Very respectfully,

NELSON A. MILES,
Major-General, Commanding.

The SECRETARY OF WAR.

Congregating tens of thousands of men, many of whom were not uniformed, and scarcely any properly equipped, in great camps away from their States, rendered it difficult for them to be properly supplied with food, cooking utensils, camp equipage, blankets, tentage, medical supplies, transportation, etc., and was to a great extent the cause, in my judgment, of the debilitating effect upon the health and strength of the men, who were otherwise in good physical condition. The material necessary to clothe and equip large armies was not even manufactured at that time, and the consequent condition of the troops for weeks and months was injurious to the commands in many ways.

There being a lack of uniformity in the amount of clothing furnished by the States and applied for by the different commands, the following general orders were issued:

GENERAL ORDERS, }
No. 54. }

HEADQUARTERS OF THE ARMY,
ADJUTANT-GENERAL'S OFFICE,
Washington, May 25, 1898.

The following standard of supplies and equipment for field service is published for the information and guidance of troops in the military service of the United States. The allowance is regarded as the minimum for field service:

Headquarters of an army corps.—Three wagons for baggage, etc., or 8 pack mules; 1 two-horse wagon; 1 two-horse spring wagon; 10 extra saddle horses for contingent wants; 2 wall tents for commanding general; 1 wall tent for every two officers of his staff.

Headquarters of a division.—Two wagons for baggage, etc., or 5 pack mules; 1 two-horse spring wagon; 1 two-horse wagon; 5 extra saddle horses for contingent wants; 1 wall tent for commanding general; 1 wall tent for every two officers of his staff.

Headquarters of a brigade.—One wagon for baggage, or 5 pack mules; 1 two-horse spring wagon; 2 extra saddle horses for contingent wants; 1 wall tent for the commanding general; 1 wall tent for every two officers of his staff.

Allowance of transportation for regiment of cavalry, 49 wagons or 144 pack animals.

Allowance of transportation for battery light artillery, 4 wagons.

Allowance of transportation for regiment of infantry, 25 wagons.

Supplies to be carried in wagons per company: Ten days' field rations per man; 100 rounds of ammunition per soldier; 250 pounds of officers' baggage and supplies; tentage; grain for animals; utensils for each company mess, not to exceed 350 pounds for each troop, battery, or company; horseshoes, nails, tools, and medicines for cavalry horses, not to exceed 300 pounds; to each soldier or civilian employee (compactly rolled in one piece of shelter tent), 1 blanket, 1 poncho, and 1 extra suit of undergarments.

Whenever the amount of rations or grain varies from the above, the weight to be carried per 6-mule wagon may be increased or diminished, but should not exceed 4,000 pounds, and for 4-mule wagon 3,000 pounds, and if possible should be less per wagon.

Whenever obtainable on line of march, full forage will be allowed all animals, the rate of purchase to be regulated by the quartermaster's department.

To be carried on the person or horse: One overcoat, 1 piece of shelter tent, 50 rounds of rifle or carbine, and 24 rounds of revolver ammunition.

Supplies to be carried on pack mules for one troop of cavalry: Five days' field rations per man; 100 rounds of ammunition per soldier.

The utensils for each troop of cavalry must not exceed 350 pounds.

The weight of load per aparejo must never exceed 250 pounds, and should, if possible, be less than 200 pounds.

Troop of cavalry, company of infantry, or light battery.

	Troop of cavalry.	Company of infantry.	Light battery.
	<i>Pounds.</i>	<i>Pounds.</i>	<i>Pounds.</i>
Field rations, 10 days: Cavalry, 100 men; infantry, 106; artillery, 125 ..	3, 640	3, 858	4, 550
Ammunition, 100 rounds: Cavalry, 100 men; infantry, 106 men.....	725	769
Officers' baggage and supplies	250	250	250
Tentage (7 conical wall for cavalry and infantry, each; 9 for light battery)	854	854	1, 098
Grain for animals, 10 days, 6 pounds: Cavalry, 115; infantry, 12; artillery, 126	6, 900	720	7, 560
Utensils for each company mess	350	350	350
Horseshoes, nails, tools, and medicines for cavalry and artillery horses..	300	325
Soldiers' baggage: Each 1 blanket, 1 poncho, 1 extra suit of undergarments, and 1 piece shelter tent	1, 662	1, 761	2, 078
Total.....	14, 681	8, 562	16, 211

By command of Major-General Miles:

H. C. CORBIN, *Adjutant-General.*

The publication of the above order was delayed from May 16 to May 25, 1898; and the order specifying the allowance of wheel transportation, tentage, etc., for the Medical Department of the Army, including ambulances, stretchers, litter bearers, etc., was not published until June 22, 1898.

The regular infantry was ordered, April 15, 1898, to New Orleans, Mobile, and Tampa, preparatory to an immediate movement to Cuba should war be declared. This order, however, was partially suspended, and a part of the regular infantry, with the artillery and cavalry, ordered to camp at Chickamauga Park. On May 10 the regular artillery and cavalry were ordered from Chickamauga to Tampa, preparatory to a movement on Cuba. Later 70,000 men were ordered to move on Cuba, and commissary stores for ninety days for the men and thirty days' stores for the animals were ordered to be concentrated at Tampa. None of these movements on Cuba, however, materialized. The want of proper equipment and ammunition rendered the movement impracticable.

While troops were being assembled at Tampa, Mobile, New Orleans, Chickamauga, Washington, and in the different States, an expedition to the Philippine Islands was gathered at San Francisco under the command of Maj. Gen. Wesley Merritt. The command was well organized and as well supplied as it was possible with the means available. The expedition sailed May 25, 1898, and was well conducted and eminently successful in every way. Full reports have been submitted by General Merritt and his subordinate officers.

As soon as hostilities were commenced expeditions were immediately organized to give aid and support to the Cubans in the way of supplying them with arms, munitions of war, and supplies, wherever and whenever possible.

A short time before the commencement of the war, there left Washington, from the Bureau of Military Information, two officers, Lieut. A. S. Rowan and Lieut. H. H. Whitney, to attempt the most difficult and dangerous enterprise of ascertaining existing conditions in the Islands of Cuba and Porto Rico, respectively. Their efforts were eminently successful. Both of these officers penetrated the enemy's

country and obtained most accurate and valuable information regarding the position of the military and naval forces, the defenses, and the topographical and climatic features of the country, all of which was of great value in subsequent military operations. Lieutenant Rowan left the United States on April 9 and landed April 24 at El Portillo, about 70 miles west of Santiago de Cuba. He went into the interior, met General Garcia, of the Cuban army, and remained with him for a short time, then, together with Brig. Gen. Enrique Collazo and Lieut. Col. Carlos Hernandez, of General Garcia's staff, passed up to Manati on the north coast, and on May 4 went in an open boat to Nassau, New Providence, returning to the United States May 13, 1898.

Lieutenant Whitney left Key West May 5 for Porto Rico, where he arrived the 15th, and after exploring, under disguise, the southern portion of the island, left on June 1, returning to the United States June 9.

The first expedition with arms and supplies for the Cubans was started from Key West under the direction of Col. R. H. Hall, Fourth Infantry (now brigadier-general, United States Volunteers). It landed on the coast, under charge of Capt. J. J. O'Connell, First United States Infantry, Lieut. W. M. Crofton, First Infantry, being the first officer to land on Cuban soil after the commencement of hostilities.

Several expeditions were subsequently made by Col. J. H. Dorst, Lieut. C. P. Johnson, Tenth Cavalry, and others.

Also, a strong expedition was organized, consisting of 5,000 men, under the command of the senior officer then at Tampa, Maj. Gen. W. R. Shafter, the objective point being Tunas, on the south side of Cuba, where it was expected to open communication with the forces under General Gomez and support and cooperate with him in that mountain region (which is a healthful part of Cuba), and also to furnish all the supplies needed by that force. This expedition, when fully prepared, was delayed on account of the movement of Admiral Cervera's fleet from Cape Verde Islands to the waters of the West Indies, and the movement of our troops was suspended awaiting the result of the expected conflict between that fleet and our own.

An important expedition, under Lieut. Col. Dorst, U. S. V., sailed from Key West to the north of Nassau, New Providence; thence directly south, landing at the harbor of Banes, on the north coast of Cuba, which has been held during the war by the Cubans, where he remained five days, landing a steamer load of the munitions of war most needed, including 7,500 rifles, 1,000,000 cartridges, 5,000 uniforms, and other material needed by the 10,000 Cubans under General Garcia.

The following general order was issued on Memorial Day:

GENERAL ORDERS, }
No. 57. }

HEADQUARTERS OF THE ARMY,
ADJUTANT-GENERAL'S OFFICE,
Washington, May 30, 1898.

After a prolonged period of peace our Army is once more called upon to engage in war in the cause of justice and humanity. To bring the military forces to the highest state of efficiency and most speedily accomplish what is expected should be the earnest effort and call forth the best energies of all its members of whatsoever station.

The laws and regulations which govern military bodies in civilized countries have been developed to their present perfection through the experience of hundreds of years, and the faithful observance of those laws and regulations is essential to the honor and efficiency of the Army.

All authority should be exercised with firmness, equity, and decorum on the part of superiors, and should be respected by implicit obedience and loyal support from subordinates.

Every officer of whatever grade will, so far as may be in his power, guard and preserve the health and welfare of those under his charge. He must labor diligently and zealously to perfect himself and his subordinates in military drill, instruction and discipline; and, above all, he must constantly endeavor, by precept and example to maintain the highest character, to foster and stimulate that true soldierly spirit and patriotic devotion to duty which must characterize an effective army. The Major-General Commanding confidently trusts that every officer and soldier in the service of the Republic, each in his proper sphere, will contribute his most zealous efforts to the end that the honor and character of the Army may be preserved untarnished and its best efforts crowned with success.

This order is given upon a day sacred to the memory of the heroic dead, whose services and sacrifices afford us example and inspiration, and it is expected that all will be fully impressed with the sacred duty imposed upon the Army by the Government of our beloved country.

By command of Major-General Miles:

H. C. CORBIN, *Adjutant-General.*

Definite information having been received that Cervera's fleet had been inclosed in the harbor of Santiago de Cuba by the navy, orders were given to General Shafter, May 30, 1898, to place his troops on transports and go to the assistance of the navy in capturing that fleet and harbor. It was expected that the transports engaged at that time would convey some 25,000 men.

I desired to go with this command, and sent the following telegram to the honorable Secretary of War:

[Telegram.]

HEADQUARTERS OF THE ARMY,
Tampa, Fla., June 5, 1898.

The SECRETARY OF WAR, *Washington, D. C.:*

This expedition has been delayed through no fault of anyone connected with it. It contains the principal part of the Army, which, for intelligence and efficiency, is not excelled by any body of troops on earth. It contains 14 of the best conditioned regiments of volunteers, the last of which arrived this morning. Yet these have never been under fire. Between 30 and 40 per cent are undrilled, and in one regiment over 300 men had never fired a gun. I request ample protection while at sea at all times for this command from the Navy. This enterprise is so important that I desire to go with this army corps, or to immediately organize another and go with it to join this and capture position No. 2. Now that the military is about to be used, I believe that it should be continued with every energy, making the most judicious disposition of it to accomplish the desired result.

MILES,
Major-General Commanding Army.

June 6, the following telegram was received:

WASHINGTON, D. C., *June 6, 1898—2.35 p. m.*

Major-General MILES, *Tampa, Fla.:*

The President wants to know the earliest moment you can have an expeditionary force ready to go to Porto Rico large enough to take and hold island without the force under General Shafter.

R. A. ALGER, *Secretary of War;*

and reply sent that such an expedition could be ready in ten days.

It was found that many of the steamers were not suitable for transport service, they having been built entirely for freight steamers and not equipped for properly conveying troops and munitions of war. The accumulation of the large amount of supplies and war material for the 70,000 men above mentioned at Tampa had crowded that place, and, owing to the absence of depots and facilities for handling that amount of material, occasioned great delay in properly equipping the expedition intended for Santiago. It was, however, supplied, and orders (hereto attached) given for the proper embarkation of the troops, which were ready to sail June 8,

1898. The movement was, however, suspended, owing to the report received that Spanish war vessels had been seen in the Nicholas Channel. The expedition, consisting of 803 officers and 14,935 men, finally sailed on June 14, leaving some 10,000 troops that were expected to move with this expedition, but which could not do so, owing to insufficient transportation.

IN THE FIELD, TAMPA, FLA., *June 11, 1898.*

SIR: Please ascertain whether the following has been attended to in connection with your fleet of transports:

Have commanding officers required their transport officers to make a list of the contents of each ship, where stored, the bulk of such stores, and an estimate of how many wagonloads there are in each vessel? Do the commanding officers of organizations know exactly where their supplies are? Have arrangements been made in order that if so many rations of any kind, ammunition, hospital supplies, etc., should be required, that they would know at once where they can be found? Have transports been supplied with stern anchors to hold them in place and afford a lee for the landing of troops in case of necessity when sea is somewhat rough? What kind of small boats are supplied to each ship for the landing of the troops of that ship? Has a list been made of them and the total number of men they can safely land at one time? Have stores been put upon transports with a view that each organization's should be complete?

The great importance of these details can not be overestimated. In landing, stores intended for one command are liable to be sent to another, and the necessity of having stores that may be needed accessible at once is manifest.

I would suggest that thorough attention be required to every detail in order to insure perfect order in the disembarking of your command.

Respectfully, yours,

MILES,
Major-General Commanding.

Gen. WILLIAM R. SHAFTER,
Port Tampa, Fla.

The following dispatch was received June 15:

WASHINGTON, D. C., *June 15, 1898.*

Major-General MILES, *Tampa, Fla.:*

Important business requires your presence here; report at once. Answer.

R. A. ALGER, *Secretary of War.*

On June 24, 1898, I submitted a plan of campaign, as follows:

HEADQUARTERS OF THE ARMY,
Washington, D. C., June 24, 1898.

SIR: I have the honor to submit the following:

With the capture of Santiago de Cuba it is expected we will have several thousand Spanish prisoners; and with the capture of the second objective position (Porto Rico), now under consideration, it is expected we will add to the number, making, it is hoped, in the aggregate at least 30,000 prisoners.

After the capture of the position next after Santiago de Cuba, it would be, in my judgment, advisable to take some deep-water harbors on the northern coast of Cuba, which would be available, not only for our Army, but also for the Navy, as safe ports for our transports, supply ships, and naval vessels between Key West and Porto Rico. It is also important that we should select some point at which to disembark our mounted troops and light artillery, with which our Government is well supplied. We will have in a few weeks upward of 15,000 cavalry. This force, with the light artillery and a small body of infantry, will make a most formidable army corps with which to conduct a campaign in the interior of Cuba.

The most available point, it appears to me, would be the harbor of Neuvas, which has 28½ feet of water. From there the command could move to Porto Principe, one of the principal cities in the Island of Cuba. Using that as a base, it could move through the rolling country, which is reported to be free from yellow fever, to Poron and Taguayabon, and thence to Villa Clara; or, by a more southerly route, from Porto Principe to Ciego de Avilla; thence to Spiritus, and thence to Ville Clara. A road could be built at the rate of 5 miles per day as that army corps marches; also we would find two railroad bases between Porto Principe and Ville Clara.

To move mounted troops over from Florida to Cuba and make this march would undoubtedly consume the time up to nearly the 30th of September.

This army corps would also have the assistance of all the available forces of Garcia

and Gomez, and would by that time be occupying practically two-thirds of the Island of Cuba.

If no serious force was encountered, this army corps would continue its march the south side of Havana. If a large force of Spanish troops, sufficient to check the march, was moved to the vicinity of Villa Clara, then the entire army with which we purpose to invade Cuba could be moved between the forces at Villa Clara and Havana, dividing the Spanish forces and defeating them in detail.

I make this suggestion as having three advantages: First, we could employ reasonable compensation such prisoners as desired occupation in road building; second, we could move into the interior of Cuba our large cavalry command without serious molestation; third, we would be operating during the rainy or sickly season in the most healthful parts of Cuba, practically free from yellow fever, and at the same time be occupying a large portion of the enemy's territory.

If this proposition does not meet with favor, then, after the capture of Santiago de Cuba and other places to the east, we could move the entire force to the west of Havana and conduct the campaign from the deep harbors on that coast. My judgment, however, is decidedly in favor of the first plan of campaign.

Before reaching Villa Clara we would undoubtedly have upward of 50,000 prisoners, and if we could, by judicious, humane treatment, use them in a way that would be advantageous to themselves as well as to our interests, I think it would be advisable. There would be one great danger in moving them to our own territory and establishing a large camp of prisoners, and that is, that they would bring the germ of disease with them and spread them among our own people, as many Americans would have to be employed on the ships and railroads, together with the guard necessary to control them.

Very respectfully,

NELSON A. MILES,
Major-General Commanding.

The SECRETARY OF WAR.

The main features of the above plan of campaign were submitted in my letters of May 26 and 27.

The following order was received to *organize an expedition for operation against the enemy in Cuba and Porto Rico:*

WASHINGTON, D. C., June 26, 1898.

SIR: By direction of the President an expedition will be organized with the least possible delay, under the immediate command of Major-General Brooke, United States Army, consisting of three divisions taken from the troops best equipped in the First and Third Army Corps and two divisions from the Fourth Army Corps, for movement and operation against the enemy in Cuba and Porto Rico. The command under Major-General Shafter, or such part thereof as can be spared from the work now in hand, will join the foregoing expedition, and you will command the forces thus united in person.

Transports for this service will be assembled at Tampa with the least possible delay. The naval forces will furnish convoy, and cooperate with you in accomplishing the object in view. You will place yourself in close touch with the senior officer of the navy in those waters, with the view to harmonious and forceful action.

Estimates will be made by you immediately in the several staff departments for the necessary supplies and subsistence, such estimates to be submitted to the Secretary of War.

For the information of the President, copies of all orders and instructions given by you from time to time will be forwarded on the day of their issue to the Adjutant-General of the Army. Also daily reports of the state and condition of your command will be made to the Secretary of War direct.

It is important that immediate preparation be made for this movement, and, when ready, report to this Department for further instructions.

Very respectfully,

R. A. ALGER,
Secretary of War.

Maj. Gen. NELSON A. MILES,
United States Army, Washington, D. C.

While these movements were in progress the capture of Porto Rico had already been determined upon and transports were being gathered for an expedition for that purpose. It was my opinion that during the interim before such an expedition could be equipped and organized, it would be advisable to utilize a small portion of the troops then available at Tampa to take the Isle of Pines, off the south coast of Cuba. It was then occupied by a very small force of Spanish troops, and was being

used as a base for smuggling supplies to the Island of Cuba. It was advisable, in my opinion, to take the Isle of Pines, as it was a healthful sanitarium, entirely free from yellow fever, swept by the ocean breezes, had a high altitude, and, there being large public buildings on the island, it would have been most suitable for large hospitals and camps of prisoners. I also deemed it advisable to take the deep-water harbor of Nipe, on the north coast of eastern Cuba, in order to make it available for our naval ships and transports in case of hurricanes, which were liable to occur at that season of the year, and also for use as a coaling station.

The yellow fever at this time had broken out in Mississippi, and it was feared it might spread over the Southern States. The safety of the military camps was then a matter of great importance, and after consulting with the best authorities I advised that the troops at Mobile be sent to Mount Vernon, Ala., which has been a refuge for the garrisons on the Gulf for many years; also to Miami, on the east coast of Florida, another place of refuge, and also to Fernandina, Fla., in order to isolate the troops as much as possible from railroad centers, where they would be likely to become infected by the traveling public. I also recommended that a portion of the troops at Chickamanga be sent to Fernandina and also to Porto Rico, and at the same time suggested that troops be stationed in the Loudoun and Shenandoah valleys, in the vicinity of Antietam, and on Long Island Sound. These recommendations were made in order to avoid overcrowding the larger camps at Chickamanga and Camp Alger.

During this time Lieutenant Rowan had returned from his journey to Cuba, bringing with him to Washington Brigadier-General Collazo and Lieutenant-Colonel Hernandez, of General Garcia's staff. He also brought very important information concerning the active operations of the Cubans against the Spanish troops, and the location and strength of the Spanish forces in the eastern part of Cuba, numbering at that time some 31,000 men. The two Cuban officers mentioned accompanied me to Tampa, and Colonel Hernandez, having received permission from the Navy Department to be conveyed by a United States vessel to the harbor of Banes, carried the following letter from me to General Garcia:

HEADQUARTERS OF THE ARMY,
In the Field, Tampa, Fla., June 2, 1898.

DEAR GENERAL: I am very glad to have received your officers, General Enrique Collazo and Lieut. Col. Carlos Hernandez, the latter of whom returns to-night with our best wishes for your success.

It would be a very great assistance if you could have as large a force as possible in the vicinity of the harbor of Santiago de Cuba, and communicate any information, by signals, which Colonel Hernandez will explain to you, either to our navy or to our army on its arrival, which we hope will be before many days.

It would also assist us very much if you could drive in and harass any Spanish troops near or in Santiago de Cuba, threatening or attacking them at all points, and preventing, by every means, any possible reinforcement coming to that garrison. While this is being done, and before the arrival of our army, if you can seize and hold any commanding position to the east or west of Santiago de Cuba, or both, that would be advantageous for the use of our artillery, it will be exceedingly gratifying to us.

With great respect and best wishes, I remain, very respectfully,

NELSON A. MILES,

Major-General, Commanding United States Army.

Lieutenant-General GARCIA, Cuban Army.

This letter was sent in anticipation of the movement of the command under General Shafter, which sailed twelve days later. Colonel Hernandez left Key West with

it June 2; General Garcia received it June 6, and I received his reply by cable June 9, of which the following is a copy:

MOLE ST. NICHOLAS (via Washington) *June 9, 1898.*

General MILES,
Commanding United States Army:

Garcia's reply on June 6 to your letter of June 2:

"Will take measures at once to carry out your recommendation, but concentration of force will require some time. Roads bad and Cubans scattered. Will march without delay. Santiago de Cuba well fortified with advanced intrenchments, but believe good artillery position can be taken. Spanish force approximate 12,000 between Santiago de Cuba and Guantnamo, 3,000 militia. Will maintain a Cuban force near Holguin to prevent sending reenforcements to Santiago."

The above given to me by Admiral Sampson to forward to you.

ALLEN.

Also, the following is an extract from a cablegram from Admiral Sampson to the Secretary of the Navy, which was repeated to me at Tampa, June 12, for my information:

MOLE ST. NICHOLAS, HAITI.

General Miles's letter received through Colonel Hernandez on June 6. Garcia regards his wishes and suggestions as orders, and immediately will take measures to concentrate forces at the points indicated, but he is unable to do so as early as desired on account of his expedition to Banes Port, Cuba, but he will march without delay. All of his subordinates are ordered to assist to disembark the United States troops and to place themselves under orders. Santiago de Cuba well fortified, with advanced intrenchments, but he believes position for artillery can be taken as Miles desires. (Approximate) twelve thousand (12,000) regulars and three thousand (3,000) militia between Santiago and Guantnamo. He has sent force in order to prevent aid going to Santiago from Holguin. Repeats every assurance of good will, and desires to second plans.

SAMPSON.

It will be observed that General Garcia regarded my requests as his orders, and promptly took steps to execute the plan of operations. He sent 3,000 men to check any movement of the 12,000 Spaniards stationed at Holguin. A portion of this latter force started to the relief of the garrison at Santiago, but was successfully checked and turned back by the Cuban forces under General Feria. General Garcia also sent 2,000 men, under Perez, to oppose the 6,000 Spaniards at Guantnamo, and they were successful in their object. He also sent 1,000 men, under General Rios, against the 6,000 men at Manzanillo. Of this garrison, 3,500 started to reenforce the garrison at Santiago, and were engaged in no less than thirty combats with the Cubans on their way before reaching Santiago, and would have been stopped had General Garcia's request of June 27 been granted. With an additional force of 5,000 men General Garcia besieged the garrison of Santiago, taking up a strong position on the west side and in close proximity to the harbor, and he afterwards received General Shafter and Admiral Sampson at his camp near that place. He had troops in the rear, as well as on both sides, of the garrison at Santiago before the arrival of our troops.

The expedition against Santiago, commanded by Major-General Shafter, landed at Daiquiri and Siboney June 22, 23, and 24. The subsequent movements of the expedition against the garrison of Santiago have been described in the several communications and reports of commanding officers there engaged.

On July 2 the following dispatch was received:

PLAYA DEL ESTE, *July 1, 1898.*

ADJUTANT-GENERAL'S OFFICE, UNITED STATES ARMY,
Washington, D. C.:

Siboney. Had a very heavy engagement to-day, which lasted from 8 a. m. till sundown. We have carried their outer works and are now in possession of them.

There is now about three-quarters of a mile of open country between my lines and city. By morning troops will be intrenched and considerable augmentation of force will be there. General Lawton's division and General Bates's brigade, which have been engaged all day in carrying El Caney, which was accomplished at 4 p. m., will be in line and in front of Santiago during the night. I regret to say that our casualties will be above 400. Of these not many are killed.

W. R. SHAFTER, *Major-General.*

And on the next day the following dispatch was received:

PLAYA DEL ESTE, *July 3, 1898.* (Camp near Sevilla, Cuba, 3.)

The SECRETARY OF WAR, *Washington:*

We have the town well invested on the north and east, but with a very thin line. Upon approaching it we find it of such a character and the defenses so strong it will be impossible to carry it by storm with my present force, and I am seriously considering withdrawing about 5 miles and taking up a new position on the high ground between the San Juan River and Siboney, with our left at Sardinero, so as to get our supplies to a large extent by means of the railroad, which we can use, having engines and cars at Siboney. Our losses up to date will aggregate a thousand, but list has not yet been made; but little sickness outside of exhaustion from intense heat and exertion of the battle of the day before yesterday and the almost constant fire which is kept up on the trenches. Wagon road to the rear is kept up with some difficulty on account of rains, but I will be able to use it for the present. General Wheeler is seriously ill, and will probably have to go to the rear to-day. General Young also very ill, confined to his bed. General Hawkins slightly wounded in foot. During sortie enemy made last night, which was handsomely repulsed, the behavior of the regular troops was magnificent. I am urging Admiral Sampson to attempt to force the entrance of the harbor, and will have a consultation with him this morning. He is coming to the front to see me. I have been unable to be out during the heat of the day for four days, but am retaining the command. General Garcia reported he holds the railroad from Santiago to San Luis, and has burned a bridge and removed some rails; also that General Pando has arrived at Palma, and that the French consul with about four hundred French citizens came into his lines yesterday from Santiago. Have directed him to treat them with every courtesy possible.

SHAFTER, *Major-General.*

11.44 A. M.

To which I cabled the following answer:

HEADQUARTERS OF THE ARMY,
Washington, D. C., July 3, 1898.

General SHAFTER, *Playa del Este, Cuba:*

Accept my hearty congratulations on the record made of magnificent fortitude, gallantry, and sacrifice displayed in the desperate fighting of the troops before Santiago. I realize the hardships, difficulties, and sufferings, and am proud that amid those terrible scenes the troops illustrated such fearless and patriotic devotion to the welfare of our common country and flag. Whatever the results to follow their unsurpassed deeds of valor, the past is already a gratifying chapter of history. I expect to be with you within one week with strong reinforcements.

MILES,
Major-General, Commanding.

HEADQUARTERS FIFTH ARMY CORPS,
Near Santiago, Playa, July 4, 1898.

Maj. Gen. NELSON A. MILES,

Commanding the Army of the United States, Washington:

I thank you in the name of the gallant men I have the honor to command for splendid tribute of praise which you have accorded them. They bore themselves as American soldiers always have. Your telegram will be published at the head of the regiments in the morning. I feel that I am master of the situation and can hold the enemy for any length of time. I am delighted to know that you are coming, that you may see for yourself the obstacles which this army had to overcome. My only regret is the great number of gallant souls who have given their lives for our country's cause.

SHAFTER.

The following dispatch was also received from General Shafter:

HEADQUARTERS FIFTH ARMY CORPS,
CAMP NEAR SAN JUAN RIVER,
Via Haiti, Playa del Este, July 4, 1898.

ADJUTANT-GENERAL, *Washington:*

If Sampson will force an entrance with all his fleet to the upper bay of Santiago, we can take the place within a few hours. Under these conditions I believe the

town will surrender. If the Army is to take the place, I want 15,000 troops speedily, and it is not certain that they can be landed, as it is getting stormy. Sure and speedy way is through the bay. Am now in position to do my part.

SHAFTER, *Major-General*.

On receipt of these communications it was decided that I should go immediately to Santiago with the reenforcements already en route and that were being moved as rapidly as possible. Before leaving Washington it was my purpose to land sufficient forces on the west side of the harbor of Santiago to either open the entrance to our fleet or enfilade the enemy's line and take their position in reverse. I left Washington on the evening of July 7, arrived at Columbia at 5 p. m. on the 8th; thence took a special train to Charleston, reaching there in time to go on board the fast steamer *Yale*, already loaded with 1,500 troops, and, with the steamer *Columbia* accompanying, arrived opposite the entrance of Santiago Harbor on the morning of July 11. The fleet under command of Admiral Sampson was then bombarding the Spanish position. Before reaching Santiago I prepared the following note to Admiral Sampson and forwarded it to him by Captain Wise, commander of the *Yale*, immediately upon our arrival. Admiral Sampson was then on board the flagship *New York*, in close proximity to the entrance of Santiago Harbor, and in full view of Morro Castle.

HEADQUARTERS OF THE ARMY, ON BOARD U. S. S. *YALE*,
Off Siboney, Cuba, July 11, 1898.

Admiral SAMPSON,
Commanding United States Fleet.

SIR: I desire to land troops from the *Yale*, *Columbia*, and *Duchesse* to the west of the bay of Santiago Harbor, and follow it up with additional troops, moving east against the Spanish troops defending Santiago on the west. I will be glad if you can designate the most available point for disembarking the troops, and render all the assistance practicable to the troops as they move east.

Very respectfully,

NELSON A. MILES,
Major-General, Commanding.

Admiral Sampson immediately came on board the *Yale*. I explained to him the purpose of my presence and told him that I desired the cooperation of the Navy in the plan above stated. He cordially acquiesced in the plan, and offered every assistance of his fleet to cover the debarkation of the troops and also to enfilade the Spanish position with the guns of the ships. When this arrangement had been concluded, I went on shore and opened communication with General Shafter. I asked him if he had sufficient troops on the east side of the harbor of Santiago to maintain his position, and he replied that he had. I then gave directions for General Garretson to disembark all the troops on the *Yale*, *Columbia*, and other transports that were there or expected to arrive, viz, the *Duchesse* and *Rita*, whenever he should receive orders.

On the following morning I rode from Siboney to the headquarters of General Shafter. After consulting with him, he sent a communication to General Toral, saying that the Commanding General of the American Army had arrived in his camp with reenforcements, and that we desired to meet him between the lines at any time agreeable to him. He replied that he would see us at 12 o'clock the following day. That evening I became apprised of the fact that negotiations regarding a surrender had been pending between the commanding general and the Spanish commander, but no definite conclusions had been reached. Before leaving Washington I was aware of the fact that yellow fever had developed among our troops and by this time learned that it had spread so much that there were over a hundred cases,

and the medical officers were undecided as to the extent it might cripple the command. This was the most serious feature of the situation, and impressed me with the importance of the fact that prompt action should be taken, and I so informed the authorities by cable, suggesting that it was a case where discretionary authority should be granted.

At the appointed time, accompanied by Brig. Gen. J. C. Gilmore and Lieut. Col. Marion P. Maus, of my staff, Major-General Shafter, two of his staff officers, and Major-General Wheeler, and Lieutenant Wheeler, aid-de-camp, I met the Spanish general, Toral, with two of his staff officers and an interpreter. After some conversation between General Toral and General Shafter, I informed General Toral distinctly that I had left Washington six days before; that it was then the determination of the Government that this portion of the Spanish forces must either be destroyed or captured; that I was there with sufficient reinforcements to accomplish that object, and that if this was not the case any number of troops would be brought there as fast as steamers could bring them, if it took 50,000 men. I told him that we offered him liberal terms, namely, to return his troops to Spain; and I also pointed out the fact that this was the only way in which his forces could return, they being on an island 3,000 miles away from their own country with no means of succor. He said that under the Spanish law he was not permitted to surrender as long as he had ammunition and food, and that he must maintain the honor of the Spanish arms. My reply was that he had already accomplished that; that he must now surrender or take the consequences, and that I would give him until daylight the next morning to decide. He appealed for longer time, saying it was impossible for him to communicate with his superiors, and upon his request I granted him until 12 o'clock noon.

After thoroughly examining the entire position and riding along the trenches from right to left, I returned to General Shafter's headquarters. Before reaching that point I received the following cablegram from Washington in reply to mine of the evening before:

WASHINGTON, D. C., *July 13, 1898.* (Received 2.45 p. m.)

Major-General MILES:

You may accept surrender by granting parole to officers and men, the officers retaining their side arms. The officers and men after parole to return to Spain, the United States assisting. If not accepted, then assault, unless in your judgment an assault would fail. Consult with Sampson and pursue such course as to the assault as you jointly agree upon. Matter should be settled promptly.

R. A. ALGER,
Secretary of War.

This left the matter entirely to my discretion—to accept surrender, order an assault, or withhold the same. I sent the following telegram to Admiral Sampson, again requesting him to be ready to cover the landing of the troops, in accordance with our previous arrangement, and fixing the time at 12 o'clock the following day:

HEADQUARTERS FIFTH ARMY CORPS,
Camp near Santiago de Cuba, July 13, 1898.

Admiral W. T. SAMPSON,

Commanding United States Naval Forces, North Atlantic Squadron.

SIR: Please have General Henry's command, now on *Yale, Columbia, and Duchesse*, ready to disembark at noon to-morrow at Cabanas. Telegraph notification will be sent you at flag station, also at Siboney, when to commence the debarkation.

Very respectfully,

NELSON A. MILES,
Major-General, Commanding United States Army.

I also sent the following telegrams to General Henry, whom I had placed in command of all the infantry and artillery then on board transports:

HEADQUARTERS OF THE ARMY,
Camp near Santiago, July 13, 1898.

General HENRY, *Commanding Division*:

Have asked Admiral Sampson to be prepared to cover your debarkation at Cabanas to-morrow after 12 noon in case Spaniards do not surrender. Notification will be sent him by telegraph and signal when your troops should go ashore. Make the best use of your troops against the Spanish troops. Avoid surprise or exposing your troops to artillery fire.

MILES, *Commanding*.

HEADQUARTERS OF THE ARMY,
Camp near Santiago, July 13, 1898.

General HENRY, *Siboney, Cuba*:

Major-General commanding directs me to inform you that all movements against the enemy are suspended until 12 noon to-morrow.

J. C. GILMORE, *Brigadier-General*.

On the morning of July 14 Admiral Sampson's fleet was in position to cover the landing of the troops from the transports, which were in the rear and in close proximity to the small harbor of Cabanas, about 2½ miles west from the entrance of the harbor of Santiago. The ground between the harbor of Cabanas and the right flank of General Shafter's command on the north side of the Bay of Santiago, a distance of between 6 and 7 miles, had been occupied by a small force of Cuban troops, and it was my purpose to occupy this ground with a strong body of infantry, and with some 24 pieces of artillery, where the latter could easily reach Morro Castle, as well as enfilade the Spanish lines in front of General Lawton's division. The Spanish commander was well aware of our designs, as the position and movements of the fleet had been in full view of the officers commanding his troops, and they had reported to him having seen 57 vessels, some of them loaded with troops, menacing that part of his position.

Before the time, 12 o'clock on July 14, the following letter was received from General Toral:

SANTIAGO DE CUBA, July 14, 1898.

HONORED SIR: His excellency the general in chief of the army of the Island of Cuba telegraphs from Havana yesterday at 7 p. m. the following: "Believing the business of such importance as the capitulation of that place should be known and decided upon by the Government of His Majesty, I give you notice that I have sent the conditions of your telegram, asking an immediate answer and enabling you also to show this to the General of the American army, to see if he will agree to await the answer of the Government, which can not be as soon as the time which he has decided, as communication by way of Bermuda is more slow than by Key West. In the meanwhile your honor and the General of the American army may agree upon capitulation on the basis of repatriation [returning to Spain]." I have the honor to transmit this to you, in case you may [consider] the foregoing satisfactory, that we may designate persons in representation of himself, who, with those in my name, agree to clauses of the capitulation upon the basis of the return to Spain, accepted already in the beginning by the general in chief of this army.

Awaiting a reply, I am, very respectfully, your servant,

JOSE TORAL, etc.

GENERAL IN CHIEF OF THE AMERICAN FORCES.

On meeting General Toral by appointment at 12 o'clock that day under a flag of truce, at the same place as before, he stated that he was prepared to surrender his command, and that such action was approved by Captain-General Blanco, who had

authorized him to appoint commissioners to agree upon the clauses of capitulation, which he was prepared to do, but that before final action it was proper that the Government at Madrid should know and approve what was done. He said, however, that he was sure that the Government would not fail to indorse his action. His manner was so sincere and the language of General Blanco so positive that I felt no hesitancy in accepting it in good faith, and stated that we would accept the surrender under the condition that the Spanish troops should be repatriated by the United States. General Toral stated that he would surrender all the troops in the department of Santiago de Cuba, many of them from 70 to 100 miles distant and against whom not a shot had been fired; yet the activity of the Cuban troops and their dispositions had been such as to render the Spanish positions exceedingly perilous. This desirable result I regarded as an accomplished fact, and sent the following telegram:

HEADQUARTERS CAVALRY DIVISION, UNITED STATES ARMY,
Before Santiago, Cuba, July 14, 1898—12.55 p. m.

The SECRETARY OF WAR, Washington, D. C.:

General Toral formally surrendered the troops of his army corps and division of Santiago on the terms and understanding that his troops would be returned to Spain. General Shafter will appoint commissioners to draw up the conditions of arrangement for carrying out the terms of surrender. This is very gratifying, and General Shafter and the officers and men of this command are entitled to great credit for their tenacity, fortitude, and in overcoming almost insuperable obstacles which they have encountered. A portion of the army has been infected with yellow fever, and efforts will be made to separate those who are infected and those free from it, and to keep those which are still on board ship separated from those on shore. Arrangements will be immediately made for carrying out the further instructions of the President and yourself.

MILES,
Major-General Commanding the Army.

and informed General Shafter that he could appoint the commissioners.

HEADQUARTERS CAVALRY DIVISION, UNITED STATES ARMY,
Before Santiago, Cuba, July 14, 1898.

SIR: You are authorized to appoint commissioners to draw up articles of capitulation on the terms upon which the Spanish division has surrendered, namely, the return of the Spanish troops to Spain at the expense of the United States. The Spanish troops will be supplied at the expense of the United States, and assembled at such place as may be available for their embarkation on the arrival of the necessary transportation.

The attention of the commissioners should be called to the importance of the return of the people that have fled from the city of Santiago and supplying them with food.

The sending of supplies into the harbor on the Red Cross ship and other vessels.

The removal of all obstructions to the entrance of the harbor, or notification to the fleet that no obstacle will be placed in the way of their removing such obstructions.

Respectfully,

NELSON A. MILES,
Major-General, Commanding the Army.

Maj. Gen. WILLIAM R. SHAFTER,
Commanding United States Forces.

After learning the real condition of our troops and their urgent necessities, I gave the following instructions:

HEADQUARTERS CAVALRY DIVISION, UNITED STATES ARMY,
Before Santiago, Cuba, July 14, 1898.

SIR: The Spanish army having surrendered, the terms of capitulation will be carried into effect with as little delay as practicable, on the understanding that these troops will be returned to Spain at the expense of the United States. You will, with as little delay as practicable, place such troops as are not infected with yellow

fever in separate camps and, as soon as practicable, report the number that will be available for service with another expedition. Those organizations which have been infected with yellow fever every effort will be made to improve their sanitary condition and to check the spread of the disease by placing them in as healthy camps as possible.

Respectfully,

NELSON A. MILES,
Major-General, Commanding the Army.

Maj. Gen. WILLIAM R. SHAFTER,
Commanding United States Forces.

HEADQUARTERS CAVALRY DIVISION, UNITED STATES ARMY,
Before Santiago, Cuba, July 14, 1898.

SIR: For a double reason I think it would be advisable to isolate the troops that have just joined your command in separate camps on healthful ground, so as to keep them, if possible, free from infection by yellow fever. It will also form a strong force to meet any force that might by any possibility come from Holguin. Make your disposition accordingly.

Respectfully,

NELSON A. MILES,
Major-General, Commanding the Army.

Maj. Gen. WILLIAM R. SHAFTER,
Commanding United States Forces.

HEADQUARTERS CAVALRY DIVISION, UNITED STATES ARMY,
Before Santiago, Cuba, July 14, 1898.

SIR: The cavalry division are separated from their horses and have been doing most extraordinary service. If it is possible, I desire to have them separated from the rest of the command, and in time they can be put on board ship and sent to other fields, as I desire to have them remounted as soon as possible.

Very respectfully,

NELSON A. MILES,
Major-General, Commanding United States Army.

Maj. Gen. WILLIAM R. SHAFTER,
Commanding Fifth Army Corps.

The following telegram was received:

WASHINGTON, D. C., July 14, 1898.

Major-General MILES:

The conditions are such, on account of yellow fever, I have ordered all further shipments of troops to Santiago cease. We are now arranging transportation of 25,000 men for Porto Rico. As soon as matters are settled at Santiago I think you had better return and go direct with the expedition. Yellow fever breaking out in camp at Santiago will, I fear, deprive you of the use of our forces there; however, can be determined later. As soon as Santiago falls, the troops must all be put in camp as comfortable as they can be made, and remain, I suppose, until the fever has had its run. It is the most difficult problem to solve, but we are sure you and General Shafter, with the aid of the surgeons in charge, will do all that can be done. Have ordered two immune regiments to Santiago. They will be colored regiments; seems to me will answer to garrison the places as long as our forces have to remain there.

R. A. ALGER,
Secretary of War.

and answered as follows:

HEADQUARTERS CAVALRY DIVISION, UNITED STATES ARMY,
Before Santiago, Cuba, July 14, 1898—1.40 p. m.

Hon. SECRETARY OF WAR,
Washington, D. C.:

Your second dispatch received. Have already anticipated in part by giving directions for separating the troops that have been infected, and kept the troops that came on the *Yale*, *Columbia*, *Duchesse*, and part of those on the *Comanche* ready to disembark at Cabanas, on the west side, where I had made all arrangements for putting the troops in on that side of the harbor and opening the entrance to the bay in conjunction with Admiral Sampson. I will now keep these troops away from the

infected districts and will probably let them go ashore at Guantanamo. Other vessels en route will go into the harbor at Guantanamo. Presume that will be a good rendezvous, at least for the troops coming from Tampa. They could come in on the south side and go into a safe harbor there. Will consult with the Admiral with regard to rendezvousing our troops at Porto Rico or one of the islands immediately adjacent thereto. Will keep you fully apprised of any important information.

MILES,
Major-General, Commanding the Army.

The following telegrams were also sent: .

GENERAL WHEELER'S CAMP, July 14, 1898.

General HENRY, *Siboney, Cuba:*
The enemy have surrendered.

GILMORE, *Brigadier-General.*

GENERAL WHEELER'S CAMP, July 14, 1898.

Admiral SAMPSON,
The New York, Siboney, Cuba:

The enemy have surrendered. I will be down to see you soon.

MILES, *Major-General.*

I left without delay, returning to General Shafter's headquarters, and thence to Siboney. While en route I became fully apprised of the condition of the troops at the fever hospitals, and recognized the great need of immediate action to relieve the threatened danger of the whole command. I had already given directions on the 11th of July for destruction of the infected habitations at Siboney and other places, and now ordered the Twenty-fourth Regiment of United States Infantry to the yellow-fever hospital to police the grounds and nurse the sick. I moved all of the troops then on board transports to Guantanamo.

There was some delay in the final capitulation, owing to the nonagreement at first between the two commissions as to the disposition of the small arms, but it was finally settled by leaving it to the decision of our Government, upon the recommendation of our commissioners that they should be sent to Spain with the troops.

My chief desire, after being sure of the surrender of the garrison at Santiago, was to relieve our troops as speedily as possible by getting them away from the trenches and malarial grounds upon which they were encamped. Dispatches were received and sent as follows:

HEADQUARTERS FIFTH ARMY CORPS, July 16, 1898.

General MILES:
They surrender.

SHAFTER.

HEADQUARTERS OF THE ARMY, ON BOARD U. S. S. YALE,
Off Siboney, Cuba, July 16, 1898.

General SHAFTER,
Commanding Fifth Army Corps:

Congratulate you and the Army again. The troops should change camps almost daily, occupying fresh ground until free from the fever. I should think ground parallel to the railroad, where men could bathe in salt water, would be good ground. All blockhouses or places occupied by the Spanish troops should be burned.

MILES,
Major-General, Commanding.

The following indorsement upon the report of board composed of Colonel Greenleaf, chief surgeon of the Army, Maj. Louis A. La Garde, surgeon, and Drs. Guiteras

and Parker, was transmitted to Major-General Shafter, with the following indorsement:

HEADQUARTERS OF THE ARMY, ON BOARD U. S. S. YALE,
Off Siboney, Cuba, July 17, 1898.

Respectfully referred to Major-General Shafter, commanding Fifth Army Corps.

This sanitary recommendation has been drawn up by Colonel Greenleaf, chief surgeon of the Army, after a consultation with the yellow-fever experts on duty with the Army, and the commanding general directs that it be complied with as far as possible, the main purpose being the immediate isolation of those affected by the disease of yellow fever from the commands; second, frequent change of camp, and in all cases the selection of fresh ground, uncontaminated with the disease, and in every case, prior to occupation, the ground must be rigidly inspected, and, if necessary, burned over; third, the command must be kept away from all habitations, blockhouses, huts, and shanties of every description that have been occupied by Spanish or Cuban people; fourth, the establishment of guards and a rigid quarantine, to keep all native or Spanish inhabitants out of any of the camps and away from any intercourse of whatever description with the troops. This rule must be thoroughly enforced.

The commanding general further directs that you make daily reports to General Gilmore, adjutant-general at Army headquarters, of the condition of your command and any matters of importance, mentioning specifically the number of men affected with yellow fever, and giving the organization to which they belong.

You will also separate your camps, as far as practicable, so that any organization that may be more seriously affected will not contaminate the whole command.

By order of Major-General Miles:

J. C. GILMORE,
Brigadier-General, U. S. V.

HEADQUARTERS OF THE ARMY,
Playa del Este, July 17, 1898—7 p. m.

General SHAFTER:

What is the condition of your command to-day? Sent you report of medical board, with direction for changing camps, etc. If it is thought more advisable to move troops to fresh camps on the foothills or mountain sides, and surgeons advise, act accordingly.

The *St. Paul* should be unloaded immediately, and every transport unloaded and returned as soon as they are needed.

MILES,
Major-General, Commanding.

SIBONEY, July 17, 1898—8.48 p. m. (Received July 18, 1898.)

General MILES, On Board *Yale*:

Letters and orders in reference to movement of camp received and will be carried out. None is more anxious than myself to get away from here. It seems, from your orders given me, that you regard my force as a part of your command. Nothing will give me greater pleasure than serving under you, General, and I shall comply with all your requests and directions, but I was told by the Secretary that you were not to supersede me in command here. I will furnish the information called for as to condition of command to Gilmore, adjutant-general, Army headquarters.

SHAFTER, Major-General.

HEADQUARTERS OF THE ARMY,
Playa del Este, July 18, 1898. (Sent about 11.30 a. m.)

General SHAFTER:

Telegram received. Have no desire and have carefully avoided any appearance of superseding you. Your command is a part of the United States Army, which I have the honor to command, having been duly assigned thereto, and directed by the President to go wherever I thought my presence required, and give such general directions as I thought best concerning military matters, and especially directed to go to Santiago for a specific purpose. You will also notice that the order of the Secretary of War of July 13 left the matter to my discretion. I should regret that any event would cause either yourself or any part of your command to cease to be a part of mine.

Very truly, yours,

NELSON A. MILES,
Major-General, Commanding United States Army.

HEADQUARTERS OF THE ARMY,
Playa del Este, July 18, 1898—12 m.

SECRETARY OF WAR, *Washington, D. C.:*

Regarding your telegram of yesterday, I think it important to go direct to Port Fajardo, Cape de San Juan. All appliances for the expedition should be sent there, if not already en route to Santiago.

Tugs, lighters, construction corps, engineer corps under Colonel Black at Tampa, General Stone's boats now at Jacksonville, artillery, cavalry, siege train, and infantry, ample hospital supplies and appliances and ambulances, full transportation for all the organizations, should all be directed to go to Porto Rico; also officers to establish depots of quartermaster's, commissary, and ordnance supplies, and quartermaster's funds to the extent of \$100,000 for hire of native transportation and purchase of horses, should be sent.

Troops from the North have been heretofore sent, and I would suggest that Kiefer's division, from Miami, Fla., or troops from Texas, Louisiana, Mississippi, Alabama, Georgia, and Florida be sent as a part of the command to Porto Rico.

Paymasters, with ample funds, should be sent at once to Santiago and Porto Rico. A strong, fast, seagoing dispatch boat should also be sent to Porto Rico.

MILES,
Major-General, Commanding.

HEADQUARTERS OF THE ARMY, ON BOARD U. S. S. YALE,
Guantanamo Bay, Cuba, July 20, 1898.

General SHAFER, *Commanding:*

As there appears to be a decided increase of yellow-fever cases in your present location, a move should be made of the entire command to the highest ground practicable where the disease is not prevalent. In some cases you can send the troops to the mountains.

By command of Major-General Miles:

J. C. GILMORE, *Brigadier-General.*

The following is an extract from the telegram to the honorable Secretary of War concerning their condition:

HEADQUARTERS OF THE ARMY, ON BOARD U. S. S. YALE,
Guantanamo Bay, July 21, 1898.

SECRETARY OF WAR,
Washington, D. C.:

* * * * *

There is not a single regiment of regulars or volunteers with General Shafter's command that is not infected with yellow fever, from one case in the Eighth Ohio to thirty-six in the Thirty-third Michigan.

After consulting with best medical authorities, it is my opinion that the best mode of ridding the troops of the fever will be as I have directed, namely, the troops to go up as high into the mountains as possible, selecting fresh camps every day. If this does not check the spread of the disease, the only way of saving a large portion of the command will be to put them on transports and ship them to the New England coast, to some point to be designated by the Surgeon-General.

* * * * *

MILES,
Major-General, Commanding.

Before leaving Siboney I issued the following general field order:

GENERAL FIELD ORDERS, }
No. 1. }

HEADQUARTERS OF THE ARMY,
Siboney, Cuba, July 16, 1898.

The gratifying success of the American arms at Santiago de Cuba and some features of a professional character both important and instructive I hereby announce to the Army.

The declaration of war found our country with a small Army scattered over a vast territory. The troops composing this Army were speedily mobilized at Tampa, Fla. Before it was possible to properly equip a volunteer force strong appeals for aid came from the Navy, which had inclosed in the harbor of Santiago de Cuba an important part of the Spanish fleet. At that time the only efficient fighting force available was the United States Army, and in order to organize a command of sufficient strength the cavalry had to be sent dismounted to Santiago de Cuba with the infantry and artillery.

The expedition thus formed was placed under command of Major-General Shafter. Notwithstanding the limited time to equip and organize an expedition of this character, there was never displayed a nobler spirit of patriotism and fortitude on the part of officers and men going forth to maintain the honor of their country. After encountering the vicissitudes of an ocean voyage, they were obliged to disembark on a foreign shore and immediately engage in an aggressive campaign. Under drenching storms, intense and prostrating heat, within a fever-afflicted district, with little comfort or rest, either by day or night, they pursued their purpose of finding and conquering the enemy. Many of them, trained in the severe experience of the great war, and in frequent campaigns on the western plains, officers and men alike, exhibited a great skill, fortitude, and tenacity, with results which have added a new chapter of glory to their country's history. Even when their own generals in several cases were temporarily disabled, the troops fought on with the same heroic spirit until success was finally achieved. In many instances the officers placed themselves in front of their commands, and under their direct and skillful leadership the trained troops of a brave army were driven from the thickets and jungles of an almost inaccessible country. In the open field the troops stormed intrenched infantry, and carried and captured fortified works with an unsurpassed daring and disregard of death. By gaining commanding ground they made the harbor of Santiago untenable for the Spanish fleet, and practically drove it out to a speedy destruction by the American Navy.

While enduring the hardships and privations of such a campaign, the troops generously shared their scanty food with the 5,000 Cuban patriots in arms and the suffering people who had fled from the besieged city. With the twenty-four regiments and four batteries, the flower of the United States Army, were also three volunteer regiments. These, though unskilled in warfare, yet, inspired with the same spirit, contributed to the victory, suffered hardships, and made sacrifices with the rest. Where all did so well it is impossible, by special mention, to do justice to those who bore conspicuous part. But of certain unusual features mention can not be omitted, namely, the cavalry dismounted fighting and storming works as infantry, and a regiment of colored troops, who having shared equally in the heroism as well as the sacrifices, is now voluntarily engaged in nursing yellow-fever patients and burying the dead. The gallantry, patriotism, and sacrifices of the American Army, as illustrated in this brief campaign, will be fully appreciated by a grateful country, and the heroic deeds of those who have fought and fallen in the cause of freedom will ever be cherished in sacred memory and be an inspiration to the living.

By command of Major-General Miles:

J. C. GILMORE,
Brigadier-General, United States Volunteers.

I was anxious to proceed as quickly as possible to the Island of Porto Rico, and so telegraphed the authorities in Washington. After some delay authority was granted, and I started from Guantanamo on July 21 with 3,415 infantry and artillery, together with two companies of engineers and one company of the Signal Corps, on nine transports, convoyed by Captain Higginson's fleet, consisting of the battle ship *Massachusetts* (flagship) and two smaller vessels. The *Yale* and *Columbia* were armed ships, but being loaded with troops, they were practically only available as transports. The above number includes the men who were sick, of which there were nearly a hundred, which reduced our effective force to about 3,300 men, and with that number we moved on the Island of Porto Rico, at that time occupied by 8,233 Spanish regulars and 9,107 volunteers.

For several days I had been anxiously looking for the arrival of tugs, launches, and lighters that had been ordered from Santiago, Washington, and Tampa, but none arrived prior to our departure, although I still hoped to meet them as we moved north through the Windward Passage. As all cablegrams concerning our landing place had passed over foreign cables, and as it was important to deceive the enemy (who, I afterwards learned, were marching to and intrenching the ground we were expected to occupy, at the very time we were taking possession of the southern coast of Porto Rico), and nonarrival of launches, lighters, etc., the question of successfully disembarking the command became somewhat serious; and, after all

hope of receiving any appliances of this kind had disappeared, I considered the advisability of finding a safe harbor and capturing necessary appliances from the enemy. I therefore wrote the following letter to Captain Higginson while at sea:

ON BOARD U. S. S. YALE,
En route to Porto Rico, July 22, 1898.

SIR: Our objective point has been Port Fajardo or Cape San Juan, but so much time has occurred since the movement was decided in that direction and such publicity has been given the enterprise, that the enemy has undoubtedly become apprised of our purpose. While it is advisable to make a demonstration near the harbor of San Juan near Port Fajardo, or Port Figneroa, I am not decided as to the advisability of landing at either of these places, as we may find them well occupied by strong Spanish forces. If we draw them to that vicinity, we might find it judicious to quickly move to Porto Guanica, where there is deep water near the shore—4½ fathoms—and good facilities for landing. We can move from Cape San Juan to that point in twelve hours (one night), and it would be impossible for the Spanish to concentrate their forces there before we will be reenforced. I am also informed that there are a large number of strong lighters in the harbors at Ponce and Guanica, as well as several sailing vessels, which would be useful. As it is always advisable not to do what your enemy expects you to do, I think it advisable after going around the northeast corner of Porto Rico, to go immediately to Guanica and land this force and move on Ponce, which is the largest city in Porto Rico. After, or before, this is accomplished we will receive large reenforcements, which will enable us to move in any direction or occupy any portion of the island of Porto Rico.

Your strong vessels can cover our landing and capture any vessels in the harbor of Ponce, Guanica, or the ports on the southern coast; one light vessel can remain at Cape San Juan to notify transports that will arrive where we have landed, and another could scout off the northwest corner of Porto Rico to intercept others and direct them where to find us.

Very respectfully,

NELSON A. MILES,
Major-General, Commanding United States Army.

Capt. FRANCIS J. HIGGINSON,
Commanding United States Naval Convoy.

The following messages will further explain the circumstances and the final decision to change our course:

[Flag message for Captain Higginson.]

HEADQUARTERS OF THE ARMY,
On Board U. S. S. Yale, July 24, 1898.

General Miles desires, if possible, you send in advance any naval vessel you can spare to the Port Guanica, reported to be without fortifications or torpedoes. If secured, hold, and report quickly to us, Cape San Juan.

It is more important to land at Guanica than at Cape San Juan. If we can land there, we have troops enough to take the harbor of Ponce and let your fleet into that port.

Possibly all of this can be accomplished by going by the south side. Can send Captain Whitney, who was at Ponce in June, to you, if desired. Answer.

[Signal from *Massachusetts*, July 24, 1898.]

All right. Guanica it is. Shall I send orders to transport at Cape San Juan to join at Guanica?

[Answer sent by General Miles.]

Better be sure we can land at Guanica, then send for the transports. You can notify all vessels accordingly. Do you want Whitney?

Captain Whitney was sent to report to Captain Higginson on the *Massachusetts*, with his maps and reports.

[Flag message for Capt. Francis J. Higginson.]

HEADQUARTERS OF THE ARMY,
On Board U. S. S. Yale, July 24, 1898.

SIR: I would call your attention to the railroad between Ponce and Yauco, which I was informed passes right by the sea at one point, El Penon, about 8 miles west of Ponce. A vessel carrying a gun or two dispatched to this point could prevent reen-

forcements from being sent by rail from there to Yauco, or detachments of troops, rolling-stock supplies, etc., from being brought into Ponce from Yauco.

Very respectfully,

NELSON A. MILES,
Major-General, Commanding.

[Flag message for Capt. Francis J. Higginson.]

HEADQUARTERS OF THE ARMY,
U. S. S. Yale, July 24, 1898.

Railroad from Ponce to Yauco runs close to sea, 6 to 8 miles west Ponce. Shell or destroy this and prevent Spanish troops moving.

NELSON A. MILES,
Major-General, Commanding Army.

Instead of making a demonstration at Fort Fajardo, it was finally decided to go direct to Guanica. We arrived off that point near daylight on July 25, and the harbor was entered without opposition. The guns of the *Gloucester* fired several shots at some Spanish troops on shore. The landing of the marines, sailors, and our troops immediately commenced, and after a short skirmish the Spanish troops were driven from the place, and the flag of the United States was raised on the island.

In this, and in subsequent movements, I was very ably and cordially assisted by the Navy, which rendered invaluable aid in disembarking troops and supplies from the transports, using their steam launches to tow the lighters loaded with men and animals from the transports to the shore. Ten lighters were captured at Guanica and seventy at Ponce.

In the subsequent military operation in the interior, I found Captain Whitney's knowledge of the country, and the information gained by him in his perilous journey through Porto Rico, to be in every respect thoroughly accurate and of great value to me in the conduct of the campaign.

At daylight on the 26th of July, with six companies of the Sixth Massachusetts and one of the Sixth Illinois Volunteer Infantry, under command of Brigadier-General Garretson, an attack was made upon a strong force of Spaniards near Yauco, and after a spirited and decisive engagement the enemy was defeated and driven back, giving us possession of the railroad and the highway to the city of Ponce, and leaving them open for the march of General Henry's command to that place.

On the 27th of July Major-General Wilson arrived in the harbor of Guanica with General Ernst's brigade. The same day Commander Davis, of the *Dixie*, entered the port of Ponce and found that it was neither fortified nor mined. The next morning the fleet and transports, with General Wilson's command, moved into the harbor of Port Ponce. The troops disembarked and marched to the city of Ponce, a distance of 2 miles, and we took formal possession of the city and adjacent country, the Spanish troops withdrawing on the military road to San Juan, and our troops being pushed well forward in that direction. In the meantime General Henry's command had been directed to proceed to Ponce, where he arrived shortly afterwards, joining General Wilson's command.

Before leaving I was aware of the fact that there existed considerable disaffection among the people in the southern portion of the island, and as our force was so much inferior to the Spanish I deemed it advisable, if possible, to encourage this feeling,

and also to impress the people of the island with the good intentions of the American forces, and for this and other reasons I issued the following proclamation:

HEADQUARTERS OF THE ARMY,
Ponce, Porto Rico, July 28, 1898.

To the inhabitants of Porto Rico:

In the prosecution of the war against the Kingdom of Spain by the people of the United States in the cause of liberty, justice, and humanity, its military forces have come to occupy the Island of Porto Rico. They come bearing the banner of freedom inspired by a noble purpose to seek the enemies of our country and yours, and to destroy or capture all who are in armed resistance. They bring you the fostering arm of a nation of free people, whose greatest power is in its justice and humanity to all those living within its fold. Hence, the first effect of this occupation will be the immediate release from your former political relations, and it is hoped a cheerful acceptance of the Government of the United States. The chief object of the American military forces will be to overthrow the armed authority of Spain and to give to the people of your beautiful island the largest measure of liberty consistent with this military occupation. We have not come to make war upon the people of a country that for centuries has been oppressed, but, on the contrary, to bring you protection, not only to yourselves, but to your property, to promote your prosperity, and bestow upon you the immunities and blessings of the liberal institutions of our Government. It is not our purpose to interfere with any existing laws and customs that are wholesome and beneficial to your people so long as they conform to the rules of military administration of order and justice. This is not a war of devastation, but one to give to all within the control of its military and naval forces the advantages and blessings of enlightened civilization.

NELSON A. MILES,
Major-General, Commanding United States Army.

And the following letter of instructions was published for the information and guidance of all concerned:

HEADQUARTERS OF THE ARMY,
Port Ponce, Porto Rico, July 29, 1898.

SIR: I have the honor to inform you that the Major-General Commanding the Army of the United States directs me to communicate to you the following instructions, which will govern you or your successor in the discharge of your duties relating to the military government of the territory now occupied, or hereafter to be occupied, by the United States forces under your command:

The effect of the military occupation of the enemy's territory is the severance of the former political relations of the inhabitants, and it becomes their duty to yield obedience to the authority of the United States, the power of the military occupant being absolute and supreme and immediately operating upon the political conditions of the inhabitants. But generally, as long as they yield obedience to their new condition, security in their person and property and in all other private rights and relations will be duly respected.

The municipal laws, in so far as they affect the private rights of persons and property and provide for the punishment of crime, should be continued in force as far as they are compatible with the new order of things, and should not be suspended unless absolutely necessary to accomplish the objects of the present military occupation. These laws should be administered by the ordinary tribunals substantially as they were before the occupation. For this purpose the judges and other officials connected with the administration of justice may, if they accept the authority of the United States, continue to administer the ordinary laws of the land as between man and man, under the supervision of the commander of the United States forces. Should it, however, become necessary to the maintenance of law and order, you have the power to replace or expel the present officials, in part or altogether, and to substitute others, and to create such new and supplementary tribunals as may be necessary. In this regard you must be guided by your judgment and a high sense of justice.

It is to be understood that under no circumstances shall the criminal courts exercise jurisdiction over any crime or offense committed by any person belonging to the Army of the United States, or any retainer of the Army, or person serving with it, or any persons furnishing or transporting supplies for the Army; nor over any crime or offense committed on either of the same by any inhabitant or temporary resident of the occupied territory. In such cases, except when courts-martial have jurisdiction, jurisdiction to try and punish is vested in military commissions and such provost courts as you may find necessary to establish. The native constabulary, or police force, will, so far as may be practicable, be preserved. The freedom

of the people to pursue their accustomed occupations will be abridged only when it may be necessary to do so.

All public funds and securities belonging to the Spanish Government in its own right, and all movable property, arms, supplies, etc., of such Government, should be seized and held for such uses as proper authority may direct. And whatever real property the Spanish Government may have held should be taken charge of and administered; the revenues thereof to be collected and reported for such disposition as may be made of the same, under instructions from these headquarters.

All public means of transportation, such as telegraph lines, cables, railways, telephone lines, and boats belonging to the Spanish Government, should be taken possession of and appropriated to such use as may be deemed expedient.

Churches and buildings devoted to religious worship, and all schoolhouses, should be protected.

Private property, whether belonging to individuals or corporations, is to be respected, and can be confiscated only as hereinafter indicated. Means of transportation, such as telegraph lines, and cables, railways, and boats, may, although they belong to private individuals or corporations, be seized by the military occupant, but, unless destroyed under military necessity, are not to be retained.

As a result of military occupation of this country, the taxes and duties payable by the inhabitants to the former government become payable to the military occupant; the money so collected to be used for the purpose of paying the necessary and proper expenses under military government.

Private property will not be taken except upon the order of brigade and division commanders in cases of absolute military necessity, and when so taken for the public use of the army will be paid for in cash at a fair valuation.

All ports and places in actual possession of our forces will be opened to the commerce of all neutral nations, as well as our own, in articles not contraband of war, upon payment of the prescribed rates of duty which may be in force at the time of the importation.

A memorandum in respect to the jurisdiction of military commissions and provost courts is herewith inclosed.

Very respectfully,

J. C. GILMORE,
Brigadier-General, U. S. V.

Maj. Gen. J. M. WILSON, U. S. V.,
Commanding First Division, First Corps, Ponce, Porto Rico.

[Inclosure.]

I. Except as hereinafter restricted, and subject to the supervision and control of the commanding general, the jurisdiction of the municipal government and of the civil and criminal courts remain in force.

II. The said criminal courts shall not exercise jurisdiction over any crime or offense committed by any person belonging to the Army of the United States, or any retainer of the Army, or person serving with it, or any person furnishing or transporting supplies for the Army; nor over any crime or offense committed on either of the same by any inhabitant or temporary resident of said territory. In such cases, except when courts-martial have jurisdiction, jurisdiction to try and punish is vested in military commissions and the provost court, as hereinafter set forth.

III. The crimes and offenses triable by military commission are murder, manslaughter, assault and battery with intent to kill, robbery, rape, assault and battery with intent to commit rape, and such other crimes, offenses, and violations of the laws of war as may be referred to it for trial by the commanding general. The punishment awarded by military commission shall conform, as far as possible, to the laws of the United States, or the custom of war. Its sentence is subject to the approval of the commanding general.

IV. The provost court has jurisdiction to try all other crimes and offenses referred to in section II of this order, not exclusively triable by court-martial or military commission, including violations of orders of the laws of war, and such cases as may be referred to it by the commanding general. It shall have power to punish with confinement, with or without hard labor, for not more than * * * or with fine not exceeding * * * or both. Its sentence does not require the approval of the commanding general, but may be mitigated or remitted by him.

V. The judge of the provost court is appointed by the commanding general. When in the opinion of the provost court its power of punishment is inadequate, it shall certify the case to the commanding general for his consideration and action.

Brigadier-General Schwan arrived July 31, and was subsequently instructed to disembark part of the Eleventh Infantry, under Colonel De Russey, at Guanica, and march to Yauco and thence west with an additional force of two batteries of artil-

lery and one troop of cavalry. The following letter of instructions was addressed to General Schwan:

HEADQUARTERS OF THE ARMY,
Port Ponce, Porto Rico, August 6, 1898.

GENERAL: The Major-General Commanding the Army directs me to transmit to you the following instructions:

You will proceed from Ponce with the six companies of the Eleventh Infantry to Yauco, moving by rail if desirable. You will also move by wagon road Troop A, Fifth Cavalry, and two batteries of light artillery. At Yauco you will take the remainder of the Eleventh Infantry and two companies of the Nineteenth and proceed to Sabana Grande, San German, Mayaguez, thence to Lares and Arecibo.

At Yauco you will take with you all the wagon transportation brought from Guanica.

You will drive out or capture all Spanish troops in the western portion of Porto Rico. You will take all necessary precautions and exercise great care against being surprised or ambushed by the enemy, and make the movement as rapidly as possible, at the same time exercising your best judgment in the care of your command to accomplish the object of your expedition.

It is expected that at Arecibo you will be joined by the balance of your brigade. Such rations and supplies will be taken as you decide to be proper and necessary.

Report frequently by telegraph.

Very respectfully,

J. C. GILMORE,
Brigadier-General, U. S. V.

Brig. Gen. THEODOR SCHWAN,
Commanding Brigade, Ponce, Porto Rico.

Major-General Brooke arrived July 31, and was directed to disembark his command at Arroyo, and move thence to Cayei. On August 5 he had a sharp engagement with the Spanish troops at Guayama, which was finally occupied by our forces. An action took place near Guayama on August 8, the Spaniards being driven from their position farther in the direction of Cayei. Arrangements for investing and attacking that place, both directly and in the rear, were promptly made, and were about to be consummated when the order for cessation of hostilities arrived.

On August 9 General Schwan's command advanced from Yauco westward, occupying successively the important towns of Sabana Grande, San German, Lares, and Arecibo, finally entering the city of Mayaguez, after a sharp engagement on August 10 near Hormigueros, in which a strong force of the enemy was engaged. In this action, in which artillery, infantry, and cavalry were employed, the Spanish forces, although strongly posted on ground of their own selection, and skillfully disposed, and being equal in strength to our own, were routed with severe loss, while our own loss was but 1 killed and 16 wounded. The enemy was pursued toward Lares, which town would have been occupied August 13 by our troops had not the order to suspend hostilities been received. Near this place the advance under Colonel Burge encountered the enemy, who was defeated without loss to our force.

In the meantime General Stone had made a practicable road over what had been considered an impassable trail, by way of Adjuntas and Utuado, through the center of the territory; and General Henry moved his command over that road with the object of intercepting the enemy retreating before General Schwan, and later of effecting a junction with him at Arecibo, his advance troops having already reached the immediate vicinity of that place. This operation would have formed a strong division on the line of retreat of the Spanish troops occupying the western portion of the island.

At Coamo a sharp engagement took place on August 9 between the troops of Major-General Wilson's command, under the personal direction of Brigadier-General Ernst, and the Spanish forces at that place. The United States troops, guided by Lieutenant Colonel Biddle, of the Engineers, made a skillful flank movement at Coamo, which was admirably executed by the Sixteenth Pennsylvania Regiment Volunteer Infantry, under Colonel Hulings. Passing over a mountain trail they made a wide detour, coming in rear of the Spanish troops under cover of night without being discovered, and striking the military road to San Juan, cut off the enemy's retreat. In this engagement the commanding officer of the Spanish troops and the second in command were killed, and 167 prisoners taken.

The road to Aibonito was thus cleared and our troops were advanced and well disposed for the capture of the Spanish forces that had taken positions near that place.

At Asomanto, on the 12th of August, the artillery of General Wilson's command began shelling the enemy's position preparatory to an advance in front, while a rear attack was to be made by General Ernst's brigade. This command was under arms and ready to move August 13, when orders were received suspending hostilities.

During the nineteen days of active campaign on the Island of Porto Rico, a large portion of the island was captured by the United States forces and brought under our control. Our forces were in such a position as to make the positions of the Spanish forces, outside of the garrison at San Juan, utterly untenable. The Spaniards had been defeated or captured in the six different engagements which took place, and in every position they had occupied up to that time. The volunteers had deserted their colors, and many of them had surrendered to our forces and taken the oath of allegiance. This had a demoralizing effect upon the regular Spanish troops.

The success of the enterprise was largely due to the skill and good generalship of the officers in command of the different divisions and brigades. Strategy and skillful tactics accomplished what might have occasioned serious loss to achieve in any other way. The loss of the enemy in killed, wounded, and captured was nearly ten times our own, which was only 3 killed and 40 wounded. Thus the Island of Porto Rico became a part of the United States. It embraces nearly 3,700 square miles, and has a population of nearly a million souls. It no longer affords a base of operations for any foreign government, thereby being a menace to ours. Under the rule of nations, which requires troops to remain during a truce in exactly the position they occupied at the time of cessation of hostilities, the commands were obliged to stay where they were, without regard to the suitability of the camping grounds, and as hostilities ceased during the rainy season in Porto Rico, this requirement had an injurious effect upon the health of the troops. They therefore suffered to some extent on account of exposure and the unusual climatic effects incident to the country. As soon as practicable, however, a large portion of the troops were returned in good condition to the United States.

The field and siege artillery were well organized and equipped, under the direction of Brig. Gen. John I. Rodgers, and rendered efficient service wherever used. In my opinion, the siege train should remain as at present organized.

The bureau of military information, under charge of Lieutenant-Colonel Wagner, was exceedingly useful, and furnished valuable and important information

obtained by it regarding the nature of the enemy's country and the position of their forces.

The Signal Corps, under Col. James Allen, rendered very excellent service, especially in the use of ocean cables, and the field telegraph and signal detachment under charge of Major Reber rendered most important service. Telegraph and telephone lines were extended hundreds of miles and followed close to the picket and skirmish lines.

On returning to the United States from Porto Rico, Lieutenant-Colonel Rowan and Lieut. Charles F. Parker made a journey of nearly 2,000 miles through the territory of Cuba, and obtained most valuable information concerning that country and the present condition of its inhabitants, which is both of political and military interest.

I trust that the services of both officers and soldiers in these campaigns may be appreciated by a generous Government and a grateful people. I have recommended a small list of officers who have rendered conspicuous, distinguished, and gallant services for promotion and brevets, and I hope that these recommendations may be favorably considered. I may possibly desire to add a few names to the list already submitted.

It is gratifying to record that during the war not a single defeat has been met, and not a prisoner, color, gun, or rifle has been captured by the enemy. In this respect the war has been most remarkable, and, perhaps, unparalleled. Under all circumstances and in spite of many most trying difficulties the troops have maintained the fortitude of the American character and the honor of their arms.

While but a small portion of the available forces of the United States—approximately, 52,000 men—has been on foreign soil and engaged in fighting a foreign foe, those that have been in the presence of the enemy have fairly demonstrated the character and fortitude of the military forces of the United States.

The experience of the last few months, I trust, will be valuable to the people and Government of the United States. The value of proper defenses for our ports, harbors, and seaport cities, of inestimable wealth, has been demonstrated; and I trust that the system already adopted for coast defenses, the completion of which has been so long delayed, may be carried out without unnecessary delay. I have urged the importance of this in my annual reports for the last thirteen years.

For several years I have urged the importance of the Government's adopting a standard of strength for its military forces that should be commensurate with the interests of the Government in its growth and development, and proportionate to its population and wealth. Spasmodic vibration from a weak and ineffective army to one of gigantic proportions does not seem to be best for the welfare and safety of the nation, and I think it more judicious for the Government to fix a certain percentage of trained military men in proportion to the population. The Army would thereby have a more healthy growth as the nation develops. In fact, this system, if once adopted, would be as practicable for one hundred years as for a single decade. The art of war was never so much an exact science as at the present time. The appliances used in modern warfare are constantly changing, and are steadily increasing in effective force; so that it is of the utmost importance that the Government should have the most skilled and efficient forces practicable. I therefore renew my

former recommendation that the Government authorize enlistments in the Army at the rate of one soldier to every 1,000 of the population. This would practically continue in service the same number as does the act of Congress approved April 26, 1898, authorizing the increase of the Regular Army, provided for, viz, 62,579 men; but unfortunately there was a provision in that act which required the Army to be reduced to its former peace basis, which was entirely inadequate to the needs and interests of the Government.

I also recommend that Congress authorize an auxiliary force of native troops, to be officered principally by United States Army officers, for service in Porto Rico, Cuba, and the Philippine Islands, not to exceed two soldiers to every one thousand of the population of those islands. This would give the United States a most valuable auxiliary force. It would pacify the native elements of the islands, and would be in the interests of economy and good government. This force could be used in a way similar to the mounted police in Canada and the British forces in Egypt and India.

I recommend that Congress be requested to take immediate action upon this question of increasing the Army, as I consider it of vital importance. If the system I have suggested is adopted it would give us very nearly an available force of 100,000 men, and would enable the volunteers who enlisted for the war to be returned to their homes without delay.

I desire to make special mention of the officers on my staff, Brig. Gen. J. C. Gilmore, Col. Charles R. Greenleaf, and Lieut. Col. Marion P. Maus, who rendered very important services at Santiago de Cuba and in Porto Rico, being exposed at the former place to all the dangers of yellow-fever camps; and also Brig. Gen. Roy Stone, Col. James Allen, Lieut. Col. J. W. Clous, Lieut. Col. Arthur L. Wagner, Lieut. Col. William M. Black, Lieut. Col. Francis Michler, Lieut. Col. Andrew S. Rowan, Lieut. Col. Samuel Reber, Maj. W. H. Daly, Maj. John G. Black, and Capt. Henry W. Whitney, who rendered most efficient and valuable services in Porto Rico.

Accompanying this report are two maps of Cuba and one of Porto Rico.

Very respectfully, your obedient servant,

NELSON A. MILES,
Major-General, Commanding.

THE SECRETARY OF WAR.

REPORT OF MAJOR-GENERAL MERRITT, COMMANDING THE TROOPS IN THE PHILIPPINES.

STEAMSHIP CHINA,

At Sea, August 31, 1898.

SIR: I have the honor to submit the following report of the operations of the troops under my command in the expedition to the Philippine Islands, the campaign ending with the capture of Manila, August 13, 1898, and the subsequent occupation of the city:

In obedience to the order assigning me to the command of the Department of the Pacific, and the special instructions from the President, furnished me by the honorable Secretary of War, under date of May 28, 1898, I embarked with my staff from

San Francisco on the steamer *Newport* June 29 and arrived at Cavite, Manila Bay, July 25, 1898. The military situation in Manila Bay I found to be as follows:

The American fleet of war ships, commanded by Rear-Admiral George Dewey, was anchored in line off Cavite and just outside of the transports and supply vessels engaged in the military service. The distinguished admiral above mentioned was in full control of the navigation of the bay, and his vessels passed and repassed within range of the water batteries of the town of Manila without drawing the fire of the enemy.

Brig. Gen. Thomas M. Anderson, United States Volunteers, was in command of the military forces prior to my arrival, and from his report I learned that his headquarters were in Cavite and that the troops were disposed as follows:

The Second Oregon, detachments of California Heavy Artillery, Twenty-third Infantry, and Fourteenth Infantry occupied the town of Cavite; while Brig. Gen. F. V. Greene, United States Volunteers, was encamped with his brigade, consisting of the Eighteenth Infantry; Third United States Artillery; Company A, Engineer Battalion; First Colorado, First California, First Nebraska, Tenth Pennsylvania, and Batteries A and B of the Utah Artillery, along the line of the bay shore near the village of Paranaque, about 5 miles by water and 25 miles by the roads from Cavite.

Immediately after my arrival I visited General Greene's camp and made a reconnaissance of the position held by the Spanish, and also the opposing lines of the insurgent forces, hereafter to be described. I found General Greene's command encamped on a strip of sandy land running parallel to the shore of the bay and not far distant from the beach, but owing to the great difficulties of landing supplies, the greater portion of the force had shelter tents only and were suffering many discomforts, the camp being situated in a low, flat place, without shelter from the heat of the tropical sun or adequate protection during the terrific downpours of rain so frequent at this season. I was at once struck by the exemplary spirit of patient, even cheerful, endurance shown by the officers and men under such circumstances, and this feeling of admiration for the manner in which the American soldier, volunteer and regular alike, accept the necessary hardships of the work they have undertaken to do has grown and increased with every phase of the difficult and trying campaign which the troops of the Philippine expedition have brought to such a brilliant and successful conclusion.

I discovered during my visit to General Greene that the left or north flank of his brigade camp extended to a point on the "Calle Real" about 3,200 yards from the outer line of Spanish defenses of the city of Manila. This Spanish line began at the powder magazine, or old Fort San Antonio, within a hundred yards of the beach and just south of the Malate suburb of Manila, and stretched away to the Spanish left in more or less detached works, eastward, through swamps and rice fields, covering all the avenues of approach to the town and encircling the city completely.

The Filipinos, or insurgent forces at war with Spain, had, prior to the arrival of the American land forces, been waging a desultory warfare with the Spaniards for several months, and were at the time of my arrival in considerable force, variously estimated and never accurately ascertained, but probably not far from 12,000 men. These troops, well supplied with small arms, with plenty of ammunition and several

field guns, had obtained positions of investment opposite to the Spanish line of detached works throughout their entire extent; and on the particular road called the "Calle Real," passing along the front of General Greene's brigade camp and running through Malate to Manila, the insurgents had established an earthwork or trench within 800 yards of the powder-magazine fort. They also occupied as well the road to the right, leading from the village of Pasay, and the approach by the beach was also in their possession. This anomalous state of affairs, namely, having a line of quasi-hostile native troops between our forces and the Spanish position, was, of course, very objectionable, but it was difficult to deal with, owing to the peculiar condition of our relations with the insurgents, which may be briefly stated as follows:

Shortly after the naval battle of Manila Bay the principal leader of the insurgents, Gen. Emilio Aguinaldo, came to Cavite from Hongkong, and, with the consent of our naval authorities, began active work in raising troops and pushing the Spaniards in the direction of the city of Manila. Having met with some success, and the natives flocking to his assistance, he proclaimed an independent government of republican form, with himself as president, and at the time of my arrival in the islands the entire edifice of executive and legislative departments and subdivision of territory for administrative purposes had been accomplished, at least on paper, and the Filipinos held military possession of many points in the islands other than those in the vicinity of Manila.

As General Aguinaldo did not visit me on my arrival nor offer his services as a subordinate military leader, and as my instructions from the President fully contemplated the occupation of the islands by the American land forces, and stated that "the powers of the military occupant are absolute and supreme and immediately operate upon the political condition of the inhabitants," I did not consider it wise to hold any direct communication with the insurgent leader until I should be in possession of the city of Manila, especially as I would not until then be in a position to issue a proclamation and enforce my authority, in the event that his pretensions should clash with my designs.

For these reasons the preparations for the attack on the city were pressed and military operations conducted without reference to the situation of the insurgent forces. The wisdom of this course was subsequently fully established by the fact that when the troops of my command carried the Spanish intrenchments, extending from the sea to the Pasay road, on the extreme Spanish right, we were under no obligations, by prearranged plans of mutual attack, to turn to the right and clear the front still held against the insurgents, but were able to move forward at once and occupy the city and suburbs.

To return to the situation of General Greene's brigade as I found it on my arrival, it will be seen that the difficulty in gaining an avenue of approach to the Spanish line lay in the fact of my disinclination to ask General Aguinaldo to withdraw from the beach and the "Calle Real," so that Greene could move forward. This was overcome by instructions to General Greene to arrange, if possible, with the insurgent brigade commander in his immediate vicinity to move to the right and allow the American forces unobstructed control of the roads in their immediate front. No objection was made, and accordingly General Greene's brigade threw forward a

heavy outpost line on the "Calle Real" and the beach and constructed a trench, in which a portion of the guns of the Utah batteries was placed.

The Spanish, observing this activity on our part, made a very sharp attack with infantry and artillery on the night of July 31. The behavior of our troops during this night attack was all that could be desired, and I have, in cablegrams to the War Department, taken occasion to commend by name those who deserve special mention for good conduct in the affair. (For particulars of the action see the appended reports of the brigade commander.) Our position was extended and strengthened after this and resisted successfully repeated night attacks, our forces suffering, however, considerable loss in wounded and killed, while the losses of the enemy, owing to the darkness, could not be ascertained. (See appended reports.)

The strain of the night fighting and the heavy details for outpost duty made it imperative to reenforce General Greene's troops with General MacArthur's brigade, which had arrived in transports on the 31st of July. The difficulties of this operation can hardly be overestimated. The transports were at anchor off Cavite, 5 miles from a point on the beach where it was desired to disembark the men. Several squalls, accompanied by floods of rain, raged day after day, and the only way to get the troops and supplies ashore was to load them from the ship's side into native lighters (called "cascos") or small steamboats, move them to a point opposite the camp, and then disembark them through the surf in small boats, or by running the lighters head on to the beach. The landing was finally accomplished, after days of hard work and hardship; and I desire here to express again my admiration for the fortitude and cheerful willingness of the men of all commands engaged in this operation.

Upon the assembly of MacArthur's brigade in support of Greene's, I had about 8,500 men in position to attack, and I deemed the time had come for final action. During the time of the night attacks I had communicated my desire to Admiral Dewey that he would allow his ships to open fire on the right of the Spanish line of intrenchments, believing that such action would stop the night firing and loss of life, but the admiral had declined to order it unless we were in danger of losing our position by the assaults of the Spanish, for the reason that, in his opinion, it would precipitate a general engagement, for which he was not ready. Now, however, the brigade of General MacArthur was in position and the *Monterey* had arrived, and under date of August 6 Admiral Dewey agreed to my suggestion that we should send a joint letter to the Captain-General notifying him that he should remove from the city all noncombatants within forty-eight hours, and that operations against the defenses of Manila might begin at any time after the expiration of that period.

This letter was sent August 7 (see copy appended), and a reply was received the same date (copy hereto appended), to the effect that the Spanish were without places of refuge for the increased numbers of wounded, sick women, and children now lodged within the walls. On the 9th a formal joint demand for the surrender of the city was sent in. (See copy hereto appended.) This demand was based upon the hopelessness of the struggle on the part of the Spaniards, and that every consideration of humanity demanded that the city should not be subjected to bombardment under such circumstances. The Captain-General's reply, of same date (see copy attached), stated that the council of defense had declared that the demand could

not be granted; but the Captain-General offered to consult his Government if we would allow him the time strictly necessary for the communications by way of Hongkong.

This was declined on our part for the reason that it could, in the opinion of the admiral and myself, lead only to a continuance of the situation, with no immediate result favorable to us, and the necessity was apparent and very urgent that decisive action should be taken at once to compel the enemy to give up the town, in order to relieve our troops from the trenches and from the great exposure to unhealthy conditions which were unavoidable in a bivouac during the rainy season. The seacoast batteries in defense of Manila are so situated that it is impossible for ships to engage them without firing into the town, and as the bombardment of a city filled with women and children, sick and wounded, and containing a large amount of neutral property, could only be justified as a last resort, it was agreed between Admiral Dewey and myself that an attempt should be made to carry the extreme right of the Spanish line of intrenchments in front of the positions at that time occupied by our troops, which, with its flank on the seashore, was entirely open to the fire of the navy.

It was not my intention to press the assault at this point, in case the enemy should hold it in strong force, until after the navy had made practicable breaches in the works and shaken the troops holding them, which could not be done by the army alone, owing to the absence of siege guns. This is indicated fully in the orders and memorandum of attack hereto appended. It was believed, however, as most desirable, and in accordance with the principles of civilized warfare, that the attempt should be made to drive the enemy out of his intrenchments before resorting to the bombardment of the city.

By orders issued some time previously MacArthur's and Greene's brigades were organized as the Second Division of the Eighth Army Corps, Brig. Gen. Thomas M. Anderson commanding; and in anticipation of the attack General Anderson moved his headquarters from Cavite to the brigade camps and assumed direct command in the field. Copies of the written and verbal instructions, referred to above and appended hereto, were given to the division and brigade commanders on the 12th, and all the troops were in position on the 13th at an early hour in the morning.

About 9 a. m. on that day our fleet steamed forward from Cavite and before 10 a. m. opened a hot and accurate fire of heavy shells and rapid-fire projectiles on the sea flank of the Spanish intrenchments at the powder magazine fort, and at the same time the Utah batteries, in position in our trenches near the "Calle Real," began firing with great accuracy. At 10.25, on a prearranged signal from our trenches that it was believed our troops could advance, the navy ceased firing, and immediately a light line of skirmishers from the Colorado regiment of Greene's brigade passed over our trenches and deployed rapidly forward, another line from the same regiment from the left flank of our earthworks advancing swiftly up the beach in open order. Both these lines found the powder magazine fort and the trenches flanking it deserted, but as they passed over the Spanish works they were met by a sharp fire from a second line situated in the streets of Malate, by which a number of men were killed and wounded, among others the soldier who pulled down the Spanish colors still flying on the fort and raised our own. (See detailed report of brigade commander.)

The works of the second line soon gave way to the determined advance of Greene's troops, and that officer pushed his brigade rapidly through Malate and over the bridges to occupy Binondo and San Miguel, as contemplated in his instructions. In the meantime the brigade of General MacArthur, advancing simultaneously on the Pasay road, encountered a very sharp fire, coming from the blockhouses, trenches, and woods in his front, positions which it was very difficult to carry, owing to the swampy condition of the ground on both sides of the roads and the heavy undergrowth concealing the enemy. With much gallantry and excellent judgment on the part of the brigade commander and the troops engaged these difficulties were overcome with a minimum loss (see report of brigade commander appended), and MacArthur advanced and held the bridges and the town of Malate, as was contemplated in his instructions.

The city of Manila was now in our possession, excepting the walled town, but shortly after the entry of our troops into Malate a white flag was displayed on the walls, whereupon Lieut. Col. C. A. Whittier, United States Volunteers, of my staff, and Lieutenant Brunby, United States Navy, representing Admiral Dewey, were sent ashore to communicate with the Captain-General. I soon personally followed these officers into the town, going at once to the palace of the Governor-General, and there, after a conversation with the Spanish authorities, a preliminary agreement of the terms of capitulation was signed by the Captain-General and myself. This agreement was subsequently incorporated into the formal terms of capitulation, as arranged by the officers representing the two forces, a copy of which is hereto appended and marked.

Immediately after the surrender the Spanish colors on the sea front were hauled down and the American flag displayed and saluted by the guns of the Navy. The Second Oregon Regiment, which had proceeded by sea from Cavite, was disembarked and entered the walled town as a provost guard, and the colonel was directed to receive the Spanish arms and deposit them in places of security. The town was filled with the troops of the enemy driven in from the intrenchments, regiments formed and standing in line in the streets, but the work of disarming proceeded quietly and nothing unpleasant occurred.

In leaving the subject of the operations of the 13th, I desire here to record my appreciation of the admirable manner in which the orders for attack and the plan for occupation of the city were carried out by the troops exactly as contemplated. I submit that for troops to enter under fire a town covering a wide area, to rapidly deploy and guard all principal points in the extensive suburbs, to keep out the insurgent forces pressing for admission, to quietly disarm an army of Spaniards more than equal in numbers to the American troops, and finally by all this to prevent entirely all rapine, pillage, and disorder, and gain entire and complete possession of a city of 300,000 people filled with natives hostile to the European interests, and stirred up by the knowledge that their own people were fighting in the outside trenches, was an act which only the law-abiding, temperate, resolute American soldier, well and skillfully handled by his regimental and brigade commanders, could accomplish.

Prior to the action on the 13th, General Order No. 3, hereto appended, was issued, and a copy was sent to Aguinaldo's representative as an indication of the conduct that would be expected of them in the event that any bands of the insurgents should

effect an entrance to the city. After the action, General Order No. 6, here appended, was published to the troops as a sincere expression of my appreciation of their conduct.

The amount of public funds and the numbers of the prisoners of war and arms taken have been reported in detail by cable. It will be observed that the trophies of Manila were nearly \$900,000, 13,000 prisoners, and 22,000 arms.

Immediately after the surrender my headquarters were established in the ayuntamiento, or city office of the Governor-General, where steps were at once inaugurated to set up the government of military occupancy. A proclamation was issued and published in all the newspapers of the city in English, Spanish, and native dialect, and one of my two very efficient brigade commanders, General MacArthur, was appointed provost-marshal-general and civil governor of the town, while the other, General Greene, was selected for the duties of intendente general de hacienda or director of financial affairs, the collectors of customs and internal revenue reporting to him. Lieutenant-Colonel Whittier, United States Volunteers, of my staff, an efficient business man of long experience, was appointed collector of the customs and a bonded officer, Major Whipple, of the pay department, was announced as custodian of the public funds, to whom all Spanish money derived from any source was to be transmitted for safe-keeping and disbursement under orders.

On the 16th a cablegram containing the text of the President's proclamation directing a cessation of hostilities was received by me, and at the same time an order to make the fact known to the Spanish authorities, which was done at once. This resulted in a formal protest from the Governor-General in regard to the transfer of public funds then taking place, on the ground that the proclamation was dated prior to the surrender. To this I replied that the status quo in which we were left with the cessation of hostilities was that existing at the time of the receipt by me of the official notice, and that I must insist upon the delivery of the funds. The delivery was made under protest.

After the issue of my proclamation and the establishment of my office as military governor, I had direct written communication with General Aguinaldo on several occasions. He recognized my authority as military governor of the town of Manila and suburbs, and made professions of his willingness to withdraw his troops to a line which I might indicate, but at the same time asking certain favors for himself. The matters in this connection had not been settled at the date of my departure. Doubtless much dissatisfaction is felt by the rank and file of the insurgents that they have not been permitted to enjoy the occupancy of Manila, and there is some ground for trouble with them owing to that fact; but, notwithstanding many rumors to the contrary, I am of the opinion that the leaders will be able to prevent serious disturbances, as they are sufficiently intelligent and educated to know that to antagonize the United States would be to destroy their only chance of future political improvement.

On the 28th instant I received a cablegram directing me to transfer my command to Major-General Otis, United States Volunteers, and to proceed to Paris, France, for conference with the peace commissioners. I embarked on the steamer *China* on the 30th in obedience to these instructions.

In view of my short occupancy of the office of military governor (sixteen days),

I shall leave to my successor to report in detail and at length on the many important matters of administration and questions affecting trade and commerce which it was not difficult to see would soon arise.

I may add, however, that great changes for the better have taken place in Manila since the occupancy of the city by the American troops. The streets have been cleaned under the management of General MacArthur, and the police, under Colonel Reeve, Thirteenth Minnesota, were most proficient in preserving order. A stranger to the city might easily imagine that the American forces had been in control for months rather than days.

In concluding this report I wish formally to declare my indebtedness for the success of the expedition to the brigade commanders, the division commander, the members of my staff, and my personal aids. While we were still in San Francisco these latter were sent to me to report to the commanders of the different organizations in camp, and were busy assisting in instructing the newly arrived troops. That they did good service in this direction I have the assurance of all concerned.

Brig. Gen. R. P. Hughes, my inspector-general at San Francisco, was especially noticeable in accomplishing the instruction of the green troops that came to the city, many of them without arms, clothing, or equipment of any kind. His services will undoubtedly be duly recognized by Major-General Otis, with whom I left him to continue the good work.

I desire especially to express my acknowledgments to Brigadier-General Babcock, my adjutant-general and chief of staff, for his most valuable services from the inception of the campaign in San Francisco to the close of the work at the present time. This officer is too well known to require special mention of his services in any one direction. He was my right arm, not only in the office but in the field, and much of the success that has attended the expedition is due to his individual efforts.

I desire especially to mention Major McClure and Major Whipple, of the Pay Department, who volunteered their services after they had completed their legitimate duties, and performed excellent work whenever called upon. Major McClure was especially important in his services immediately after the surrender, taking long rides under my orders to the Spanish lines, and bearing instructions to them which resulted in effecting their withdrawal in such manner as to prevent the incursion of the insurgents in the northern portions of the city. Other officers have been named in my special reports and have been recommended for brevets and promotion.

I especially call attention to the services of Captain Mott, as mentioned in the report of Brigadier-General Greene. He was cheerful, willing, intelligent, and energetic in the discharge of the multifarious duties imposed upon him in connection with our troops and trenches during the rainy season, and in the final action showed those rare characteristics which stamp him as a very superior soldier.

It is possible, in the hurry attending the making up of this report, that some matters to which I would call attention have been neglected. If this proves to be true I desire to retain the right to make ample amendment in future reports.

I desire, in conclusion, to express my sincere thanks on behalf of my command and myself for the most welcome cablegram of congratulation from His Excellency the

President of the United States, which was immediately published to the troops in General Order No. 11, hereto appended.

Very respectfully,

WESLEY MERRITT,
Major-General, U. S. A.

HEADQUARTERS U. S. LAND AND NAVAL FORCES,
Manila Bay, Philippine Islands, August 7, 1898.

The General in Chief Commanding Spanish forces in Manila.

SIR: We have the honor to notify your excellency that operations of the land and naval forces of the United States against the defenses of Manila may begin at any time after the expiration of forty-eight hours from the hour of receipt by you of this communication, or sooner if made necessary by an attack on your part.

This notice is given in order to afford you an opportunity to remove all noncombatants from the city.

Very respectfully,

WESLEY MERRITT,
*Major-General, United States Army,
Commanding land forces of the United States.*

GEORGE DEWEY,
*Rear-Admiral, United States Navy,
Commanding United States naval force on Asiatic station.*

[Translation.]

MANILA, August 7, 1898.

The Governor-General and Captain-General of the Philippines to the Major-General of the Army and the Rear-Admiral of the Navy, commanding, respectively, the military and naval forces of the United States.

GENTLEMEN: I have the honor to inform your excellencies that at half past 12 to-day I received the notice with which you favor me, that after forty-eight hours have elapsed you may begin operations against this fortified city, or at an earlier hour if the forces under your command are attacked by mine.

As your notice is sent for the purpose of providing for the safety of noncombatants, I give thanks to your excellencies for the humane sentiments you have shown, and state that, finding myself surrounded by insurrectionary forces, I am without places of refuge for the increased numbers of wounded, sick, women, and children who are now lodged within the walls.

Very respectfully, and kissing the hands of your excellencies,

FERMIN JAUDENES,
Governor-General and Captain-General of the Philippines.

HEADQUARTERS U. S. LAND AND NAVAL FORCES,
Manila Bay, Philippine Islands, August 9, 1898.

The Governor-General and Captain-General of the Philippines.

SIR: The inevitable suffering in store for the wounded, sick, women, and children, in the event that it becomes our duty to reduce the defenses of the walled town in which they are gathered, will, we feel assured, appeal successfully to the sympathies of a general capable of making the determined and prolonged resistance, which your excellency has exhibited after the loss of your naval forces and without hope of succor.

We therefore submit, without prejudice to the high sentiments of honor and duty which your excellency entertains, that, surrounded on every side as you are by a constantly increasing force, with a powerful fleet in your front, and deprived of all prospect of reenforcement and assistance, a most useless sacrifice of life would result in the event of an attack, and therefore every consideration of humanity makes it imperative that you should not subject your city to the horrors of a bombardment. Accordingly, we demand the surrender of the city of Manila and the Spanish forces under your command.

Very respectfully,

W. MERRITT,
*Major-General, United States Army,
Commanding Land Forces of the United States.*

GEORGE DEWEY,
*Rear-Admiral, United States Navy,
Commanding United States Naval Force on Asiatic Station.*

HEADQUARTERS U. S. LAND AND NAVAL FORCES,
Manila Bay, August 10, 1898.

The Governor-General and Captain-General of the Philippine Islands.

SIR: We have the honor to acknowledge the communication of your excellency of the 8th instant, in which you suggest your desire to consult your Government in regard to the exceptional circumstances in your city, provided the time to do so can be granted by us.

In reply we respectfully inform your excellency that we decline to grant the time requested.

Very respectfully,

WESLEY MERRITT,
Major-General, U. S. A., Commanding U. S. Land Forces.

GEORGE DEWEY,
*Rear-Admiral, U. S. Navy,
 Commanding U. S. Naval Forces, Asiatic Station*

[Translation.]

MANILA, August 9, 1898.

The Governor-General and Captain-General of the Philippines to the Major-General of the Army and the Rear-Admiral of the Navy, commanding, respectively, the Military and Naval Forces of the United States.

GENTLEMEN: Having received an intimation from your excellencies that, in obedience to sentiments of humanity to which you appeal and which I share, I should surrender this city and the forces under my orders, I have assembled the council of defense, which declares that your request can not be granted; but taking account of the most exceptional circumstances existing in this city, which your excellencies recite and which I unfortunately have to admit, I would consult my Government, if your excellencies will grant the time strictly necessary for this communication, by way of Hongkong.

Very respectfully,

FERMIN JAUDENES,
Governor-General and Captain-General of the Philippines.

The undersigned, having been appointed a commission to determine the details of the capitulation of the city and defenses of Manila and its suburbs and the Spanish forces stationed therein, in accordance with the agreement entered into the previous day by Maj. Gen. Wesley Merritt, United States Army, American commander in chief in the Philippines, and His Excellency Don Fermin Jaudenes, acting general in chief of the Spanish army in the Philippines, have agreed upon the following:

1. The Spanish troops, European and native, capitulate with the city and its defenses, with all the honors of war, depositing their arms in the places designated by the authorities of the United States, and remaining in the quarters designated and under the orders of their officers, and subject to the control of the aforesaid United States authorities, until the conclusion of a treaty of peace between the two belligerent nations.

All persons included in the capitulation remain at liberty, the officers remaining in their respective homes, which shall be respected as long as they observe the regulations prescribed for their government and the laws in force.

2. Officers shall retain their side arms, horses, and private property.

3. All public horses and public property of all kinds shall be turned over to staff officers designated by the United States.

4. Complete returns in duplicate of men by organizations and full lists of public property and stores shall be rendered to the United States within ten days from this date.

5. All questions relating to the repatriation of officers and men of the Spanish forces and of their families, and of the expenses which said repatriation may occasion, shall be referred to the Government of the United States at Washington.

Spanish families may leave Manila at any time convenient to them.

The return of the arms surrendered by the Spanish forces shall take place when they evacuate the city or when the American Army evacuates.

6. Officers and men included in the capitulation shall be supplied by the United States, according to their rank, with rations and necessary aid as though they were prisoners of war, until the conclusion of a treaty of peace between the United States and Spain.

All the funds in the Spanish treasury and all other public funds shall be turned over to the authorities of the United States.

7. This city, its inhabitants, its churches and religious worship, its educational establishments, and its private property of all descriptions are placed under the special safeguard of the faith and honor of the American Army.

F. V. GREENE,
Brigadier-General of Volunteers, United States Army.

B. P. LAMBERTON,
Captain, United States Navy.

CHARLES A. WHITTIER,
Lieutenant-Colonel and Inspector-General.

E. H. CROWDER,
Lieutenant-Colonel and Judge-Advocate.

NICHOLAS DE LA PETRA,
Auditor General Exomo.

CARLOS,
Coronel de Ingenieros.

JOSE,
Coronel de Estado Major.

HEADQUARTERS DEPARTMENT OF THE PACIFIC,
August 14, 1898.

To the people of the Philippines:

I. War has existed between the United States and Spain since April 21 of this year. Since that date you have witnessed the destruction by an American fleet of the Spanish naval power in these islands, the fall of the principal city, Manila, and its defenses, and the surrender of the Spanish army of occupation to the forces of the United States.

II. The commander of the United States forces now in possession has instructions from his Government to assure the people that he has not come to wage war upon them, nor upon any part or faction among them, but to protect them in their homes, in their employments, and in their personal and religious rights. All persons who, by active aid or honest submission, cooperate with the United States in its efforts to give effect to this beneficent purpose will receive the reward of its support and protection.

III. The government established among you by the United States is a government of military occupation; and for the present it is ordered that the municipal laws, such as affect private rights of persons and property, regulate local institutions, and provide for the punishment of crime shall be considered as continuing in force, so far as compatible with the purposes of military government, and that they be administered through the ordinary tribunals substantially as before occupation, but by officials appointed by the Government of occupation.

IV. A provost-marshal-general will be appointed for the city of Manila and its outlying districts. This territory will be divided into subdistricts, and there will be assigned to each a deputy provost-marshal.

The duties of the provost-marshal-general and his deputies will be set forth in detail in future orders. In a general way they are charged with the duty of making arrests of military as well as civil offenders, sending such of the former class as are triable by courts-martial to their proper commands, with statements of their offenses and names of witnesses, and detaining in custody all other offenders for trial by military commission, provost courts, or native criminal courts, in accordance with law and the instructions hereafter to be issued.

V. The port of Manila, and all other ports and places in the Philippines which may be in the actual possession of our land and naval forces will be open, while our military occupation may continue, to the commerce of all neutral nations as well as our own, in articles not contraband of war, and upon payment of the prescribed rates of duty which may be in force at the time of the importation.

VI. All churches and places devoted to religious worship and to the arts and sciences, all educational institutions, libraries, scientific collections, and museums are, so far as possible, to be protected; and all destruction or intentional defacement of such places or property, of historical monuments, archives, or works of science and art, is prohibited, save when required by urgent military necessity. Severe punishment will be meted out for all violations of this regulation.

The custodians of all property of the character mentioned in this section will make prompt returns thereof to these headquarters, stating character and location, and embodying such recommendations as they may think proper for the full protection of the properties under their care and custody, that proper orders may issue enjoining the cooperation of both military and civil authorities in securing such protection.

VII. The commanding general, in announcing the establishment of military government and in entering upon his duty as military governor in pursuance of his appointment as such by the Government of the United States, desires to assure the people that so long as they preserve the peace and perform their duties toward the representatives of the United States they will not be disturbed in their persons and property, except in so far as may be found necessary for the good of the service of the United States and the benefit of the people of the Philippines.

WESLEY MERRITT,
Major-General, United States Army, Commanding.

REPORT OF MAJOR-GENERAL SHAFER, COMMANDING THE TROOPS IN CUBA.

WASHINGTON, D. C., *September 13, 1898.*

ADJUTANT-GENERAL OF THE ARMY,

Washington, D. C.

SIR: I have the honor to submit the following report of the campaign which terminated in the fall of Santiago de Cuba, and the adjacent territory, and the establishment of the military government therein:

The expedition was undertaken in compliance with telegraphic instructions of May 30, 1898, from Headquarters of the Army, in which it was stated "Admiral Schley reports that two cruisers and two torpedo boats have been seen in the harbor of Santiago. Go with your force to capture garrison at Santiago, and assist in capturing harbor and fleet."

On this date there were a large number of transports in Port Tampa Bay, which had been collected for the purpose of an expedition which it had been previously contemplated I should command, and for such other emergencies as might arise. Orders were immediately given for loading aboard those transports the necessary subsistence and quartermaster's supplies, and for the embarkation of the authorized number of troops and their material. General Orders, No. 5, from these headquarters, indicate the organizations it was at first proposed to take. The order is as follows:

GENERAL ORDERS, }
No. 5. }

HEADQUARTERS FIFTH ARMY CORPS,
Tampa, Fla., May 31, 1898.

The following troops will hold themselves in readiness to move immediately on board transports upon notification from these headquarters:

1. The Fifth Army Corps.
- 2 The Battalion of Engineers.
3. The detachment of the Signal Corps.
4. Five squadrons of cavalry, to be selected by the commanding general of the cavalry division, in accordance with instructions previously given.
5. Four batteries of light artillery, to be commanded by a major to be selected by the commanding officer of the Light Artillery Brigade.
6. Two batteries of heavy artillery, to be selected by the commanding officer of the siege artillery battalion, with eight siege guns and eight field mortars.
7. The Battalion of Engineers, the Infantry and Cavalry, will be supplied with 500 rounds of ammunition per man.
8. All troops will carry, in addition to the fourteen days' field rations now on hand, ten days' travel rations.
9. The minimum allowance of tentage and baggage, as prescribed in General Orders 54, Adjutant-General's Office, current series, will be taken.
10. In addition to the rations specified in paragraph 8 of this order, the Chief Commissary will provide sixty days' field rations for the entire command.
11. All recruits' and extra baggage, the latter to be stored, carefully piled and covered, will be left in camp, in charge of a commissioned officer, to be selected by the regimental commander. Where there are no recruits available, the necessary guard only will be left.

12. Travel rations will be drawn, at once, by the several commands, as indicated in paragraph 8.

By command of Major-General Shafter:

E. J. MCCLERNAND,
Assistant Adjutant-General.

This order was afterwards changed to include 12 squadrons of cavalry, all of which were dismounted, because of lack of transportation for the animals, and because it was believed from the best sources of information obtainable that mounted cavalry could not operate efficiently in the neighborhood of Santiago. This was found subsequently to be correct.

The facilities at Tampa, and Port Tampa, for embarking the troops and the large amount of supplies required were inadequate, and with the utmost effort it was not possible to accomplish this work as quickly as I hoped and desired.

On the evening of June 7, I received orders to sail without delay, but not with less than 10,000 men.

The orders referred to caused one division composed of volunteer troops—commanded by Brigadier-General Snyder, and which it had been intended to include in my command—to be left behind. I was joined, however, by Brigadier-General Bates, who had already arrived on transports from Mobile, Ala., with the Third and Twentieth Infantry, and one squadron of the Second Cavalry, with their horses—the latter being the only mounted troops in my command.

After some of the transports had already reached the lower bay, telegraphic instructions were received from the Honorable Secretary of War directing that the sailing of the expedition be delayed waiting further orders. This delay was occasioned by the Navy reporting that a Spanish war vessel had been sighted in the Nicholas Channel. The ships in the lower bay were immediately recalled. On the next day, in compliance with instructions from the Adjutant-General of the Army, the necessary steps were taken to increase the command to the full capacity of the transports, and the expedition sailed on June 14 with 815 officers and 16,072 enlisted men.

The passage to Santiago was generally smooth and uneventful. The health of the command remained remarkably good, notwithstanding the fact that the conveniences on many of the transports, in the nature of sleeping accommodations, space for exercise, closet accommodations, etc., were not all that could have been desired. While commenting upon this subject, it is appropriate to add that the opinion was general throughout the army that the travel ration should include tomatoes, beginning with the first day, and that a small quantity of canned fruit would prove to be a most welcome addition while traveling at sea in the tropics; if the future policy of our Government requires much transportation for the military forces by sea, definite arrangements should be determined upon to provide the necessary hammock accommodations for sleeping. Hammocks interfere immeasurably less than bunks with the proper ventilation of the ships, and during the day can be easily removed, thus greatly increasing space for exercise; moreover, they greatly diminish the danger of fire.

While passing along the north coast of Cuba, one of the two barges we had in tow broke away during the night, and was not recovered. This loss proved to be very serious, for it delayed and embarrassed the disembarkation of the army. On the morning of June 20, we arrived off Guantanamo Bay, and about noon reached the

vicinity of Santiago, where Admiral Sampson came on board my headquarter transport. It was arranged between us to visit in the afternoon the Cuban general, Garcia, at Aserraderos, about 18 miles to the west of the Morro. During the interview General Garcia offered the services of his troops, comprising about 4,000 men, in the vicinity of Aserraderos, and about 500 under General Castillo at the little town of Cujababo, a few miles east of Daiquiri. I accepted his offer, impressing it upon him that I could exercise no military control over him except such as he would concede, and as long as he served under me I would furnish him rations and ammunition.

Ever since the receipt of my orders I had made a study of the terrain surrounding Santiago, gathering information mainly from former residents of the city, several of whom were on the transports with me. At this interview all the possible points of attack were for the last time carefully weighed, and then, for the information and guidance of Admiral Sampson and General Garcia, I outlined the plan of campaign, which was as follows:

With the assistance of the small boats of the navy, the disembarkation was to commence on the morning of the 22d at Daiquiri. On the 21st 500 insurgent troops were to be transferred from Aserraderos to Cujababo, increasing the force already there to 1,000 men. This force under General Castillo was to attack the Spanish force at Daiquiri in the rear at the time of disembarkation. This movement was successfully made. To mislead the enemy as to the real point of our intended landing, I requested General Garcia to send a small force (about 500 men), under General Rabi, to attack the little town of Cabanas, situated on the coast a few miles to the west of the entrance to Santiago Harbor, and where it was reported the enemy had several hundred men intrenched, and from which a trail leads around the west side of the bay to Santiago.

I also requested Admiral Sampson to send several of his war ships, with a number of my transports, opposite this town for the purpose of making a show of disembarking there. In addition I asked the admiral to cause a bombardment to be made at Cabañas, and also at the forts around the Morro, and at the towns of Aguadores, Siboney, and Daiquiri. The troops under General Garcia remaining at Aserraderos were to be transferred to Daiquiri or Siboney, on the 24th. This was successfully accomplished at Siboney.

These movements committed me to approaching Santiago from the east over a narrow road, at first in some places not better than a trail, running from Daiquiri through Siboney and Sevilla, and making attack from that quarter. This, in my judgment, was the only feasible plan, and subsequent information and results confirmed my judgment.

On the morning of the 22d the army commenced to disembark at Daiquiri. The following general order indicates the manner in which the troops left the transports, and the amount of supplies carried immediately with them:

GENERAL ORDERS, }
No. 18. }

HEADQUARTERS FIFTH ARMY CORPS,
ON BOARD S. S. SEGURANCA, AT SEA, *June 20, 1898.*

EXTRACT.

1. Under instructions to be communicated to the proper commanders, troops will disembark in the following order:

First. The Second Division, Fifth Corps (Lawton's). The Gatling gun detachment will accompany this division.

Second. General Bates's brigade. This brigade will form as a reserve to the Second Division, Fifth Corps.

Third. The dismounted cavalry division (Wheeler's).

Fourth. The First Division, Fifth Corps (Kent's).

Fifth. The squadron of the Second Cavalry (Rafferty's).

Sixth. If the enemy in force vigorously resist the landing, the light artillery, or part of it, will be disembarked by the battalion commander and brought to the assistance of the troops engaged. If no serious opposition be offered, this artillery will be unloaded after the mounted squadron.

2. All troops will carry on the person the blanket roll (with shelter tent and poncho), three days' field rations (with coffee ground), canteens filled, and 100 rounds of ammunition per man. Additional ammunition, already issued to the troops, tentage, baggage, and company cooking utensils, will be left under charge of the regimental quartermaster, with one noncommissioned officer and two privates from each company.

3. All persons not immediately on duty with, and constituting a part of, the organizations mentioned in the foregoing paragraphs, will remain aboard ship until the landing be accomplished, and until notified they can land.

4. The chief quartermaster of the expedition will control all small boats, and will distribute them to the best advantage to disembark the troops in the order indicated in paragraph 1.

5. The ordnance officer, Second Lieutenant Brooke, Fourth Infantry, will put on shore, at once, 100 rounds of ammunition per man, and have it ready for distribution on the firing line.

6. The commanding general wishes to impress officers and men with the crushing effect a well-directed fire will have upon the Spanish troops. All officers concerned will rigidly enforce fire discipline, and will caution their men to fire only when they can see the enemy.

* * * * *

By command of Major-General Shafter:

E. J. MCCLERNAND,
Assistant Adjutant-General.

The small boats belonging to the Navy and to the transports, together with a number of steam launches furnished by the Navy, were brought alongside and loaded with troops as prescribed in the order just quoted. When General Lawton's division was fairly loaded in the small boats the latter were towed in long lines by the steam launches toward the shore. The sea was somewhat rough, but by the exercise of caution and good judgment the beach was reached and the troops disembarked satisfactorily. As a precaution against a possible attack upon the part of any Spaniards who might have been hidden in the adjacent blockhouses and woods, the Navy opened a furious cannonade on these places while the troops were moving toward the shore. It was learned afterwards that the Spanish garrison had retired in the direction of Siboney soon after daylight.

By night about 6,000 troops were on shore. General Lawton was ordered to push down a strong force to seize and hold Siboney.

On the 23d the disembarkation was continued and about 6,000 more men landed. Early on this date General Lawton's advance reached Siboney, the Spanish garrison of about 600 men retiring as he came up, and offering no opposition except a few scattering shots at long range. Some of the Cuban troops pursued the retreating Spaniards and skirmished with them. During the afternoon of this date the disembarkation of Kent's division was commenced at Siboney, which enabled me to establish a base 8 miles nearer Santiago, and to continue the unloading of troops and supplies at both points.

The disembarkation was continued throughout the night of the 23d and 24th, and by the evening of the 24th the disembarkation of my command was practically completed.

The orders for June 24 contemplated General Lawton's division taking a strong defensive position a short distance from Siboney, on the road to Santiago; Kent's division was to be held near Siboney, where he disembarked; Bates's brigade was to take position in support of Lawton, while Wheeler's division was to be somewhat to the rear on the road from Siboney to Daiquiri. It was intended to maintain this situation until the troops and transportation were disembarked and a reasonable quantity of necessary supplies landed. General Young's brigade, however, passed beyond Lawton on the night of the 23d-24th, thus taking the advance, and on the morning of the latter date became engaged with a Spanish force intrenched in a strong position at La Guasima, a point on the Santiago road about three miles from Siboney. General Young's force consisted of one squadron of the First Cavalry, one of the Tenth Cavalry, and two of the First U. S. Volunteer Cavalry, in all 964 officers and men. The enemy made an obstinate resistance, but were driven from the field with considerable loss. Our own loss was 1 officer and 15 men killed; 6 officers and 46 men wounded. The reported losses of the Spaniards were 9 killed and 27 wounded. The engagement had an inspiring effect upon our men, and doubtless correspondingly depressed the enemy, as it was now plainly demonstrated to them that they had a foe to meet who would advance upon them under a heavy fire delivered from intrenchments. General Wheeler, division commander, was present during the engagement, and reports our troops, officers and men, fought with the greatest gallantry. His report attached marked A. This engagement gave us a well-watered country farther to the front, on which to encamp our troops.

My efforts to unload transportation and subsistence stores, so that we might have several days' rations on shore, were continued during the remainder of the month. In this work I was ably seconded by Lieut. Col. Charles F. Humphrey, deputy quartermaster-general, United States Army, chief quartermaster, and Col. John F. Weston, assistant commissary-general of subsistence, chief commissary, but notwithstanding the utmost efforts it was difficult to land supplies in excess of those required daily to feed the men and animals, and the loss of the scow, mentioned as having broken away during the voyage, as well as the loss at sea of lighters sent by Quartermaster's Department, was greatly felt. Indeed, the lack of steam launches, lighters, scows, and wharves can only be appreciated by those who were on the ground directing the disembarkation and landing of supplies. It was not until nearly two weeks after the army landed that it was possible to place on shore three days' supplies in excess of those required for the daily consumption.

After the engagement at La Guasima, and before the end of the month, the army, including General Garcia's command, which had been brought on transports to Siboney from Aserraderos, was mostly concentrated at Sevilla, with the exception of the necessary detachments at Daiquiri and Siboney.

On June 30 I reconnoitered the country about Santiago and made my plan of attack. From a high hill, from which the city was in plain view, I could see the San Juan Hill and the country about El Caney. The roads were very poor, and indeed little better than bridle paths, until the San Juan River and El Caney were reached.

The position of El Caney, to the northeast of Santiago, was of great importance to the enemy, as holding the Guantanamo road as well as furnishing shelter for a

strong outpost that might be used to assail the right flank and rear of any force operating against San Juan Hill.

In view of this, I decided to begin the attack next day at El Caney, with one division, while sending two divisions on the direct road to Santiago, passing by El Pozo House, and, as a diversion, to direct a small force against Aguadores, from Siboney along the railroad by the sea, with a view of attracting the attention of the Spaniards in the latter direction, and of preventing them from attacking our left flank.

During the afternoon I assembled the division commanders, and explained to them my general plan of battle. Lawton's division, assisted by Capron's light battery, was ordered to move out during the afternoon toward El Caney, to begin the attack there early the next morning. After carrying El Caney, Lawton was to move by the Caney road toward Santiago, and take position on the right of the line. Wheeler's division of dismounted cavalry, and Kent's division of infantry, were directed on the Santiago road, the head of the column resting near El Pozo, toward which heights Grimes's battery moved on the afternoon of the 30th, with orders to take position thereon early the next morning, and at the proper time prepare the way for the advance of Wheeler and Kent on San Juan Hill. The attack at this point was to be delayed until Lawton's guns were heard at El Caney and his infantry fire showed he had become well engaged.

The remainder of the afternoon and night was devoted to cutting out and repairing the roads and to other necessary preparations for battle. These preparations were far from what I desired them to be, but we were in a sickly climate; our supplies had to be brought forward by a narrow wagon road which the rains might at any time render impassable; fear was entertained that a storm might drive the vessels containing our stores to sea, thus separating us from our base of supplies, and, lastly, it was reported that General Pando, with 8,000 reinforcements for the enemy, was en route from Manzanillo, and might be expected in a few days. Under those conditions I determined to give battle without delay.

Early on the morning of July 1 Lawton was in position around El Caney, Chaffee's brigade on the right, across the Guantanamo road, Miles's brigade in the center, and Ludlow's on the left. The duty of cutting off the enemy's retreat, along the Santiago road, was assigned to the latter brigade. The artillery opened on the town at 6.15 a. m. The battle here soon became general, and was hotly contested. The enemy's position was naturally strong, and was rendered more so by blockhouses, a stone fort, and intrenchments cut in solid rock, and the loopholing of a solidly built stone church. The opposition offered by the enemy was greater than had been anticipated, and prevented Lawton from joining the right of the main line during the day as had been intended. After the battle had continued for some time, Bates's brigade of two regiments reached my headquarters from Siboney. I directed him to move near El Caney to give assistance if necessary. He did so and was put in position between Miles and Chaffee. The battle continued with varying intensity during most of the day, and until the place was carried by assault about 4.30 p. m. As the Spaniards endeavored to retreat along the Santiago road, Ludlow's position enabled him to do very effective work, and to practically cut off all retreat in that direction.

After the battle at El Caney was well opened, and the sound of the small arms fire caused us to believe that Lawton was driving the enemy before him, I directed Grimes's battery to open fire from the heights of El Pozo on the San Juan blockhouse, which could be seen situated in the enemy's intrenchments extending along the crest of San Juan hill. This fire was effective, and the enemy could be seen running away from the vicinity of the blockhouse. The artillery fire from El Pozo was soon returned by the enemy's artillery. They evidently had the range of this hill, and their first shells killed and wounded several men. As the Spaniards used smokeless powder it was very difficult to locate the positions of their pieces, while, on the contrary, the smoke caused by our black powder plainly indicated the position of our battery.

At this time the cavalry division, under General Sumner, which was lying concealed in the general vicinity of El Pozo House, was ordered forward, with directions to cross the San Juan River and deploy to the right on the Santiago side, while Kent's division was to follow closely in its rear and deploy to the left.

These troops moved forward in compliance with orders, but the road was so narrow as to render it impracticable to retain the column of fours formation at all points, while the undergrowth on either side was so dense as to preclude the possibility of deploying skirmishers. It naturally resulted that the progress made was slow, and the long-range rifles of the enemy's infantry killed and wounded a number of our men while marching along this road, and before there was any opportunity to return this fire. At this time Generals Kent and Sumner were ordered to push forward with all possible haste, and place their troops in position to engage the enemy. General Kent, with this end in view, forced the head of his column alongside of the cavalry column as far as the narrow trail permitted, and thus hurried his arrival at the San Juan, and the formation beyond that stream. A few hundred yards before reaching the San Juan, the road forks, a fact that was discovered by Lieutenant-Colonel Derby of my staff, who had approached well to the front in a war balloon. This information he furnished to the troops, resulting in Sumner moving on the right-hand road, while Kent was enabled to utilize the road to the left.

General Wheeler, the permanent commander of the cavalry division, who had been ill, came forward during the morning, and later returned to duty, and rendered most gallant and efficient service during the remainder of the day.

After crossing the stream, the cavalry moved to the right with a view of connecting with Lawton's left when he should come up, and with their left resting near the Santiago road.

In the meanwhile Kent's division, with the exception of two regiments of Hawkins's brigade, being thus uncovered, moved rapidly to the front from the forks previously mentioned in the road, utilizing both trails, but more especially the one to the left, and crossing the creek, formed for attack in the front of San Juan Hill. During this formation the Third Brigade suffered severely. While personally superintending this movement, its gallant commander, Colonel Wikoff, was killed. The command of the brigade then devolved upon Lieutenant-Colonel Worth, Thirteenth Infantry, who was soon severely wounded, and next upon Lieutenant-Colonel Liscum, Twenty-fourth Infantry, who, five minutes later, also fell under

the terrible fire of the enemy, and the command of the brigade then devolved upon Lieutenant-Colonel Ewers, Ninth Infantry.

While the formation just described was taking place, General Kent took measures to hurry forward his rear brigade. The Tenth and Second Infantry were ordered to follow Wikoff's brigade, while the Twenty-first was sent on the right-hand road to support the First Brigade, under General Hawkins, who had crossed the stream and formed on the right of the division. The Second and Tenth Infantry, Col. E. P. Pearson commanding, moved forward in good order on the left of the division, passed over a green knoll, and drove the enemy back toward his trenches.

After completing their formation, under a destructive fire, and advancing a short distance, both divisions found in their front a wide bottom in which had been placed a barbed-wire entanglement, and beyond which there was a high hill, along the crest of which the enemy was strongly posted. Nothing daunted, these gallant men pushed on to drive the enemy from his chosen position, both divisions losing heavily. In this assault Colonel Hamilton, Lieutenants Smith and Shipp were killed, and Colonel Carroll, Lieutenants Thayer and Myer, all in the cavalry, were wounded.

Great credit is due to Brig. Gen. H. S. Hawkins, who, placing himself between his regiments, urged them on by voice and bugle calls to the attack so brilliantly executed.

In this fierce encounter, words fail to do justice to the gallant regimental commanders and their heroic men, for while the generals indicated the formations and the points of attack, it was, after all, the intrepid bravery of the subordinate officers and men that planted our colors on the crest of San Juan Hill, and drove the enemy from his trenches and blockhouses, thus gaining a position which sealed the fate of Santiago.

In the action on this part of the field, most efficient service was rendered by Lient. John H. Parker, Thirteenth Infantry, and the Gatling-gun detachment under his command. The fighting continued at intervals until nightfall, but our men held resolutely to the positions gained at the cost of so much blood and toil.

I am greatly indebted to General Wheeler, who, as previously stated, returned from the sick list to duty during the afternoon. His cheerfulness and aggressiveness made itself felt on this part of the battlefield, and the information he furnished to me at various stages of the battle proved to be most useful.

My own health was impaired by overexertion in the sun and intense heat of the day before, which prevented me from participating as actively in the battle as I desired, but from a high hill near my headquarters I had a general view of the battlefield, extending from El Caney on the right to the left of our lines on San Juan Hill. My staff officers were stationed at various points on the field, rendering frequent reports, and through them, by the means of orderlies and the telephone, I was enabled to transmit my orders. During the afternoon I visited the position of Grimes's battery on the heights of El Pozo and saw Sumner and Kent in firm possession of San Juan Hill, which I directed should be intrenched during the night. My engineer officer, Lieutenant-Colonel Derby, collected and sent forward the necessary tools, and during the night trenches of very considerable strength were constructed.

During the afternoon Major Dillenback, by my order, brought forward the two

remaining batteries of his battalion and put them in position at El Pozo, to the left of Grimes. Later in the afternoon all three batteries were moved forward to positions near the firing line; but the nature of the country and the intensity of the enemy's small-arms fire were such that no substantial results were gained by our artillery in the new positions. The batteries were intrenched during the night. General Duffield, with the Thirty-third Michigan, attacked Agnadores as ordered, but was unable to accomplish more than to detain the Spaniards in that vicinity.

After the brilliant and important victory gained at El Caney, Lawton started his tired troops, who had been fighting all day and marching much of the night before, to connect with the right of the cavalry division. Night came on before this movement could be accomplished. In the darkness the enemy's pickets were encountered, and the division commander, being uncertain of the ground and as to what might be in his front, halted his command and reported the situation to me. This information was received about 12.30 a. m., and I directed General Lawton to return by my headquarters and the El Pozo house, as the only certain way of gaining his new position.

This was done, and the division took position on the right of the cavalry early next morning, Chaffee's brigade arriving first, about half-past 7, and the other brigades before noon.

On the night of July 1, I ordered General Duffield, at Siboney, to send forward the Thirty-fourth Michigan and the Ninth Massachusetts, both of which had just arrived from the United States. These regiments reached the front the next morning. The Thirty-fourth was placed in rear of Kent, and the Ninth was assigned to Bates, who placed it on his left.

Soon after daylight, on July 2, the enemy opened battle, but because of the intrenchments made during the night, the approach of Lawton's division, and the presence of Bates's brigade, which had taken position during the night on Kent's left, little apprehension was felt as to our ability to repel the Spaniards.

It is proper here to state that General Bates and his brigade had performed most arduous and efficient service, having marched much of the night of June 30-July 1 and a good part of the latter day, during which he also participated in the battle of El Caney, after which he proceeded, by way of El Pozo, to the left of the line at San Juan, reaching his new position about midnight.

All day on the 2d the battle raged with more or less fury, but such of our troops as were in position at daylight held their ground, and Lawton gained a strong and commanding position on the right.

About 10 p. m. the enemy made a vigorous assault to break through my lines, but he was repulsed at all points.

On the morning of the 3d the battle was renewed, but the enemy seemed to have expended his energy in the assault of the previous night, and the firing along the lines was desultory until stopped by my sending the following letter within the Spanish lines:

HEADQUARTERS UNITED FORCES,
Near San Juan River, July 3, 1898—8.30 a. m.

THE COMMANDING GENERAL OF THE SPANISH FORCES,
Santiago de Cuba.

SIR: I shall be obliged, unless you surrender, to shell Santiago de Cuba. Please

inform the citizens of foreign countries, and all women and children, that they should leave the city before 10 o'clock to-morrow morning.

Very respectfully, your obedient servant,

WILLIAM R. SHAFER,
Major-General, U. S. Volunteers.

To this letter I received the following reply:

SANTIAGO DE CUBA, *July 3, 1898.*

His Excellency the GENERAL COMMANDING FORCES OF THE UNITED STATES,
Near San Juan River.

SIR: I have the honor to reply to your communication of to-day, written at 8.30 a. m. and received at 1 p. m., demanding the surrender of this city, or in the contrary case announcing to me that you will bombard this city, and that I advise the foreigners, women, and children, that they must leave the city before 10 o'clock to-morrow morning.

It is my duty to say to you that this city will not surrender, and that I will inform the foreign consuls and inhabitants of the contents of your message.

Very respectfully,

JOSÉ TORAL,
Commander in Chief, Fourth Corps.

Several of the foreign consuls came into my lines and asked that the time given for them, the women and children, to depart from the city be extended until 10 o'clock on July 5. This induced me to write a second letter, as follows:

SANTIAGO DE CUBA, *July 3, 1898.*

The COMMANDING GENERAL, SPANISH FORCES,
Santiago de Cuba.

SIR: In consideration of a request of the consular officers in your city for further delay in carrying out my intentions to fire on the city, and in the interests of the poor women and children, who will suffer very greatly by their hasty and enforced departure from the city, I have the honor to announce that I will delay such action solely in their interests until noon of the 5th, provided that during the interim your forces make no demonstration whatever upon those of my own.

I am, with great respect, your obedient servant,

WILLIAM R. SHAFER,
Major-General, U. S. Volunteers.

My first message went in under a flag of truce at 12.30 p. m. I was of the opinion that the Spaniards would surrender if given a little time, and I thought this result would be hastened if the men of their army could be made to understand they would be well treated as prisoners of war. Acting upon this presumption, I determined to offer to return all the wounded Spanish officers at El Caney who were able to bear transportation, and who were willing to give their paroles not to serve against the forces of the United States until regularly exchanged. This offer was made and accepted. These officers, as well as several of the wounded Spanish privates, 27 in all, were sent to their lines under the escort of some of our mounted cavalry. Our troops were received with honors, and I have every reason to believe the return of the Spanish prisoners produced a good impression on their comrades.

The cessation of firing about noon on the 3d practically terminated the battle of Santiago; all that occurred after this time may properly be treated under the head of the siege which followed. After deducting the detachments retained at Siboney and Daiquiri to render those depots secure from attack, organizations held to protect our flanks, others acting as escorts and guards to light batteries, the members of the hospital corps, guards left in charge of blanket rolls which the intense heat caused the men to cast aside before entering battle, orderlies, etc., it is doubtful if we had more than 12,000 men on the firing line on July 1, when the battle was fiercest, and when the important and strong positions of El Caney and San Juan were captured. A few Cubans assisted in the attack at El Caney, and fought vali-

antly, but their numbers were too small to materially change the strength, as indicated above. The enemy confronted us with numbers about equal to our own. They fought obstinately in strong and intrenched positions, and the results obtained clearly indicate the intrepid gallantry of the company officers and men and the benefits derived from the careful training and instruction given in the company in recent years in rifle practice and other battle exercises. Our losses in these battles were 22 officers and 208 men killed and 81 officers and 1,203 men wounded; missing, 79. The missing, with few exceptions, reported later.

The arrival of General Escario on the night of July 2, and his entrance into the city was not anticipated, for, although it was known, as previously stated, that General Pando had left Manzanillo with reinforcements for the garrison of Santiago, it was not believed his troops could arrive so soon. General Garcia, with between 4,000 and 5,000 Cubans, was intrusted with the duty of watching for and intercepting the reenforcement expected. This, however, he failed to do, and Escario passed into the city along on my extreme right and near the bay. Up to this time I had been unable to complete the investment of the town with my own men, but to prevent any more reinforcements coming in, or the enemy escaping, I extended my lines as rapidly as possible to the extreme right, and completed the investment of the place, leaving General Garcia's forces in the rear of my right flank to scout the country for any approaching Spanish reinforcements, a duty which his forces were very competent to perform.

It had been reported that 8,000 Spanish troops had left Holguin for Santiago. It was also known that there was a considerable force at San Luis, 20 miles to the north.

In the battle of Santiago the Spanish navy endeavored to shell our troops on the extreme right, but the latter were concealed by the inequalities of the ground, and the shells did little, if any, harm. Their naval forces also assisted in the trenches, having 1,000 on shore, and I am informed they sustained considerable loss; among others, Admiral Cervera's chief of staff was killed. Being convinced the city would fall, Admiral Cervera determined to put to sea, informing the French consul it was better to die fighting than to sink his ships. The news of the great naval victory which followed was enthusiastically received by the army.

The information of our naval victory was transmitted under flag of truce to the Spanish commander in Santiago on July 4, and the suggestion again made that he surrender to save needless effusion of blood.

On the same date I informed Admiral Sampson that if he would force his way into the harbor the city would surrender without any further sacrifice of life. Commodore Watson replied that Admiral Sampson was temporarily absent, but that in his (Watson's) opinion the navy should not enter the harbor.

In the meanwhile, letters passing between General Toral and myself caused the cessation of hostilities to continue. Each army, however, continued to strengthen its intrenchments. I was still of the opinion the Spaniards would surrender without much more fighting, and on July 6 called General Toral's attention to the changed conditions, and at his request gave him time to consult his home Government. This he did, asking that the British consul, with the employees of the cable company, be permitted to return from El Caney to the city. This I granted.

The strength of the enemy's position was such I did not wish to assault if it could be avoided.

An examination of the enemy's works made after the surrender fully justified the wisdom of the course adopted. The intrenchments could only have been carried with very great loss of life, probably with not less than 3,000 killed and wounded.

On July 8 General Toral offered to march out of the city with arms and baggage, provided he would not be molested before reaching Holguin, and to surrender to the American forces the territory then occupied by him. I replied that while I would submit his proposition to my home Government, I did not think it would be accepted.

In the meanwhile arrangements were made with Admiral Sampson that when the army again engaged the enemy the navy would assist by shelling the city from ships stationed off Aguadores, dropping a shell every few minutes.

On July 10 the First Illinois and the First District of Columbia arrived and were placed on the line to the right of the cavalry division. This enabled me to push Lawton farther to the right and to practically command the Cobra road.

On the afternoon of the date last mentioned the truce was broken off at 4 p. m., and I determined to open with four batteries of artillery, and went forward in person to the trenches to give the necessary orders, but the enemy anticipated us by opening fire with his artillery a few minutes after the hour stated. His batteries were apparently silenced before night, while ours continued playing upon his trenches until dark. During this firing the Navy fired from Aguadores, most of the shells falling in the city. There was also some small-arms firing. On this afternoon and the next morning we lost Capt. Charles W. Rowell, Second Infantry, and one man killed, and Lieutenant Lutz, Second Infantry, and ten men wounded.

On the morning of July 11 the bombardment by the Navy and my field guns was renewed and continued until nearly noon, and on the same day I reported to the Adjutant-General of the Army that the right of Ludlow's brigade of Lawton's division rested on the bay. Thus our hold upon the enemy was complete.

At 2 p. m. on this date, the 11th, the surrender of the city was again demanded. The firing ceased and was not again renewed. By this date the sickness in the Army was increasing very rapidly as a result of exposure in the trenches to the intense heat of the sun and the heavy rains. Moreover the dews in Cuba are almost equal to rains. The weakness of the troops was becoming so apparent I was anxious to bring the siege to an end, but, in common with most of the officers of the Army, I did not think an assault would be justifiable, especially as the enemy seemed to be acting in good faith in their preliminary propositions to surrender.

On July 11, I wrote General Toral as follows:

"With the largely increased forces which have come to me, and the fact that I have your line of retreat securely in my hands, the time seems fitting that I should again demand of your excellency the surrender of Santiago, and of your excellency's army. I am authorized to state that should your excellency so desire the Government of the United States will transport the entire command of your excellency to Spain."

General Toral replied that he had communicated my proposition to his general in chief, General Blanco.

July 12, I informed the Spanish commander that Major-General Miles, commander in chief of the American Army, had just arrived in my camp, and requested him to grant us a personal interview on the following day. He replied he would be pleased to meet us. The interview took place on the 13th, and I informed him his surrender only could be considered, and that as he was without hope of escape he had no right to continue the fight.

On the 14th another interview took place, during which General Toral agreed to surrender upon the basis of his army, the Fourth Army Corps, being returned to Spain, the capitulation embracing all of eastern Cuba east of a line passing from Asseraderos on the south, to Sagua de Tanamo on the north, via Palma Soriano. It was agreed commissioners should meet during the afternoon to definitely arrange the terms of surrender, and I appointed Major-Generals Wheeler and Lawton and Lieutenant Miley to represent the United States.

The Spanish commissioners raised many points, and were especially desirous of retaining their arms. The discussion lasted until late at night, and was renewed at 9.30 o'clock next morning. The terms of surrender finally agreed upon included about 12,000 Spanish troops in the city and as many more in the surrendered district.

It was arranged the formal surrender should take place between the lines on the morning of July 17, each army being represented by 100 armed men. At the time appointed I appeared at the place agreed upon with my general officers, staff, and 100 troopers of the Second Cavalry under Captain Brett. General Toral also arrived with a number of his officers and 100 infantry. We met midway between the representatives of our two armies, and the Spanish commander formally consummated the surrender of the city and the 24,000 troops in Santiago and the surrendered district.

After this ceremony I entered the city with my staff and escort, and at 12 o'clock noon the American flag was raised over the governor's palace with appropriate ceremonies.

The Ninth Infantry immediately took possession of the city, and perfect order was maintained. The surrender included a small gunboat and about 200 seamen, together with five merchant ships in the harbor. One of these vessels, the Mexico, had been used as a war vessel and had four guns mounted on it.

In taking charge of the civil government all officials who were willing to serve were retained in office, and the established order of government was preserved as far as consistent with the necessities of military rule.

I soon found the number of officials was excessive, and I greatly reduced the list, and some departments were entirely abolished.

A collector of customs, Mr. Donaldson, arrived soon after the surrender, and due to his energy and efficiency this department was soon working satisfactorily. The total receipts had, up to my departure, been \$102,000.

On August 4, I received orders to begin the embarkation of my command and ship them to Montauk Point, Long Island, N. Y. The movement continued without interruption until August 25, when I sailed for Montauk with the last troops in my command, turning over the command of the district to Major-General Lawton.

Before closing my report I wish to dwell upon the natural obstacles I had to encounter, and which no foresight could have overcome or obviated. The rocky and precipitous coast afforded no sheltered landing places, the roads were mere

bridle paths, the effect of the tropical sun and rains upon unacclimated troops was deadly, and a dread of strange and unknown diseases had its effect on the army.

At Daiquiri the landing of the troops and stores was made at a small wooden wharf, which the Spaniards tried to burn, but unsuccessfully, and the animals were pushed into the water and guided to a sandy beach about 200 yards in extent. At Siboney the landing was made on the beach and at a small wharf erected by the engineers.

I had neither the time nor the men to spare to construct permanent wharves.

In spite of the fact that I had nearly 1,000 men continuously at work on the roads, they were at times impassable for wagons.

The San Juan and Aguadores Rivers would often suddenly rise so as to prevent the passage of wagons, and then the eight pack trains with the command had to be depended upon for the victualing of my army, as well as the 20,000 refugees, who could not, in the interests of humanity, be left to starve while we had rations.

Often for days nothing could be moved except on pack trains.

After the great physical strain and exposure of July 1 and 2, the malarial and other fevers began to rapidly advance throughout the command, and on July 4 the yellow fever appeared at Siboney. Though efforts were made to keep this fact from the army, it soon became known.

The supply of quartermaster and commissary stores during the campaign was abundant, and, notwithstanding the difficulties in landing and transporting the rations, the troops on the firing line were at all times supplied with its coarser components, namely, of bread, meat, sugar, and coffee.

There was no lack of transportation, for at not a time up to the surrender could all the wagons I had be used.

In reference to the sick and wounded I have to say that they received every attention that it was possible to give them. The medical officers, without exception, worked night and day to alleviate the suffering, which was no greater than invariably accompanies a campaign. It would have been better if we had more ambulances, but as many were taken as was thought necessary, judging from previous campaigns.

The discipline of the command was superb, and I wish to invite attention to the fact that not an officer was brought to trial by court-martial, and, as far as I know, no enlisted man. This speaks volumes for an army of this size, and in a campaign of such duration.

In conclusion, I desire to express to the members of my staff my thanks for their efficient performance of all the duties required of them and the good judgment and bravery displayed on all occasions when demanded.

I submit the following recommendations for promotion, which I earnestly desire to see made. It is very little reward to give them for their devotion and fearless exposure of their lives in their country's cause.

E. J. McClernand, lieutenant-colonel and adjutant-general, U. S. Volunteers, to be brevetted colonel for gallantry in the face of the enemy on the 1st and 2d of July, and to be brevetted brigadier-general for faithful and meritorious service throughout the campaign.

George McC. Derby, lieutenant-colonel of engineers, U. S. Volunteers, to be brevetted colonel for hazardous service on July 1 and 2 in reconnoitering the enemy's lines, and to be brevetted brigadier-general for hazardous and meritorious service in ascending under a hot fire in a war balloon on July 1, thus gaining valuable information.

J. D. Miley, lieutenant-colonel and inspector-general, U. S. Volunteers, to be brevetted colonel for conspicuous gallantry in the battle of San Juan on July 1, and to be brevetted brigadier-general for faithful and meritorious service throughout the campaign.

R. H. Noble, major and adjutant-general, U. S. Volunteers, to be brevetted lieutenant-colonel for faithful and meritorious service throughout the campaign.

J. J. Astor, lieutenant-colonel and inspector-general, U. S. Volunteers, to be brevetted colonel for faithful and meritorious service during the campaign.

B. F. Pope, lieutenant-colonel and surgeon, U. S. Volunteers, to be brevetted colonel for faithful and meritorious service during the campaign.

Maj. S. W. Groesbeck, judge-advocate, U. S. Army, to be brevetted lieutenant-colonel for faithful and meritorious service throughout the campaign.

Charles F. Humphrey, lieutenant-colonel, Quartermaster's Department, to be brevetted brigadier-general for faithful and meritorious service throughout the campaign.

John F. Weston, colonel and assistant commissary-general of subsistence, chief commissary, to be brevetted brigadier-general for faithful and meritorious service throughout the campaign.

C. G. Starr, major and inspector-general, U. S. Volunteers, to be brevetted lieutenant-colonel for faithful and meritorious service throughout the campaign.

Leon S. Roudiez, major and quartermaster, U. S. Volunteers, to be brevetted lieutenant-colonel for faithful and meritorious service throughout the campaign.

H. J. Gallagher, major and commissary of subsistence, U. S. Volunteers, to be brevetted lieutenant-colonel for faithful and meritorious service throughout the campaign.

Captain Brice, commissary of subsistence, U. S. Volunteers, to be brevetted major for faithful and meritorious service throughout the campaign.

E. H. Plummer, captain, U. S. Army, aid-de-camp, to be brevetted major for faithful and meritorious service throughout the campaign.

J. C. Gilmore, jr., captain and assistant adjutant-general, U. S. Volunteers, to be brevetted major for faithful and meritorious service during the campaign.

W. H. McKittrick, captain and assistant adjutant-general, U. S. Volunteers, to be brevetted major for faithful and meritorious service during the campaign.

Captain Johnson, assistant quartermaster, U. S. Volunteers, to be brevetted major for faithful and meritorious service during the campaign.

I wish to invite special attention to Dr. G. Goodfellow, of New York, who accompanied me throughout the campaign and performed much professional service, as well as duties as volunteer aid. I recommend him for favorable consideration of the War Department and appointment as surgeon of volunteers.

Mr. G. F. Hawkins, of New York, also accompanied me as volunteer aid, and I recommend him for favorable consideration of the War Department for faithful and important services rendered.

My thanks are due to Admiral Sampson and Captain Goodrich, U. S. N., for their efficient aid in disembarking my army. Without their assistance it would have been impossible to have landed in the time I did.

I also express my warmest thanks to division, brigade, and regimental commanders without exception for their earnest efforts in carrying out my wishes and for the good judgment they invariably displayed in handling their troops.

The reports of the division commanders are attached hereto, and those of the brigade and regimental commanders forwarded herewith and attention respectfully invited to them.

Very respectfully,

WILLIAM R. SHAFTER,
Major-General, U. S. Volunteers.

HEADQUARTERS FIFTH ARMY CORPS,
Camp Wikoff, Long Island, September 16, 1898.

ADJUTANT-GENERAL U. S. ARMY,
Washington, D. C.

SIR: By an oversight the Signal Corps was not mentioned in my report. I request that this supplementary report be filed with my original.

The Signal Corps proved itself very efficient and performed its duties to my entire satisfaction under the able management of the officer in charge, Lieutenant-Colonel Greene. I desire to add his name to those recommended for brevets, and recommend that he receive the brevet of colonel for faithful and meritorious services during the campaign.

I also wish to add to my list of recommendations the name of Lieut. William Brooke, Fourth Infantry, U. S. Army, who acted as my ordnance officer from the commencement of the expedition until after the fall of Santiago, and I recommend him to be brevetted major for very efficient and meritorious service during that period.

Very respectfully,

WILLIAM R. SHAFTER,
Major-General, U. S. Volunteers, Commanding.

GOVERNORS ISLAND, NEW YORK HARBOR,
November 21, 1898.

SIR: In connection with my report of September 12, 1898, detailing the operations of the army in the campaign before Santiago de Cuba, I wish to invite special attention to the very valuable services rendered by Lieut. Col. George McC. Derby, Chief Engineer, U. S. Volunteers, and the six officers who assisted him. Their reconnaissances, made daily from the time of landing until the attack, gave me most valuable knowledge of the country up to the enemy's picket line. The two companies, C and E, United States Engineers, also rendered valuable services in road building and road repairing, construction of pier and temporary road bridges, and deserve special credit for the rapidity with which repairs were made on railroad bridges, particularly the large break in the bridge of Aguadores, the repairing of which gave us railroad communication between Siboney and Santiago. Extensive

and important repairs were also made on the bridges on the railroad from Santiago to San Luis, which gave us connection with the interior, otherwise impossible, on account of the impassable condition of the roads.

I also desire to mention the squadron of the Second United States Cavalry, under Lieut. Col. William A. Rafferty, of that regiment. These four troops, under command of Captains Brett and Lewis and Lieutenants Allen and Clark, constituted the only mounted force of my command, and performed most arduous and valuable services in escorting wagon and pack trains along dangerous sections of the road and in furnishing escorts for light batteries in battle and orderlies for my own and division headquarters. While the dense undergrowth, which covered most of the country, prevented this squadron from performing some of the duties usually assigned to a mounted command, yet it performed an immense amount of labor, which was accomplished to my entire satisfaction. As separate organizations, these troops were present on various parts of the battlefields of July 1, 2, and 3, and conducted themselves most creditably, as did the troopers individually when carrying dispatches under fire. I commend the squadron to the favorable consideration of my superiors.

Very respectfully,

WM. R. SHAFTER,
Major-General, U. S. Volunteers.

TO ADJUTANT-GENERAL U. S. ARMY,
Washington, D. C.

HEADQUARTERS CAVALRY DIVISION,

Camp 6½ miles east of Santiago de Cuba, June 26, 1898.

TO ADJUTANT-GENERAL FIFTH ARMY CORPS,
Steamship Seguranca.

SIR: I have the honor to report that in obedience to instructions from the major-general commanding, given to me in person on June 23, I proceeded to Siboney (Juraquacito).

The enemy had evacuated the place at daylight that morning, taking a course toward Sevilla. A body of about 100 Cubans had followed and engaged the enemy's rear guard. About nine of them were wounded.

I rode out to the front and found the enemy had halted and established themselves at a point about three miles from Siboney. At night the Cubans returned to the vicinity of the town.

At 8 o'clock on that evening (of the 23d) General Young reached Siboney with 8 troops of Colonel Wood's regiment—A, B, D, E, F, G, K and L—500 strong; troops A, B, G, K, of the First Cavalry, in all 244; and troops A, B, E, and I of the Tenth Cavalry, in all 220 men, making the total force 964 men, which included nearly all of my command which had disembarked. These troops had marched from Daiquiri, 11 miles. With the assistance of General Castillo a rough map of the country was prepared and the position of the enemy fully explained, and I determined to make an attack.

At daylight on the 24th Wood's regiment was sent by General Young, accompanied by two of his staff officers, Lieuts. Tyree R. Rivers and W. R. Smedberg, jr., to approach the enemy on the left hand or more westerly road, while General Young, myself, and the troops of the First and Tenth Cavalry, with three Hotchkiss mountain guns, approached the enemy on the regular Sevilla road. We expected also to take the dynamite gun with us, but unfortunately it did not reach Siboney.

General Young and myself examined the position of the enemy. The lines were deployed and I directed him to open fire with the Hotchkiss guns. The enemy replied and the firing immediately became general.

Colonel Wood had deployed his regiment, his right nearly reaching the left of the regulars.

For an hour the fighting was very warm, the enemy being very lavish in the expenditure of ammunition, most of their firing being by volleys.

Finally the enemy gave way and retreated rapidly, our line keeping well closed upon them. Our men, being physically exhausted by both their exertions and the great heat, were incapable of maintaining the pursuit.

I can not speak too highly of the gallant and excellent conduct of the officers and men throughout the command.

General Young deserves special commendation for his cool, deliberate, and skillful management.

I also specially noticed his acting adjutant-general, Lieut. A. L. Mills, First Cavalry, who, under General Young's direction, was at the various parts of the line, acting with energy and cool courage.

The imperative necessity of disembarking with promptitude had impelled me to leave most of my staff to hasten this important matter, and, unfortunately, I only had with me Major Beach and Mr. Mestre, a Cuban volunteer aid, both of whom during the engagement most creditably and bravely performed their duties. I am especially indebted to Maj. W. D. Beach for his cool and good judgment.

Colonel Wood's regiment was on the extreme left of the line, and too far distant for me to be a personal witness of the individual conduct of his officers and men, but the magnificent and brave work done by his regiment under the lead of Colonel Wood testifies to his courage and skill. The energy and determination of this officer had been marked from the moment he reported to me at Tampa, Fla., and I have abundant evidence of his brave and good conduct on the field and I recommend him for consideration of the Government.

I must rely upon his report to do justice to his officers and men, but I desire personally to add that all that I have said about Colonel Wood applies equally to Lieutenant-Colonel Roosevelt.

I was immediately with the troops of the First and Tenth Regular Cavalry dismounted, and personally noticed their brave and good conduct, which will be specially mentioned by General Young.

I personally noticed the good conduct of Capts. W. H. Beck, Robert P. P. Wainwright, and Jacob G. Galbraith, Maj. James M. Bell, Capt. Thomas T. Knox, and Lieut. George L. Byrom. The last three were wounded.

Major Bell, as he laid on the ground with a broken leg, said: "I only regret I can't go on with you farther."

Captain Knox, though severely wounded, insisted to me that he was not much hurt and continued as long as possible to exercise command, and Lieutenant Byrom also continued upon the line until he fainted.

I recommend these officers for favorable consideration of the Government.

I can not state positively as to the size of the Spanish force which we engaged or the extent of their casualties further than that the force was much greater than ours, and that the information I have would indicate that their killed and wounded very far exceeded the losses which our troops sustained, but our estimates on these points can only be verified when we have access to the reports of the Spanish commanders.

The engagement inspired our troops and must have had a bad effect upon the spirits of the Spanish soldiers.

It also gave our army a beautiful and well-watered country, in which we have established our encampments. It has also given us a full view of Santiago and the surrounding country and enabled us to reconnoiter close up to the fortifications of that place.

Very respectfully,

JOS. WHEELER,
Major-General, U. S. Volunteers, Commanding.

HEADQUARTERS CAVALRY DIVISION, U. S. ARMY,
Before Santiago, Cuba, July 7, 1898.

TO ADJUTANT-GENERAL,
Fifth Army Corps.

SIR: After the engagement of June 24, I pushed forward my command through Sevilla into the valley, Lawton's and Kent's commands occupying the hills in the vicinity of that place. After two days' rest Lawton was ordered forward, and on the night of the 30th instructions were given by Major-General Shafter to this officer to attack Caney while the cavalry division and Kent's division were ordered to move forward on the regular Santiago road. The movement commenced on the morning of July 1. The cavalry division advanced and formed its line with its left near the Santiago road, while Kent's division formed its line with the right joining the left of the cavalry division.

Colonel McClernand, of General Shafter's staff, directed me to give instructions to General Kent, which I complied with in person, at the same time personally directing General Sumner to move forward. The men were all compelled to wade the San Juan River to get into line. This was done under very heavy fire of both infantry and artillery. Our balloon having been sent up right by the main road, was made a mark of by the enemy. It was evident that we were as much under fire in forming

the line as we would be by an advance, and I therefore pressed the command forward from the covering which it was formed. It merged into open space in full view of the enemy, who occupied breastworks and batteries on the crest of the hill which overlooked Santiago, officers and men falling at every step. The troops advanced gallantly, soon reached the foot of the hill and ascended, driving the enemy from their works and occupying them on the crest of the hill. To accomplish this required courage and determination on the part of the officers and men of a high order, and the losses were very severe. Too much credit can not be given to General Sumner and General Kent and their gallant brigade commanders, Colonel Wood and Colonel Carroll, of the cavalry; Gen. Hamilton S. Hawkins, commanding First Brigade, Kent's Division, and Colonel Pearson, commanding Second Brigade. Colonel Carroll and Major Wessels were both wounded during the charge, but Major Wessels was enabled to return and resume command. Colonel Wikoff, commanding Kent's Third Brigade, was killed at 12.10; Lieutenant-Colonel Worth took command and was wounded at 12.15; Lieutenant-Colonel Liscum then took command and was wounded at 12.20, and the command then devolved upon Lieutenant-Colonel Ewers, Ninth Infantry.

Upon reaching the crest I ordered breastworks to be constructed, and sent to the rear for shovels, picks, spades, and axes. The enemy's retreat from the ridge was precipitate, but our men were so thoroughly exhausted that it was impossible for them to follow. Their shoes were soaked with water by wading the San Juan River, they had become drenched with rain, and when they reached the crest they were absolutely unable to proceed further. Notwithstanding this condition, these exhausted men labored during the night to erect breastworks, furnished details to bury the dead and carry the wounded back in improvised litters. I sent word along the line that reinforcements would reach us and that Lawton would join our right and that General Bates would come up and strengthen our left. After reaching the crest of the ridge, General Kent sent the Thirteenth Regulars to assist in strengthening our right. At midnight General Bates reported and I placed him in a strong position on the left of our line. General Lawton had attempted to join us from Caney, but when very near our lines he was fired upon by the Spaniards and turned back, but joined us next day at noon by a circuitous route. During all the day on July 2 the cavalry division, Kent's division, and Bates's brigade were engaged with the enemy, being subjected to a severe fire and incurring many casualties, and later in the day Lawton's division also became engaged.

During the entire engagement my staff performed their duties with courage, judgment, and ability. Special credit is due to Lieut. Col. J. H. Dorst, Maj. William D. Beach, Capt. Joseph E. Dickman, and Lieut. M. F. Steele. I desire also to say that Lieuts. James H. Reeves and Joseph Wheeler, jr., Capt. William Astor Chanler, Maj. E. A. Garlington, Mr. Aurelius Mestre, and Corpl. John Lundmark also deserve high commendation for courage and good conduct. Major West, my quartermaster, deserves special commendation for his energy and good conduct during the campaign, and Maj. Valery Havard and Mr. Leonard Wilson have also done their full duty. Captain Hardie and First Lieut. F. J. Koester, with Troop G, Third Cavalry, were detailed with headquarters and conducted themselves handsomely under fire. The superb courage displayed by the officers and men will be specially mentioned in the reports of subordinate commanders.

Our losses were as follows:

	Killed.		Wounded.		Missing.		Aggre- gate.	Strength.

The following is a list of the officers killed and wounded in the cavalry division:

Officers killed.—Lieut. Col. James M. Hamilton, Ninth Cavalry; Maj. Albert G. Forse, First Cavalry; Captain O'Niel, First United States Volunteer Cavalry; First Lieut. William E. Shipp, Tenth Cavalry; First Lieut. W. H. Smith, Tenth Cavalry; Acting Asst. Surg. H. W. Danforth, Ninth Cavalry.

Officers wounded.—Lieut. Col. Henry Carroll, Sixth Cavalry (commanding First Brigade); Maj. Henry W. Wessels, Third Cavalry; Maj. T. J. Wint, Tenth Cavalry; Major and Assistant Surgeon La Motte, First United States Volunteer Cavalry; Capt. J. B. Kerr, Sixth Cavalry; Capt. George A. Dodd, Third Cavalry; Capt. George K. Hunter, Third Cavalry; Capt. C. W. Taylor, Ninth Cavalry; Capt. A. P. Blocksam, Sixth Cavalry; Capt. John Bigelow, jr., Tenth Cavalry; Captain Henry, commander United States Volunteers; First Lieut. O. L. Mills, First Cavalry, captain and assistant adjutant-general volunteers; First Lieut. M. H. Barnum, Tenth Cavalry; First Lieut. Arthur Thayer, Third Cavalry; First Lieut. O. B. Meyer, Third Cavalry; First Lieut. M. S. Wood, Ninth Cavalry; First Lieutenant Merrillat, Third Cavalry; First Lieutenant Carr, First United States Volunteer Cavalry; First Lieutenant Leahy, First United States Volunteer Cavalry; Second Lieutenant Williard, Tenth Cavalry; Second Lieut. Walter C. Short, Sixth Cavalry; Second Lieutenant McCoy, Tenth Cavalry; Second Lieutenant Roberts, Tenth Cavalry; Second Lieut. H. S. Devereux, First United States Volunteer Cavalry; Second Lieutenant Day, First United States Volunteer Cavalry; Second Lieutenant Huskell, First United States Volunteer Cavalry.

General Kent's report of casualties has been forwarded.

The strength given in the tabulated statement above is the aggregate strength of the command, but as there were many details, the above figures are about 15 per cent greater than the forces actually engaged in battle.

The command has been active in strengthening their position, and commanders and their staffs have thoroughly informed themselves as to the topographical features of the country and the situation of the enemy.

Very respectfully,

JOS. WHEELER,
Major-General Volunteers.

HEADQUARTERS FIRST DIVISION, FIFTH ARMY CORPS,
In the field, Fort San Juan, near Santiago de Cuba, July 7, 1898.

The ASSISTANT ADJUTANT-GENERAL, FIFTH ARMY CORPS.

SIR: I have the honor to submit the following report of the operations of my command in the battle of July 1:

On the afternoon of June 30, pursuant to orders given me verbally by the corps commander at his headquarters, I moved my Second and Third Brigades (Pearson and Wikoff) forward about 2 miles to a point on the Santiago road, near corps headquarters. Here the troops bivouacked, the First Brigade (Hawkins) remaining in its camp of the two preceding days, slightly in rear of corps headquarters.

On the following morning (July 1) at 7 o'clock I rode forward to the hill where Captain Grimes's battery was in position. I here met Lieutenant-Colonel McClermand, assistant adjutant-general Fifth Corps, who pointed out to me a green hill in the distance which was to be my objective on my left, and either he or Lieutenant Miley, of Major-General Shafter's staff, gave me directions to keep my right on the main road leading to the city of Santiago. I had previously given the necessary orders for Hawkins's Brigade to move early, to be followed in turn by Wikoff and Pearson. Shortly after Grimes's battery opened fire I rode down to the stream and there found General Hawkins at the head of his brigade at a point about 250 yards from the El Pozo sugar house. Here I gave him his orders.

The enemy's artillery was now replying to Grimes's battery. I rode forward with Hawkins about 150 yards, closely followed by the Sixth Infantry, which was leading the First Brigade. At this point I received instructions to allow the cavalry the right of way, but for some unknown reason they moved up very slowly, thus causing a delay in my advance of fully forty minutes. Lieutenant Miley, of General Shafter's staff, was at this point and understood how the division was delayed, and reported several times that he understood I was making all the progress possible. General Hawkins went forward, and word came back in a few minutes that it would be possible to observe the enemy's position from the front. I immediately rode forward with my staff. The fire of the enemy's sharpshooters was being distinctly felt at this time. I crossed the main ford of the San Juan River, joined General Hawkins, and with him observed the enemy's position from a point some distance in advance of the ford. General Hawkins deemed it possible to turn the enemy's right at Fort San Juan, but later, under the heavy fire, this was found impracticable for the First Brigade, but was accomplished by the Third Brigade coming up later on General Hawkins's left. Having completed the observation, with my staff I proceeded to join the head of my division, just coming under heavy fire. Approaching the First Brigade, I directed

them to move alongside the cavalry (which was halted). We were already suffering losses caused by the balloon near by attracting fire and disclosing our position.

The enemy's infantry fire, steadily increasing in intensity, now came from all directions, not only from the front and the dense tropical thickets on our flanks, but from sharpshooters thickly posted in trees in our rear, and from shrapnel apparently aimed at the balloon. Lieutenant-Colonel Derby, of General Shafter's staff, met me about this time and informed me that a trail or narrow way had been discovered from the balloon a short distance back leading to the left to a ford lower down the stream. I hastened to the forks made by this road, and soon after the Seventy-first New York Regiment, of Hawkins's Brigade, came up. I turned them into the bypath indicated by Lieutenant-Colonel Derby, leading to the lower ford, sending word to General Hawkins of this movement. This would have speedily delivered them in their proper place on the left of their brigade, but under the galling fire of the enemy the leading battalion of this regiment was thrown into confusion and recoiled in disorder on the troops in rear. At this critical moment the officers of my staff practically formed a cordon behind the panic-stricken men and urged them to again go forward. I finally ordered them to lie down in the thicket and clear the way for others of their own regiment who were coming up behind. This many of them did, and the Second and Third battalions came forward in better order and moved along the road toward the ford. One of my staff officers ran back, waving his hat, to hurry forward the Third Brigade, who, upon approaching the forks, found the way blocked by men of the Seventy-first New York. There were other men of this regiment crouching in the bushes, many of whom were encouraged by the advance of the approaching column to rise and go forward. As already stated, I had received orders some time before to keep in rear of the cavalry division. Their advance was much delayed, resulting in frequent halts, presumably to drop their blanket rolls and due to the natural delay in fording a stream. These delays under such a hot fire grew exceedingly irksome, and I therefore pushed the head of my division as quickly as I could toward the river, in column of files or twos, parallel in the narrow way by the cavalry. This quickened the forward movement and enabled me to get into position as speedily as possible for the attack. Owing to the congested condition of the road the progress of the narrow columns was however painfully slow. I again sent a staff officer at a gallop to urge forward the troops in rear. The head of Wikoff's brigade reached the forks at 12.20 p. m. and hurried on the left, stepping over prostrate forms of men of the Seventy-first. This heroic brigade, consisting of the Thirteenth, Ninth, and Twenty-fourth U. S. Infantry, speedily crossed the stream and were quickly deployed to the left of the lower ford. While personally superintending this movement, Colonel Wikoff was killed, the command of the brigade then devolving upon Lieutenant-Colonel Worth, Thirteenth Infantry, who immediately fell severely wounded, and then upon Lieutenant-Colonel Liscum, Twenty-fourth Infantry, who, five minutes later, also fell under the withering fire of the enemy. The command of the brigade then devolved upon Lieut. Col. E. P. Ewers, Ninth Infantry. Meanwhile, I had again sent a staff officer to hurry forward the Second Brigade which was bringing up the rear. The Tenth and Second Infantry, soon arriving at the forks, were deflected to the left, to follow the Third brigade, while the Twenty-first was directed along the main road to support Hawkins.

Crossing the lower ford a few minutes later, the Tenth and Second moved forward in column in good order toward the green knoll already referred to as my objective on the left. Approaching the knoll the regiments deployed, passed over the knoll and ascended the high ridge beyond, driving back the enemy in the direction of his trenches. I observed this movement from the Fort San Juan Hill. Col. E. P. Pearson, Tenth Infantry, commanding the Second Brigade, and the officers and troops under his command, deserve great credit for the soldierly manner in which this movement was executed. I earnestly recommend Colonel Pearson for promotion. Prior to this advance of the Second Brigade, the Third, connecting with Hawkins's gallant troops on the right, had moved toward Fort San Juan, sweeping through a zone of most destructive fire, scaling a steep and difficult hill and assisting in capturing the enemy's strong position (Fort San Juan) at 1.30 p. m. This crest was about 125 feet above the general level and was defended by deep trenches and a loop-holed brick fort, surrounded by barbed wire entanglements. General Hawkins, some time after I reached the crest, reported that the Sixth and Sixteenth Infantry had captured the hill, which I now consider incorrect; credit is almost equally due the Sixth, Ninth, Thirteenth, Sixteenth, and Twenty-fourth Regiments of Infantry. Owing to General Hawkins's representations, I forwarded the report sent to Corps Headquarters about 3 p. m. that the Sixth and Sixteenth Infantry regiments had captured the hill. The Thirteenth Infantry captured the enemy's colors waving over the fort, but unfortunately destroyed them, distributing the fragments among the men, because, as was asserted, "It was a bad omen," two or three men having been shot while assisting Private Arthur Agnew, Company H, Thirteenth Infantry, the captor. All fragments which could be recovered are submitted with this report. *The greatest credit is due to the officers of my*

command, whether company, battalion, regimental, or brigade commanders, who so admirably directed the formation of their troops, unavoidably intermixed in the dense thicket, and made the desperate rush for the distant and strongly defended crest. I have already mentioned the circumstances of my Third Brigade's advance across the ford where, in the brief space of ten minutes, it lost its brave commander (killed) and the next two ranking officers by disabling wounds, yet, in spite of these confusing conditions, the formations were effected without hesitation, although under a stinging fire, companies acting singly in some instances, and by battalion and regiments in others, rushing through the jungle across the stream, waist deep, and over the wide bottom thickly set with barbed wire entanglements. In this connection I desire to particularly mention First Lieut. Wendell L. Simpson, adjutant Ninth Infantry, acting assistant adjutant-general, Third Brigade, who was noticeably active and efficient in carrying out orders which I had given him to transmit to his brigade commander, who no longer existed.

The enemy having retired to a second line of rifle pits, I directed my line to hold their positions and entrench. At ten minutes past 3 p. m. I received almost simultaneously two requests—one from Colonel Wood, commanding a cavalry brigade, and one from General Sumner, asking for assistance for the cavalry on my right, "as they were hard pressed." I immediately sent to their aid the Thirteenth Infantry, who promptly went on this further mission, despite the heavy losses they had already sustained.

Great credit is due to the gallant officer and gentleman, Brig. Gen. H. S. Hawkins, who, placing himself between the two regiments, leading his brigade, the Sixth and Sixteenth Infantry, urged and led them by voice and bugle calls to the attack so successfully accomplished. My earnest thanks are due to my staff officers present at my side and under my personal observation on the field, especially to Maj. A. C. Sharpe, assistant adjutant-general; Maj. Philip Reade, inspector-general; Capt. U. G. McAlexander, chief quartermaster, and my aids, First Lieut. George S. Cartwright, Twenty-fourth Infantry, and First Lieut. William P. Jackson, Second Infantry; also to Mr. Adolpho Carlos Munoz, the latter a volunteer aid, subsequently wounded in the fight of the 2d instant, who richly merits a commission for his able assistance, given without pay.

The officers enumerated should at least be brevetted for gallantry under fire. I also personally noticed the conduct of First Lieut. F. J. Kirkpatrick, assistant surgeon, United States Army, on duty with the Twenty-fourth Infantry, giving most efficient aid to the wounded under fire. I observed several times First Lieut. J. D. Miley, Fifth Artillery, aid to General Shafter, who was conspicuous throughout the day for his coolness under fire, delivering instructions with apparent unconcern. The bloody fighting of my brave command can not be adequately described in words. The following list of killed, wounded, and missing, tells the story of their valor:

Report of killed, wounded, and missing July 1, 1898, First Division, Fifth Army Corps.

At daylight on the morning of July 2 the enemy resumed the battle, and firing continued throughout the day, part of the time in a drenching rain. At night-fall the firing ceased, but at 9 p. m. a vigorous assault was made all along our lines. This was completely repulsed, the enemy again retiring to his trenches. The following morning firing was resumed and continued until near noon when a white flag was displayed by the enemy and firing was ordered to cease. The casualties of these two days (July 2 and 3) were as follows:

One hospital corps man killed, attached to Tenth Infantry, not included in above total.

I desire, in conclusion, to express my gratitude to Maj. Gen. Joseph Wheeler for his courteous conduct to me, and, through me, to my division, under the trying circumstances enumerated.

Though ill and suffering, General Wheeler was so perfectly at home under fire that he inspired all of us with assurance.

Attention is invited in this connection to the reports of brigade and subordinate commanders herewith. I cordially indorse their commendations.

Very respectfully,

J. FORD KENT,
Brigadier-General, United States Volunteers, Commanding.

HEADQUARTERS SECOND DIVISION, FIFTH ARMY CORPS,
Camp near Santiago de Cuba, July 3, 1898.

The ADJUTANT-GENERAL,
Fifth Army Corps, near Santiago de Cuba.

SIR: I have the honor to report the following operations of the Second Division in the capture of El Caney on July 1, 1898. The town of El Caney is situated at an important point about 4 miles northeast of Santiago de Cuba, on the main road from Guantanamo to that city, where reenforcements for the Spanish garrison of Santiago de Cuba would probably concentrate. The town was strongly fortified with numerous blockhouses within its limits and on the roads leading thence. On a prominent hill of the town was a stone fort surrounded, as is now known, by intrenchments cut in solid rock. The reduction of El Caney being determined upon, and being on the right flank of the general advance on Santiago de Cuba, the duty devolved on the Second Division, to which was attached Light Battery E, First Artillery commanded by Capt. Allyn Capron, First Artillery. After due reconnaissance by the division and brigade commanders, the movement began about 3 p. m. on June 30, from the division camp about 4 miles east of Santiago on the main road from Siboney through Sevilla. The position of the brigades and the details of operations on July 1 are quite fully set forth in the accompanying reports of regimental and brigade commanders and in the sketch herewith submitted. The light battery first opened on a column of Spanish troops which appeared to be cavalry moving westward from El Caney and about 2 miles range, resulting, as was afterwards learned, in killing 16 in the column. The battery remained during the action at its first position until about 2.30 p. m., when it was moved to a new position south of and about 1,000 yards from certain blockhouses in the town where a few shots, all taking effect, were fired. This firing terminated the action, as the Spanish garrison was attempting to escape. Gen. J. C. Bates, United States Volunteers, with two regiments of his independent brigade—the Third and Twentieth Infantry—having been sent by the major-general commanding the forces of the United States in Cuba to relieve the second brigade of this division, which was holding the main road from El Caney to Santiago, so as to permit it to join in the attack, also came forward, joined in the attack, taking position between the Second and Third Brigades, and rendered material assistance, especially in the assault of the stone fort.

I heartily approve the special mention of individuals and recommendations made in the reports of the regimental and brigade commanders, and regret that others who deserve mention have not received it, through circumstances. During the

action I was accompanied most of the time by Maj. Gen. J. C. Breckenridge, Inspector-General U. S. Army, as a spectator, and had the advantage of his valuable suggestions and advice during the day, for which I desire to express my sincere appreciation. His horse was shot under him on the advance upon Santiago the morning of the 2d instant.

To Gen. Adna R. Chaffee I am indebted for a thorough and intelligent reconnaissance of the town of El Caney and vicinity prior to the battle, and the submission of a plan of attack which was adopted. I consider General Chaffee one of the best practical soldiers in the Army and recommend him for special distinction for successfully charging the stone fort mentioned in this report, the capture of which practically closed the battle. I desire to invite special attention to General William Ludlow, commanding the First Brigade. General Ludlow's professional accomplishments are well known, and his assignment to command a brigade in my division I consider a high compliment to myself. In this battle General Ludlow proved himself a capable and able commander. His coolness, good judgment, and prompt action in difficult situations were remarkable. To this and his personal example on the firing line was due the decisive success of the attack on his part of the line. I recommend General Ludlow for substantial recognition.

To Capt. H. C. Carbaugh, assistant adjutant-general, adjutant-general of the division, I desire to express my thanks and appreciation for untiring energy and faithful work in dangerous positions on this occasion, and I desire particularly to mention him for gallantry in volunteering to carry and carrying to General Chaffee, while he was most hotly engaged on the firing line, instructions concerning the assault upon the stone fort mentioned in these reports, and to recommend Captain Carbaugh for promotion to the rank of major and assistant adjutant-general and for brevet of lieutenant-colonel for this act. I desire also to commend to favorable consideration Maj. G. Creighton Webb, inspector-general on my staff, for persistently riding his horse along the firing line of the First Brigade in search of the brigade-commander to deliver important instructions when men of his escort demurred at going with him, and recommend that he receive the brevet of lieutenant-colonel of volunteers. I am particularly pleased that this battle gives me a suitable opportunity to call to the notice of my superiors Mr. R. G. Mendoza, a volunteer aid on my staff. Mr. Mendoza is a Cuban by birth, an American citizen, a young man of prepossessing appearance, of education and refinement. He joined me at Tampa, Fla., with the consent and authority of the general commanding the forces, as a volunteer aid. Since that time he has become one of my most competent and reliable assistants, and has been untiring in his labors, both night and day. In the battle he was active, energetic, and courageous. He has my hearty thanks for his invaluable assistance, and I strongly recommend and urge that he be offered the appointment of captain and assistant adjutant-general of volunteers and that he be left on duty with me. I desire also to commend for gallantry and courageous conduct in this battle, and for faithful and valuable services generally, Mr. E. L. D. Breckenridge, a son of Maj. Gen. J. C. Breckenridge, Inspector-General of the Army, who has also been on duty on my staff during the campaign as volunteer aid. Mr. Breckenridge is educated and refined, a gentleman in every respect, and has proven in battle his courage and coolness. I earnestly recommend that he be appointed a second lieutenant in the Army in consideration of the services rendered in this battle. To Lieut. H. H. Warren, Second Massachusetts, aid-de-camp, I desire to tender my thanks for courageous and efficient performance of duty in this battle, and to recommend that he receive a brevet of captain of volunteers. To Surg. H. S. Kilbourne, chief surgeon, is due the thanks, not only of myself, but of the whole division for faithful and unremitting attention to the wounded on the field and under fire.

It may not be out of place for me to mention the fact that Capt. J. C. Gilmore, jr., of the staff of the general commanding the forces, joined me with important instructions and that he might see for himself the situation, the better to inform the commanding general, he rode the firing line with me, exhibiting a coolness under severe fire worthy a veteran.

Very respectfully,

H. W. LAWTON,
Brigadier-General, U. S. Volunteers, Commanding Division.

HEADQUARTERS INDEPENDENT BRIGADE,
In front of Santiago de Cuba, July 8, 1898.

ADJUTANT GENERAL FIFTH ARMY CORPS:

SIR: I have the honor to report that my brigade left Siboney, Cuba, on the evening of June 30, at 8.30, and marched up over the hill trail. We followed this trail to where it joins the main road and proceeded along the main road in the dark

to the place just vacated by Wheeler's cavalry division as a camp. Here we found General Wheeler's headquarter tents still standing, and went into camp in the rear of them about midnight. We struck camp at 6.30 a. m., July 1, and marched to a point adjacent to General Shafter's headquarters, where I reported in person to General Shafter. At 10.05 a. m. I moved my brigade from this location to within about a mile and a half of El Caney, and met General Lawton upon the road at this point. After a consultation with him, lasting some minutes, I halted my brigade upon the road in order to give an opportunity for the placing of a battery that General Lawton expected to put in position between Colonel Miles's right and General Chaffee's left. I waited some time for this to be done, but the battery not putting in an appearance, I moved my brigade down the road in the direction of El Caney, crossed the San Juan River, and taking the first cross-roads moved to the right to a position upon this crossroad to the right of the brigade commanded by Colonel Miles, and pushed rapidly to the front. After my brigade remained in this road for some time, under a heavy fire, we moved to the right to the assault of a small hill, occupied upon the top by a stone fort and well protected by rifle pits. General Chaffee's brigade charged them from the right and the two brigades joining upon the crest, opened fire from this point of vantage, lately occupied by the Spanish, upon the village of El Caney. From this advantageous position the Spanish were easily driven from place to place in the village proper, and as fast as they sought shelter in one building were driven out to seek shelter elsewhere, the sharpshooters of my command were enabled to do effective work at this point. The town proper was soon pretty thoroughly cleaned out of Spanish, though a couple of blockhouses upon the hill to the right of the town offered shelter to a few, and some could be seen retreating along a mountain road leading to the northwest. A part of these made a stand in a field among some bowlders. I desire to say at this point that the Third United States Infantry, under command of Col. John H. Page, and the Twentieth United States Infantry, under command of Maj. William S. McCaskey, performed most efficient and meritorious services in the engagement before the village of El Caney. At about 4.30 p. m. the firing from the village had practically ceased, and as General Ludlow's brigade was then moving up the valley from the left upon the village it was deemed unwise to charge El Caney, as our troops would have been subjected to the fire from this brigade. After consultation with General Chaffee, I withdrew my brigade, hoping there was yet time to aid in the attack more to the left. My command, having had a long hard march, the withdrawal took more time than anticipated; darkness was coming on. I therefore halted the command at the first water at which we arrived and proceeded in person to report to the corps commander; was then ordered to the extreme left. I immediately moved the command and reached this position at midnight. My command had been then continuously marching or fighting for twenty-seven and one-half hours, with the exception of six and one-half hours spent near General Wheeler's headquarters. On the morning of July 2 I placed the Twentieth Infantry on the left of the Second Infantry and in continuation of their line, and held the Third Infantry in reserve near the brigade of Colonel Pearson, of General Kent's division, as that part of the line seemed to need to be strengthened. The loss in action at El Caney suffered by this brigade was 3 killed and 10 wounded; on the 2d of July, was 1 killed and 18 wounded. The wounded include Captains Rodman and Moon, of the Twentieth Infantry.

I desire to mention the following members of my staff for efficient and gallant service in the action before El Caney and in front of Santiago: Major Logan, Major Wilkins, Captain Wright, and Lieutenant Smiley. I wish also to add that Major Ives, my chief surgeon, was on the firing line and did efficient services during the progress of the fight and behaved in most gallant manner. I invite attention to the inclosed sketch, which gives the itinerary of march of this brigade during the two days.

Very respectfully,

J. C. BATES,
Brigadier-General of Volunteers, Commanding Brigade.

TELEGRAPHIC AND OTHER CORRESPONDENCE RELATING TO THE WAR.

Early in May a movement upon Havana was contemplated, as it was believed that the city could be assaulted and captured before the rainy season set in, but the plan was subsequently abandoned on account of the reported movements of the enemy's fleet.

It was proposed to send a portion of the army of invasion from Tampa, and to gather another part of it at Key West, on account of the close proximity of the latter place to Mariel, Cuba (a point about 26 miles west of Havana), as will be shown by the following dispatches:

HEADQUARTERS OF THE ARMY,
Washington, D. C., May 9, 1898.

The Major-General Commanding directs that the following orders be sent by telegraph to General Wade, at Tampa:

Direct Major-General Shafter to move his command, under protection of Navy, and seize and hold Mariel, or most important point on north coast of Cuba and where territory is ample to land and deploy army. Follow up his command with all the force sent to you. Troops will be sent you as rapidly as possible from Chickamauga and other points. Have troops fully equipped; send abundance of ammunition and ship with them food for men and animals for sixty days, to be followed by four months' supplies.

J. C. GILMORE,
Assistant Adjutant-General.

ADJUTANT-GENERAL'S OFFICE,
Washington, May 9, 1898—6.7 p. m.

General WADE, commanding troops at Tampa, Fla.:

With the approval of the Secretary of War, the Major-General Commanding directs that General Shafter move his command under protection of Navy and seize and hold Mariel, or most important point on north coast of Cuba, and where territory is ample to land and deploy army. Follow up his command with all the forces sent to you. Troops will be sent you as rapidly as possible from Chickamauga and other points. Have troops fully equipped, send abundance of ammunition, and ship with them food for men and animals for sixty days, to be followed by four months' supplies. Acknowledge receipt.

H. C. CORBIN, *Adjutant-General.*

One great difficulty in the concentration of a large force at Key West, however, was found to be a lack of fresh water there, as will be shown by the following dispatches:

TAMPA BAY HOTEL, *Tampa, Fla., May 7, 1898—3.44 p. m.*
ADJUTANT-GENERAL UNITED STATES ARMY, *Washington, D. C.:*

Am crowding work of watering and coal transport and put in pen and stall for sortie (stock?). Will have it completed Wednesday sure. Many obstacles to——.*
SHAFTER, *Brigadier-General.*

TAMPA BAY HOTEL, *Tampa, Fla., May 7, 1898—6.50 p. m.*
ADJUTANT-GENERAL, UNITED STATES ARMY,
War Department, Washington, D. C.:

Colonel Lawton just returned from Key West. Brings message from Commodore Watson that water is absolutely necessary; that supply on all ships is very short, and that if can assist him in getting supply it will be a great favor to him. A barge, capacity one hundred thousand gallons, can start in morning for Key West, towed by one of ships under charter. Cost of water two cents per gallon. No tug here for hire. Shall I send it?

SHAFTER, *Brigadier-General.*

* Telegram apparently not completed.

ADJUTANT-GENERAL'S OFFICE, *Washington, May 8, 1898.*

General SHAFER,

Tampa Bay Hotel, Tampa, Fla.

Your telegram concerning water supply for Commodore Watson received, and Secretary of War directs you to make every possible effort to furnish anything and everything to help him along. In this and other cases Secretary of War approves any action you take, but desires every such order of yours reported for his information.

H. C. CORBIN, *Adjutant-General.*

HEADQUARTERS OF THE ARMY,

Washington, D. C., May 10, 1898.

The Major-General Commanding directs that the following orders be telegraphed General Wade, Tampa, Fla.: That the movement of troops to Cuba is delayed until Monday May 16, 1898. In the meantime he will send the infantry in the ships, with an abundant supply of water and whatever else is required with them, to Key West, there to disembark. The ships are to return to Tampa to carry more infantry to Key West until there are about 12,000 men there. These will move from Key West to Dry Tortugas and Cuba on ships coming from New York. Also, that General Brooke has been directed to send to Tampa from Chickamunga the Second, Seventh, Eighth, Twelfth, and Sixteenth Infantry. These can be forwarded to Key West by any means available.

J. C. GILMORE,
Assistant Adjutant-General.

ADJUTANT-GENERAL'S OFFICE,

Washington, May 10, 1898—6.35 p. m.

General WADE, *commanding Troops at Tampa, Fla.:*

Movement of troops to Cuba is delayed until Monday, May 16. In the meantime you will send infantry in the ships, with an abundant supply of water and whatever else is required with them, to Key West, there to disembark. The ships are to return to Tampa to carry more infantry to Key West until there are about 12,000 men there. These will move from Key West to Dry Tortugas and Cuba on ships coming from New York. General Brooke has been directed to send to Tampa from Chickamauga the Second, Seventh, Eighth, Twelfth, and Sixteenth Infantry. These can be forwarded to Key West by any means available.

By command General Miles.

H. C. CORBIN, *Adjutant-General.*

TAMPA BAY HOTEL, *Tampa, Fla., May 11, 1898.*

(Received Washington, 8.12 p. m.)

ADJUTANT-GENERAL UNITED STATES ARMY, FOR COMMANDING GENERAL,

War Department, Washington, D. C.:

Water for large body of troops at Key West is serious question. Absolutely no water there. Only water barge from this port, capacity 130,000 gallons, should reach Key West to-morrow with water for Navy, and be back Friday. Transports carry considerable water, but have no way of distillation. Is imperative that water be placed in Key West before troops begin to arrive. Quartermaster-General has been asked to charter, clean, loan, and start 1,000,000 gallons tank steamer with light-draft barge for unloading. Dry Tortugas reported to have brackish water in cisterns. Am now trying to ascertain quantity and quality. Expect information.

J. F. WADE, *Brigadier General.*

TAMPA BAY HOTEL, *Tampa, Fla., May 21, 1898—11.21 a. m.*

Gen. N. A. MILES, *Washington, D. C.:*

On account of difficulty in finding suitable camp ground, with abundant water supply, I have temporarily stopped part of the volunteer regiments at Jacksonville, and placed them under command of General Lawton. The Government will not be subjected to extra expense on account of transportation, nor for supply depots or officer. They will be brought closer to Tampa as soon as possible. The principal difficulty here is water, which must be drawn from wells; surface water can not be used.

SHAFTER, *Major-General.*

WAR DEPARTMENT, *Washington, May 26, 1898.*

Maj. Gen. NELSON A. MILES,

Commanding U. S. Army, Washington, D. C.

SIR: You will proceed to the following points, to make a thorough inspection of the troops there in camp:

Chickamauga, Ga.

Tampa, Fla.

Mobile, Ala.

You will be accompanied by the officers of your personal staff. On the completion of this duty you will return to the city and make report of the inspection herein ordered.

I have the honor to be, very respectfully,

R. A. ALGER,
Secretary of War.

HEADQUARTERS OF THE ARMY,
Washington, D. C., May 27, 1898.

The honorable the SECRETARY OF WAR.

SIR: Referring to my letter of yesterday, and to our consultation since, I desire to submit the following:

As we are now about to inaugurate active military operations in conjunction with the Navy, I think it would be advisable to load the transports at Tampa with a strong force of infantry and artillery, move them to Key West, and thence along the northern coast of Cuba, where they would have the full protection of Admiral Sampson's fleet until they reach Admiral Schley's fleet at Santiago de Cuba, and then, by a combined effort of the Army and Navy, capture the harbor, garrison, and possibly the Spanish fleet at that point.

If before reaching Admiral Schley's fleet it shall be found that he has already accomplished the above object, or that the Spanish fleet shall have escaped, I then urge the importance of a combined attack of the Army and Navy upon Porto Rico. We will be able to land a superior force, and I believe that a combined effort will result in capturing the island, with its garrison, provided it is done before it can be reenforced from Spain. The distance from Key West to Porto Rico is 1,040 miles, and from Cadiz, Spain, to Porto Rico it is about 4,000 miles. The possession of Porto Rico would be of very great advantage to the military, as it would cripple the forces of Spain, giving us several thousand prisoners. It could be well fortified, the harbor mined, and would be a most excellent port for our Navy, which could be speedily relieved from any responsibility in the charge of that port, as we could leave a sufficient garrison to hold it against any force that might be sent against it.

Then we should commence, in my judgment, a movement toward the west by capturing the ports along the northern coast of Cuba, at the eastern end, supplying the

insurgents with abundance of arms and munitions of war, and as speedily as possible land our cavalry and sufficient light artillery to enable them to move from the harbor of Pto de Nuevitas along the line of railroad to Puerto Principe. From that base our cavalry and light artillery, in conjunction with the forces of Lieutenant-General Garcia and General Gomez, should move west to near Santa Clara. These movements, in my judgment, can all be accomplished during the rainy season, through a country comparatively free from yellow fever, well stocked with cattle, and having grass sufficient for our animals. While this is being accomplished our Volunteer Army will be prepared to land in the vicinity of Mariel, Havana, or Matanzas in sufficient force to complete the capture or destruction of the Spanish forces upon the island of Cuba. The advantage of this movement will be that the army and navy will act in concert and close unison; that it does not divide our navy, and that it will utilize our most available military force in the best way during the time of the year when military operations are most difficult.

I believe that the entrance to the port of Cienfuegos can be obstructed or blockaded by one or two monitors to better advantage than to send the army there, where it would have to meet a strong garrison, which is already there, and all of the forces that can be quickly sent there by rail directly from Havana and Matanzas.

If the above plan is approved, troops could be ordered to embark on the transports immediately, and the purpose would be the occupation of Spanish territory, first, by moving our troops as speedily as possible to Santiago de Cuba and Porto Rico, and later to the north coast of Cuba, especially our cavalry. This military occupation to continue until hostilities cease.

Very respectfully,

NELSON A. MILES,
Major-General Commanding.

At this time the Secretary of the Navy had become convinced that the enemy's fleet, under the command of Admiral Cervera, was in Santiago Harbor, and every energy was bent from that time to concentrate a force of the army near Santiago to aid in the capture or destruction of the fleet and army in Santiago and its harbor.

The great difficulty in the way of a prompt movement was the procurement of the necessary transports for that service, the Government having none of its own.

The imperfect facilities at Port Tampa made the task most difficult. While the wharf is a good one, the railroad facilities were inadequate, and the failure to label each car with its contents, and the congested state of the post-office where bills of lading were sent, added to the embarrassment of the situation.

Thirty-six transports were gathered at Port Tampa, few of them fitted for such service on account of their lack of sufficient ventilation and space to carry as large a force as was required.

They were, however, the best and all that could be had; and while the description of them furnished prior to their charter showed that they could transport about 23,000 men, with transportation, artillery, horses, quartermaster, commissary, and medical supplies, yet it was found that even the number shipped—about 16,000—was greater than should have been carried. But, fortunately, they arrived at their destination without accident and without any special inconvenience to the troops save that of being crowded.

The first duty for which General Shafter was selected—to make a reconnaissance in force, about 5,000 strong, on the south side of Cuba—was abandoned just as the expedition was prepared to sail from Tampa, on account of the movements of the enemy's fleet.

Major-General Shafter was selected to command the expedition to Santiago.

The following instructions were sent to General Shafter by the Major-General Commanding:

WAR DEPARTMENT,
Washington, May 31, 1898—2.30 a. m.

Maj. Gen. WILLIAM R. SHAFTER, *Tampa, Fla.:*

With the approval of the Secretary of War, you are directed to take your command on transports, proceed under convoy of the Navy to the vicinity of Santiago de Cuba, land your force at such place east or west of that point as your judgment may dictate, under the protection of the Navy, and move it onto the high ground and bluffs overlooking the harbor or into the interior, as shall best enable you to capture or destroy the garrison there, and cover the Navy as it sends its men in small boats to remove torpedoes, or, with the aid of the Navy, capture or destroy the Spanish fleet now reported to be in Santiago Harbor. You will use the utmost energy to accomplish this enterprise, and the Government relies upon your good judgment as to the most judicious use of your command, but desires to impress upon you the importance of accomplishing this object with the least possible delay. You can call to your assistance any of the insurgent forces in that vicinity and make use of such of them as you think advisable to assist you, especially as scouts, guides, et cetera. You are cautioned against putting too much confidence in any persons outside of your own troops. You will take every precaution against ambuscade or surprises or positions that may have been mined or are commanded by the Spanish forces. You will cooperate most earnestly with the naval forces in every way, agreeing beforehand upon a code of signals. Communicate your instructions to Admiral Sampson and Commodore Schley. On completion of this enterprise, unless you receive other orders or deem it advisable to remain in the harbor of Santiago de Cuba, reembark your troops and proceed to the harbor of Pto de Banes, reporting by the most favorable means for further orders and future important service—this with the understanding that your command has not sustained serious loss and that the above harbor is safe for your transports and convoy. When will you sail?

By command of Major-General Miles:

H. C. CORBIN, *Adjutant-General.*

On May 30 Major-General Miles left for Tampa to assist in the embarkation of the troops, arriving at that point June 1.

On June 2 he reported that the working force at Tampa had been divided into three reliefs, each working eight hours during the twenty-four; nine ships being loaded at a time.

On June 4 the following dispatch was sent to General Shafter:

ADJUTANT-GENERAL'S OFFICE,
Washington, June 4, 1898, 6.15 p. m.

Major-General SHAFTER, *Tampa, Fla.:*

Admiral Sampson cables to-day: "*Merrimac* in channel. Cervera, with 4 ships and 2 torpedo boats, in harbor safely bottled up. He urges immediate aid from your troops. He reports 7,000 men intrenched in Juraquacito and Daiquiri; 5,000 at Morron de Cuba; 4,000 at other points; in bay 500, with small Hotchkiss gun.

Cervera sent flag of truce opprobiously to exchange prisoners for Naval Constructor Hobson and 7 men who unharmed with him on *Merrimac*, who were taken prisoners, in recognition of their bravery. We are sure Cervera is there."

ALGER, *Secretary of War*.

On June 5 the following was received from General Shafter:

TAMPA, FLA., June 4-5, 1898—6.32 a. m.

ADJUTANT-GENERAL U. S. ARMY, *Washington, D. C.*:

Replying to your dispatch that President wishes report of the situation, I have to say that everything possible is being done to get away, but delays occur that can not be prevented or foreseen. Siege guns have only been assembled late this evening. They will be loaded on cars to-night and sent to transports early in the morning and the loading rushed. Will begin putting men on to-morrow p. m., if possible, and be ready to start Monday night or Tuesday morning. The last of the troops from Chickamauga are expected to-night. Officers engaged in loading transports have worked night and day. The main cause for delay has been the fact that great quantities of stores have been rushed in promiscuously, and with no facilities to handle or store them. The last ten miles before reaching the wharf is a single track and very narrow place in which to work. The capacity of this place has been greatly exceeded. Could have put the troops on and rushed them off, but not properly equipped, as I know the President wishes them. I will not delay a minute longer than is absolutely necessary to get my command in condition, and start the earliest moment possible.

SHAFTER, *Major-General*.

The following dispatches will give a brief history of the Santiago campaign:

ADJUTANT-GENERAL'S OFFICE,
Washington, June 5, 1898—12 noon.

Major-General SHAFTER, *Tampa, Fla.*:

Your telegram of 6.45 this morning shown to the President, with which he expressed his satisfaction, with every confidence that you are doing everything for the best. I would like to have a telegram at 6 o'clock this evening of the situation.

H. C. CORBIN, *Adjutant-General*.

TAMPA, FLA., June 5, 1898—12.24 p. m.

The SECRETARY OF WAR, *Washington, D. C.*:

This expedition has been delayed through no fault of anyone connected with it. It contains the principal part of the Army, which for intelligence and efficiency is not exceeded by any body of troops on earth. It contains fourteen of the best conditioned regiments of volunteers, the last of which arrived this morning. Yet these have never been under fire. Between 30 and 40 per cent are undrilled, and in one regiment over 300 men had never fired a gun. I request ample protection at all times for this command from the Navy. This enterprise is so important that I desire to go with this army corps or to immediately organize another and go with it to join this and capture position number 2. Now that the military is about to be used, I believe it should be continued with every energy, making the most judicious disposition of it to accomplish the desired result.

MILES,
Major-General Commanding Army.

TAMPA, FLA., *June 6, 1898—2.37 p. m.*SECRETARY OF WAR, *Washington, D. C.:*

In telegram sent you yesterday morning please substitute words "while on sea" for "at all times" after word "protection."

MILES,
Major-General Commanding.

NAVY DEPARTMENT, *Washington, June 6, 1898.*

SIR: This Department has received from Admiral Sampson, off Santiago de Cuba, a telegram from which the following is an extract: "Very important we should know immediately whether the army expedition has sailed for Santiago and its number of vessels." You are respectfully requested to give information on the above points as soon as practicable, in order that it may be communicated to the admiral. It is respectfully urged that the expedition should get off as soon as possible. The naval force is all ready to convoy it.

Very respectfully,

CHAS. H. ALLEN, .
Acting Secretary.

The Honorable the SECRETARY OF WAR.

TAMPA, FLA., *June 6, 1898—11.40 p. m.*

Hon. R. A. ALGER,

Secretary of War, Washington, D. C.:

Troops have been marching on board to-day and will continue all night. General Shafter hopes to sail to-morrow night or next day. There is siege artillery here and more will arrive before No. 2 can be ready. There should be a few regiments well equipped at Camp Alger.

MILES, *Major-General.*WAR DEPARTMENT, *Washington, June 7, 1898.*

To Major-General SHAFTER or Major-General MILES,

Tampa, Fla.:

Secretary of Navy has received this dispatch from Sampson to-day: "Bombarded forts at Santiago 7.30 to-day, June 6. Have silenced works quickly without injury of any kind, though stationed within 3,000 yards. If 10,000 men were here, city and fleet would be ours within forty-eight hours. Every consideration demands immediate army movement. If delayed, city will be defended more strongly by guns taken from the fleet."

R. A. ALGER, *Secretary of War.*WASHINGTON, *June 7, 1898.*Major-General SHAFTER, *Port Tampa, Fla.:*

Since telegraphing you, an hour since, the President directs you to sail at once with what force you have ready.

R. A. ALGER, *Secretary of War.*TAMPA, FLA., *June 7, 1898—9 p. m.*SECRETARY OF WAR, *Washington:*

I will sail to-morrow morning. Steam can not be gotten up earlier. There is loaded to-night one division of infantry (9 regiments), 16 companies of dismounted cavalry, 4 light batteries, 2 siege batteries artillery, 2 companies of engineers, and the troops from Mobile. I will try and get on the rest of the cavalry and another division of regular infantry by morning. I will sail then with whatever I have on board.

SHAFTER, *Major-General.*

EXECUTIVE MANSION, *Washington, June 7, 1898.*General SHAFER, *Tampa, Fla.:*

About how many men will you have ready by morning?

CORBIN, *Adjutant-General.*PORT TAMPA, FLA. (direct), *June 7, 1898—10.15 p. m.*

Adjutant-General CORBIN:

I expect to have 834 officers 16,154 men on transports by daylight and will sail at that hour. Will wire particulars before starting.

SHAFTER.

TAMPA, FLA., *June 7, 1898—9.54 p. m.*The PRESIDENT, *Washington:*

From the Commanding General down to the drummer boys, everyone is impatient to go, and annoyed at the delay. The last of the troops from Chickamauga arrived this morning and have been equipped and hurried to the steamers. Feel confident they will all do their best to carry out the wishes and directions of the President.

MILES, *Major-General Commanding.*WAR DEPARTMENT,
*Washington, D. C., June 8, 1898.*Major-General SHAFER, *Tampa, Fla.:*

Wait until you get further orders before you sail. Answer quick.

R. A. ALGER, *Secretary of War.*WAR DEPARTMENT,
*Washington, D. C., June 8, 1898.*Major-General MILES, *Port Tampa, Fla.:*

I have sent the following telegram to Major-General Shafter: "Wait until you get further orders before you sail. Answer quick."

R. A. ALGER, *Secretary of War.*TAMPA, FLA., *June 8, 1898—4.52 p. m.*ADJUTANT-GENERAL U. S. ARMY, *Washington:*

Your dispatch of to-day received.

MILES,
*Major-General Commanding Army.*PORT TAMPA, FLA., *June 8, 1898—4.06 p. m.*R. A. ALGER, *Secretary of War, Washington, D. C.:*

Message received. Vessels are in the stream, but will be able to stop them before reaching the Gulf.

SHAFTER, *Major-General.*WAR DEPARTMENT,
*Washington, June 8, 1898.*Major-General MILES, *Tampa, Fla.:*

The reason for countermanding order you will find in the following. The order was given at the request of the Navy Department by direction of the President:

"KEY WEST, *June 8.*"Spanish armor cruiser, second class, and Spanish torpedo-boat destroyer seen by *Eagle*, Nicholas Channel, Cuba. Destroy convoy. Detail follow. REMEY."

“KEY WEST, *June 8.*

“Last cipher just came by *Resolute*, just arrived; was pursued by two vessels, Nicholas Channel, Cuba, last night. Shall I order *Indiana* and all available cruisers to coast of Cuba? More detail to follow.

REMEY.”

R. A. ALGER, *Secretary of War.*

TAMPA, FLA., *June 8, 1898—11.42 p. m.*

HON. SECRETARY OF WAR, *Washington, D. C.:*

If that report is true, those Spanish vessels could be within six hours of the loaded transports now, and there to-morrow. Have ample measures been taken by the navy to insure their safety?

MILES, *Commanding.*

PORT TAMPA, FLA., *June 8, 1898—5.03 p. m.*

HON. SECRETARY OF WAR, *Washington, D. C.:*

Ships commenced moving at 4 o'clock yesterday. They have been moving out during night and morning as loaded. Your dispatch just received. Ships can be recalled and await orders.

MILES, *Commanding.*

HEADQUARTERS OF THE ARMY,

Tampa, Fla., June 9, 1898—6.50 p. m.

SECRETARY OF WAR, *Washington, D. C.:*

Think it would be well to announce that the army got on board transports and started, as they did yesterday. Say nothing about its being recalled, but let our naval vessels go over the course that our transports would have gone over, with the hope of finding those Spanish ships. Does not the presence of Spanish war vessels in Cuban waters render it extremely hazardous to send troops on transports until they are captured, destroyed, or driven away? And, under the circumstances, is it expected that I shall organize expedition number 2? Arrangements had been partly made before the presence of the Spanish ships was announced.

MILES,
Major-General Commanding Army.

WAR DEPARTMENT, *June 9, 1898.*

Major-General MILES, *Tampa, Fla.:*

The President directs me to say that no change of plan will be made; that Expedition No. 2 must be organized as rapidly as possible. We are looking for transports and are satisfied the Navy will take care of that problem. Give nothing out.

R. A. ALGER, *Secretary of War.*

TAMPA, FLA., *June 9, 1898—2.45 p. m.*

SECRETARY OF WAR, *Washington, D. C.:*

It seems that it is a naval problem yet unsolved, and it might be advisable for the command now on board transports to have the protection of the entire Navy to convey it to number 1, number 2, or Nuevitas, or, if this is considered too hazardous, then keep the troops in healthful camps, as they are now, and assist the Navy to destroy the Spanish fleet. There are here 25 good steamers that could be used to carry water, coal, and supplies, guns, revolving cannon, and mortars, etc., and they could be added to the force of the Navy. It seems strange to be suggesting that the Army assist the Navy in this way, but I am sure we would receive most loyal support when the waters are safe for crossing with the Army.

MILES,
Major-General Commanding Army.

ADJUTANT-GENERAL'S OFFICE,
Washington, June 9, 1898.

Major-General SHAFER, *Tampa, Fla.*:

Should you not sail until Monday, Secretary War desires to know whether you will keep your troops on board or disembark them.

H. C. CORBIN, *Adjutant-General.*

PORT TAMPA, FLA., June 9, 1898—9.32 p. m.

ADJUTANT-GENERAL U. S. ARMY, *Washington, D. C.*:

As the ships are lying it is impracticable to disembark the men. The general officers in command are all unanimous in this opinion. They will be taken off, however, in detachments for exercise. There is no place in the vicinity where they can be camped with any degree of comfort.

SHAFER,
Major-General, U. S. Volunteers.

The following communication was received from Navy Department on date named:

NAVY DEPARTMENT, *Washington, June 9, 1898.*

The Honorable the SECRETARY OF WAR.

SIR: Referring to the expedition destined to Santiago de Cuba, I have the honor to inform you that it is expected that the convoy of men-of-war, reenforced by two armored ships from Admiral Sampson's fleet, will be coaled and ready to start for Santiago de Cuba by the evening of Monday, the 13th instant, or by the morning of the following day, without regard to the Spanish ships.

The board is of opinion that the army transports should not move from the vicinity of Tampa until about twenty hours before the naval convoy will be coaled and ready to start. This latter time, though estimated as above, can not be closely fixed to-day, but probably can be by to-morrow evening.

Very respectfully,

CHAS. H. ALLEN,
Acting Secretary.

ADJUTANT-GENERAL'S OFFICE,
Washington, June 9, 1898—9.30 p. m.

Major-General MILES, *Tampa Fla.*:

Following from the Acting Secretary Navy sent you for your information and you will transmit it to General Shafer:

"Referring to the expedition destined to Santiago de Cuba, I have the honor to inform you that it is expected that the convoy men-of-war, reenforced by two armored ships from Admiral Sampson's fleet, will be coaled and ready to start for Santiago by the evening of Monday, the 13th instant, or by the morning of the following day, without regard to the Spanish ships. The board is of opinion that army transports should not move from the vicinity of Tampa until about twenty hours before the naval convoy will be coaled and ready to start. This latter time, though estimated as above, can not be closely fixed to-day, but probably can be by to-morrow evening."

Any further information concerning the movement of vessels for convoy will be sent you the moment it is received.

By order Secretary of War:

H. C. CORBIN, *Adjutant-General.*

ADJUTANT-GENERAL'S OFFICE,
Washington, June 12, 1898—11 a. m.

Maj. Gen. W. R. SHAFER, *Port Tampa, Fla.*:

The following is sent you for your information and guidance: Commodore Remey, commandant of the naval base at Key West, has been directed to reassemble and

coal as soon as possible the naval force which was recently designated to convoy the army transports in which is embarked the military expedition for Santiago de Cuba. As soon as Commodore Remey reports when the convoy will be coaled and ready, his instructions are to send it to meet the army transports in the passage or strait between Rebecca Shoal and the Dry Tortugas, and considerable time would be saved if the army transports could leave Tampa about eighteen hours before the Key West division of the convoy reaches the neighborhood of Rebecca Shoal. The date and hour at which the Key West division of the convoy will reach the vicinity of Rebecca Shoal can not be exactly fixed, but you will be informed of it as soon as practicable.

You will place yourself in communication with Commodore Remey and arrange to meet convoy as herein suggested, making close connection. Acknowledge receipt.

By order Secretary War.

H. C. CORBIN, *Adjutant-General.*

WAR DEPARTMENT, *Washington, June 12, 1898.*

Major-General SHAFTER, *Port Tampa, Fla.:*

Having reference to telegram of this morning, the Secretary of War now directs me to inform you that the *Indiana* and other ships forming the convoy will meet the transports at Rebecca Shoal and proceed together to destination. You should reach the shoal not later than to-morrow afternoon. Confer freely with Commodore Remey.

H. C. CORBIN, *Adjutant-General.*

TAMPA, FLA., *June 12, 1898—7.18 p. m.*

ADJUTANT-GENERAL U. S. ARMY, *Washington, D. C.:*

4.30 p. m. Your dispatch in reference to starting delivered at 3 p. m. to-day. Have consulted with senior naval officer present, who says we must have daylight to get down to lower bay. Will start the transports at daylight to-morrow, and with good luck will meet convoy from Key West before Wednesday noon.

SHAFTER,

Major-General, U. S. Volunteers, Commanding.

PORT TAMPA, FLA., *June 13, 1898—1.10 p. m.*

SECRETARY OF WAR, *Washington, D. C.:*

Steamers are moving out to sea and should be away by 1 o'clock.

MILES, *Major-General.*

ADJUTANT-GENERAL'S OFFICE,
Washington, D. C. June 14, 1898—11.40 p. m.

Major-General MILES, *Tampa, Fla.:*

Secretary War desires the names of the general officers accompanying General Shafter's expedition.

H. C. CORBIN, *Adjutant-General.*

TAMPA, FLA., *June 15, 1898—1.41 p. m.*

Gen. H. C. CORBIN,

Adjutant-General, U. S. Army, Washington, D. C.:

In reply to your telegram of yesterday the Major-General Commanding directs me to inform you that the following general officers accompanied General Shafter:

Maj. Gen. Joseph Wheeler, Brig. Gens. J. F. Kent, H. S. Hawkins, S. S. Sumner, J. C. Bates, S. B. M. Young, H. W. Lawton, and A. R. Chaffee. Also Major-General Breckinridge and Brig. Gen. William Ludlow went as inspecting officer and engineer officer from Headquarters Army, respectively.

MICHLER,

Assistant Adjutant-General.

After General Shafter had sailed, the following dispatch was sent to the Major-General Commanding the Army, June 15, the object being to have him fit out the expedition for Porto Rico:

WASHINGTON, D. C., *June 15, 1898.*

Major-General MILES, *Tampa, Fla.:*

Important business requires your presence here. Report at once.

R. A. ALGER, *Secretary of War.*

TAMPA, FLA., *June 15, 1898.*

SECRETARY OF WAR, *Washington, D. C.:*

I leave by the first train, 7.25 this evening.

MILES, *Major-General Commanding.*

KEY WEST, FLA., *June 15, 1898.*

(Received at Washington 10.55 p. m.)

Captain MONTGOMERY, *Executive Mansion, Washington, D. C.:*

Twenty-one transports and eight convoys off Tortugas 10 this morning, and at same place at sundown.

SAWYER, *Censor.*

PLAYA DEL ESTE, VIA HAITI.

(Received Washington June 22, 1898, 6.22 p. m.)

SECRETARY OF WAR, *Washington, D. C.:*

Off Daiquiri, Cuba, June 22, 1898.—Landing at Daiquiri this morning successful. Very little, if any, resistance.

SHAFTER.

ADJUTANT-GENERAL'S OFFICE,

Washington, June 21, 1898.

Major-General SHAFTER, *Santiago de Cuba:*

Secretary War directs that the transports that went with you be returned to Tampa for reenforcements under same convoy that conducted you to your present station, unless you think it unsafe to send it. Also report as to your needs. Proposed to send you auxiliary cruisers *Yale* and *Harvard* sailing from Newport News with reenforcements.

H. C. CORBIN, *Adjutant-General.*

WAR DEPARTMENT, *Washington, June 21, 1898.*

The honorable the SECRETARY OF THE NAVY.

SIR: I have the honor to inclose herewith copy of a telegram just sent to Major-General Shafter, Santiago de Cuba.

Very respectfully,

R. A. ALGER, *Secretary of War.*

By H. C. CORBIN, *Adjutant-General.*

ADJUTANT-GENERAL'S OFFICE,

Washington, June 23, 1898.

Major-General SHAFTER, *Santiago de Cuba:*

Secretary of War directs such of the transports as can be spared be returned to Tampa soon as convenient under convoy of the Navy. Please cable number and

names that can be returned and time of departure. Should it be deemed best to not unload all supplies not perishable on ships, the same can be left in them until next voyage.

By command Major-General Miles:

H. C. CORBIN, *Adjutant-General.*

PLAYA DEL ESTE, VIA HAITI.

(Received at Washington July 2, 1898—1.21 a. m.)

ADJUTANT-GENERAL, *Washington:*

Siboney, 1.—Cable received. Colonel Humphrey has been ordered to return as many transports as possible at once.

W. R. SHAFTER,
Major-General, U. S. Volunteers, Fifth Corps.

HEADQUARTERS OF THE ARMY,
Washington, D. C., June 24, 1898.

SIR: I have the honor to submit the following:

With the capture of Santiago de Cuba it is expected we will have several thousand Spanish prisoners, and with the capture of the second objective position, now under consideration, it is expected we will add to the number, making, it is hoped, in the aggregate at least 30,000 prisoners.

After the capture of the position next after Santiago de Cuba it would be, in my judgment, advisable to take some deep-water harbors on the northern coast of Cuba, which would be advisable, not only for our Army, but also for the Navy, as safe ports for our transports, supply ships, and naval vessels between Key West and Porto Rico. It is also important that we should select some point at which to disembark our mounted troops and light artillery, with which our Government is well supplied. We will have, in a few weeks, upward of 15,000 cavalry. This force, with the light artillery and a small body of infantry, will make a most formidable army corps with which to conduct a campaign in the interior of Cuba.

The most available point, it appears to me, would be the harbor of Neuvas, which has 28½ feet of water. From there the command could move to Puerto Principe, one of the principal cities of the Island of Cuba. Using that as a base, it could move through the rolling country, which is reported to be free from yellow fever, to Moron and Taguayabon, and thence to the Villa Clara, or, by a more southern route, from Puerto Principe to Ciego de Avila, thence to Spiritus, and thence to Villa Clara. A road could be built at the rate of 5 miles per day as that army corps marches; also, we would find two railroad bases between Puerto Principe and Villa Clara.

To move the mounted troops over from Florida to Cuba and make this march would undoubtedly consume the time up to nearly the 30th of September.

This army corps would also have the assistance of all the available forces of Garcia and Gomez, and would by that time be occupying practically two-thirds of the Island of Cuba.

If no serious force was encountered, this army corps could continue its march to the south side of Havana. If a large force of Spanish troops, sufficient to check its march was moved to the vicinity of Villa Clara, then the entire army with which we propose to invade Cuba could be moved between the forces at Villa Clara and Havana, dividing the Spanish forces and defeating them in detail.

I make this suggestion as having three advantages: First, we could employ at reasonable compensation such prisoners as desired occupation in road building; second, we could move into the interior of Cuba our large cavalry command without serious molestation; third, we would be operating during the rainy or sickly season in the most healthful parts of Cuba, practically free from yellow fever, and at the same time be occupying a large portion of the enemy's territory.

If this proposition does not meet with favor, then, after the capture of Santiago de Cuba and other places to the east, we could move the entire force to the west of Havana and conduct the campaign from the deep harbors on that coast. My judgment, however, is decidedly in favor of the first plan of campaign.

Before reaching Villa Clara we would undoubtedly have upward of 50,000 prisoners, and if we could, by judicious, humane treatment, use them in a way that would be advantageous to themselves as well as to our interests, I think it would be advisable. There would be one great danger in moving them to our own territory and establishing a large camp of prisoners, and that is that they would bring the germs of disease with them and spread them among our own people, as many Americans would have to be employed on the ships and railroads, together with the guards necessary to control them.

Very respectfully,

NELSON A. MILES,
Major-General Commanding.

The SECRETARY OF WAR.

This plan of campaign was not approved.

PLAYA DEL ESTE, VIA HAITI.

(Received at Washington, D. C., June 25, 1898, 2.45 p. m.)

ADJUTANT-GENERAL U. S. ARMY, *Washington, D. C.:*

Daiquiri, 23.—Had very fine voyage. Lost less than 50 animals; 6 or 8 to-day. Lost more putting them through the surf to land than on transports. Command as healthy as when we left. Eighty men sick. Only deaths, 2 men drowned in landing. Landings difficult. Coast quite similar to that in vicinity of San Francisco and covered with dense growth of bushes. Landing at Daiquiri unopposed. All points occupied by Spanish troops heavily bombarded by navy to clear them out. Sent troops toward Santiago and occupied Juraguasito, a naturally strong place, this morning, Spanish troops retreating as soon as our advance was known. Had no mounted troops or could have captured them, about 600 all told. Railroad from there in. Have cars and engine in possession. With assistance of navy disembarked 6,000 men yesterday and as many more to-day. Will get all troops off to-morrow, including light artillery and greater portion of pack train, probably all of it, with some of the wagons. Animals have to be jumped to the water and towed ashore. Had consultation with Generals Garcia, Rader, and Castillo 1 p. m. of 20th, 20 miles west of Santiago. These officers were unanimously of the opinion that landing should be made east of Santiago. I had come to the same conclusion.

General Garcia promises to join me at Juraguasito to-morrow with between three and four thousand men, who will be brought from west of Santiago by ships of the Navy to Juraguasito and there disembarked. This will give us between four and five thousand Cubans and leave one thousand with General Rabi to threaten Santiago from the west. General Kent's division is being disembarked this afternoon at Juraguasito and will be continued during the night. The assistance of the Navy has been of the greatest benefit and enthusiastically given. Without them I could not have landed in ten days, and perhaps not at all, as I believe I should have lost so many boats in the surf. At present want nothing; weather has been good; no rain on land and prospects for fair weather.

SHAFTER,
Major-General, United States Army, Commanding.

PLAYA, *June 25, 1898.*

(Received at Washington, D. C., June 25, 1898—11.57 a. m.)

ADJUTANT-GENERAL U. S. ARMY, *Washington:*

Daiquiri, 24.—Two or three lighters and a steam tug are an imperative necessity here. We are absolutely dependent on the little steam tug *Laura*. Without her

we could hardly get rations ashore as fast as they can be consumed. There should be no delay in furnishing these vessels.

SHAFTER,
Major-General Commanding.

ADJUTANT-GENERAL'S OFFICE,
Washington, June 25, 1898.

Major-General SHAFTER, *Playa del Este, Cuba:*

Every effort is being put forth to get you two or three lighters as asked for in your telegram just received.

H. C. CORBIN, *Adjutant-General.*

PLAYA (Received at Washington, June 25, 1898—1.17 p. m.).

ADJUTANT-GENERAL U. S. ARMY:

Daiquiri, 24.—In pushing out, to occupy good position near Sevilla to wait and intrench until supplies and artillery could be landed, the Fourteenth and Tenth Cavalry and Wood's regiment had a skirmish; enemy was driven from his position, and General Wheeler reports he now occupies their ground. Wounded: Major Bell, Captain Knox, Captain Wainwright, Lieutenant Byram, First Cavalry, and a number of men; above names only given. Lighters and steam tugs asked for this morning should be sent at once.

SHAFTER, *Commanding.*

PLAYA, *June 25, 1898.*
(Received at Washington 11.58 a. m.)

ADJUTANT-GENERAL U. S. ARMY, *Washington:*

Daiquiri, 24.—Further news from General Wheeler places our loss in this morning's affair about 10 killed and 40 wounded. Captain Capron, First United States Volunteer Cavalry, killed. Wounded: Major Brodie, Captain McClintock, and Lieutenant Thomas, First United States Volunteer Cavalry; Major Bell, Captain Knox, and Lieutenant Byram, First United States Cavalry; Captain Knox seriously. Captain Wainwright formerly reported wounded is uninjured; the names of the others killed and wounded not yet known. The Spaniards occupied a very strong intrenched position on a high hill, and firing lasted about an hour, and the enemy was driven from his position, which is now occupied by our troops about 1½ miles from Sevilla. The enemy has retired toward Santiago de Cuba.

SHAFTER, *Major-General.*

WAR DEPARTMENT, *June 25, 1898.*

Major-General SHAFTER, *Commanding, etc.:*

The President directs me to send his thanks to you and your army for the gallant action of yesterday, which I gladly do.

R. A. ALGER, *Secretary of War.*

PLAYA DEL ESTE, VIA HAITI.
(Received at Washington, June 26, 1898—9.05 p. m.)

Honorable SECRETARY OF WAR, *Washington:*

Daiquiri, Cuba, June 26, 1898.—Sincere thanks to the President for his congratulations.

SHAFTER, *Major-General.*

WAR DEPARTMENT, *Washington, June 26, 1898.*

SIR: By direction of the President an expedition will be organized with the least possible delay, under the immediate command of Major-General Brooke, United States Army, consisting of three divisions taken from the troops best equipped in the First and Third Army Corps and two divisions from the Fourth Army Corps, for movement and operation against the enemy in Cuba and Porto Rico. The command under Major-General Shafter, or such part thereof as can be spared from the work now in hand, will join the foregoing expedition, and you will command the forces thus united in person.

Transports for this service will be assembled at Tampa with the least possible delay. The naval forces will furnish convoy and cooperate with you in accomplishing the object in view. You will place yourself in close touch with the senior officer of the Navy in those waters, with the view to harmonious and forceful action.

Estimates will be made by you immediately on the several staff departments for the necessary supplies and subsistence, such estimates to be submitted to the Secretary of War.

For the information of the President, copies of all orders and instructions given by you from time to time will be forwarded on the day of their issue to the Adjutant-General of the Army. Also daily reports of the state and condition of your command will be made to the Secretary of War direct.

It is important that immediate preparation be made for this movement, and, when ready, report to this Department for further instructions.

Very respectfully,

R. A. ALGER,
Secretary of War.

Maj. Gen. NELSON A. MILES,
United States Army, Washington.

ADJUTANT-GENERAL'S OFFICE,
Washington, June 25, 1898—4.45 p. m.

Major-General SHAFTER, *Playa del Este, Cuba:*

Secretary of War directs as many of your transports as you can spare shall return at once with the convoy to Tampa for more troops, provisions, and transportation. The convoy has been ordered to return at once for reenforcements for you. Return the wounded on ships that are able to travel, using preferably the *Harvard* and *Yale*, returning to Newport News. Advise Department of action taken.

By command Major-General Miles:

H. C. CORBIN, *Adjutant-General.*

The dispatches concerning lighters are given in the report of the Quartermaster-General.

ADJUTANT-GENERAL'S OFFICE,
Washington, June 26, 1898—11 a. m.

Major-General SHAFTER, *Playa del Este, Cuba.*

Secretary of War directs that the graves of the dead be marked, so that there will be no question of identity or recovering the bodies when they can be shipped to their friends.

H. C. CORBIN, *Adjutant-General.*

WASHINGTON, *June 26, 1898.*

Maj. Gen. W. R. SHAFTER, *Commanding United States forces in Cuba:*

In burying the dead, be sure and detail a competent officer to have a map made giving resting place of each, so that friends can find the remains of their loved ones.

R. A. ALGER, *Secretary of War.*

PLAYA DEL ESTE, VIA HAITI.

(Received at Washington June 28, 1898—9 p. m.)

Hon. RUSSELL A. ALGER, *Secretary of War, Washington.*

Off Siboney, Cuba, June 27.—The graves of the dead are marked, so that there will be no mistake in identification. There was no embalming. Chief surgeon says it is impossible to do so. Caskets can be taken to graves, as there is a wagon road from this place to them. Steel caskets could be brought here and bodies put in them, but professional undertaker must do it. General Duffield's command ashore. I will not act hastily, though I believe I can take the place within forty-eight hours, but I fear at considerable loss of life. There is no necessity for haste, as we are growing stronger and they weaker every day. The health of the command is reported to me by the surgeon as remarkable, outside of the wounded. There are to-day less than 150 men sick; so far no wounded have died and but two men of disease since leaving Tampa. Am very glad to know that tugs and lighters are on the way. Hospital steamer *Relief* is all that we need at present. Have temporarily taken two transports for this service. Wired yesterday would like First Cavalry horses and Wood's with squadrons of those regiments left at Tampa, but they should come at once with them (I do not think the enemy could escape); besides, they can be used to gather in some small bodies of troops in the interior. Your son and young Corbin well. Your son urged me to let him go to the front as a volunteer, which I did, but have assigned him to General Duffield. No rain yet. Roads dusty.

SHAFTER,

*Major-General U. S. Volunteers, Commanding.*WAR DEPARTMENT, *Washington, June 27, 1898.*Major-General SHAFTER, *Cuba:*

Have you landed the siege guns?

(Rush.)

R. A. ALGER, *Secretary of War.*

PLAYA DEL ESTE, VIA HAITI.

(Received at Washington June 29, 1898, 9.37 p. m.)

SECRETARY OF WAR, *Washington:*

Siboney, 28.—I have not yet unloaded the siege guns, but will do so as soon as I can. I do not intend to take them to the front until we are stopped or need them. It is going to be a very difficult undertaking to get them up, and if attempted now would block the road. I have four light batteries at the front, and they are heavy enough to overcome anything the Spaniards have. If we have to besiege the town I will get the guns up. The advance picket is now within 2½ miles of Santiago. Officers making reconnoissances were within 1½ miles to-day and met with no opposition.

SHAFTER, *Major-General, Commanding.*

PLAYA DEL ESTE, VIA HAITI.

(Received at Washington June 29, 1898, 9.40 p. m.)

ADJUTANT-GENERAL U. S. ARMY, *Washington:*

Headquarters Fifth Army Corps, 3 miles from Santiago, Cuba, 29.—Advance pickets within a mile and a half of Santiago. No opposition. Spaniards have evidently withdrawn to immediate vicinity of the town. Expect to put division on Caney road between that place and Santiago day after to-morrow, and will also advance on Sevilla road to San Juan River, and possibly beyond. General Garcia, with 3,000 men, will take railroad north of Santiago at the same time to prevent Pando reaching city.

SHAFTER, *Major-General, Commanding.*

HEADQUARTERS OF THE ARMY,
Washington, D. C., June 30, 1898.

The honorable the SECRETARY OF WAR.

SIR: I have the honor to report, in accordance with your instructions dated June 26, 1898, that part of the First Division of the Fourth Corps left Tampa this morning for Santiago de Cuba, and the remainder will follow as soon as transports are furnished. Six light batteries, namely, two of Third, Fourth, and Fifth, respectively, left with the same transports for the same place under command of General Randolph, U. S. Volunteers.

Very respectfully,

NELSON A. MILES,
Major-General Commanding.

HEADQUARTERS OF THE ARMY,
Washington, June 30, 1898.

The honorable the SECRETARY OF WAR.

SIR: In reply to your note, I have the honor to inform you that the First Illinois Regiment, consisting of 1,200 men, sailed to-day from Port Tampa; and also that 200,000 rations in bulk were shipped.

Very respectfully,

NELSON A. MILES,
Major-General Commanding.

PLAYA, July 1, 1898.

(Received at Washington July 1, 1898—9.34 a. m.)

SECRETARY OF WAR, Washington:

Camp near Sevilla, Cuba, 1.—Action now going on, but firing only light and desultory. Began on the right near Caney—Lawton's division. He will move on the northeast part of the town of Santiago. Will keep you continually advised of progress.

SHAFTER, Major-General.

PLAYA DEL ESTE, VIA HAITI.

(Received Washington July 1, 1898.)

ADJUTANT-GENERAL'S OFFICE, U. S. ARMY, Washington:

Siboney.—Had a very heavy engagement to-day which lasted from 8 a. m. till sundown. We have carried their outer works and are now in possession of them. There is now about three-quarters of a mile of open country between my lines and city. By morning troops will be intrenched and considerable augmentation of forces will be there. General Lawton's division and General Bates's brigade, which have been engaged all day in carrying El Caney, which was accomplished at 4 p. m., will be in line and in front of Santiago during the night. I regret to say that our casualties will be above 400. Of these not many are killed.

W. R. SHAFTER, Major-General.

PLAYA DEL ESTE, VIA HAITI.

(Received at Washington July 2, 1898—1.12 a. m.)

ADJUTANT-GENERAL, Washington:

Headquarters near Santiago de Cuba, 1.—I fear I have underestimated to-day's casualties. A large and thoroughly equipped hospital ship should be sent here at once. Chief surgeon says he has use for 40 more medical officers. Ship must bring launch and boat for conveying wounded from.

W. R. SHAFTER,
Major-General, Fifth Corps.

ADJUTANT-GENERAL'S OFFICE,
Washington, July 2, 1898.

General SHAFER:

The Secretary of War directs me to say that hospital ship and medical officers will be sent you as soon as possible; probably leave to-day or to-morrow.

H. C. CORBIN, *Adjutant-General*.

ADJUTANT-GENERAL'S OFFICE,
Washington, July 2, 1898.

General SHAFER:

Sorry the losses are so heavy, but am confident of your ultimate complete success.

H. C. CORBIN, *Adjutant-General*.

ADJUTANT-GENERAL'S OFFICE,
Washington, July 2, 1898.

General SHAFER:

The Secretary of War suggests that probably the Navy can help you in caring for the wounded. Of course, you can utilize any of our own transports for hospital purposes.

H. C. CORBIN, *Adjutant-General*.

HEADQUARTERS OF THE ARMY,
Washington, D. C., July 1, 1898.

The honorable the SECRETARY OF WAR.

SIR: As it may be several days before a convoy can reach Key West to accompany additional transports to Santiago de Cuba, and as it will be several days before a sufficient number of transports can reach Tampa to take the remainder of General Snyder's division, I think the present a favorable opportunity to take and occupy the Isle of Pines, for the following reasons:

First. It will stop the accumulation on that island of supplies for the Spaniards, and the supplies already there can be captured.

Second. It will be easily taken when, as is now the case, the attention of the enemy is turned to Havana, Santiago, and Porto Rico.

Third. It is said to have the most delightful climate in the West Indies, being entirely free from yellow fever. It can be made extremely useful for the establishment of a hospital and a camp of prisoners, and also, eventually, as a base for supplying the Cubans, and, possibly, for the cavalry operations on the main island of Cuba.

I think the one steamer now at Tampa can, with a battery of artillery and one regiment of infantry, take the island, land from two to six months' supplies, and return to Tampa inside of ten days, when the steamer would be ready to be used for any future military purpose.

Very respectfully,

NELSON A. MILES,
Major-General Commanding.

WAR DEPARTMENT, Washington, July 1, 1898.

Maj. Gen. NELSON A. MILES,

United States Army, Washington, D. C.

SIR: In reply to your communication of this date, that a battery of artillery and a regiment of infantry be sent to take the Isle of Pines, I have the honor to inform you that this is not approved by the President.

Very respectfully,

R. A. ALGER, *Secretary of War*.

WAR DEPARTMENT, *Washington, July 2, 1898.*

For the COMMISSARY-GENERAL OF SUBSISTENCE:

The Secretary of War directs you to arrange for a supply of food for prisoners and indigent citizens that may come under control of Maj. Gen. W. R. Shafter. To this end one large ship containing not less than 1,500 tons should be provided at the earliest possible day.

R. A. ALGER, *Secretary of War.*

KEY WEST, FLA., *July 2, 1898.*

(Received Washington 12.50 a. m.)

Captain MONTGOMERY, *Washington:*

Following just received: "Cervera has been ordered to shell the town when Americans get possession. All foreign consuls have been notified to retire at that time to place of safety outside of city." Inform General Greely.

SAWYER.

EXECUTIVE MANSION,

Washington, July 3, 1898—1.56 a. m.

Major-General SHAFER, *Playa del Este:*

(To be forwarded at once to headquarters in the field.)

The following is just received—midnight—from sources unofficial: "Cervera has been ordered to shell the town (Santiago) when Americans get possession. All foreign consuls have been notified to retire at that time to places of safety outside of city." This information may or may not be correct, but is sent for your consideration. We are awaiting with intense anxiety tidings of to-day.

R. A. ALGER, *Secretary of War.*

PLAYA DEL ESTE, VIA HAITI.

(Received Washington July 3, 1898—11.44 a. m.)

The SECRETARY OF WAR, *Washington:*

Camp near Sevilla, Cuba, 3.—We have the town well invested on the north and east, but with a very thin line. Upon approaching it we find it of such a character and the defenses so strong it will be impossible to carry it by storm with my present force, and I am seriously considering withdrawing about 5 miles and taking up a new position on the high ground between the San Juan River and Siboney, with our left at Sardinero, so as to get our supplies to a large extent by means of the railroad, which we can use, having engines and cars at Siboney. Our losses up to date will aggregate a thousand, but list has not yet been made. But little sickness outside of exhaustion from intense heat and exertion of the battle of the day before yesterday and the almost constant fire which is kept up on the trenches. Wagon road to the rear is kept up with some difficulty on account of rains, but I will be able to use it for the present. General Wheeler is seriously ill and will probably have to go to the rear to-day. General Young also very ill, confined to his bed. General Hawkins slightly wounded in foot during sortie enemy made last night, which was handsomely repulsed. The behavior of the regular troops was magnificent. I am urging Admiral Sampson to attempt to force the entrance of the harbor and will have a consultation with him this morning. He is coming to the front to see me. I have been unable to be out during the heat of the day for four days, but am retaining the command. General Garcia reported he holds the railroad from Santiago to San Luis and has burned a bridge and removed some rails; also that General Pando has arrived at Palma, and that the French consul with about 400 French citizens came into his line yesterday from Santiago. Have directed him to treat them with every courtesy possible.

SHAFER, *Major-General.*

WAR DEPARTMENT, *Washington, July 3, 1898—12.10 p. m.*

Major-General SHAFTER, *Playa del Este, Cuba:*

Your first dispatch received. Of course, you can judge the situation better than we can at this end of the line. If, however, you could hold your present position, especially San Juan heights, the effect upon the country would be much better than falling back. However, we leave all that matter to you. This is only a suggestion. We shall send you reenforcements at once.

R. A. ALGER, *Secretary of War.*

PLAYA DEL ESTE, VIA HAITI.

(Received Washington July 4, 1898—1.16 a. m.)

The honorable SECRETARY OF WAR, *Washington:*

Headquarters Fifth Corps, 3.—I shall hold my present position.

SHAFTER, *Major-General.*

CUBA, VIA HAITI.

(Received at Washington July 3, 1898—2 p. m.)

ADJUTANT-GENERAL OF THE ARMY, *Washington:*

Camp near Santiago, 3.—Large quantities of underclothing and shoes, enough for entire army, are badly needed.

SHAFTER, *Commanding.*

WAR DEPARTMENT, *July 4, 1898.*

General SHAFTER, *Cuba:*

St. Paul leaves New York Wednesday direct for Santiago with Eighth Ohio, and underclothing, shoes, stockings, and duck suits for your whole army. How are you, Wheeler, Young, and others?

R. A. ALGER, *Secretary of War.*

ADJUTANT GENERAL'S OFFICE,

Washington, July 3, 1898.—5 p. m.

Major General SHAFTER, *Playa del Este, Cuba:*

You can have whatever reenforcements you want. Wire what additional troops you desire and they will be sent as rapidly as transports can be secured. In addition to the 2,700 troops now en route from Tampa, the *St. Paul* and *Duchess* will leave Newport News not later than Wednesday, with 3,000 troops of Garretson's brigade; the *St. Louis*, *Yale*, and *Columbia* will sail probably from Charleston, carrying 4,000 more, and others will be sent from Tampa as you may request.

H. C. CORBIN, *Adjutant General.*

WAR DEPARTMENT, *Washington, July 3, 1898.*

General SHAFTER,

Commanding United States Forces, Cuba:

We are forwarding reenforcements to you this week. How is your health? Do you think that some one should come to relieve you? Are you going to be able to stand through? What do you think? Be very careful of yourself.

R. A. ALGER, *Secretary of War.*

WAR DEPARTMENT, *Washington, July 3, 1898.*

Major-General SHAFTER,

Commanding United States Forces, Cuba:

I waited with the President until 4 o'clock this morning for news from you relative to Saturday's battle. Not a word was received, nor has there been up to this hour,

11 a. m., except an account of the battle of Friday, upon which I congratulate you most heartily. I wish hereafter that you would interrupt all messages that are being sent for the Associated Press and others, and make report at the close of each day, or during the day, if there is anything of special importance at once. The *Relief* left New York yesterday. She has seventeen surgeons on board, and will come to you as quickly as possible.

R. A. ALGER, *Secretary of War.*

PLAYA DEL ESTE, VIA HAITI.

(Received Washington July 3, 1898—7 p. m.)

SECRETARY WAR, *Washington:*

Camp near Santiago, 3.—Lieutenant Allen, Second Cavalry, is just in from my extreme right, which is on the railroad running north from Santiago and which overlooks the entire bay. Lieutenant Allen states that Cervera's fleet was in full view until nearly 10 o'clock this morning, when it proceeded down the bay, and shortly afterwards heavy firing was heard. Duffield, at Siboney, has just telephoned me that Captain Cotton, of the *Harvard*, just sent him word that Admiral Sampson had signaled Cervera had come out and had escaped and that he was in pursuit. The *Harvard* immediately left. The French consul informed General Garcia, into whose lines he went yesterday, that Admiral Cervera had stated that he would run out at 10 o'clock this a. m., and that was the hour Allen witnessed his departure. Cervera told such consul it was better to die fighting than blow up ships in harbor.

SHAFTER, *Commanding.*

PLAYA DEL ESTE, VIA HAITI.

(Received Washington July 3, 1898—7.31 p. m.)

ADJUTANT-GENERAL UNITED STATES ARMY, *Washington:*

Camp near Santiago, Cuba, 3.—Early this morning I sent in a demand for immediate surrender of Santiago, threatening bombardment to-morrow. Perfect quiet on lines for one hour. From news just received of escape of fleet am satisfied place will be surrendered.

SHAFTER, *Commanding.*

PLAYA DEL ESTE, VIA HAITI.

(Received Washington, July 4, 1898.—12.15 a. m.)

General ALGER, *Washington:*

Headquarters Fifth Army Corps, Cuba, 3.—Did not telegraph, as I was too busy looking after things that had to be attended to at once and did not wish to send any news that was not fully confirmed; besides, I was too much excited myself. The Spanish fleet left the harbor this morning and is reported practically destroyed. I demanded surrender of the city at 10 o'clock to-day. At this hour, 4.30 p. m., no reply has been received; perfect quiet along the line; situation has been precarious on account of difficulties of supplying command with food, and tremendous fighting capabilities shown by the enemy from his almost impregnable position.

SHAFTER, *Major-General.*

PLAYA, July 4, 1898.

(Received Washington July 4, 1898—9.30 a. m.)

The ADJUTANT-GENERAL'S OFFICE, U. S. ARMY, *Washington:*

Headquarters Fifth Army Corps, near Santiago. Your telegram inquiring about my health just received. I am still very much exhausted. Eating a little this p. m. for the first time in four days. The good news has inspired everybody. When the news of the disaster of the Spanish fleet reached the front, which was during the

period of truce, a regimental band that had managed to keep its instruments on the line, played "The Star-Spangled Banner" and "There will be a hot time in the old town to-night," men cheering from one end of the line to the other. Officers and men, without even shelter tents, have been soaking for five days in the afternoon rains, but all are happy.

SHAFTER,
Major-General, U. S. A.

PLAYA DEL ESTE, VIA HAITI.
(Received Washington July 4, 1898—5.22 a. m.)

Hon. R. A. ALGER, *Secretary of War, Washington:*

Headquarters Fifth Army Corps, 3.—The following is my demand for the surrender of the city of Santiago:

"HEADQUARTERS UNITED STATES FORCES,
"Near San Juan River, Cuba, July 3, 1898—8.30 a. m.

"To the Commanding General of the Spanish Forces, Santiago de Cuba:

"SIR: I shall be obliged unless you surrender to shell Santiago de Cuba.

"Please inform the citizens of foreign countries and all women and children that they should leave the city before 10 o'clock to-morrow morning.

"Very respectfully, your obedient servant,

"W. R. SHAFTER,
"Major-General, U. S. Army."

Following is the Spanish reply, with which Colonel Dorst has just returned, at 6.30 p. m.:

"SANTIAGO DE CUBA, July 3, 1898—3 p. m.

"His Excellency the GENERAL COMMANDING FORCES OF UNITED STATES NEAR
SAN JUAN RIVER:

"SIR: I have the honor to reply to your communication of to-day, written at 8.30 a. m. and received at 1 p. m., demanding surrender of this city, on the contrary case announcing to me that you will bombard this city and that I advise the foreign women and children that they must leave the city before 10 o'clock to-morrow morning. It is my duty to say to you that this city will not surrender, and that I will inform the foreign consuls and inhabitants of the contents of your message.

"Very respectfully,

"JOSE TORAL,
"Commander in Chief, Fourth Corps."

The British, Portuguese, Chinese, and Norwegian consuls have come to my line with Colonel Dorst. They ask if noncombatants can occupy the town of Caney and railroad points, and ask until 10 o'clock of 5th instant before the city is fired on. They claim that there are between 15,000 and 20,000 people, many of them old, who will leave. They ask if I can supply them with food, which I can not do for want of transportation to Caney, which is 15 miles from my landing. The following is my reply:

SANTIAGO DE CUBA, July 3, 1898.

The COMMANDING GENERAL, SPANISH FORCES:

In consideration of the request of the consul officers in your city, award the delay in carrying out my intention to fire on the city, and in the interest of the poor women and children, who will suffer very greatly by their hasty and enforced departure from the city, I have the honor to announce that I will delay such action solely in their interest until noon on the 5th, provided during the interval your forces make no demonstration whatever upon those of my own.

I am with great respect, your obedient servant,

W. R. SHAFTER,
Major-General, U. S. Volunteers.

I do not know that these extreme measures which I have threatened be justifiable under the circumstances, and I submit the matter for the action of the President. The little town of Caney will not hold one thousand people and great suffering will be occasioned to our friends, as we must regard the people referred to; and it is now filled with dead and wounded, the dead still unburied. The consuls tell Dorst that there are not to exceed 5,000 troops in the city. I can hold my present line and starve them out, letting the noncombattants come out leisurely as they run out of food, and, will probably be able to give such as are forced out by hunger, food to keep them alive. I await your orders.

W. R. SHAFTER,

WAR DEPARTMENT, *Washington, July 4, 1898—6.10 a. m.*

Major-General SHAFTER, *Playa del Este, Cuba:*

Telegram containing demand made by you for surrender of Santiago, the Spanish commander's reply thereto, and your reply to him received. While you would be justified in beginning to shell Santiago at expiration of time limit set by you, still under the conditions named in your dispatch and for humanity's sake the postponement of the bombardment to noon of July 5th is approved. Telegraph me this evening just how matters stand. Have you recent news of Hobson?

R. A. ALGER, *Secretary of War.*

ADJUTANT-GENERAL'S OFFICE,
Washington, July 4, 1898—3.30 p. m.

Major-General SHAFTER, *Playa del Este, Cuba:*

Being on the ground and knowing all the conditions, the Secretary of War directs you use your own judgment as to how and when you will take the city of Santiago, but for manifest reasons it should be accomplished as speedily as possible.

By command Major-General Miles:

H. C. CORBIN, *Adjutant-General.*

WAR DEPARTMENT,
Washington, July 4, 1898.

General SHAFTER, *Cuba:*

My telegram to-day concerning your future action was not intended in any way to direct your movements. You are the best judge of the situation and all the country has every faith in your wisdom. How are you physically, anyway?

R. A. ALGER, *Secretary of War.*

ADJUTANT-GENERAL'S OFFICE,
Washington July 4, 1898.

Major-General SHAFTER, *Playa del Este, Cuba:*

After conference with the President and the Secretary of War I am directed to say your continued illness brings sorrow and anxiety. In case you are disabled General Wheeler would, of course, succeed to command. His illness, which we also regret, is feared to be so serious as to prevent his assuming command. You must determine whether your condition is such as to require you to relinquish command. If so, and General Wheeler is disabled, you will order the next general officer in rank for duty to succeed you and to take up the work in hand. It is not expected that our forces will make assault until they are ready.

H. C. CORBIN, *Adjutant-General.*

PLAYA DEL ESTE, VIA HAITI,
(Received Washington, July 6, 1898—5.40 a. m.)

ADJUTANT-GENERAL, *Washington*:

Camp near Santiago, Cuba, 5—I am not at present so much ill as exhausted from the intense strain that has been on me for last two months. I am also suffering from an attack of gout, which prevents me from moving about. I have, however, the whole business in my hand, and am managing it through able staff officers. When I do have to give up I will of course follow your order, but I hope to be better soon.

SHAFTER,
Major-General, Commanding.

PLAYA DEL ESTE.
(Received at Washington July 6, 1898—4.13 a.m.)

The ADJUTANT-GENERAL, *Washington*:

Camp near Santiago, 5.—I am just in receipt of a letter from General Soul agreeing to exchange Hobson and men here; to make exchange in the morning. Yesterday he refused my proposition to exchange.

SHAFTER, *Major-General.*

PLAYA DEL ESTE, VIA HAITI,
(Received at Washington July 7, 1898—7 a. m.)

SECRETARY OF WAR, *Washington*:

Headquarters Fifth Army Corps, 6.—Lieutenant Hobson and all his men have just been received safely in exchange for Spanish officer and prisoners taken by us. All are in good health except two seamen convalescent from remittent fever.

SHAFTER, *Major-General Commanding.*

PLAYA DEL ESTE, VIA HAITI.
(Received at Washington July 4, 1898—6.57 a. m.)

ADJUTANT-GENERAL'S OFFICE, *Washington*:

Headquarters Fifth Army Corps, Santiago, 3.—To-night my lines completely surround the town from the bay on the north of the city to a point on the San Juan River on the south. The enemy holds from the west bend of the San Juan River at its mouth up the railroad to the city. General Pando, I find to-night, is some distance away and will not get into Santiago.

SHAFTER, *Commanding.*

PLAYA DEL ESTE, VIA HAITI.
(Received at Washington July 4, 1898, 10.10 p. m.)

ADJUTANT-GENERAL U. S. ARMY, *Washington*:

Camp near Santiago, Cuba, 4.—When am I to expect troops from Tampa? Report just received Pando entered city last night by Cobre road with 5,000 from Holguin. Garcia was especially charged with blockading that road.

SHAFTER, *Commanding.*

ADJUTANT-GENERAL'S OFFICE,
Washington, July 4, 1898.

General SHAFTER, *Playa del Este, Cuba*:

Reenforcements are being hurried to you. Randolph leaves Key West to-night with fast convoy. He has about 3,500 men, including the six light batteries from Tampa. The *St. Paul* will leave New York Wednesday evening with the Eighth

Ohio Volunteers. The *Yale* and *Harvard* will take all the troops they can carry, sailing from Charleston. The day and hour of their departure will be communicated to you as soon as known, probably the 6th.

By command Major-General Miles,

H. C. CORBIN, *Adjutant-General*.

PLAYA DEL ESTE, VIA HAITI.

(Received Washington July 6, 1898, 7.58 p. m.)

ADJUTANT-GENERAL U. S. ARMY, *Washington*:

7.29 a. m., Siboney 5.—I, yesterday, offered to return to the commanding officer of the Spanish forces a number of wounded officers and men left lying on the battlefield at Caney, the officers to give their paroles and the senior officer for the men. Did this, first, to get rid of the care of them, and second to show the Spanish troops they were not to be killed by us as they had been told by their officers would be the case. This morning I sent Lieutenant Brooke and Dr. Goodfellow with some ambulances to Caney for the wounded and from there conduct them as far as they were to go. Four officers and 24 men were loaded and driven into the inner line of defenses near the city. Large numbers of officers and soldiers gathered about the ambulances and assisted in removing the men. Two companies of troops were drawn up on either side of the road and arms were presented to the officers and their mounted escort. All of the officers gave their individual parole and desired to return. The men did not wish to go back, but were required to do so. I have just received a letter through a flag of truce from the general of the lines thanking me courteously for giving them their wounded. I am satisfied that it will tend more to create dissatisfaction in the ranks of the enemy than anything I could have done, as the soldiers said we were fighting the church and were going to kill them. There has not been a shot fired on the line to-day. I am simply making my lines stronger and hanging on. I shall expect many deserters, as a number of officers came out with the refugees last night. One of them a colonel and two captains who fought us on the 1st.

SHAFTER, *Major-General*.

PLAYA DEL ESTE, VIA HAITI.

(Received at Washington July 5, 1898, 12.53 a. m.)

ADJUTANT-GENERAL, *Washington*:

In the field, near San Juan River, 4.—I regard it as necessary that the navy force an entrance into the harbor of Santiago not later than the 6th instant, and assist in the capture of that place. If they do, I believe the place will surrender without further sacrifice of life.

SHAFTER, *Major-General*.

Please acknowledge receipt to me.

ALLEN.

PLAYA DEL ESTE, VIA HAITI.

(Received at Washington July 5, 1898, 1.10 a. m.)

ADJUTANT-GENERAL, *Washington*:

Headquarters Fifth Army Corps, camp near San Juan River, 4.—If Sampson will force an entrance with all his fleet to the upper bay of Santiago, we can take the city within a few hours. Under these conditions I believe the town will surrender. If the army is to take the place I want 15,000 troops speedily, and it is not certain that they can be landed, as it is getting stormy. Sure and speedy way is through the bay. Am now in position to do my part.

SHAFTER, *Major-General*.

Please acknowledge receipt to me.

ALLEN.

PLAYA DEL ESTE, VIA HAITI,
(Received at Washington July 5, 1898, 7 a. m.)

ADJUTANT-GENERAL U. S. ARMY, *Washington* :

1.07 p. m. Headquarters United States forces near San Juan River, Cuba, 4.—I regard as necessary that the navy force an entrance into the harbor Santiago not later than 6th instant, and assist in the capture of the place. If they do, I believe the place will surrender without further sacrifice of life.

SHAFTER,
Major-General, U. S. Volunteers.

ADJUTANT-GENERAL'S OFFICE,
Washington, July 5, 1898, 11.20 a. m.

Major-General SHAFTER, *Playa del Este, Cuba* :

Secretary of War instructs me to say that the President directs that you confer with Admiral Sampson at once for cooperation in taking Santiago. After the fullest exchange of views, you will agree upon the time and manner of attack.

By command Major-General MILES:

H. C. CORBIN, *Adjutant-General.*

ADJUTANT-GENERAL'S OFFICE,
Washington, July 5, 1898—3.10 p. m.

Major-General SHAFTER, *Playa del Este, Cuba*:

Your telegram this date has been submitted to the President. After consideration, the Secretary of War directs me to say that it is evident from your several reports that you do not consider your force strong enough to make a successful assault upon the Spanish army intrenched in Santiago. This being the case, it is the part of wisdom to await reenforcements, the embarkation of which you have already been advised. As you have already been advised, you must be judge of the time and manner of assault. The President has directed that you and Admiral Sampson have a conference and determine a course of cooperation best calculated to secure desired results with least sacrifice.

By command Major-General Miles:

H. C. CORBIN, *Adjutant-General.*

ADJUTANT-GENERAL'S OFFICE,
Washington, July 6, 1898—2.30 p. m.

Maj. Gen. W. R. SHAFTER, *Playa del Este, Cuba*:

The Secretary of War is anxious to know what prospect there is of breaking through the mine. He would be very glad, even with a delay, to have cooperation of the navy, thus saving many lives. The *St. Paul*, sailing from New York to-day, has nearly everything you asked for. The lighters, sent a long time since, ought to be with you by this time. We are trying to make arrangements for light-draft steam vessels for carrying orders, etc., to be sent you as quickly as possible. Can you not procure from the navy steam launches to aid you in landing supplies and carrying dispatches while we are getting crafts of our own for that object. It is expected you will communicate freely, setting forth any assistance that can be given you in the way of supplies of any kind.

By command Major-General Miles:

H. C. CORBIN, *Adjutant-General.*

PLAYA, *July 7, 1898.*

(Received at Washington 4.50 p. m.)

ADJUTANT-GENERAL U. S. ARMY, *Washington:*

Had consultation with Sampson. Navy disinclined to force entrance except as a last resource. They will bombard the city, which is within easy range of their big guns, beginning at noon of the 9th, and if that is not effective after twenty-four hours will then force entrance with some of the smaller ships. I still have hopes they will surrender. Made a second demand on them yesterday, calling attention to the changed conditions because of the loss of the Spanish fleet, and offering to give them time to consult their home Government, which General Toral has accepted, asking that British consul return to the city with employees of the Cable Company, Ltd. Permitted him to do so. Meanwhile I hope my reenforcements will arrive. Not one in sight yet except the 200 recruits for the Second Infantry, who came a week ago. As a last resort I will try running in transports. I do not consider my force sufficient to warrant an assault on the city, though I believe it would be successful, but at a fearful loss, of course. It would be criminal to hope for the end to be gained, which is merely the capture of a few thousand men, and when we are seen we are getting them by siege. Nothing has yet been seen of tugs, lighters, and launches promised ten days ago.

SHAFTER, *Major-General, Commanding.*PLAYA DEL ESTE, *July 7, 1898.*

(Received at Washington 8.35 p. m.)

ADJUTANT-GENERAL U. S. ARMY, *Washington:*

Headquarters Fifth Army Corps, near Santiago, Cuba.—The hospital ship *Relief* just arrived with a large amount of medical stores. Want the teamsters, stevedores, and steam lighters, as wired you, and the sooner they can be gotten here the better.

W. R. SHAFTER, *Major-General.*ADJUTANT-GENERAL'S OFFICE, *Washington, July 7, 1898.*Major-General SHAFTER, *Playa del Este, Cuba:*

One tug should reach you to-day. A large, powerful one leaves New Orleans to-night. Fifty laborers went on the *St. Paul*, leaving New York to-day, and stevedores are on boats going to you.

H. C. CORBIN, *Adjutant-General.*

ADJUTANT-GENERAL'S OFFICE,

*Washington, July 8, 1898—11 p. m.*Maj. Gen. W. R. SHAFTER, *Playa del Este, Cuba:*

All the lighters that started for you on the 27th June, which it was supposed had reached you ere this, we now learn have been lost in the sea. Every possible effort is being put forth to get others under way, and it is hoped it will be accomplished some time between this and to-morrow.

H. C. CORBIN, *Adjutant-General.*

The following telegram from Major-General Shafter was in answer to a telegram sent him stating that his men were reported without food:

PLAYA.

(Received at Washington July 9, 1898—10.54 a. m.)

Hon. R. A. ALGER, *Washington:*

Camp near Santiago, Cuba, 8.—On the day of the battle men piled up and left their blanket rolls, and many of them their haversacks, and it was not until the

next night they were able to get them. It is possible that some of them may have been hungry, but on the night of the battle pack trains were sent and food distributed along the line. They were without tobacco for several days, as it was only by the greatest exertion that coffee, sugar, meat, and bread could be gotten; out of these they had full rations, except for twenty-four hours, when there was no coffee. I will have careful inquiry made to see if in any isolated cases men were without food for forty-eight hours, and the cause of it. No such cases have been reported to these headquarters. I learned to-night that the supply of tobacco is nearly exhausted.

SHAFTER, *Major-General.*

HEADQUARTERS OF THE ARMY,
Washington, D. C., July 6, 1898.

The honorable the SECRETARY OF WAR:

SIR: Referring to my letter of the 29th ultimo, I have the honor to report that I expect to leave Washington not later than to-morrow night.

Very respectfully,

NELSON A. MILES,
Major-General Commanding.

ADJUTANT-GENERAL'S OFFICE,
Washington, July 8, 1898.

Major-General SHAFTER, *Playa del Este, Cuba:*

Secretary of War directs me to inform you that General Miles left here at 10.40 last night for Santiago, but with instructions not to in any manner supersede you as commander of the forces in the field near Santiago so long as you are able for duty.

H. C. CORBIN, *Adjutant-General.*

ADJUTANT-GENERAL'S OFFICE,
Washington, July 9, 1898.

General SHAFTER, *Playa del Este, Cuba:*

Information from the Secretary Navy is that the *Columbia* and *Yale* sailed from Charleston, S. C., midnight of the 8th, for Santiago, General Miles being aboard the *Yale*.

H. C. CORBIN, *Adjutant-General.*

PLAYA DEL ESTE, via HAITI.

(Received at Washington July 11, 1898—7.49 p. m.)

SECRETARY OF WAR, *Washington:*

Siboney, Cuba, 11.—Arrived at noon. Had consultation with Admiral Sampson and General Shafter by telephone. Troops from Tampa, New York, and Charleston are arriving and move to the front. The line of investment is being extended.

MILES.

NAVY DEPARTMENT, *July 12, 1898.*

Columbia and *Yale*, with General Miles and United States troops on board, arrived off Santiago last evening.

Respectfully,

A. L. CROWNINSHIELD,
Chief of Bureau.

ADJUTANT-GENERAL'S OFFICE,

Washington, July 8, 1898—3.10 p. m.

Major-General SHAFER, *Playa del Este, Cuba*:

Do you recommend the arming of Henry's division, or any other volunteers of your command, with Krag-Jorgensen rifles? We have 1,800,000 rounds of ammunition at Tampa and manufacture 250,000 per day, so that you may know what the supply may be. What are your wishes?

By order Secretary of War:

H. C. CORBIN, *Adjutant-General*.

PLAYA. (Received at Washington July 9, 1898—9.56 a. m.)

ADJUTANT-GENERAL U. S. ARMY, *Washington*:

Headquarters Fifth Army Corps.—By all means arm in field Henry's division and the volunteer regiments now here with the Krag-Jorgensen rifle. The use of black powder instantly brought volleys against regiments using Springfield, and was very demoralizing on those regiments.

SHAFER, *Major-General, Commanding*.

PLAYA, via HAITI, July 7, 1898.

(Received Washington 3.32 p. m.)

Hon. R. A. ALGER, *Secretary of War, Washington*:

Under date of 3d instant in long dispatch you say that "nothing has been heard except one account of battle yesterday, upon which I can congratulate you most heartily." Anything further of a congratulatory nature from either the President or yourself failed to reach me, but upon your dispatch of this morning I will announce the President's and your congratulations to the army on its good work of the 1st instant.

SHAFER, *Major-General*.

ADJUTANT-GENERAL'S OFFICE,

Washington, July 8, 1898.

General SHAFER, *Playa del Este, Cuba*:

The telegram which it appears you did not receive reads as follows: "The President directs me to say you have the gratitude and thanks of the nation for the brilliant and effective work of your noble army on Friday, July 1. The steady valor and heroism of officers and men thrill the American people with pride. The country mourns the brave men who fell in battle. They have added new names to our roll of heroes.

"R. A. ALGER, *Secretary of War*."

H. C. CORBIN, *Adjutant-General*.

[Memorandum for the War Department.]

NAVY DEPARTMENT, *Washington, July 9, 1898*.

PLAYA DEL ESTE, VIA HAITI.

(Received at Washington July 11, 1898—5 a. m.)

Hon. R. A. ALGER, *Secretary of War, Washington:*

Camp near Santiago, 10.—Hard work is telling on teamsters and packers. Nearly 50 per cent sick. Teams have got to be kept going; will do it with details of soldiers if teamsters can not be sent here.

SHAFTER, *Major-General*.

ADJUTANT-GENERAL'S OFFICE,

*Washington, July 11, 1898—10 a. m.*Major-General SHAFTER, *Playa del Este, Cuba.*

There were 50 stevedores sent on the *St. Paul*. Four hundred laborers should have left Jacksonville yesterday afternoon. Others will be forwarded as rapidly as they

can be employed and furnished transportation. This in order to relieve the sick teamsters and laborers as far as possible.

H. C. CORBIN, *Adjutant-General*.

PLAYA. (Received at Washington July 9, 1898—11.18 a. m.)

ADJUTANT-GENERAL, *Washington*:

Camp near Santiago, 8.—Have been visiting the lines all day; I regard them as impregnable against any force the enemy can send. The truce expires at 12 to-morrow, and I expect soon after firing will begin. No assault will be made of advance from our present lines until the Navy comes into the bay. I hope to be able by fire from intrenchments to drive the enemy inside the city.

SHAFTER, *Major-General*.

PLAYA. (Received at Washington July 9, 1898—1 p. m.)

R. A. ALGER, *Secretary of War, Washington*:

Camp near Santiago, Cuba, July 8.—I am just in receipt of a letter from the commandant of Santiago de Cuba, who proposes to march out of the city with arms and baggage and not to be molested until he reaches Holguin, surrendering to the American forces the territory now occupied by him. I have replied that while I have submitted the matter to my home Government I did not think his terms would be accepted. He makes this proposition to avoid danger to the city and useless shedding of blood. This will give me another day to get up troops from Siboney, the first transports of reinforcements having just arrived. In my opinion they will have to surrender unconditionally very soon after I open fire upon them.

W. R. SHAFTER,
Major-General, U. S. Army.

ADJUTANT-GENERAL'S OFFICE,

Washington, July 9, 1898—1.50 p. m.

Major-General SHAFTER, *Playa del Este, Cuba*:

Your telegram setting forth terms in which the enemy will evacuate Santiago has been submitted to the President by the Secretary of War, who instructs me to say that you will accept nothing but an unconditional surrender and should take extra precautions to prevent the enemy's escape.

By order Secretary of War:

H. C. CORBIN, *Adjutant-General*.

PLAYA DEL ESTE, VIA HAITI.

(Received Washington July 9, 1898—9 p. m.)

HON. SECRETARY OF WAR, *Washington*:

Headquarters Fifth Army Corps, near Santiago.—I forwarded General Toral's proposition to evacuate the town this morning without consulting anyone. Since then I have seen the general officers commanding divisions, who agree with me that it should be accepted. First, it releases at once the harbor. Second, it permits the return of thousands of women, children, and old men, who have left the town fearing bombardment and who are now suffering where they are, though I am doing my best to supply them with food. Third, it saves the great destruction of property which a bombardment would entail, most of which belongs to Cubans and foreign residents. Fourth, it at once relieves the command, while it is in good health, for operations elsewhere. There are now three cases of yellow fever at Siboney in Michigan regiment, and if it gets started no one knows where it will stop. We will

lose by this simply some prisoners we do not want and the arms they carry. I believe many of them will desert and return to our lines. I was told by sentinel who deserted last night that 200 men wanted to come, but were afraid our men would fire upon them.

W. R. SHAFER, *General.*

ADJUTANT-GENERAL'S OFFICE,
Washington, July 9, 1898—11.15 p. m.

Major-General SHAFER, *Playa del Este, Cuba:*

In reply to your telegram recommending terms of evacuation as proposed by the Spanish commander, after careful consideration by the President and Secretary of War, I am directed to say that you have repeatedly been advised that you would not be expected to make an assault upon the enemy at Santiago until you were prepared to do the work thoroughly. When you are ready this will be done. Your telegram of this morning said your position was impregnable and that you believed the enemy would yet surrender unconditionally. You have also assured us that you could force their surrender by cutting off the supplies. Under these circumstances your message recommending that Spanish troops be permitted to evacuate and proceed without molestation to Holguin is a great surprise, and is not approved. The responsibility of destruction and distress to the inhabitants rests entirely with the Spanish commander. The Secretary of War orders that when you are strong enough to destroy the enemy and take Santiago that you do it. If you have not force enough it will be dispatched to you at the earliest moment practicable. Reinforcements are on the way, of which you have already been advised. In the meantime nothing is lost by holding the position you now have and which you regard as impregnable. Acknowledge receipt.

By order the Secretary of War:

H. C. CORBIN, *Adjutant-General.*

PLAYA DEL ESTE, VIA HAITI.
(Received Washington July 10, 1898—2.50 p. m.)

ADJUTANT-GENERAL, *Washington:*

Headquarters near Santiago, Cuba, 10.—Telegram of 9th regards to evacuation of Spanish troops received. My position is impregnable against any attack the enemy can bring against me, but I have not yet enough troops to entirely surround the town. The Cuban forces are not to be depended upon for severe fighting. Instructions of the War Department will be carried out to the letter.

SHAFER, *Major-General.*

SIBONEY, VIA HAITI.
(Received Washington July 10, 1898—5.55 p. m.)

ADJUTANT-GENERAL U. S. ARMY, *Washington:*

Headquarters Fifth Army Corps, 10.—I have just received letter from General Toral declining unconditional surrender. Bombardment by the Army and Navy will begin at as near 4 p. m. to-day as possible.

SHAFER, *Major-General.*

WAR DEPARTMENT, July 10, 1898.

General SHAFER, *Playa del Este, Santiago, Cuba:*

Should the Spaniards surrender unconditionally and wish to return to Spain, they will be sent back direct at the expense of the United States Government.

R. A. ALGER,
Secretary of War.

HEADQUARTERS FIFTH ARMY CORPS,
Camp near Santiago de Cuba, July 11, 1898.

SIR: With the largely increased forces which have come to me, and the fact that I have your line of retreat securely in my hands, the time seems fitting that I should again demand of your excellency the surrender of Santiago and of your excellency's army. I am authorized to state that should your excellency so desire the Government of the United States will transport the entire command of your excellency to Spain.

I have the honor to be, very respectfully, your obedient servant,

WM. R. SHAFTER,
Major-General Commanding.

HIS Excellency, COMMANDER IN CHIEF OF THE SPANISH FORCES,
Santiago de Cuba.

SANTIAGO DE CUBA, *July 11, 1898.*

SIR: I have the honor to advise your eminence that your communication of this date is received, and in reply desire to confirm that which I said in my former communication; also to advise you that I have communicated your proposition to the general in chief.

Reiterating my sentiments, I am,
 Very respectfully, your servant,

JOSÉ TORAL,
Commander in Chief Fourth Corps, and Military Governor of Santiago.

HIS Excellency, COMMANDER IN CHIEF OF THE UNITED STATES FORCES,
In Camp at the San Juan.

PLAYA DEL ESTE, VIA HAITI,
 (Received Washington July 11, 1898—12.01 a. m.)

ADJUTANT-GENERAL, *Washington:*

Headquarters Fifth Corps, 10.—Enemy opened fire a few minutes past 4 with light guns which were soon silenced by ours. Very little musketry firing and the enemy kept entirely in their trenches. Three men slightly wounded. Will have considerable occasion to force to-morrow, enough to completely block all the roads on the northwest. I am quite well. General Garcia reports enemy evacuated little town called Descaminos, about 3 miles from Santiago and near the bay. Garcia's force now occupies it. Everything is looking well and men feeling well. Navy fired few shots from the sea near Aguadores; effect was not perceptible.

SHAFTER, *Major-General.*

PLAYA, VIA HAITI.
 (Received at Washington July 12, 1898—9.30 a. m.)

ADJUTANT-GENERAL, *Washington:*

Headquarters Fifth Army Corps.—It has been quiet to-day; but little fighting. A flag of truce up since 2 o'clock considering proposition for surrendering now that I have town surrounded on the north. Line was completed at 5 p. m. by General Ludlow right down to the bay. The line is rather thin, but will have it strengthened in the morning by General Henry, who has just arrived at headquarters. Only three or four casualties; no one killed so far as I can learn. Expect to have two of the new batteries in position to-morrow. Great deal of suffering among the people who have gone out of Santiago. Am doing my best to relieve it, but not entirely successful.

SHAFTER, *Major-General.*

PLAYA DEL ESTE, VIA HAITI.

(Received at Washington July 13, 1898—2 a. m.)

ADJUTANT-GENERAL, *Washington*:

"ESTEEMED GENERAL OF THE AMERICAN FORCES.

"SIR: I have the honor to insist upon my proposition to evacuate the Plaza and the territory of the division of Cuba under conditions hereafter stated for the Spanish arms, trusting that your chivalry and sentiment as a soldier will make you appreciate exactly the situation, and therefore must a solution be found that leaves the honor of my troops intact; otherwise you will comprehend that I shall see myself obliged to now make defense as far as my strength will permit. I call the attention of your eminence to the advance of your troops by railroad, the movement of which I suppose you are ignorant, and I take that you will kindly order their return to their position during the time that the armistice is in existence.

"Very respectfully,

"JOSÉ TORAL, *Commander in Chief, etc.*"

Will any modification of the recent order be permitted? And as I have been perfectly satisfied that he can be taken, but if he fights, as we have reason to believe he may, it will be at fearful cost of life, and to stay here with disease threatened may be as great loss from the cause. The suffering of the people who left the town is intense. I can only supply food enough to keep them from starving, and if blue rains continue I do not know how long I can do that.

SHAFTER, *Major-General.*WASHINGTON, D. C., *July 13, 1898—2.14 a. m.*Major-General SHAFTER, *Before Santiago, Cuba, Playa del Este*:

Telegram just received. No modification of former order permitting the Spanish army evacuating Santiago under such conditions as proposed by Toral will be made. The Secretary of the Navy will be consulted at once concerning the ordering of Sampson to assist you.

R. A. ALGER, *Secretary of War.*

PLAYA. (Received Washington July 13, 1898—2.12 p. m.)

ADJUTANT-GENERAL, *Washington*:

Headquarters, near Santiago, 13.—Your telegram saying no modification of orders allowed just received. Have had an interview of an hour and a half with General Toral and have extended truce until noon to-morrow. Told him that his surrender only will be considered, and that he was without hope of escape and had no right to continue the fight. I think it made a strong impression on him and hope for his surrender. If he refuses, I will open on him at 12 noon, to-morrow, with every gun I have and have the assistance of the Navy. Are ready to bombard the city with 13-inch shells. There is a good deal of nervousness throughout the Army on account of yellow fever, which is among us, certainly. Twenty-nine new cases yesterday, and probably 150 all told. Whatever happens, one or two immune regiments should be sent here to act as hospital guards and garrison for the town.

W. R. SHAFTER.

WAR DEPARTMENT, *July 13, 1898—4.30 p. m.*Major-General SHAFTER, *Playa del Este, Cuba*:

Your message announcing that unless your terms are accepted before noon to-morrow you will make an assault all along the line is received and approved. God bless you and your heroic army.

R. A. ALGER, *Secretary of War.*

PLAYA DEL ESTE, VIA HAITI,
(Received Washington July 13, 1898—2.40 a. m.)

SECRETARY OF WAR, *Washington*:

Camp near Santiago, 12.—The Spanish general to-day asked some conclusion be reached that shall save his honor. Offers to surrender Santiago province, force, batteries, munitions of war, etc., all except the men and small arms. Under ordinary circumstances would not advise acceptance, but this is a great concession and would avoid assaulting intrenched lines with every device for protecting his men and inflicting heavy loss on assaulting lines. The siege may last many weeks. They have the provisions for two months. There are 20,000 starving people who have fled the city and were not allowed to take any food. The fortitude and heroism of the army has been unsurpassed, and, under the circumstances, I concur with General Shafter and the major-generals, and would request that discretion be granted as to terms, in view of the importance of other immediate operations in which both this part of the army and navy will participate. The very serious part of this situation is that there are 100 cases of yellow fever in this command, and the opinion of the surgeon that it will spread rapidly.

MILES, *Major-General, Commanding.*

WASHINGTON, D. C., *July 13, 1898.*

Major-General MILES,

Camp near Santiago, Playa del Este, Cuba:

You may accept surrender by granting parole to officers and men, the officers retaining their side arms. The officers and men after parole to be permitted to return to Spain, the United States assisting. If not accepted, then assault, unless in your judgment an assault would fail. Consult with Sampson, and pursue such course as to the assault as you jointly agree upon. Matter should now be settled promptly.

R. A. ALGER, *Secretary of War.*

(See dispatch to General Shafter, July 10.)

WAR DEPARTMENT,
Washington, July 13, 1898.

The honorable the SECRETARY OF THE NAVY:

SIR: I have the honor to request that you order the fleet off Santiago to at once force its way into the bay, if possible, to aid the army in the capture of Santiago and the Spanish army defending it.

The special reasons for immediate action are: First, the very heavy rains that are falling almost continually have made the roads nearly impassable, and threaten to cut off our supply of provisions for the army in the trenches altogether; second, the rains are making the holding of our lines almost impossible, as the trenches are filled with water; third, the lives of our men are in great danger from yellow fever, which has broken out among our troops and is spreading rapidly; and fourth, the character of the works of the enemy is such that to take them by assault would be a terrible sacrifice of life.

These conditions, it is believed by the major-general commanding, would be changed were the navy in the bay to cooperate with the army, and the capture of the city and the Spanish army thus made comparatively easy matter.

Very respectfully,

R. A. ALGER, *Secretary of War.*

NAVY DEPARTMENT, *Washington, July 14, 1898.*

The honorable the SECRETARY OF WAR:

SIR: I have the honor to acknowledge the receipt of your communication of the 13th instant, requesting orders be issued by this Department for the fleet off Santiago

to force its way into the bay, if possible, to aid the Army in the capture of Santiago and the Spanish army defending it.

Very respectfully,

JOHN D. LONG, *Secretary.*

PLAYA. (Received Washington July 14, 1898—11.05 a. m.)
 ADJUTANT GENERAL U. S. ARMY, *Washington:*

Camp near Santiago, 14.—Fifth Army Corps have this moment received communication from General Toral asking the commissioners be appointed to arrange terms of surrender on basis of returning to Spain. Has appointed his commissioners. Have not surrendered, however. How soon can the Spanish army be sent back?

W. R. SHAFTER,
Major-General.

ADJUTANT-GENERAL'S OFFICE,
Washington, July 14, 1898—12 noon.

General SHAFTER, *Playa del Este, Cuba:*

Your message referring to General Toral's last communication is received. The assistance of the United States to return the Spanish prisoners to Spain is a matter of detail which will require time, but will be done promptly and with the least possible delay. That can be arranged after surrender, which should be immediate, on lines of instruction already given you.

By order of the Secretary of War:

H. C. CORBIN, *Adjutant-General.*

PLAYA. (Received Washington July 14, 1898—2.04 p. m.)
 ADJUTANT-GENERAL, *Washington:*

Have just returned from interview with General Toral. He agrees to surrender upon the basis of being returned to Spain. This proposition embraces all of eastern Cuba from Acerraderos on the south to Sagua on the north, via Palma, with practically the Fourth Army Corps. Commissioners meet this afternoon at 2.30 to definitely arrange the terms.

W. R. SHAFTER, *Major-General.*

EXECUTIVE MANSION,
Washington, July 14, 1898—2.49 p. m.

Major-General SHAFTER, *Camp before Santiago, Cuba:*

Telegram saying General Toral agrees to surrender received. Conclusion awaited with much interest.

By order of the Secretary of War:

H. C. CORBIN, *Adjutant-General.*

PLAYA, *July 13, 1898.* (Received Washington 1.40 p. m.)
 SECRETARY OF WAR, *Washington:*

At a meeting between the lines, at which Generals Shafter and Wheeler and Spanish General Toral were present, the latter claimed that he is unable to act without authority of his Government, but has received authority to withdraw and surrender harbor ports, munitions of war, and eastern portion of Cuba. He urgently requests until to-morrow noon to receive answer from his Government regarding offer of our Government to send his forces to Spain, which was granted.

MILES, *Major-General Commanding.*

WASHINGTON, D. C., *July 13, 1898.*

Major-General MILES, *Camp near Santiago, Playa del Este, Cuba:*

I telegraphed you an hour since in regard to the action of the Army. Since then your dispatch has been received conveying the result of the meeting between the lines, at which conference Toral requested until to-morrow noon to hear from his Government regarding our offer, which you granted. Your action is approved. This Government will send the Spanish prisoners who surrender home, if they wish.

R. A. ALGER, *Secretary of War.*

PLAYA. (Received Washington July 14, 1898—3.24 p. m.)

SECRETARY OF WAR, *Washington:*

Before Santiago, July 14.—General Toral formally surrendered the troops of his army corps and division of Santiago on the terms and understanding that his troops would be returned to Spain. General Shafter will appoint commissioners to draw up the conditions of arrangements for carrying out the terms of surrender. This is very gratifying, as General Shafter and the officers and men of this command are entitled to great credit for their sincerity, fortitude, and in overcoming almost insuperable obstacles which they encountered. A portion of the Army has been infected with yellow fever, and efforts will be made to separate those who are infected and those free from it, and to keep those which are still on board ship separated from those on shore. Arrangements will be immediately made for carrying out further instructions of the President and yourself.

NELSON A. MILES,
Major-General of the Army.

EXECUTIVE MANSION,
Washington, July 15, 1898—12.35 p. m.

Major-General SHAFER, *Camp before Santiago, Cuba:*

Have you received the absolute surrender of the enemy? We are awaiting the conditions with impatience.

R. A. ALGER, *Secretary of War.*

PLAYA. (Received Washington July 15, 1898—12.52 p. m.)

SECRETARY OF WAR, *Washington:*

Daiquiri, 15.—Commission on behalf of United States appointed, consisting of Generals Wheeler, Lawton, and Lieutenant Miley, with Spanish commission, to arrange for the details for carrying into effect the capitulation. I will reach Siboney to-morrow, and will attend more especially to the second expedition.

MILES, *Major-General.*

PLAYA. (Received Washington July 15, 1898—4.10 p. m.)

ADJUTANT-GENERAL, *Washington:*

Headquarters near Santiago, 15.—Sent you several telegrams yesterday, as did General Miles, in regard to surrender. General Toral agreed yesterday positively to surrender all the forces under his command in Eastern Cuba upon a distinct understanding that they were to be sent to Spain by the United States; that this surrender was authorized by General Blanco, and that its submission to-morrow was merely formal. Commissioners to arrange details were appointed—Wheeler, Lawton, and Miley on part of United States. Points were immediately raised by Spanish commissioners.

The discussion lasted until 10 last night. At last my commissioners think the matter will be settled to-day and met at 9.30 o'clock this a. m. The great point

with Spanish is that they may be allowed to carry their arms with them to Spain, marching out here and depositing them in my charge, but having them shipped with them to Spain. There are about 12,000 troops in the city and about as many more in the surrounding district; 25,000 in all will be transported. General Miles was present and said the surrender was as absolute and as complete as possible. It can not be possible that there will be failure in completing arrangements. Water famine in city imminent. Have supply cut. This was to Lieutenant Miley by English commissioners. Will wire frequently when negotiations are progressing.

SHAFTER, *Major-General, Commanding.*

ADJUTANT-GENERAL'S OFFICE,

Washington, July 15, 1898—4.45 p. m.

Major-General SHAFTER, *Playa del Este:*

Secretary of War suggests, is it not possible that Toral is gaining time to get reinforcements that may be on the way to assist him?

H. C. CORBIN, *Adjutant-General.*

PLAYA DEL ESTE, VIA HAITI.

(Received at Washington July 15, 1898—9 p. m.)

ADJUTANT-GENERAL UNITED STATES ARMY, *Washington:*

Headquarters near Santiago, Cuba, 15.—I do not believe that Toral is trying to gain time in hopes of getting reinforcements. Cubans have forces in vicinity of all Spanish troops. Toral asked to-day to send messages to Guantanamo and to Palmas to notify Spanish troops of condition. Wheeler, Lawton, and Miley are thoroughly convinced that they are earnest, and they have been in consultation with the Spaniards twenty-four hours. Am told by reliable persons Santiago the Spanish officers are greatly pleased at the thought of going home, but generals are afraid of the consequences with themselves unless terms of surrender are sanctioned by the Madrid Government.

SHAFTER, *Major-General.*

EXECUTIVE MANSION,

Washington, July 15, 1898—5.59 p. m.

Major-General SHAFTER,

Camp near Santiago, Playa:

It is not possible that you are entertaining the proposition of permitting the Spanish to carry away their arms. Such a suggestion should be rejected instantly. You have been instructed the terms of surrender acceptable to the President, and they must be concluded on these lines.

R. A. ALGER, *Secretary of War.*

PLAYA DEL ESTE, VIA HAITI,

(Received Washington July 15, 1898—11.20 p. m.)

ADJUTANT-GENERAL U. S. ARMY, *Washington:*

Headquarters near Santiago, 15.—I do not entertain the proposition for the Spanish to retain their arms. They are to surrender them absolutely immediately after articles of capitulation are signed, but they beg, as an act of consideration to them, that I will intercede with my Government that they be shipped with them to Spain. I regard this as a small matter that in no way binds the Government, but is one I would not let stand between clearing 20,000 Spanish soldiers out of Cuba or leaving them there to be captured later and probably with much loss to ourselves.

SHAFTER, *Major-General.*

EXECUTIVE MANSION,

*Washington, July 16, 1898—1.18 a. m.*Major-General SHAFER, *Playa del Este, Cuba, Camp near Santiago:*

Our understanding from your messages is that you have agreed with the commander of the Spanish forces in Eastern Cuba for their complete surrender, and with a single condition granted on your part that the United States would transport them to Spain, officers and soldiers to give their paroles, and the former to retain their side arms. The demand of General Toral that the arms belonging to his command shall be shipped with him to Spain has been rightly declined by you.

R. A. ALGER, *Secretary of War.*

PLAYA DEL ESTE, via HAITI,

(Received Washington July 16, 1898—2.20 a. m.)

ADJUTANT-GENERAL, *Washington:*

Headquarters near Santiago, 15.—Surrender was made by Toral, yesterday p. m., absolutely on condition of returning troops to Spain. Delay was caused by the commissioners on his part insisting on approval of Madrid. I think they fear death when they get home. We may have to fight them yet.

SHAFER.

PLAYA. (Received Washington July 16, 1898—9.05 a. m.)

ADJUTANT-GENERAL, *Washington:*

Spanish surrendered; particulars later.

SHAFER.

Terms of the military convention for the capitulation of the Spanish forces occupying the territory which constitutes the division of Santiago de Cuba, and described as follows: All that portion of the island of Cuba east of a line passing through Aserradero, Dos Palmas, Canto Abajo, Escondida, Tanamo, and Aguilera, said troops being in command of Gen. José Toral, agreed upon by the undersigned commissioners: Brig. Gen. Don Federico Escario, Lient. Col. of Staff Don Ventura Fontan, and, as interpreter, Mr. Robert Mason, of the city of Santiago de Cuba, appointed by General Toral, commanding the Spanish forces, on behalf of the Kingdom of Spain, and Maj. Gen. Joseph Wheeler, U. S. Volunteers, Maj. Gen. H. W. Lawton, U. S. Volunteers, and First Lieut. J. D. Miley, Second Artillery, aid-de-camp, appointed by General Shafter, commanding the American forces, on behalf of the United States.

1. That all hostilities between American and Spanish forces in this district absolutely and unequivocally cease.

2. That this capitulation includes all the forces and war material in said territory.

3. That the United States agrees, with as little delay as possible, to transport all the Spanish troops in said district to the Kingdom of Spain, the troops being embarked as far as possible at the port nearest the garrisons they now occupy.

4. That the officers of the Spanish army be permitted to retain their side arms, and both officers and private soldiers their personal property.

5. That the Spanish authorities agree to remove, or assist the American Navy in removing, all mines or other obstructions to navigation now in the harbor of Santiago and its mouth.

6. That the commander of the Spanish forces deliver without delay a complete inventory of all arms and munitions of war of the Spanish forces in above-described district to the commander of the American forces; also a roster of said forces now in said district.

7. That the commander of the Spanish forces in leaving said district is authorized to carry with him all military archives and records pertaining to the Spanish army now in said district.

8. That all that portion of the Spanish forces known as volunteers, movilizados, and guerrillas who wish to remain in the island of Cuba are permitted to do so upon condition of delivering up their arms and taking a parole not to bear arms against the United States during the continuance of the present war between Spain and the United States.

9. That the Spanish forces will march out of Santiago de Cuba with honors of war, depositing their arms thereafter at a point mutually agreed upon to await their disposition by the United States Government, it being understood that the United States commissioners will recommend that the Spanish soldier return to Spain with the arms he so bravely defended.

10. That the provisions of the foregoing instrument become operative immediately upon its being signed.

Entered into this 16th day of July, 1898, by the undersigned commissioners acting under instructions from their respective commanding generals, and with the approbation of their respective Governments.

JOSEPH WHEELER,
Major-General, U. S. Volunteers.
H. W. LAWTON,
Major-General, U. S. Volunteers.
J. D. MILEY,
First Lieutenant, Second Artillery,
Aid-de-camp to General Shafter.
FEDERICO ESCARIO.
VENTURA FONTAN.
ROBT. MASON.

WASHINGTON, D. C., July 16, 1898.

General SHAFTER, Commanding,
Front near Santiago, Playa:

The President of the United States sends to you and your brave army the profound thanks of the American people for the brilliant achievements at Santiago, resulting in the surrender of the city and all of the Spanish troops and territory under General Toral. Your splendid command has endured not only the hardships and sacrifices incident to campaign and battle, but in stress of heat and weather has triumphed over obstacles which would have overcome men less brave and determined. One and all have displayed the most conspicuous gallantry and earned the gratitude of the nation. The hearts of the people turn with tender sympathy to the sick and wounded. May the Father of Mercies protect and comfort them.

WILLIAM MCKINLEY.

WASHINGTON, D. C., July 16, 1898.

MAJOR-GENERAL SHAFTER, *Front near Santiago, Playa:*

I can not express in words my gratitude to you and your heroic men. Your work has been well done. God bless you all.

R. A. ALGER, *Secretary of War.*

WAR DEPARTMENT, July 16, 1898.

General SHAFTER, *Playa del Este, Cuba:*

The Secretary of War directs that the President's message to you be published to each regiment in your army.

H. C. CORBIN, *Adjutant-General.*

ADJUTANT-GENERAL'S OFFICE,
Washington, July 16, 1898—10.15 a. m.

General SHAFER, *Playa del Este*:

Let me, too, add my hearty congratulations to you and all with you.

H. C. CORBIN, *Adjutant-General*.

PLAYA DEL ESTE, via HAITI.
(Received Washington July 16, 1898—10.05 p. m.)

Hon. R. A. ALGER, *Secretary of War, Washington*:

Camp near Santiago, 16.—Thank you very much for your kind telegram of this date. The army is glad to know its action meets with your approval.

SHAFER, *Major-General*.

PLAYA DEL ESTE, via HAITI,
(Received Washington July 16, 1898—8.52 p. m.)

ADJUTANT-GENERAL U. S. ARMY, *Washington*:

Camp near Santiago, 16.—The surrender has been definitely settled, and the arms will be turned over to-morrow morning and the troops will be marched out as prisoners of war. The Spanish colors will be hauled down at 9 o'clock and the American flag hoisted. Hope transports will be sent here to get them away as quickly as possible.

SHAFER, *Major-General*.

ADJUTANT-GENERAL'S OFFICE,
Washington, July 17, 1898—9.55 a. m.

General SHAFER, *Playa del Este, Cuba*:

Your telegram saying that our flag would be hoisted in Santiago at 9 this morning was received by the President and Secretary of War and members of the Cabinet with a sense of profound satisfaction. This feeling is general with all the people. I hope you are well.

H. C. CORBIN, *Adjutant-General*.

SANTIAGO DE CUBA, *July 17, 1898*.
(Received Washington 4.36 p. m.)

ADJUTANT-GENERAL U. S. ARMY, *Washington, D. C.*:

I have the honor to announce that the American flag has been this instant, 12 noon, hoisted over the house of the civil government in the city of Santiago. An immense concourse of people present. A squadron of cavalry and a regiment of infantry presenting arms and band playing national air. Light battery fired salute of 21 guns. Perfect order is being maintained by municipal government. Distress is very great, but little sickness in town. Scarcely any yellow fever. A small gun-boat and about 200 seamen left by Cervera have surrendered to me. Obstructions are being removed from mouth of harbor. Upon coming into the city I discovered a perfect entanglement of defenses. Fighting as the Spaniards did the first day, it would have cost 5,000 lives to have taken it. Battalions of Spanish troops have been depositing arms since daylight in armory over which I have guard. I hope vessels sufficient to carry 8,000 to 10,000 men will be sent as soon as possible, as the presence of prisoners is source of embarrassment. No sickness among them, and they should leave before any breaks out. General Toral formally surrendered the plaza and all stores at 9 a. m. American consul needed here.

W. R. SHAFER, *Major-General*.

ADJUTANT-GENERAL'S OFFICE,

*Washington, July 18, 1898—6.30 p. m.*General SHAFER, *Santiago, Cuba*:

The following is sent you for your information and guidance. It will be published in such manner in both English and Spanish as will give it the widest circulation in the territory under your control:

“To the SECRETARY OF WAR:

“SIR: The capitulation of the Spanish forces in Santiago de Cuba and in the eastern part of the province of Santiago, and the occupation of the territory by the forces of the United States, render it necessary to instruct the military commander of the United States as to the conduct which he is to observe during the military occupation.

“The first effect of the military occupation of the enemy's territory is the severance of the former political relations of the inhabitants and the establishment of a new political power. Under this changed condition of things, the inhabitants, so long as they perform their duties, are entitled to security in their persons and property, and in all their private rights and relations. It is my desire that the inhabitants of Cuba should be acquainted with the purpose of the United States to discharge to the fullest extent its obligations in this regard. It will therefore be the duty of the commander of the army of occupation to announce and proclaim in the most public manner that we come, not to make war upon the inhabitants of Cuba, nor upon any party or faction among them, but to protect them in their homes, in their employments, and in their personal and religious rights. All persons who, either by active aid or by honest submission, cooperate with the United States in its efforts to give effect to this beneficent purpose will receive the reward of its support and protection. Our occupation should be as free from severity as possible.

“Though the powers of the military occupant are absolute and supreme, and immediately operate upon the political condition of the inhabitants, the municipal laws of the conquered territory, such as effect private rights of person and property, and provide for the punishment of crime, are considered as continuing in force, so far as they are compatible with the new order of things, until they are suspended or superseded by the occupying belligerent; and in practice they are not usually abrogated, but are allowed to remain in force, and to be administered by the ordinary tribunals, substantially as they were before the occupation. This enlightened practice is, so far as possible, to be adhered to on the present occasion. The judges and the other officials connected with the administration of justice may, if they accept the supremacy of the United States, continue to administer the ordinary law of the land, as between man and man, under the supervision of the American commander in chief. The native constabulary will, so far as may be practicable, be preserved. The freedom of the people to pursue their accustomed occupations will be abridged only when it may be necessary to do so.

“While the rule of conduct of the American commander in chief will be such as has just been defined, it will be his duty to adopt measures of a different kind, if, unfortunately, the course of the people should render such measures indispensable to the maintenance of law and order. He will then possess the power to replace or expel the native officials in part or altogether, to substitute new courts of his own constitution for those that now exist, or to create such new or supplementary tribunals as may be necessary. In the exercise of these high powers the commander must be guided by his judgment and his experience and a high sense of justice.

“One of the most important and most practical problems with which it will be necessary to deal is that of the treatment of property and the collection and administration of the revenues. It is conceded that all public funds and securities belonging to the government of the country in its own right, and all arms and supplies and other movable property of such government, may be seized by the military occupant and concerted to his own use. The real property of the State he may hold and administer, at the same time enjoying the revenues thereof, but he is not to destroy

it save in the case of military necessity. All public means of transportation, such as telegraph lines, cables, railways, and boats belonging to the State may be appropriated to his use, but unless in case of military necessity they are not to be destroyed. All churches and buildings devoted to religious worship and to the arts and sciences, all school houses, are, as far as possible, to be protected, and all destruction or intentional defacement of such places, of historical monuments, or of archives, or of works of science or art, is prohibited, save when required by urgent military necessity.

Private property, whether belonging to individuals or corporations, is to be respected, and can be confiscated only for cause. Means of transportation, such as telegraph lines and cables, railways and boats, may, although they belong to private individuals or corporations, be seized by the military occupant, but, unless destroyed under military necessity, are not to be retained.

While it is held to be the right of the conqueror to levy contributions upon the enemy in their seaports, towns, or provinces which may be in his military possession by conquest, and to apply the proceeds to defray the expense of the war, this right is to be exercised within such limitations that it may not savor of confiscation. As the result of military occupation the taxes and duties payable by the inhabitants to the former government become payable to the military occupant, unless he sees fit to substitute for them other rates or modes of contribution to the expenses of the government. The moneys so collected are to be used for the purpose of paying the expenses of government under the military occupation, such as the salaries of the judges and the police, and for the payment of the expenses of the army.

Private property taken for the use of the army is to be paid for, when possible, in cash at a fair valuation; and when payment in cash is not possible receipts are to be given.

All ports and places in Cuba which may be in the actual possession of our land and naval forces will be opened to the commerce of all neutral nations, as well as our own, in articles not contraband of war, upon payment of the prescribed rates of duty which may be in force at the time of importation.

WILLIAM MCKINLEY.

By order Secretary of War:

H. C. CORBIN, *Adjutant-General*.

SANTIAGO, VIA HAITI, *July 25, 1898.*

(Received Washington 6.55 p. m.)

ADJUTANT-GENERAL OF THE ARMY, *Washington:*

Fifteen hundred copies of the President's proclamation were printed as directed, and distributed throughout the territory.

SHAFTER, *Major-General*.

PLAYA DEL ESTE, VIA HAITI, *July 21, 1898.*

(Received at Washington 6.03 p. m.)

SECRETARY OF WAR, *Washington:*

In order to avoid conflict of authority or misunderstanding, general directions were given General Shafter to be executed under his orders and supervision, as follows: All regimental property and stores needed with his command were to be unloaded without delay at Santiago. Such transports as were required for hospital ships would be selected. Those loaded with troops and supplies for Porto Rico were to go there, and all others, as fast as emptied, return to Tampa. Tugs, lighters, and appliances for disembarking troops and commissary and quartermaster's stores not required at Santiago were to be forwarded to Porto Rico. Quartermaster transportation wagon and pack trains not required at Santiago to be also forwarded to Porto Rico. On completion of such duties, Colonels Humphrey and Weston to be

sent to Porto Rico. This left the whole matter under the direction and supervision of General Shafter, and it was also left to his option to determine when the services of the officers named could be spared. As the Spanish prisoners have their own commissaries and quartermasters, General Shafter can issue to them stores in bulk for from five to ten days at a time.

There is no liability of their going away, as without arms they would be in danger of the Cubans, and they can not go by sea, hence they will require but a small guard. There is not a single regiment of regulars or volunteers with General Shafter's command that is not infected with yellow fever, from one case in the Eighth Ohio to thirty-six cases in the Thirty-third Michigan. After consulting with best medical authorities it is my opinion that the best mode of ridding the troops of the fever will be as I have directed, namely, the troops to go up as high into the mountains as possible, selecting fresh camp every day. If this does not check the spread of the disease the only way of saving a large portion of the command will be to put them on transports and ship them to New England coast, to some point to be designated by the Surgeon-General. Colonel Greenleaf, surgeon in chief, believes the disease comes from occupying houses, shacks, and blockhouses that have been occupied by yellow fever patients, although I had given positive directions prohibiting this before the troops landed. This was the case with the building occupied as post-office, one occupied by correspondents, and those occupied by the Thirty-third Michigan. In one blockhouse at Agnadores, where the Spaniards usually kept a guard of nine men, there originated thirty-seven cases resulting in death during the past year.

MILES, *Major-General Commanding.*

HEADQUARTERS OF THE ARMY,
Washington, D. C., July 4, 1898.

The ADJUTANT-GENERAL, *Headquarters of the Army.*

SIR: I have the honor to recommend that the necessary authority be forwarded to Major-General Shafter to utilize, on the application of the Chief Surgeon, for the transportation of the sick and wounded of his army, any vessel adapted to that purpose that may be returning from Cuba to the United States; and should a transport be so used, that telegraphic information be sent at once to the Surgeon-General of the Army, stating date of departure, the number of patients on board, and the port of destination.

Very respectfully, your obedient servant,

CHAS. R. GREENLEAF,
Colonel, Assistant Surgeon-General, U. S. Army,
Chief Surgeon Army in the Field.

ADJUTANT-GENERAL'S OFFICE, *Washington, July 4, 1898.*

General SHAFTER, *Playa del Este, Cuba:*

You are authorized to use any vessel adapted to that purpose for transportation of sick and wounded. Telegraph this office, giving date of departure and number of patients on board, and destination of any vessel so used.

H. C. CORBIN, *Adjutant-General.*

ADJUTANT-GENERAL'S OFFICE, *Washington, July 7, 1898.*

Major-General SHAFTER, *Playa del Este, Cuba:*

Secretary of War directs that consolidated returns of killed and wounded be mailed as soon as they can be prepared without interference with work in hand.

H. C. CORBIN, *Adjutant-General.*

PLAYA DEL ESTE, VIA HAITI,
(Received at Washington July 7, 1898.)

ADJUTANT-GENERAL U. S. ARMY, *Washington* :

Headquarters Fifth Army Corps, near San Juan River, 6.—The list of killed and wounded in Second Division already forwarded. Others not yet received, but will be sent you as soon as possible.

E. J. McCLEARNAND,
Assistant Adjutant-General.

PLAYA DEL ESTE, VIA HAITI,
(Received at Washington July 9, 1898—9.35 a. m.)

ADJUTANT-GENERAL, *Washington* :

Camp near Santiago, 8.—Complete report received to-day of losses on July 1 and 2: Killed, 22 officers and 208 enlisted men; wounded, 81 officers and 1,203 enlisted men; missing, 79 enlisted men. The reports giving names of killed and wounded are being rapidly prepared, and it is hoped to get them off to-morrow.

SHAFTER, *Major-General.*

PLAYA, *July 11, 1898.* (Received at Washington 2.05 p. m.)

ADJUTANT-GENERAL U. S. ARMY, *Washington* :

Siboney, Cuba, 11.—Reports of casualties in actions of July 1, 2, and 3 show: Killed, 23 officers, 208 men; wounded, 80 officers, 1,203 men; missing, 81 men; grand total, 1,595; number of missing will be reduced. Number by mail, giving names.

SHAFTER, *Major-General, Commanding.*

SANTIAGO, VIA HAITI, *July 24, 1898.*
(Received at Washington 5.30 p. m.)

ADJUTANT-GENERAL OF THE ARMY, *Washington* :

The report of casualties, in figures, was sent you on July 10. A full report, giving name, rank, and regiment of killed, wounded, and missing, was forwarded by mail July 12, and the supplemental report containing names of about 15 men that had not been included was forwarded a few days later. I have the retained copies, but on account of uncertainty of mails I dislike to forward them.

SHAFTER, *Major-General, Commanding.*

ADJUTANT-GENERAL'S OFFICE,
Washington, July 24, 1898—11.15 p. m.

General SHAFTER, *Santiago* :

The casualty report in figures reached here to-day. That containing names will doubtless be along very soon. If not, will inform you.

H. C. CORBIN, *Adjutant-General.*

PLAYA DEL ESTE.
(Received at Washington, July 6, 1898—4.20 a. m.)

ADJUTANT-GENERAL, *Washington* :

In Camp near Santiago, Cuba, 5.—The *Iroquois* sailed two days ago with 300 wounded. *Cherokee* sails to-day with 325 wounded.

SHAFTER, *Commanding.*

ADJUTANT-GENERAL'S OFFICE,
Washington, July 5, 1898.

Major-General SHAFTER, *Playa del Este, Cuba*:

Secretary War directs that as far as possible the sick and wounded of your command be sent to Fort Monroe, and not to Key West or Tampa. Of course your chief medical officer will determine character of cases sent. Surgeon-General suggests that the most severe cases should be treated on *Relief* ship.

By command Major-General Miles:

H. C. CORBIN, *Adjutant-General*.

PLAYA DEL ESTE, VIA HAITI.
(Received Washington July 6, 1898—9.47 p. m.)

ADJUTANT-GENERAL, *Washington*:

In Camp near Santiago, 5.—*Iroquois* already sailed for Key West. If *Cherokee* has not sailed will have her go to Fort Monroe. Hereafter all wounded will be sent to Fort Monroe.

SHAFTER, *Commanding*.

ADJUTANT-GENERAL'S OFFICE,
Washington, July 6, 1898.

COMMANDING OFFICER, *Key West, Fla.*:

On arrival of the *Cherokee* from Santiago, which sailed yesterday, Secretary War directs you cause her to proceed to Tampa, where hospital train will await the wounded on this ship.

H. C. CORBIN, *Adjutant-General*.

ADJUTANT-GENERAL'S OFFICE,
Washington, July 8, 1898.

COMMANDING OFFICER, *Key West, Fla.*:

The *Cherokee*, on its arrival at Key West, will discharge 100 of the worst wounded cases, to be taken into the hospital at Key West. After discharging these hundred she will then proceed to Tampa, where she will be met by hospital train, and the sick conveyed to Fort McPherson.

By order Secretary of War:

H. C. CORBIN, *Adjutant-General*.

(Same to commanding officer the *Cherokee*, on arrival at Key West; surgeon in charge of wounded, the *Cherokee*, Key West, Fla.)

Upon General Shafter's leaving Santiago Major-General Lawton was placed in charge of the province of Santiago and Brigadier-General Wood in command of the city of Santiago.

On October 7 General Lawton was granted a sick leave, and Brigadier-General Wood succeeded him.

Customs regulations have been put in force in this department, and much has been done to improve the sanitary condition of Santiago, and arrangements are being made to carry on the same work in other cities under his command.

On the 10th of October the Spaniards evacuated Manzanillo, which has also been placed in the department of General Wood. The sanitary condition of all cities of this province is simply terrible, and a great

amount of work and the expenditure of much money will be necessary to make them habitable.

Cooler weather approaching, and under the energetic supervision of General Wood it is hoped that his department will, before the beginning of the hot season of 1899, be in good condition.

While funds are lacking to enable the inhabitants to go to their homes and begin raising crops, yet the employment given many of these people by the Government is in a measure aiding them. It will, however, be necessary to furnish them means to commence raising the necessary crops and for self-support.

Following dispatches relate to the Porto Rico campaign. Reference is also made to the report of the Major-General Commanding:

WAR DEPARTMENT, *July 18, 1898.*

General MILES, *Siboney, Cuba:*

What have you determined upon? We wish to know where to direct transports.

R. A. ALGER, *Secretary of War.*

PLAYA DEL ESTE, VIA HAITI, *July 18, 1898.*

(Received at Washington 10.16 p. m.)

SECRETARY OF WAR, *Washington:*

Playa, 18.—At a meeting between Admiral Sampson and myself Saturday, Cape de San Juan was considered the best place to land at Porto Rico. I believe it would avoid some complication and delay if we could go there at once. Men and animals have been many days on shipboard.

MILES.

PLAYA, VIA HAITI, *July 17, 1898.*

(Received at Washington 6.42 p. m.)

SECRETARY OF WAR, *Washington:*

Guantanamo Bay, July 17.—There is a strong fleet of naval vessels in this harbor preparing to go to Spain. Would it not be well to suggest a strong combined movement on Porto Rico, to make sure of the capture of the island and the reduction of the forts there as speedily as possible, as its occupation will probably be all the assistance required of the Navy in the complete control of the islands in the West Indies?

MILES, *Major-General Commanding.*

PLAYA DEL ESTE, VIA HAITI, *July 20, 1898.*

(Received Washington 8.25 p. m.)

SECRETARY OF WAR, *Washington:*

July 20.—There is an excellent battalion of about 500 marines here. If President would authorize, would like to take them with my command to Porto Rico, as they are anxious to go and the Navy has no further use for them.

MILES, *Major-General Commanding.*

WAR DEPARTMENT, *July 20, 1898.*

General MILES, *Playa del Este, Cuba:*

I do not think well of your suggestion about marines. We have enough army for our work. Do not take Colonel Humphrey away from Santiago.

R. A. ALGER, *Secretary of War.*

ADJUTANT-GENERAL'S OFFICE,
Washington, July 18, 1898—10.45 p. m.

Major-General MILES, *On board Yale, Guantanamo:*

After a conference of the President, Secretaries of War and Navy this morning telegram was sent directing you to land troops now on *Yale* and other transports at such place in Porto Rico as you may determine upon. Like telegram was sent Admiral Sampson. It is desired to know if the same has been received by you.

By order Secretary of War:

H. C. CORBIN, *Adjutant-General.*

PLAYA VIA HAYTI, July 21, 1898.

(Received Washington 9.44 a. m.)

SECRETARY WAR, *Washington:*

Last night I sent this letter:

"JULY 20.

"Admiral SAMPSON, *Commanding North Atlantic Squadron.*

"SIR: I am informed by my adjutant-general that you have designated the *Yale* and *Columbia* as ships to render the assistance for landing of the troops and for maintaining their landing, and also the *Cincinnati*, the whereabouts of which I understand is not known, and the *New Orleans*, if it is at San Juan. If the latter vessel is not at San Juan it ought to be, and remain there; otherwise that port is left open with nothing to prevent the Spanish gunboats known to be there from coming out and capturing our transports now en route to Cape San Juan. Second, since it is not known where the *Cincinnati* is, it may or may not be of any assistance. Third, the *Columbia* and *Yale* could not silence a battery of light artillery on shore without jeopardizing the lives of 300 to 1,500 troops on board. In view of the above facts I have to inform you that I do not consider the force above mentioned available or sufficient to cover the landing of some 10,000 men now en route to Cape San Juan, and I have to request that an additional and ample force be immediately ordered to those waters.

"Very respectfully,

"NELSON A. MILES,
"Major-General Commanding U. S. Army."

Have received the following reply:

"U. S. FLAGSHIP NEW YORK (FIRST RATE),
"Guantanamo Bay, July 20, 1898.

"NELSON A. MILES, *Major-General Commanding U. S. Army.*

"SIR: Referring to your letter of this date, the *Cincinnati* is ordered by telegraph here. She is either at Key West or within easy reach from there on the Havana blockade. The *Annapolis*, *Wasp*, and *Leyden*, ordered to attack Port Nipe, have been ordered to Cape San Juan to assist in the expedition. The *Gloucester* will be added. Three monitors will join the expedition. The *Cincinnati*, *Yale*, *Columbia*, *Annapolis*, *Wasp*, *Gloucester*, and *Leyden* are amply sufficient to cover the landing of 10,000 men at the point named without the monitors. The first four are capable of silencing anything short of heavy guns in position.

"Very respectfully,

"W. T. SAMPSON,
"Rear-Admiral, U. S. Navy,
"Commander in Chief U. S. Naval Forces, North Atlantic Station."

With this support I will sail as quickly as the *Columbia* can get sufficient coal to take her to Cape San Juan and last a few days. All are very glad of the prospect of reaching their destination.

MILES.

WAR DEPARTMENT, July 21, 1898.

General MILES, *Playa del Este, Cuba:*

The Secretary of the Navy just informs me that he received an order from the President at 2 o'clock this morning to send the *Indiana* and *Newark*, or ships of that

class, at once to convoy you and remain with you as long as needed. Don't go without them.

R. A. ALGER, *Secretary of War.*

ST. THOMAS, VIA BERMUDA, *July 26, 1898.*

(Received at Washington 9.35 p. m.)

SECRETARY WAR, *Washington:*

Circumstances were such that I deemed it advisable to take the harbor of Guanica first, 15 miles west of Ponce, which was successfully accomplished between daylight and 11 o'clock. Spaniards surprised. The *Gloucester*, Commander Wainwright, first entered the harbor; met with slight resistance; fired a few shots. All the transports are now in the harbor, and infantry and artillery rapidly going ashore. This is a well-protected harbor; water sufficiently deep for all transports, and heavy vessels can anchor within a few hundred yards of shore. The Spanish flag was lowered and the American flag raised at 11 o'clock to-day. Captain Higginson, with his fleet, has rendered able and earnest assistance. Hope to move on Ponce in a few days, that being the largest city in Porto Rico. Notification has been sent to the transports going to Cape San Juan that all transports and supplies should be directed to this port or Ponce until further notice. Troops in good health and best spirits. No casualties.

MILES,

Major-General Commanding Army.

ADJUTANT-GENERAL'S OFFICE,

Washington, July 21, 1898—12.30 a. m.

Major-General MILES,

On Board Yale, I laya

Wilson is on the way to Cape Fajardo. A battle ship and armed cruiser must be sent at once to protect them on the arrival. The President has so instructed the Secretary of the Navy.

R. A. ALGER,

Secretary of War.

PORT PONCE, PORTO RICO (VIA ST. THOMAS), *July 28, 1898.*

(Received Washington, July 29, 1898—2.11 p. m.)

SECRETARY OF WAR, *Washington:*

1.30 a. m. On the 26th Garretson had a spirited engagement on skirmish line. Our casualties, 4 wounded; all doing well. Spanish lost 3 killed, 13 wounded. Yauco occupied yesterday. Henry's division there to-day. Last evening Commander Davis of the *Dixie* moved into this port, followed by Captain Higginson with his fleet early this morning. General Wilson and Ernst's brigade now rapidly disembarking. Spanish troops are retreating from southern part Porto Rico. Ponce and port have population 50,000 now under American flag. The populace received troops and saluted the flag with wild enthusiasm. Navy has several prizes; also seventy lighters. Railway stock partly destroyed; now restored. Telegraph communication also being restored; cable instruments destroyed. Have sent to Jamaica for others. This is a prosperous and beautiful country. The army will soon be in mountain region; weather delightful; troops in best of health and spirits; anticipate no insurmountable obstacles in future results. Thus far, have been accomplished without the loss of a single life.

NELSON A. MILES,

Major-General Commanding Army.

PORT PONCE, PORTO RICO (VIA ST. THOMAS), *July 28, 1898.*

(Received Washington July 29, 1898—2.36 p. m.)

SECRETARY WAR, *Washington, D. C.:*

4.15 p. m. In the affair of the 26th Capt. Edward J. Gibson, Company A, was wounded in the left hip; Capt. J. H. Prior, Company L, slightly wounded in hand; Private James Drummond, Company K, two wounds in neck, and Private Benjamin F. Bostick, Company L, slight wound on right arm; all of Sixth Massachusetts; all doing well. The Spanish retreat from this place was precipitous, they leaving rifles and ammunition in barracks and 40 or 50 sick in hospital. The people are enjoying a holiday in honor of our arrival.

MILES.

ADJUTANT-GENERAL'S OFFICE,

Washington, July 26, 1898—4.25 p. m.

Major-General MILES, *Porto Rico:*

Conflicting reports here as to your place of landing. Why did you change? Doraco, near Enseuada, about 15 miles west of San Juan, is reported an excellent place to land. The *Yosemite* went in there and remained several days. Did you leave ships to direct Schwan and Wilson now en route where to find you? General Brooke will leave Fortress Monroe to-morrow.

R. A. ALGER, *Secretary of War.*

PORT OF PONCE, PORTO RICO, *July 30, 1898.*

The Honorable SECRETARY OF WAR, *Washington, D. C.*

SIR: This command was made up of detachments of troops sent from Santiago, Tampa, Charleston, and Newport News, and it was not intended at first to make more than a rendezvous for the purpose of organizing the command at Guantanamo or one of the islands near Cape San Juan. On the representation of one of the naval officers, however, Point Fajardo was selected. It was later found that this port was more of an open roadstead than a safe harbor, and, further, that it was well known that we were to land there, the Spaniards being thus enabled to concentrate their forces in that vicinity before our arrival. In addition to this, I found later that the road was not suitable there for wagons or artillery. Before leaving Guantanamo, however, I had expected lighters, steam tugs, etc., to be sent from Santiago and also a construction corps from New York. None of these arrived, nor did we meet them, as expected, in the Windward Passage. This left the command without lighters and, no wagon transportation. The above are some of the reasons why I decided to take the harbors of Guanica and Ponce, where we were least expected, and from which latter point there is a macadamized road which cost the Spanish Government millions of dollars, and over which it is only 70 miles to San Juan.

We have now landed in a perfectly healthy country, well settled, and where, if necessary, a large amount of beef can be obtained, and also transportation, and under the circumstances, in my mind, much more suitable and more important in a strategic way than the other point; besides, ample time will be furnished here for thoroughly organizing the expedition before the march and for creating a favorable impression upon the people. Every precaution has been taken to notify transports coming to proceed to this point, a large number of which have arrived.

Marching across the country, rather than under the guns of the fleet, will have in every way a desirable effect upon the inhabitants of this country. At least four-fifths of the people hail with great joy the arrival of United States troops, and requests for our national flag to place over public buildings come in from every direction.

I have the honor to be, very respectfully, your obedient servant,

NELSON A. MILES,
Major-General Commanding.

ADJUTANT-GENERAL'S OFFICE,
Washington, D. C., July 30, 1898—12.40 a. m.

General MILES, *Ponce, Porto Rico*:

Secretary of War directs me to inform you that the following transports left Newport News for Porto Rico July 28:

St. Louis with Third Illinois, 1,173 men, 46 officers, and General Brooke and staff.

Roumania with four batteries, Rodney's battalion, about 19 officers and 700 men, 16 guns and caissons, 4 battery wagons, 331 horses, 72 mules, reserve ambulance, signal corps, and hospital wagons and stores, artillery ammunition, rations for men; about thirty days' forage for 1,000 horses.

Massachusetts with reserve ambulance corps, hospital corps, men and horses; headquarters First Army Corps; Troop H, Sixth Cavalry; Troops A and C, New York Volunteer Cavalry; City Troop, Pennsylvania Cavalry; Company F, Eighth Infantry. Total, 43 officers, 1,130 men, 1,005 horses and mules.

Seneca, with part Fourth Pennsylvania, 611 men, small arms, ammunition, rations for men, and additional commissary stores, wagons, and equipage, signal corps, 29 ambulances, and various small stores.

City of Washington, with part of Fourth Pennsylvania, 612 men, cargo of commissary stores, overflow of *Massachusetts*, small arms ammunition, and rations for men.

St. Paul, with Fourth Ohio, 44 officers, 1,211 men, battery dynamite guns, Brigadier-General Hains and staff, Porto Rican Commission, newspaper correspondents, and transients joining Army in Porto Rico.

General Grant's brigade follows from Newport News and will sail Monday or Tuesday. General Shafter is sending the transports rapidly to Tampa. Troops from there should be under way in considerable numbers by middle of the week unless we are embarrassed by the quarantine regulations, which are giving us trouble all along the line.

H. C. CORBIN, *Adjutant-General*.

ADJUTANT-GENERAL'S OFFICE,
Washington, July 30, 1898.

General MILKS, *Ponce, Porto Rico*:

The Secretary of War directs that transports bringing you troops, as soon as discharged, be put under way at once for New York. This will expedite matters, avoiding complications of quarantine at Southern ports, and thus enable the Department to get you reinforcements and supplies in the quickest time possible. The Santiago transports will bring you all that you ordered from Tampa. They are all under way there.

H. C. CORBIN, *Adjutant-General*.

PONCE, PORTO RICO, July 31, 1898.
(Received at Washington 3.35 p. m.)

SECRETARY OF WAR, *Washington, D. C.*:

Your telegrams 27th received and answered by letter. Volunteers are surrendering themselves with arms and ammunition. Four-fifths of the people are overjoyed at the arrival of the army; 2,000 from one place have volunteered to serve with it. They are bringing in transportation, beef cattle, and other needed supplies. The custom-house has already yielded \$14,000, which is the only public funds we have for paying necessary expenses. As soon as all the troops are disembarked they will be in readiness to move. Please send any national colors that can be spared, to be given to the different municipalities. I request that the question of the tariff rates to be charged in the ports of Porto Rico occupied by our forces be submitted to the President for his action, the previously existing tariff remaining meanwhile in force. As to the Government under military occupation, I have already given instructions based upon

the instructions issued by the President in the case of the Philippine Islands and similar to those issued at Santiago de Cuba.

MILES.

One hundred flags were sent to General Miles in response to above request.

PONCE, VIA BERMUDA.

(Received Washington August 2, 1898, 9.27 p. m.)

SECRETARY OF WAR, *Washington*:

Please inform me how soon ample quartermaster and commissary funds will be available at this place. We are using native transportation and employing labor in unloading transports and storing supplies. Abundance of beef, cattle, coffee, sugar, and supplies of that character can be obtained in the country. Request that no more fresh meat be sent, as it can not be used more than a day from the coast. I also recommend that the manufacture of Springfield rifles, .45-caliber ammunition, all white canvas tentage and black-leather equipments of every description be discontinued, as they are obsolete and should not be a part of the army equipment.

MILES, *Major-General*.

WAR DEPARTMENT, *August 3, 1898.*

General MILES, *Ponce, Porto Rico*:

As you ought to know, the last caliber .45 Springfield rifle was manufactured in ninety-three. Smokeless powder cartridges are now being manufactured and will be forwarded. I suggest that you get along with what the Government has on hand. The question of currency and duties will be taken up to-day. Your action requiring all duties to be paid in United States currency is approved and will be adhered to.

R. A. ALGER, *Secretary of War*.

EXECUTIVE MANSION,
Washington, August 5, 1898.

General MILES, *Ponce, Porto Rico*:

The Secretary of War directs me to inform you that \$50,000 in coin was sent your quartermaster by General Brooke; \$100,000 more by *City of Chester* sailing to-morrow

H. C. CORBIN, *Adjutant-General*.

ADJUTANT-GENERAL'S OFFICE,
Washington, August 6, 1898—Noon.

General MILES, *Ponce, Porto Rico*:

A part of General Grant's brigade sailed from Newport News yesterday; 1,300 more will sail to-morrow; the Fifth United States Cavalry and First Ohio are waiting for the two transports; you were authorized by wire yesterday to send them. The Secretary War desires an early report of how many more troops, if any, you require to prosecute the campaign in Porto Rico. He wishes to hurry forward every man you require, but no more than you need.

H. C. CORBIN, *Adjutant-General*.

PONCE, *August 8, 1898.*
(Received Washington, 1.22 p. m.)

SECRETARY OF WAR, *Washington*:

I think enough troops have been ordered to Porto Rico. No more light batteries required.

MILES.

PONCE, *August 6, 1898.*

(Received Washington 2.35 p. m.)

SECRETARY OF WAR, *Washington:*

General Brooke reports Hains's Brigade, Fourth Ohio and Third Illinois, captured Guayama yesterday. Slight skirmish with enemy in and about town. Enemy's strength estimated about 500. Not ascertained that any of the enemy were regulars. Resistance not strong. Private John O. Corder wounded below knee; C. W. Riffie, both legs below thigh; S. W. Wolcott, in right foot. None serious. All Fourth Ohio. One Spaniard killed, two wounded, as far as known.

MILES.

PONCE, *August 8, 1898.*

(Received Washington 3.10 p. m.)

SECRETARY OF WAR, *Washington:*

General Schwan's command is marching around the west end of Porto Rico. General Henry, with Garretson's brigade, is moving across Via Adjuntas and Utuado to Arecibo, thence to San Juan. General Brooke has one brigade between Guayama and Cayes. General Wilson, with Ernst's brigade, is at Coamo. American flag is floating in nearly all the principal places in Porto Rico. A small fort has been built at the entrance of Guanica Bay, which I hold; respectfully recommend be named Fort Capron, in honor of Captain Capron. Would recommend that no more troops or laborers be sent to Porto Rico.

MILES,

*Major-General Commanding Army.*WAR DEPARTMENT, *August 9, 1898.*General MILES, *Ponce, Porto Rico.:*

It is deemed advisable to at once establish a large hospital at Ponce. Can you get the lumber, labor, and material necessary to put this order into execution immediately? Will send you nurses and doctors as many as desired. This is of the utmost importance. Answer, giving number of nurses and doctors you deem will be required.

R. A. ALGER, *Secretary of War.*PONCE (VIA BERMUDA), *August 10, 1898.*

(Received Washington 8 p. m.)

SECRETARY OF WAR, *Washington:*

Replying to your telegram, any sized hospital can be established. Lumber, labor, and material abundant. Or the *Relief* ship may be detained, with other transports of the Government, and be converted into hospital ships, if advisable, and remain in safe harbor. Matter being carefully considered by Colonels Greenleaf and Senn and Major Torney, who will render best judgment to-morrow and give number of nurses and doctors required. The command is in good health thus far, with the exception of cases that bring the germs of disease from Chickamauga and other camps.

MILES.

PONCE (VIA BERMUDA), *August 11, 1898.*

(Received Washington 9.45 p. m.)

SECRETARY OF WAR, *Washington:*

Following is result of conference and recommendation by Surgeons Greenleaf, Torney, Daly, regarding case sick of army in Porto Rico: General Miles's hospital of lumber can be built, but one of tents preferable. We, however, urgently recommend speedy return of sick to United States on properly equipped transports or hospital ships. Fifty doctors and hundred and fifty trained male nurses required at once.

SECRETARY OF WAR, *Washington:*

Following received from General Wilson: General Ernst's brigade captured Coamo 8.30 this morning. Sixteenth Pennsylvania, Colonel Hulings commanding, led by Lieutenant-Colonel Biddle, of my staff, having made a turning movement through the mountains, striking the Aiboneto road half mile beyond town, captured entire garrison, amounting 150 men, Spanish commander, Illeroa, and Captain Lopez killed. Our loss reported 6 wounded, only 1 severely. Men and officers behaved excellently. General Ernst, Colonel Hulings, and Colonel Biddle are especially to be commended. This is a very important capture and well executed. Names of wounded as soon as received here.

PONCE, *August 13, 1898.*

(Received Washington 1.06 p. m.)

SECRETARY OF WAR, *Washington:*

General Wilson reports Major Lancaster with Potts's battery at 1.30 p. m., 12th instant, quickly silenced enemy's battery at Asemanta, near Aiboneto, and drove him from his position and rifle pits; no infantry fire on our part. Lient. John P. Hains, Third Artillery, struck by stray Mauser bullet; not serious. A shell from enemy's gun burst just over one of our pickets, killing Corporal Swansen, wounding Corporal Jenks, Company L, Third Wisconsin, neck and arm; Private Vought, same company, seriously in abdomen; Private Bunce, same company, in chest, not seriously.

MILES.

PONCE (VIA BERMUDA), *August 10, 1898.*

(Received Washington, 7.40 p. m.)

SECRETARY OF WAR, *Washington:*

Have established telegraphic communication with General Brooke, who reports that in a skirmish on the 8th instant with the enemy about 3 miles north of Guayama General Hains forced the enemy to retreat. The following men of the Fourth Ohio were wounded, none killed: Capt. Edward O. Thompson, Company K, in right wrist; Private Samuel F. Jones, right knee; Private Noble W. Haniacker, Company C, in ankle; Private Henry S. Haines, Company C, in right foot; Private William Jeddington, Company A, in hip.

PONCE (VIA BERMUDA), *August 11, 1898.*

(Received Washington, 3.25 p. m.)

SECRETARY WAR, *Washington:*

Following message received from Schwan, camp near Hormigueros, 10. Advance guard, including cavalry of this command, while reconnoitering northwest of Rosario River, near Hormigueros, developed strong Spanish force, which lay con-

cealed in hills north of Mayaguez road. In general engagement which followed Lieutenant Byron, Eighth Cavalry, my aid-de-camp, was wounded in foot, and Private Fernberger, Company D, Eleventh Infantry and 1 other private was killed and 14 enlisted men were wounded. It is reported that the most, if not the entire, Spanish garrison of Mayaguez and surrounding country, consisting of 1,000 regulars and 200 volunteers, took part in engagement. We drove the enemy from his position, and it is believed inflicted heavy loss. A wounded Spanish lieutenant was found in field and brought in our lines. Conduct of officers and men was beyond all praise. I propose to continue my march on Mayaguez at early hour to-morrow. Signed, Schwan.

MILES.

PONCE (VIA BERMUDA), *August 11, 1898.*

(Received Washington, 9.35 p. m.)

SECRETARY OF WAR, *Washington:*

Following from Schwan:

"Immediately after repulse yesterday Spanish troops, joined by what were left in Mayaguez, moved in direction Lares. Have sent scouts in that direction. My command entered Mayaguez at 9 o'clock this morning.—SCHWAN."

MILES.

PONCE (VIA BERMUDA), *August 15, 1898.*

(Received Washington 3.11 p. m.)

SECRETARY WAR, *Washington:*

Following dispatches received from General Schwan, sent before he received notification suspension hostilities:

"IN CAMP, 2 MILES NORTH LASMARIOS, VIA GAUCO, *August 13.*

"Burke's column, while descending valley Rio Grande, fired into by retreating Spanish force from mountain slope, north side stream. Fire returned, thought with effect; none of our men hurt. Spanish forces numbering about 1,500, heading for Lares and Penino. Received surrender of commanding officer, Colonel Soto; sick in cottage near; attended by two Spanish surgeons. Have directed they be sent Mayaguez; held as prisoners or paroled as you determine. Shall close my command here and be governed in movements to-morrow by reports expect to receive during the night. Probably march Lares; road most difficult.

"CAMP NEAR LOS MARIAS, *August 14.*

"After sending dispatch last evening, company Eleventh Infantry brought forty prisoners, including battalion commander and lieutenant; also number Spanish soldiers, wounded yesterday. Cavalry scouring country toward Lares for fugitives. Deserters from Spanish column, which has been thoroughly disorganized and demoralized by pursuit. Prisoners report our fire yesterday very effective and well directed."

Please notice on map our troops occupy best part of Porto Rico. They were moving in such strong column in concert that nothing could check their progress. They would have occupied the entire island within four days if they had not been stopped by order to suspend hostilities. There were some unavoidable delays before the troops could be landed, but none after. Will the disembarking of troops that are now in transports be considered an act of hostility?

MILES.

ADJUTANT-GENERAL'S OFFICE,
Washington, August 12, 1898—4.23 p. m.

Major-General MILES, *Ponce, Porto Rico*:

The President directs all military operations against the enemy be suspended. Peace negotiations are nearing completion, a protocol having just been signed by representatives of the two countries. You will inform the commander of the Spanish forces in Porto Rico of these instructions. Further orders will follow. Acknowledge receipt.

By order Secretary of War:

H. C. CORBIN, *Adjutant-General*.

ADJUTANT-GENERAL'S OFFICE,
Washington, August 12, 1898—5 p. m.

General MILES,
Ponce, Porto Rico.

General MERRITT,
Manila.

General SHAFTER,
Santiago.

The Secretary of War directs that the following proclamation of the President's be sent you for your information and guidance:

"BY THE PRESIDENT OF THE UNITED STATES OF AMERICA,

"A PROCLAMATION.

"Whereas, by a protocol concluded and signed August 12, 1898, by William R. Day, Secretary of State of the United States, and His Excellency Jules Cambon, Ambassador Extraordinary and Plenipotentiary of the Republic of France, at Washington, respectively representing for this purpose the Government of the United States and the Government of Spain, the United States and Spain have formally agreed upon the terms on which negotiations for the establishment of peace between the two countries shall be undertaken; and

"Whereas it is in said protocol agreed that upon its conclusion and signature hostilities between the two countries shall be suspended, and that notice to that effect shall be given as soon as possible by each Government to the commanders of its military and naval forces:

"Now, therefore, I, William McKinley, President of the United States, do, in accordance with the stipulations of the protocol, declare and proclaim on the part of the United States a suspension of hostilities, and do hereby command that orders be immediately given through the proper channels to the commanders of the military and naval forces of the United States to abstain from all acts inconsistent with this proclamation.

"In witness whereof I have hereunto set my hand and caused the seal of the United States to be affixed.

"Done at the city of Washington this 12th day of August, in the year of our Lord one thousand eight hundred and ninety-eight, and of the independence of the United States the one hundred and twenty-third.

"By the President:

"WILLIAM MCKINLEY.

"WILLIAM R. DAY,
"Secretary of State."

Acknowledge receipt.

By order Secretary War:

H. C. CORBIN, *Adjutant-General*.

PONCE, via BERMUDA, *August 21, 1898*—8.05 p. m.

SECRETARY WAR, *Washington*:

Everything accomplished that could be desired. Only details to be arranged by commission for evacuation of Spanish troops. Some Spanish troops now marching to San Juan preparatory to embarking for Spain. I have 106 guns, mortars, and howitzers, field and siege, I intended to use at San Juan if Spanish had not been captured outside, which our troops were doing. These available if needed elsewhere. Among number are 10 light, very powerful dynamite guns. If desirable, any of above, with ammunition and men, can be shipped, via New Orleans and San Francisco, to Manila. I expect very soon to return to Washington.

MILES.

BOARD OF ORDNANCE AND FORTIFICATION.

WAR DEPARTMENT,

BOARD OF ORDNANCE AND FORTIFICATION,

Washington, D. C., October 25, 1898.

SIR: In response to your request of the 20th instant, I have the honor to submit a summary of the annual report of the Board of Ordnance and Fortification for the current year:

The general operations of the Board have been largely influenced by the war with Spain, officially declared April 21, 1898. A majority of the members have been called to duty in the field, and it has been necessary to meet at longer and more irregular intervals than usual.

A large number of devices and instruments, together with many suggestions and plans for national defense, have been carefully considered, and whenever the promise of future military value was sufficient to warrant it, an allotment has been made for development and test.

Satisfactory progress has been made by the Bethlehem Iron Company toward the completion of the 100-gun contract. All the 8-inch guns, 29 of the 10-inch, and 4 of the 12-inch guns have already been completed, and the work on the remainder is reported to be well advanced.

Dr. Gatling reports the 8-inch cast-steel gun of his design ready for shipment to Sandy Hook for test.

The trustees of the Brown segmental-tube wire-wound gun report that work has been somewhat delayed on their 10-inch experimental gun by the difficulty in procuring suitable steel from the manufacturers on time. The gun is now in the lathe, however, and partly turned and wound.

The Board has under consideration two methods of throwing high explosives from field guns, one proposed by the Sims-Dudley Defense Company of New York, the other by the Dynamite Ordnance and Armaments Company of New Jersey. The tests have not yet been completed.

Experiments are being made with heavy rapid-fire guns. A rapid-fire field gun and carriage have been purchased abroad for test, but are not yet delivered in this country.

Several forms of disappearing carriages for heavy guns are under construction or test.

During the year the Board has recommended the adoption of emmensite, wet gun-cotton, and joveite as types of high explosives for charging shells.

In emergency depression position finders the Board found both the Rafferty and the Lewis instruments satisfactory. A horizontal base position finder has been developed by Professor Crehore and Lieutenant Squier that is found to give accurate and satisfactory results.

The equipment of the typical artillery station at Fort Wadsworth was completed, with the exception of a portion of the auxiliary defenses, early in the summer, but exhaustive tests have been interfered with by the war. The text and plates of the Drill Regulations for Coast Artillery have been completed, approved by the Secretary of War, and distributed to the service.

The question of the application of electric-power apparatus for manipulating the guns and carriages of the seacoast armament and in the service of the ammunition has been carefully considered, and a type installation is now in progress at Fort Wadsworth.

An estimate of the funds needed to continue the work of the board during the coming year has been prepared and submitted, with a recommendation that the present law be so modified as to enable the Board to more directly control its expenditures. The Board believes it to be for the best interests of the service that it should have the power to disburse its own funds, subject to the control of the Secretary of War.

While types of all the more important engines and appliances of war for our coast defenses have already been developed and adopted under the auspices of the board, much remains to be accomplished in order to make the armament truly effective. It is the aim of the board to keep in touch with the best inventive talent of the country in all that pertains to war material, to encourage the development of every suggestion and device of value presented, and to use the funds at its disposal to secure for our service the best products of American genius.

Very respectfully,

NELSON A. MILES,

Major-General Commanding the Army, President of the Board.

THE SECRETARY OF WAR.

THE SOLDIERS' HOME.

OFFICE OF THE BOARD OF COMMISSIONERS,

Washington, D. C., October 28, 1898.

SIR: I have the honor to submit the following summary of the annual report of the Board of Commissioners of the Soldiers' Home for the year ending September 30, 1898:

The report shows that on September 30, 1898, there were 1,226 receiving the benefits of the Home, an increase of 85 over last year, and that 771 were resident inmates; that the daily average number of inmates for the year was 751, and the number of deaths 54.

The permanent fund in the United States Treasury on September 30, 1898, was \$2,725,740.08, a decrease from amount of last year of \$11,857.87, due to delayed settlements of accounts by the Treasury Department. The disbursements for current expenses and permanent improvements amounted to \$206,566.28, \$11,720 greater than last year, which is accounted for by expenses incurred for permanent

improvements, the purchase of cows for the dairy, and the installation of an electric plant.

Of the 771 resident inmates 629 are receiving pensions from \$6 to \$32 per month; two of these received \$50 and one \$72.

The daily average number of patients treated in the hospital was 74.91, and the average age of patients 53.92.

The cultivation of the farm and the reestablishment of the dairy proved profitable during the year.

Brig. Gen. David S. Stanley, U. S. A., was relieved as governor of the Home on April 15, 1898, by Brig. Gen. George D. Ruggles, U. S. A.

The affairs of the Home have been administered by its officers with zeal and wisdom. Good, wholesome food, comfortable clothing, clean quarters and beds, and rational amusement have been provided, leaving no reasonable room for complaint.

Very respectfully,

NELSON A. MILES,

Major-General Commanding the Army, President Board of Commissioners.

The SECRETARY OF WAR.

THE MILITARY ACADEMY.

WAR DEPARTMENT, ADJUTANT-GENERAL'S OFFICE,

Washington, November 5, 1898.

SIR: I have the honor to submit herewith a synopsis of report of the Board of Visitors to the United States Military Academy for the year 1898:

APPOINTMENTS AND EXAMINATIONS.

The board was impressed with the accuracy of knowledge shown by the cadets in their examinations. The work done was strong testimony to the thoroughness of the instructors' work as well as to the diligence of the students.

The recommendations of previous boards, that the number of cadets be increased by allowing the President to appoint 20 and one to each Senator, is renewed.

DISCIPLINE AND INSTRUCTION.

The board is unable to suggest any improvement in the methods of discipline. All infractions of the rules are promptly punished with absolute justice and impartiality.

The methods of instruction are the result of many years of experience of accomplished and painstaking officers, and are as nearly perfect in their results as it seems possible to make them.

SEACOAST BATTERY.

It is recommended that the five 8-inch converted rifles be replaced with guns of modern type, one of which should be a disappearing gun.

This battery contains one 8-inch modern gun, which at present can not be used on account of danger to surrounding towns and railroads. The construction of a safe target in the mountain side for the use of this gun is strongly recommended.

SIEGE AND MORTAR BATTERY.

The guns and howitzers of this battery, with the exception of two, are old and obsolete, and the board recommends that they be replaced with those of modern type, and that the light battery used in the instruction of the fourth class, which consists of four guns, be increased by the addition of two guns.

BUILDINGS AND GROUNDS.

The care that is taken of the buildings and grounds of the reservation is highly commended.

The board is impressed, as has been former boards, with the desirability of refitting and remodeling the interior of the Library Building, so as to make it more suitable for the purposes of a library, and fireproof for the preservation of the valuable books and pamphlets, and does not consider the estimates submitted of \$63,100 for the alterations and of \$6,900 for removing and returning the books as excessive.

An appropriation of \$8,000 is recommended to refit the old army service barracks into a commissary storehouse.

Four thousand two hundred dollars is recommended for a porch to be erected around the cavalry barracks.

The cemetery was found to be in good condition, but showed a want of proper attention to the grass, flowers, plants, and trees, and the board recommend an appropriation of \$720 for a keeper to preserve the same in better repair.

MASTER OF THE SWORD.

The board urges the passage of an act giving the master of the sword the rank, etc., of a first lieutenant of infantry.

Very respectfully,

H. C. CORBIN,
Adjutant-General.

The SECRETARY OF WAR.

An increase of the number of cadets for this great school has been recommended for several years by Boards of Visitors, and the recommendation of the present board is concurred in that twenty cadets annually, to be appointed by the President, and one appointment at large, to be nominated by each Senator, be authorized, in addition to the present number provided by law. This increase is urgently needed.

While all army, corps, and division commanders in the late war were graduates of West Point or officers of the Regular Army, as were all of the chief engineers, quartermasters, commissaries of subsistence, paymasters, surgeons, and ordnance officers, yet there was a great lack of subordinate staff officers for so large an organization.

The present organization of the Army is officered for 25,000 men, and to such an extent was it necessary to appoint Regular Army officers to places in the volunteer force that scarcely a company had more than one

officer, although filled to its maximum with recruits; and in many cases, when an officer was killed, wounded, or taken sick, the company was commanded by noncommissioned officers. This should not be; it can be remedied in future by increasing the corps of cadets, thus supplying officers for growing needs.

The other recommendations of the board are judicious, and the Department will carry them out as far as it can; but where appropriations are necessary, it is recommended that they be granted so that the important work of the Academy may be conducted with the best possible results.

ADJUTANT-GENERAL'S DEPARTMENT.

WAR DEPARTMENT, ADJUTANT-GENERAL'S OFFICE,

Washington, November 11, 1898.

SIR: I have the honor to submit the following summary of my annual report:

THE REGULAR ARMY.

On the 1st of April the strength of the Regular Army, just before the breaking out of the war, was 2,143 officers and 26,040 enlisted men, including hospital corps, engineers, and the signal corps. By the act of March 8, 1898, the artillery arm was increased by two regiments, to be composed of twelve batteries each, two of which, in each regiment to be organized, in the discretion of the President, as field artillery.

By general orders issued April 20, 1898, the equipment of each battery of light artillery was directed to include 6 guns and caissons, 1 combined forge and battery wagon, and 100 horses.

The act of April 26, 1898, prescribed the peace conditions of each regiment of infantry to consist of two battalions of four companies each and two unmanned companies, and authorized the President, upon declaration of war, to establish a third battalion of four companies each in the infantry arm, and increased the enlisted strength of a company of infantry to 106, a troop of cavalry to 100, a battery of heavy artillery to 200, of each battery of light artillery to 173, of each company of engineers to 150, and of the signal corps, by the addition of 10 corporals, 100 first-class privates and 40 second-class privates.

Under the authority thus given a third battalion was established for each regiment of infantry, and a sufficient number, not less than 20, of noncommissioned officers and men selected with reference to their ability to assist in the instruction of the recruits, was ordered to be transferred to the new companies from other companies of the same regiment, and the company, troop, and battery organizations provided for in that act were ordered recruited to their war strength.

Under the authority conferred upon the President by section 4 of the act of April 26, 1898, he directed, July 13, 1898, an increase of the artillery arm of the service by the addition of 84 second lieutenants over and above the number provided by the act of March 8, 1898.

In view of the then possibilities of the near future, this office on the 16th of March last recommended an increase in the regular infantry, and submitted a draft of "A bill for the better organization of the line of the Army of the United States." This bill is published in full in my report, and also your letter of March 16, submitting it to Congress with your recommendation.

The following table exhibits the strength of the Regular Army for each of the four months following the declaration of war with Spain, as shown by the latest returns on file in this office:

Organisation.	May.		June.		July.		August.	
	Officers.	Enlisted men.	Officers.	Enlisted men.	Officers.	Enlisted men.	Officers.	Enlisted men.

Inspectors general	16	Ordnance officers.....	21
Judge-advocates	3	Signal officers.....	12
Quartermasters	43	Officers of volunteer regiments.....	86
Commissaries of subsistence.....	21		

THE VOLUNTEER ARMY.

By the act of April 22, 1898, providing for the temporary increase of the military establishment of the United States, the organized and active land forces were declared to consist of the Regular Army and of the militia of the several States when called into service, constituting two branches, designated, respectively, as the Regular Army and the Volunteer Army of the United States.

Section 6 provided that "When the members of any company, troop, battery, battalion, or regiment of the organized militia of any State shall enlist in the Volunteer Army in a body, as such company, troop, battery, battalion, or regiment, the regimental, company, troop, battery, and battalion officers in service with the militia organization thus enlisting may be appointed by the governors of the States and Territories, and shall when so appointed be officers of corresponding grades in the same organization when it shall have been received into the service of the United States as a part of the Volunteer Army."

The same section further provided that the President may authorize "the Secretary of War to organize companies, troops, battalions, or regiments, possessing special qualifications, from the nation at large, not to exceed 3,000 men, under such rules and regulations, including the appointment of the officers thereof, as may be prescribed by the Secretary of War."

Section 7 authorized the recruitment to the maximum strength of all the accepted organizations in the volunteer force, and provided for the organization of regular and volunteer troops into divisions of three brigades, each brigade to be composed of three or more regiments, and authorized the President, whenever three or more divisions are present in the same army, to organize them into army corps, each corps to consist of not more than three divisions. By section 13 not more than one officer of the Regular Army could hold a commission in any one of the regiments of the Volunteer Army at the same time.

Finally, by the act approved May 11, 1898, Congress authorized, in addition to the volunteer forces provided by the act of April 22, the organization of a volunteer brigade of engineers from the nation at large, to consist of not more than three regiments and not more than 3,500 men possessing the special qualifications for engineer troops, the officers of this brigade to be appointed by the Secretary of War. The same act authorized also the organization of an additional volunteer force, not exceeding 10,000 men possessing immunity from disease incident to tropical climates, the officers of this force to be appointed by the President, by and with the advice and consent of the Senate.

Under authority conferred upon him by the joint resolution of April 20 and the act of April 22, 1898, the President issued a proclamation, dated April 23, 1898, calling for volunteers to the number of 125,000 men, to be apportioned as far as practicable among the several States, Territories, and the District of Columbia, according to population, to serve for two years unless sooner discharged.

The apportionment under this call aggregated 5 regiments and 17 troops of cavalry, 16 batteries of light artillery, 1 regiment and 7 batteries of heavy artillery, 119 regiments and 10 battalions of infantry.

May 25, 1898, the President issued a proclamation calling for an additional force of 75,000 men. For controlling military reasons it was determined to utilize so much of this additional force as was necessary to bring up the several State organizations in service to the full legal strength, the remainder to be apportioned among the several States and Territories according to their respective quotas as nearly as possible. The apportionment under this second call comprised 16 batteries of light artillery, 3 battalions of heavy artillery, and 22 regiments, 10 battalions, and 46 companies of infantry.

In view of the imminence of war with Spain, and in anticipation of the action of Congress and of the call of the President for volunteers, carefully prepared regulations were issued April 22, 1898, for the guidance and government of the numerous prospective mustering officers whose duty it would be to critically inspect the volunteer organizations that would be offered for muster into the service of the United States. The general orders, circulars, etc., are attached to the report in appendix for the muster, instruction, health, welfare, and comfort of the volunteers, whether in the field, in camps, in hospitals, on furlough, etc.—in fact, under all conceivable

conditions—from the date of their reception into the service of the United States until their final discharge from military duty.

The following table exhibits the strength of the volunteer army at the several periods indicated:

Strength of the Volunteer Army.

Organization.	May.		June.		July.		August.	
	Officers.	Enlisted men.	Officers.	Enlisted men.	Officers.	Enlisted men.	Officers.	Enlisted men.
Major-generals	11	12	18	21
Brigadier-generals	25	70	70	71
Adjutant-General's Department	54	98	100	99
Inspector-General's Department	19	30	27	25
Judge- Advocate-General's Department ...	6	7	8	8
Quartermaster-General's Department	34	32	114	121
Subsistence Department	25	87	106	108
Medical Department...	19	84	99	113
Pay Department.....	12	65	80	86
Corps of Engineers	10	24	28	28
Ordnance Department.....	25	24
Signal Corps.....	10	101	897	112	1, 089	111	1, 173
Engineers	81	704	108	2, 458	150	3, 236
Cavalry.....	285	5, 972	292	6, 920	292	7, 221	289	7, 003
Heavy artillery.....	83	1, 836	83	2, 010	93	2, 540	92	2, 570
Light artillery.....	69	1, 706	84	2, 979	120	4, 405	120	4, 265
Infantry	5, 562	109, 006	5, 969	139, 845	7, 238	185, 748	7, 319	188, 947
Total	6, 224	118, 580	7, 169	153, 355	8, 633	203, 461	8, 785	207, 244

The patriotic response of the several States under the first call for volunteers and the activity of the officers detailed for duty in mustering troops are sufficiently indicated by the fact that on May 31, 1898, a little more than a month after the President's call for volunteers, nearly 125,000 men had been mustered into service. The muster in of the three regiments of cavalry was completed by May 30; that of the ten regiments of infantry (immune) by July 30; that of the three regiments of engineers by August 20; the last volunteer organization being mustered in August 24, 1898.

The aggregate strength of the Regular and of the Volunteer armies for each of the months of May, June, July, and August was as follows:

	Officers.	Enlisted men.	Grand total.
May:			
Regular Army.....	2, 191	41, 934	44, 125
Volunteer Army.....	6, 224	118, 580	124, 804
Aggregate.....	8, 415	160, 514	168, 929

	Officers.	Enlisted men.	Grand total.
June:			
Regular Army.....	2, 198	49, 513	51, 711
Volunteer Army.....	7, 169	153, 355	160, 524
Aggregate.....	9, 367	202, 868	212, 235
July:			
Regular Army.....	2, 327	53, 931	56, 258
Volunteer Army.....	8, 633	203, 461	212, 094
Aggregate.....	10, 960	257, 392	268, 352
August:			
Regular Army.....	2, 323	56, 365	58, 688
Volunteer Army.....	8, 785	207, 244	216, 029
Aggregate.....	11, 108	263, 609	274, 717

The suspension of hostilities, resulting from the short but brilliant operations of the army against Santiago, Cuba, leading to its capture and that of the Spanish forces defending the city, the surrender of the Spanish troops in Porto Rico, no less than the successful operations of our troops in the Philippines, led to the determination to muster out 100,000 men, nearly one-half of the entire volunteer force, and the first order looking to that end was issued on the 18th of August last.

Since the signing of the protocol the officers and men of the volunteer regiments have remained at their posts of duty, in most cases at great personal sacrifice. It is desirable, however, that a speedy increase of the Regular Army may be provided for in order that the volunteers may be released from further service and be allowed to return to their peaceful vocations.

The officers of the Regular Army detailed to make the examination and muster in of the volunteer regiments, also the officers detailed for mustering out volunteers, performed their duty with promptness and with great care.

STAFF ORGANIZATIONS.

If, as recommended in another part of the report, additional officers are given the line of the Army, so as to give plenty of trained officers for staff duty in time of war, it is believed that a general reorganization of the staff or the adoption of new systems will not be found desirable. Under the present system the great and successful campaigns of Grant, Sherman, and Sheridan were conducted; it has worked well in our Indian wars, and it is confidently asserted that when the work of the staff departments in this war is more fully understood it will receive the approval of military men and of the people generally.

MILITARY GEOGRAPHICAL DEPARTMENTS.

Important considerations led, early in the year, to a comprehensive rearrangement of the several geographical departments into which, for facility of military administration, the country is divided. Five new departments, those of the Lakes, the Gulf, Santiago, Porto Rico, and the Pacific, were created; the department of the Missouri was reconstituted; the departments of the Platte and of Texas discontinued; and the geographical limits of other departments were rectified.

The declaration of the war with Spain made the defense of the entire Atlantic seaboard against possible attack a question of the utmost importance. With this object in view, the governors of the several littoral States were freely consulted, and their active cooperation enlisted in favor of providing temporary garrisons, drawn from the State militia, for those exposed points where no defenses containing heavy guns existed, or where the defenses had either no garrisons or only small ones. Infantry supports were drawn, while war was in progress, from some of the volunteer infantry, heavy artillery, and light batteries organized under the first call for troops, and the organizations were recruited to war strength of twelve companies. The number of men so utilized was, approximately, 12,000. After cessation of hostilities, in July last, the infantry supports were transferred to inland camps, the withdrawal being completed by September 1, 1898.

ARMY CORPS.

On April 15, 1898, the regiments of the Regular Army, with few exceptions, were ordered to proceed to designated points in the South.

On April 23, 1898, the troops assembled in the Chickamunga National Park (Camp George H. Thomas) were constituted a provisional army corps, under Maj. Gen. John R. Brooke.

By direction of the President, May 7, 1898, seven army corps were constituted, embracing both the regular and volunteer branches of the Army; and later, June 21, the forces comprising the Philippine expedition were constituted an army corps, to be known as the Eighth.

The subjoined table exhibits the strength and distribution of the Army by departments and army corps.

Command.	May.		June.		July.		August.

CASUALTIES.

A statement is given of the several actions in which troops were engaged during the war with Spain and of the losses sustained by them from April 21 to August 13, 1898, including the names of all officers killed and wounded.

Grand total of casualties in killed and wounded during the war with Spain.

Where.	Killed.		Wounded.	
	Officers.	Enlisted men.	Officers.	Enlisted men.
Cuba	23	237	90	1, 332
Porto Rico.....		3	4	36
Manila.....		17	10	96
Total	23	257	113	1, 464

The number of deaths from all causes, between May 1 and September 30, inclusive, as reported to the Adjutant-General's Office up to October 3, were: Killed, 23 officers and 257 enlisted men; died of wounds, 4 officers and 61 enlisted men; died of disease, 80 officers and 2,485 enlisted men. Total, 107 officers and 2,803 enlisted men, being an aggregate of 2,910 out of a total force of 274,717 officers and men, or a percentage of 1⁵⁸/₁₀₀.

BREVETS AND MEDALS OF HONOR.

A board of officers will soon be convened, in accordance with your instructions, to examine all recommendations for brevets and medals of honor for services in Cuba, the Philippines, and Porto Rico.

INCREASE OF THE REGULAR ARMY.

A bill is now being prepared providing for an increase of the Army, which will be ready to submit upon the assembling of Congress.

It is believed that the number of officers should be increased, by one first lieutenant to each troop, battery, and company, for reasons stated in full in the report; and it is recommended that all officers below the rank of major, serving in the West Indies and the Philippines, shall have the pay and allowance of the next higher grade.

GENERAL OFFICERS.

The requirements of probable service in Cuba and elsewhere call for an increase of general officers in the permanent establishment. There should be at least an increase of two major-generals and four brigadier-generals. Provision for the grade of lieutenant-general is called for by the best interests of the public service.

ADJUTANT-GENERAL'S DEPARTMENT.

Brig. Gen. Samuel Breck, an officer of high order and ability and of long and faithful service, was retired February 25, 1898, under the provisions of law, and the undersigned succeeded to the office of adjutant-general.

Five officers of the Department have been appointed brigadier-generals of volunteers, namely: Cols. Michael V. Sheriden, Theodore Schwan, and Lient. Cols.

Arthur MacArthur, John C. Gilmore, and John B. Babcock, and one has been promoted to major-general of volunteers for distinguished service in the battle of Manila, namely, General MacArthur.

MILITARY INFORMATION DIVISION.

The publications of this division, including maps and handbooks of Cuba, Porto Rico, and the Philippines, have been numerous and widely distributed.

MISCELLANEOUS.

In the report a number of minor matters are considered. A modification of the act of August 1, 1894, in regard to enlistments, is recommended, to the end that the enlistment of natives for service in regiments serving in Cuba, Porto Rico, and the Philippines may be authorized; statistics are given as to the recruiting service; an increase of the appropriation for the militia is recommended, as also for the post-graduate schools at Forts Leavenworth, Monroe, and Riley; suggestions are made for the improvement of post schools and lyceums. Increased rank should be provided for officers serving as military attachés. It is suggested that the number of yearly Presidential appointments to the Military Academy be increased to twenty, and that two appointments at large be authorized to be nominated by the Senators from each State; that the pay of noncommissioned officers be increased; that regimental bands be increased, and that the clerical force at Army and Department headquarters be reorganized.

THE ADJUTANT-GENERAL'S OFFICE.

Owing to the large increase of business following the declaration of war with Spain, the number of temporary clerks appointed in this office has steadily increased, and is now 141, largely composed, since the cessation of hostilities, of men from the Regular and Volunteer Army, who, having the requisite qualifications, were thus partially rewarded for the trials and hardships endured by them in the service. The physical endurance of the force has been taxed to the utmost. It has labored, regardless of hours, with a gratifying degree of success, considering the serious inconvenience resulting from crowded rooms and the growing insufficiency of space for the office records and files.

To the officers serving in the office acknowledgment for their devotion and faithful and intelligent performance of duties under trying conditions is freely made.

The uniform courtesy and cooperation of the heads and officers of other staff departments are gratefully acknowledged. Under all the trying conditions there has not been a sign of discord. All have vied with each other in an intelligent and faithful performance of duty. The clerical force of the office has been no less diligent and faithful and richly deserve recognition.

Very respectfully,

H. C. CORBIN, *Adjutant-General.*

The SECRETARY OF WAR.

The foregoing report summarizes the legislation enacted by Congress increasing the Regular Army and providing for an Army of Volunteers during the war with Spain.

Attention is invited to the suggestions and statistics contained in the report of the Adjutant-General, and to his various recommendations, which are judicious and merit the favorable consideration of Congress.

The recommendation in my report last year is renewed, that military attachés to embassies be given the rank and pay, while serving, of colonel; and the attachés to legations be given the rank and pay of lieutenant-colonel, while serving, or at least the rank and pay of major. The reasons for this are well stated by the Adjutant-General in his full report.

Instead of the increase of pay for officers serving in the West Indies and the Philippines, recommended by the Adjutant-General, viz, the pay and allowance of the next higher grade for all officers below the rank of Major, it is recommended that their pay, as also the pay of those stationed in Alaska, be increased 50 per cent while so serving; this because of the additional expense of serving in those countries.

INSPECTOR-GENERAL'S DEPARTMENT.

WAR DEPARTMENT, INSPECTOR-GENERAL'S OFFICE,

Washington, D. C., November 7, 1898.

SIR: In compliance with instructions, the following summary of matters mentioned in the annual reports of this department for 1898, and possibly requiring legislative action, is submitted:

THE NATIONAL GUARD.

Recent experiences have shown that our militia system could advantageously be reconstructed and a more intimate relation established between it and the National Government.

SMALL ARMS.

The National Guard should be armed with the same kind of rifles as the Regular Army, if we wish the most effective service. Besides, the difference in the manual of arms prescribed for differently constructed rifles, and want of interchangeability of ammunition, are apt to cause confusion and delay where prompt action is required.

SUPPLY DEPOTS.

The great number of volunteer regiments moving to the centers of concentration without arms or uniforms, and the subsequent difficulties in meeting their needs promptly, suggest the establishment of reserve or supply depots at convenient points, in order that each State, on call, can put its quota in the field in condition for service, at least as far as arms and equipments go.

STRATEGIC STAFF.

The great need in the Army to insure coherence, promptness, and efficiency in the field is a strategic staff, composed of highly trained and trustworthy officers, such as possessed by all continental armies, who, free from the overwhelming details of paper work, can give their undivided attention to the systematic preparation and execution of all important military affairs. Such a staff would permit no symptom of chaos, hold all to their full and proper work, and mold the organized forces and control their movement so they would respond to their slightest touch.

CAMPS AND MANEUVERS.

To secure better cohesion between the National Guard and regulars and the greatest efficiency of the troops in the field, funds should be provided for combined encampments and periodical military maneuvers and experimental mobilization in times of peace, as is customary with all first-class European powers. One of the most serious defects noted during the Spanish-American war was the inexperience and utter disregard for the most elementary principles of military life in large camps.

INDEMNITY FUND.

It has been found that crops and fencing of farms and other property are occasionally damaged in the movements and maneuvers of troops. Such damages are generally slight, and if they could be paid immediately it would be an act of justice, insure the good will of the people, and avoid much labor and expense in effecting a settlement afterwards. It is recommended that a small sum be appropriated for this purpose, as is done by other civilized nations.

TRANSPORTATION ON THE SEA.

It seems apparent, in view of future movements of troops made necessary by our changing national policy, a transport system should be organized and the control of this important service most completely organized or confided to the Navy. During the transmarine expeditions much friction is apt to be developed between captains engaged with each vessel and whoever controls affairs and their movements, whether a quartermaster, naval officer, or the commander of the troops aboard, which might interfere, seriously in some cases, with the prompt accomplishment of the task imposed upon the military commander.

PACK TRAINS.

As pointed out in former reports, in military operations over rough country the use of wheeled transportation is very limited, and pack trains become of prime importance; and it is suggested that a system be devised by which the Government can have a corps of trained civilian teamsters and packers for this service. Obviously, soldiers should not be taken from the fighting line for this purpose, even if fit. It is of moment that the employees be expert in their work, as untrained hands may within a week cripple the transportation of an army. The depletion of the trained transportation at many military posts years ago seems felt as a serious injury throughout every effort at mobilization now.

HOSPITAL CORPS.

It has been clearly demonstrated that the proportion of hospital stewards and trained hospital corps men to the fighting force is far too limited and should be increased, say to about 4 to 8 per cent for the firing line or entire service.

RATIONS.

The component parts of the ration as now fixed by law should be changed or made more elastic to meet the new conditions of service in the tropics; and articles required by convalescing patients, suffering from fever and disturbances of the alimentary tract, should be added to some branch of supply.

MILITARY COLLEGES.

If the permanent force is to be increased, it is recommended that the annual selection of a few of the most efficient military students for appointment to the Army under suitable regulations be made a settled policy; and that college organizations seeking active service be given a chance to join the forces in future calls for volunteers. It would give increased impetus to the study of military science and tactics at these institutions and establish closer relations between these organizations and the Government.

INSPECTOR-GENERAL'S DEPARTMENT.

In the recent mobilization and concentration of the Regular and Volunteer armies, the great lack of capable and well-organized inspectors-general was severely felt, particularly during the earlier stages, when the inexperienced troops were suffering for want of such attention as only an inspector, unhampered by other duties and working under central supervision and with the conscious support of the highest authority, can give. It is recommended that the law be amended so as to authorize an assistant inspector-general for each brigade, and one with the rank of colonel for the corps or higher commands; and that all should undergo a preliminary examination to demonstrate their suitability and efficiency. At present the smallest part of an army corps entitled to an inspector is the division, and that has been found too large for one inspector to look after thoroughly and do all that ought to be allotted to officers of this Department in the field.

It is also urgently recommended that the clerical force of the Inspector-General's Office and Corps be increased to meet the increased demands upon it adequately and efficiently.

Very respectfully,

J. C. BRECKINRIDGE,
Inspector-General.

The SECRETARY OF WAR.

The following extracts are from the report of Major-General Breckinridge, who went with Major-General Shafter's command, by order of the Major-General Commanding the Army, to observe the movements of troops in Cuba, June 5 to July 25, 1898:

ON BOARD TRANSPORT HUDSON,

En route from Santiago de Cuba to the United States, July 25, 1898.

SIR: The energy with which every element was driven from first to last will be sufficiently understood when such men as General Shafter and Colonels Humphrey and Weston had the task in hand. The liberality with which every necessary

article was purchased that could be found in the market goes without saying. But the means for expediting the landing of stores seemed inadequate, even to the last, and it is understood that lighter after lighter, ordered to the Cuban coast, was sunk at sea; and the lack of quick communication between the vessels or of any launches was apparently irremediable. The extent to which the transports suffered in their ground tackles, capstans, small boats, and other paraphernalia, and the dread their masters had of even greater loss on such a surf-beaten, rock-bound shore, was constantly shown, and the Navy appeared to leave the Army at last much to its own devices.

It was natural to suppose that there might well be heavy loss in such an adventure at at least three points, to wit: The landing place, at some intermediate fortified position, like San Juan, and in the final assault or contest; but all the loss in battle was concentrated practically in the single battle of the 1st and 2d of July. The several organizations appear content with how they played their own part and with their immediate commanders, and look upon the demands made upon them as at least up to the usual powers of man and worthily met.

Great security was given to the enemy by the blockhouses, wire entanglements, etc., created during the long course of defensive construction for the purpose of dominating the country from the insurgents; and it is remarkable that such ubiquitous defenses were not more frequently defended. Special interest was given to this battle, where our men for the first time faced smokeless powder in rapid-fire Mauser guns, handled by men in invisible rifle pits, to whom every ford and road were absolutely familiar objects. To most of our enlisted men, all of whom were regulars but three regiments—the First Volunteer Cavalry, Second Massachusetts, and Seventy-first New York—this was the first battle against a civilized foe. In peace our Army is administered rather by posts and departments, and our staff officers are diligent at their desks, especially in the bureaus. Now the regiments and brigades were recognized in campaign, where nearly every officer is performing unwonted duties, even among the regulars, so there are some of the usual indications of unfamiliar occupations.

On the 28th the reenforcements land and go into camp near Siboney. On the 29th General Shafter came ashore with his staff, moved out to the front, and there established his headquarters beside General Lawton's. General Ludlow had assumed command of his brigade and reconnoitered the commanding ground on the left of the road well beyond El Poso.

We were told when we entered upon this campaign that it was necessary above all things to sleep off the ground, and hammocks were recommended to secure this end. Some were seen in the original bales on the transports, and it is doubtful whether the soldiers could have carried hammocks in addition to what they already have to carry. Even such heavy intrenching tools as were on hand were felt to be a burden.

Perhaps it is possible to make a hammock that will at once furnish shelter and keep the soldier from the ground, which would have a material effect in preserving the health of the soldier during the rainy season in this climate. That there should be any suffering or ill health along the firing line for lack of food, clothing, modern arms, or other supplies may appear either temporarily necessary or hardly credited, according to the point of view; especially during the days it seemed no tents and

but little eating, and no animals were possible, on the advance or fighting line. The need of witnesses from every corps and bureau of the Army may not have been appreciated, if, indeed, any were needed. What the Army cheerfully endured and accomplished with its valor deserves the clearest appreciation, and has, doubtless, received it; and protection against unnecessary deprivations is, of course, always assured.

Some men, notably among the volunteers, started out carrying overcoats. These were left on the transports or quickly abandoned. In some cases even blankets, blouses, and underclothing were thrown away. Knapsacks were strewn along the roadsides. And yet it is almost as difficult in this climate to keep warm at night as it is to keep cool in the daytime, as there is hardly a night when a covering is not needed in addition to the usual clothing worn, and never a day when the usual clothing is not uncomfortably warm. What became of personal property wherever left will possibly prove a problem to some to solve.

A serious question that seems ever to return for sufficient consideration is, What shall be done with the soldier's heavy pack when he goes into action? Shall he carry it with him, weighing him down in the charge and pursuit, or shall he throw it aside, never to see it again, perhaps? In the battles of July 1 and 2 it became, in most cases, a physical necessity to throw the pack aside. In some cases regiments deposited their packs by the roadside and marched some miles after the battle to recover them again. In others, packs were thrown haphazard into the bushes, and in many cases were never recovered by their proper owners. Apparently the Cubans and sick found some comfort from the owner's loss.

It has certainly been clearly demonstrated in this war that smokeless powder is an absolute necessity for both small arms and field guns. Often we fought for hours against an invisible enemy who was firing fatally upon us all the time. The volunteers, as soon as the Springfields were fired, at once revealed their position and drew the fire of the enemy, besides hiding the enemy from their view. They found it difficult to contend with an invisible enemy pouring in an effective fire from a position impossible to determine.

General Shafter seemed to perform six men's work, and the organizations displayed a coherence and power that won universal admiration and made every call upon the forces fully met, from squad and company leader up, under circumstances illustrated by the successive loss of four brigade commanders within a half hour.

If any recognition is to be fairly given to the staff work of such a famous military expedition, attention is perhaps doubly due the supreme labors of Col. C. F. Humphrey and Col. J. F. Weston, who did more work and endured more than many men are capable of, and they are working at a financial loss, since their commutation of quarters is stopped. And Lieut. Col. G. McC. Derby, of the Engineers, and some of the medical officers have labored in their line with unending energy and under difficulties and dangers rivaling past records of their corps. What man could do these men have done.

Always throughout his career good judges seem to have recognized that in every exigency of campaign and battle Lawton was capable of adequately performing more than was ever assigned to him, though some of the severest military tasks and duties

have been performed by him. This judgment still stands well established, though the command of a division of regulars and the front and swinging right wing of an invading and assaulting army have been intrusted confidently to his command. The reserve force and quiet self-control with which every step in action was conducted equaled his proverbial energy, endurance, courage, and tenacity. And it is believed his immediate commander (General Shafter), whose force and energy are also phenomenal, appreciates the soldierly qualities of his loyal subordinate fully, as on his recommendation promotion has been given for conduct on the field of battle; but as an eyewitness this testimony to well-proven military merit may be also permitted to the Inspector-General of the Army.

Of course his immediate superiors, both in advance of and since the Santiago expedition, have carefully determined the military and personal qualities of the commanding officer of this expedition; but if permitted me, it seems due that I shall bear willing testimony to the remarkable energy, decision, and self-reliance which characterized General Shafter's course during this distinguished military adventure throughout its arduous course to its most honorable conclusion. At every stage of this proceeding General Shafter was the dominant spirit at the scene of action. Oppressed by sickness and overweighted with responsibilities and care, he carried the fate of his army to a successful and glorious issue. And any precedent is rare where amidst such natural obstacles, and dangers, and limited means, and opposing defenses, a more numerous, well-disciplined, and gallant force capitulated to invaders who had upon their fighting line a smaller force than that surrendered. The glory of this belongs to General Shafter and his army and the Administration sustaining it. And whatever influence was felt from this army toward the driving out and destruction of the Spanish fleet may also go to its credit.

Very respectfully,

J. C. BRECKINRIDGE,

Major-General of Volunteers and Inspector-General U. S. A.

The question of payment for damages to farms and other property by movement of troops will be the subject of a communication to Congress during the ensuing session. .

JUDGE-ADVOCATE-GENERAL'S DEPARTMENT.

WAR DEPARTMENT, OFFICE JUDGE-ADVOCATE-GENERAL,

Washington, October 3, 1898.

SIR: I have the honor to submit the following summary of my annual report for the twelve months ending August 31, 1898:

The number of trials by general court-martial in the Regular Army was 1,245, which is 139 less than last year. The number of trials by general court-martial in the Volunteer Army up to August 31, 1898, inclusive, was 635. The number of convictions of desertion in the Regular Army was 176, which is 68 less than last year; and the number in the Volunteer Army was 18.

These figures are only approximately correct, as not all the records of the trials promulgated prior to September 1, 1898, have been received, owing to the fact that the Army is widely scattered.

At the last session of Congress an act was passed making the summary court the regular permanent inferior court-martial, both in time of peace and of war; and there has also been issued a new Executive order fixing the limits of punishment. These two measures have been adopted in order to remove defects in the system of administration of military justice which the experience of the Army had pointed out; and the system is now on a good footing, with one exception. This exception is the lack of power on the part of courts-martial to compel civilian witnesses to testify. There have heretofore been failures of justice on this account, and during the present year a general court-martial sitting in an important case has been shut off from material evidence by the refusal of civilian witnesses to answer legal questions. It is to be hoped that Congress will afford some relief—if not by giving general courts-martial the power to punish for contempt, at least in such other form as may be deemed best.

The number of officers in the Judge-Advocate-General's Department has been insufficient to meet the demands made upon it, even with the small army we have had. With an army enlarged as it seems likely that ours will be, the increase of the Judge-Advocate-General's Department will be necessary. It now consists of only eight officers. With an army of 100,000 men, or even 75,000 men, double that number would be required.

Very respectfully,

G. N. LIEBER,
Judge-Advocate-General.

The SECRETARY OF WAR.

The Judge-Advocate-General points out the fact that there have been failures of justice by reason of the lack of power on the part of courts-martial to compel civilian witnesses to testify. It is hoped that the necessary legislation may be enacted to afford relief in this respect.

There is now need of an increase in the corps of judge-advocates, and this need will be the greater if the Regular Army is increased.

The amount of the reward for the apprehension of deserters was formerly left to the discretion of the Secretary of War. For many years \$30 was the amount designated; this not being considered sufficient, it was increased to \$60. In 1894 Congress prescribed that the amount should be \$10. This amount is entirely insufficient, and the Judge-Advocate-General reports that, in the opinion of many who are in the best position to judge, it encourages desertion. A return to the former system, whereby the amount of the reward was regulated by the Secretary of War, was urged in the last annual report, and the necessary legislation is again recommended.

QUARTERMASTER'S DEPARTMENT.

WAR DEPARTMENT,
QUARTERMASTER-GENERAL'S OFFICE,
Washington, October 31, 1898.

SIR: In accordance with your request of the 18th instant, I have the honor to submit below a summary of my annual report for the fiscal year ended June 30, 1898, which also covers all important transactions of this Department down to the close of hostilities with Spain, August 12, 1898:

There was appropriated for the regular service of the Quartermaster's Department for the fiscal year ended June 30, 1898, the sum of \$7,711,367.75, of which the sum of \$340,154.71 remained undrawn at the close of the fiscal year.

There was also appropriated for this Department by act approved May 4, 1898, for deficiencies, available until January 1, 1899, the sum of \$19,550,000, and by act approved July 7, 1898, a further sum of \$103,200,000, making a total of \$130,461,367.75 provided by Congress for the purposes of this Department.

With all the perplexing difficulties confronting the Department in the matter of clothing and equipage supplies, it is remarked that in the short period of three and one-half months an army of 275,000 men was equipped with such supplies, and it is further remarked that the army in Cuba, consisting of nearly 16,000 men, leaving their tentage behind, arrived at their camp at Montauk Point, New York, and found a complete new outfit of tents and clothing ready there for them.

The issues to the militia of the several States and Territories during the fiscal year amounted to \$189,870.72.

For the maintenance of the Indian prisoners of war, held captive at Fort Sill, Okla. Territory, the sum of \$8,234 was expended.

From April 1, to August 31, which covers the period of hostilities, this Department purchased 36,800 horses and mules, at an aggregate cost of \$3,871,690.08; 5,179 wagons of all kinds, at a cost of \$478,111.10; and 28,012 sets of harness, at a cost of \$358,449.18.

During the war period there was also purchased 5,130 field ranges, at a cost of \$106,742, and 5,434 field desks, at a cost of \$38,471.80.

Eighty-three thousand and seventy-eight tons of coal were contracted for, for use of transport vessels.

TRANSPORTATION BY RAIL AND WATER.

During the fiscal year ended June 30, 1898, transportation was furnished for 709,617 persons, 60,632 animals, and 1,529,585 tons of materials.

From April 1, 1898, to the breaking up of Camp Wikoff, the aggregate movements of troops by rail amounted to 17,863 officers and 435,569 men.

The total movement of troops by transport ships up to September 15, 1898, amounted to 92,836, as follows:

	Men.
To Cuba.....	28, 195
To Porto Rico	17, 460
To Manila	16, 405
To Honolulu.....	629

	Men.
Returned from Cuba	21, 686
Returned from Porto Rico.....	5, 541
Civilian employees transported	2, 920
Total	92, 836

The orders for the movement of the regular troops to Chickamanga, New Orleans, Mobile, and Tampa were sent out by the Adjutant-General of the Army about the middle of April, 1898.

The troops were put in motion as fast as arrangements with the railroad companies could be perfected, and were rapidly assembled at the points designated by the War Department. These troops were moved with the most satisfactory dispatch and an entire absence of accident.

On May 13 the Adjutant-General sent to the Quartermaster-General the first orders for the movement of volunteers—a separate order for each organization—designating the point of destination. The volunteer troops have gone to destinations with promptness and remarkable freedom from accident or delay en route.

Low rates were secured by the Quartermaster's Department in making these movements, generally not exceeding 1½ cents per mile for passengers, and in many cases much less, and about one-half the prevailing tariff rates for freight in excess of 150 pounds per man carried free.

A special outfit was provided, under orders of the Secretary of War, to be used by the Surgeon-General as a hospital train. This train was made up of 10 tourist sleepers, 2 kitchen and dining cars, and a combined passenger and baggage car. It was furnished by the Medical Department, placed in charge of its trained nurses, and kept exclusively for the purpose of carrying sick and wounded to points designated by the proper medical officers.

The sum of \$90,757.34 was expended during the fiscal year to maintain, including repairs, the eleven vessels owned by this Department, which is exclusive of the transports chartered and purchased for the prosecution of the war with Spain.

From the declaration of war to June 30, 1898, this Department chartered for service on the Atlantic and Gulf waters 43 vessels, with a total tonnage of 104,201 and a carrying capacity of 1,287 officers, 22,335 men, with their arms, ammunition, equipment, medical and subsistence supplies, and 6,746 animals. There was also chartered 4 water boats, with a total capacity of 820,000 gallons; 3 lighters, 2 tugs, and 1 barge; also 2 barges purchased.

In addition to the above there were chartered for the Signal Service of the Army the steamship *Adria*, used as a cable boat; the steamship *Fanita* for the Secret Service, and the steamer *Gretchen* for inspection purposes.

The operations of the navy in the harbor at Manila required that provision be made for the transportation of troops and supplies to the Philippines.

Fourteen ships were chartered to June 30, 1898, on the Pacific coast, having a total tonnage of 41,152 and carrying capacity of 629 officers and 13,059 men with their complete outfit of camp and garrison equipage, arms, ammunition, medical and subsistence stores for a voyage of over 7,000 miles.

The combined fleets on the Atlantic and Pacific coasts at the close of the fiscal year consisted of 69 vessels of various classes, with a total tonnage of 145,353 tons and carrying capacity of over 37,000 men.

To convert the vessels composing these fleets from their ordinary uses as freight vessels into safe and commodious transport ships required considerable alteration. Sleeping accommodations for the men and stalls for the animals had to be constructed, largely increased water capacity had to be provided by the construction of extra tanks and the supply of barrels and casks, and provision made for pure-air ventilation. For this last-mentioned purpose many of the vessels were supplied with electric plants for running fans and for lighting the ship. Special care was given to the fitting out of the transports on the Pacific coast so as to provide for the long voyage to Manila.

The total expenditures for fitting up these vessels (as far as reported) to June 30, 1898, amounted to \$186,632.68, which includes the sum of \$7,694.30 for fitting up the steamship *City of Peking*, which was chartered by the Navy Department and turned over to the War Department for transportation of the Army.

The total sum paid for the services of vessels under charter to June 30, 1898, was as follows:

On Atlantic coast and Gulf waters.....	\$1, 007, 952. 50
On Pacific coast.....	319, 764. 17
	<hr/>
Total	1, 327, 716. 67

To provide for the transportation of the sick and wounded, this Department purchased from the Maine Steamship Company the steamship *John Englis* for the sum of \$450,000. This ship was fitted up at considerable expense as a hospital ship, and every appliance provided for the care, comfort, and treatment of the sick and wounded. The expenditure for refitting amounted to \$136,851.11. This hospital ship was renamed *Relief*, and is under the control of the Medical Department of the Army.

Since the close of the fiscal year the steamship *Missouri*, used by the Medical Department of the Army as a hospital transport, has been fitted up for that purpose by the Quartermaster's Department at an expenditure of \$85,854.

Since the 1st of July, 1898, there have been chartered four vessels for service on the Atlantic coast and the same number on the Pacific coast.

There were also purchased for the service of the Army on the Pacific Ocean two large, commodious steamships, the *Scandia* and *Arizona*, which have been fitted up, the former as a hospital ship and the latter for the transportation of troops and supplies to the newly acquired islands of the Pacific Ocean.

The Secretary of War directed the purchase of 14 large steamships to be fitted up to meet the needs of the Army for the safe and comfortable transportation of men and animals and the transportation of army supplies. These 14 steamships have a total tonnage of 61,298 tons and carrying capacity of 12,700 men and 6,750 animals. To fit these vessels up comfortably to meet the urgent demands of the Army required an expenditure of \$178,018.37. It is the intention to carefully overhaul all of these vessels and refit them for the army transport service.

The aggregate cost of the 16 steamships purchased by the Government, which includes the *Scandia* and *Arizona*, heretofore mentioned, was \$6,231,000. Total cost of tugs, barges, and lighters amounted to \$245,300.

The fleet of transport ships which was concentrated at Port Tampa, Fla., in June last, for the transportation of the army of General Shafter to Cuba, consisting of 38 vessels, including 2 water boats, 3 steam lighters, 1 collier, and 1 tug, had been fitted out for a voyage to the vicinity of Havana, distant about 400 miles. The vessels carried with them 153 small boats, having a carrying capacity of 2,500 men. The fleet also had two decked barges which were provided by the Engineer Department. One of the steam lighters, the tug, and one decked barge failed to reach Cuba.

Upon embarkation of the troops it was found that the vessels would not safely and comfortably carry more than 16,000 men, with their 2,295 animals, equipments, ammunition, subsistence, and medical supplies, on a voyage of 1,000 miles.

This entire fleet arrived without serious mishap at Daiquiri. Upon disembarkation of the army difficulty was encountered by reason of the lack of sufficient means for lightering the transports which could not approach the small dock at Daiquiri, and this office was advised of the needs of the command. Active efforts were immediately made by this office to supply the needed lighterage. Two decked barges in tow of the U. S. S. *Fern* were dispatched at once from Key West, Fla., which arrived safely, but were wrecked the day after their arrival. A seagoing tug, the *Nimrod*, chartered in Mobile, with three barges in tow—the *Ora*, *Ben*, and *Touart*—the former chartered, the last two purchased, by the Department, was dispatched, with orders to proceed direct to Santiago, and the chartered seagoing tug *Underwriter*, with two decked barges belonging to the Engineer Department of the Army, was dispatched to Santiago from New Orleans. These tugs lost all their barges and only one of the tugs succeeded in reaching Cuba. Under instructions from this office the steam-lighter *Bessie* was dispatched from Tampa to Santiago, but, her boilers springing a leak, she returned to Tampa for repairs.

These unsuccessful efforts to relieve the situation of the army in Cuba led the Department to enter into contract with the firm of D. Van Aken & Co., of New York City, to fit out an expedition, with a large force of mechanics of various trades, and laborers, with machinery, such as pile drivers, implements for construction of docks and railways, with the necessary materials, iron and lumber, for building docks, lighters, repairing railroads and engines. The company was furnished the steamship *Panama*, and two fine ocean tugs, the *Gladiolen*, which was chartered, and the *Gypsum King*, which was purchased. This outfit proceeded to Santiago and thence to Ponce, Porto Rico, where their services have been of great value in the operation of the army in that harbor.

Upon the cessation of hostilities in Cuba it became necessary, on account of sickness prevailing among the troops, to return General Shafter's army. The sick and wounded who were able to make the voyage were first considered in the matter of return, and these were brought to this country and placed in hospitals in the various coast cities. Montauk Point, Long Island, having been selected as a reception camp for the returning army, preparations were made for the safe and speedy landing of the troops as they arrived and for the supplies required by them. For this

purpose there were chartered eight small vessels and two flatboats, besides the steamer *Shinnecock*, 1,205 tons burden, which was employed to afford easy and comfortable transportation for the sick troops to other points where they might be sent for treatment.

The movement of troops to Porto Rico consisted of about 16,000 men, 3,367 animals, with their artillery, equipments, and supplies, and a large quantity of ammunition and army wagons. Of these troops 5,581 men, with 256 convalescents, have been returned to the United States.

Seventeen large steamships and one large sailing vessel were chartered by this Department for the transportation of troops and supplies to the Philippine Islands, besides the two steamships purchased for this service. Transportation was furnished from San Francisco to Manila for 16,405 persons, with their equipments and supplies.

Upon the acquisition of the Hawaiian Islands, the First Regiment New York Volunteer Infantry was ordered to Honolulu for garrison duty. A contract was made for the transportation, at a per capita rate, of three companies of that regiment by a merchant vessel, 11 officers and 313 men, who sailed from San Francisco on August 18. The remainder of the regiment, 10 officers and 293 men, sailed for Honolulu on August 27 on the steamship *Scandia*, a vessel owned by the Quartermaster's Department, showing a total of 629 persons transported to Honolulu.

TRANSPORTATION OF SPANISH PRISONERS OF WAR.

Under the terms of capitulation for the surrender of Santiago de Cuba to the American army, it was agreed that transportation should be furnished by the United States Government for the Spanish prisoners of war to Spain, and to provide subsistence for them while en route. The proposal submitted by an American citizen on behalf of the Spanish Trans-Atlantic Company was accepted. The rates to be paid under the terms of the contract were for commissioned officers \$55 per capita and for enlisted men \$20 per capita, the men to be delivered on the ships by the United States.

The only other bid from responsible parties, and who represented steamship companies having facilities to carry out the contract, was the combined bid of the Anchor Line, Cunard Steamship Company (Limited), Hamburg-American Packet Company, Robert M. Sloman & Co., Frederick Leyland & Co. (Limited), North German Lloyd Steamship Company, Royal Mail Steam Packet Company, Thomas Wilson Sons & Co. (Limited), and Wilson & Furness Leyland Line (Limited), which bid was for officers \$110 and enlisted men \$55 per capita, steamers to be dispatched from Santiago de Cuba within forty-eight hours of their reported arrival, or demurrage to be paid at the rate of 60 cents per capita per day, passenger capacity; if passengers are on board during such delay, 40 cents additional per capita per day. Same demurrage rates to be paid if steamer be detained at place of debarkation by quarantine or other cause. Will endeavor to have vessels at Santiago de Cuba between July 30 and August 10, 1898, but desire, if necessary, an extension of time to include the entire month of August.

As will be observed, this bid had demurrage conditions which would have amounted to a large sum in addition to the per capita, amounting for the actual number trans-

ported to \$1,312,915, whereas the contract entered into had no demurrage conditions and the actual sum paid was \$513,860.

The Government decided to include in the transportation the wives and children of the officers, and the priests and sisters of charity who had been in service in the hospitals and with the Spanish army.

The embarkation began on August 9, 1898, and was completed on September 17, 1898, and 22,864 persons were embarked.

The cost for this service, as above stated, amounted to \$513,860.

WEEKLY STEAMSHIP LINE.

The permanent occupation of the islands of Cuba and Porto Rico by the army has rendered necessary the transportation of large quantities of army supplies to those islands, and also the mails for the troops. It was, therefore, determined to establish a regular weekly line of steamships to sail from New York to points in Porto Rico and Cuba and return to New York. This line was opened Wednesday, August 31, 1898, since which time a steamship has sailed from New York every Wednesday for Ponce and Santiago, and return.

TRANSPORTATION OF RELIEF SUPPLIES.

Large quantities of supplies have been transported by the Quartermaster's Department to Cuba for the relief of the people on that island upon the request of the officers of the Red Cross Society, National Relief Association, and other kindred associations and individuals interested in the work of relief of the suffering Cubans.

MILITARY POSTS AND BARRACKS AND QUARTERS.

The sum of \$1,170,000 was appropriated during the last fiscal year for the above-named purposes, which was duly apportioned for the construction, repair, and alteration of public buildings at the various military posts and for rent. Special construction and improvements have been ordered from the appropriations for military posts at Fort Ethan Allen, Vt.; post near Seattle, Wash.; Jefferson Barracks, Mo.; Fort Point, Tex.; Fort Harrison, Mont.; Plum Island, N. Y.; post near Spokane, Wash.; Willets Point, N. Y., etc.

CAMPS FOR THE TROOPS.

During the war camps were established for military purposes at Tampa, Fla.; Mobile, Ala.; Camp George H. Thomas, Ga.; Camp Alger, Va.; Camp Poland, Knoxville, Tenn.; Jacksonville, Fla.; Miami, Fla.; Fernandina, Fla.; Camp Wikoff, N. Y.; Camp Hamilton, near Lexington, Ky.; Camp George G. Meade, Pa.; Camp Wheeler, Huntsville, Ala., and Camp Shipp, Anniston, Ala. All necessary temporary storehouses, hospitals, and other buildings were erected or hired and tents floored. Water facilities were arranged for either by driven wells, pumping plants, or by connecting camps with city water mains. To insure a supply of good water many of the camps were furnished with a number of approved portable filters, and one with boilers for boiling water.

During the latter part of April, 1898, five buildings were rented at Key West, Fla., for a general hospital. An office and storeroom were also rented, and temporary buildings constructed for kitchen, dining room, closets, etc., and a water-

supply system, including distilling plant, installed for the hospital and post at Key West Barracks, Fla., at an approximate cost of \$20,682.25.

Many of the buildings at Fort McPherson, Ga.; Fort Myer, Va.; and Fort Thomas Ky., were used as general hospitals.

On July 3, 1898, instructions were given for the erection of tents and temporary buildings on the Fort Monroe, Va., Reservation for a general hospital to accommodate 500 patients and 100 attendants. The work was completed July 23, 1898, at a cost, exclusive of tents, of \$5,016.12.

On July 20, 1898, the Secretary of War authorized the establishment, near Fort Monroe, Va., of a pavilion hospital of 1,000 beds. A tract of land on the line of an electric railway, about 2 miles from the post, was leased at \$500 per annum, and on this site the buildings and improvements are in course of completion, the cost to September 30, 1898, being reported as \$90,276.

The sum of \$20,000 was authorized for a distilling plant at the Philippine Islands, including machinery for taking water from a tower to a higher level and providing larger camps with water from one or more sources of supply.

GRAVES AT SANTIAGO.

In accordance with the orders of the President, the chief quartermaster at Santiago, Cuba, on August 10, 1898, was instructed by cablegram to take immediate steps to erect temporary markers and prevent effacement of any markers erected at soldiers' graves at Santiago. A capable and reliable employee of this department was sent to Santiago, Cuba, by this office, with directions to report to Maj. Gen. H. W. Lawton, commanding that department, for the specific duty of erecting suitable markers at the graves of our soldiers at Santiago and vicinity. He was especially instructed to ascertain the exact location of our dead, securing, if possible, the names, ranks, companies, regiments, and dates of death of all soldiers buried there, also names and dates of death of employees and other American citizens who had been interred there since the Army landed in Cuba, making a complete record thereof, and take prompt measures for the erection of wooden markers at said graves until permanent ones could be supplied. He was further directed to make such examination of this subject as to be able to report and identify the burial places of every United States soldier and American citizen buried at Santiago and vicinity, and at the same time prepare a complete record of every case, showing exact location of each burial site, in order that the identification of the place of burial of all our soldiers and citizens can hereafter be ascertained with accuracy. He reported his arrival at Santiago on August 31, 1898, and upon completion of this important work will submit full and detailed report to this office.

Under the act of Congress approved July 8, 1898, the sum of \$200,000 was appropriated to enable the Secretary of War, in his discretion, to cause to be transported to their homes the remains of officers and soldiers who die at military camps, or who are killed in action, or who die in the field at places outside of the limits of the United States.

No definite plans have yet been formulated by the Department in regard to the removal of the remains to the United States, but the subject is under consideration.

NATIONAL CEMETERIES.

There are 83 national cemeteries and 75 superintendents. The interments in these cemeteries to June 30, 1898, were 337,296. During the fiscal year all the necessary improvements and repairs have been made to all these cemeteries and the grounds kept in good condition.

ORGANIZATION.

Congress, on July 7, 1898, passed an act "to increase the efficiency of the Quartermaster's Department of the Army," which authorized the Secretary of War to make such distribution of the duties and labors of the Quartermaster's Department, as well as the assignment of its officers to important and special lines of duty, as might be deemed for the best interests of the service.

Under the provisions of the above-mentioned law, this Department has been enabled to largely increase its efficiency by a proper distribution of the work, and a more advantageous assignment of its officers.

TAMPA DEPOT.

A résumé of the work done by the quartermaster's department at Tampa, in the short space of four months, is as follows:

Army corps equipped	2
Freight cars handled (loaded or unloaded).....	13, 239
Officers and men transported.....	66, 478
Horses and mules transported	15, 309
Horses and mules received	1 389
Horses and mules issued	9, 919
Wagons "set up".....	604
Teams "broken out" (six mules)	141
Teams "broken out" (four mules).....	520
Pack trains equipped	21
Wagons and ambulances repaired	699
Transports fitted out	33
Transports cleared	78

TAMPA, FLA., AND SANTIAGO.

Col. C. F. Humphrey (now brigadier-general, United States Volunteers), Chief Quartermaster, arrived at Tampa, Fla., May 1, 1898, and the following day, at the request of General Shafter, took charge of the quartermaster's department at that place, so far as pertained to the fitting out of the expedition to Cuba. The same day he was placed in charge of the quartermaster's department at Tampa by telegraphic order from the honorable the Secretary of War. He accompanied the expedition to Santiago and attended to the unloading of the transports at the latter place. His work at both these points was of the most important and laborious character, and was efficiently administered.

DEPOT AT PONCE, PORTO RICO.

Lieut. Col. J. W. Pullman, quartermaster, U. S. A., sailed from Tampa, Fla., on the steamer *Rita* on August 15, 1898, for Ponce, Porto Rico, with a full supply of

quartermaster stores, employees, etc., for the purpose of establishing a quartermaster's depot at that place, from which to issue all necessary supplies required by the troops operating there. He arrived at Ponce on August 22, 1898, and established a temporary depot at that place.

DEPOT AT HONOLULU.

Lient. Col. George Ruhlen, quartermaster, U. S. Volunteers (captain and assistant quartermaster, U. S. A.), is the officer of this department who has been assigned to duty as depot quartermaster at Honolulu, where he arrived on August 28, 1898, and established a quartermaster's depot there from which all the United States troops stationed at that point can be promptly supplied with all quartermaster supplies.

MANILA, PHILIPPINE ISLANDS.

Lient. Col. J. W. Pope, chief quartermaster, U. S. Volunteers (major and quartermaster, U. S. A.), is the chief quartermaster at this station.

Owing to the length of time required for mail communication no detailed report of operations of the Quartermaster's Department in the Philippine Islands has as yet been received.

OCCUPATION OF CUBA BY UNITED STATES FORCES.

Officers of this Department have been ordered to duty at Havana, Matanzas, Nuevitas, Gibara, Cienfuegos, and Manzanillo, Cuba, with a view to making every preparation possible for the United States troops previous to their arrival at the places named.

CONCLUSION.

In concluding this report I desire to state that this office, during the war, has constantly kept in view the fact that the all-important duty devolving upon this Department was to provide for and promptly furnish the Army with all needful quartermaster supplies. For months the most energetic efforts have been made to the accomplishment of this purpose. Practically everything needed for the largely increased Army had to be purchased or manufactured and then transported to the numerous camps.

I feel deeply indebted to the officers of this Department for their valuable assistance in the accomplishment of the heavy task placed upon this branch of the public service. They deserve the highest credit for service efficiently performed.

I also gladly bear testimony to the zeal, fidelity, and intelligence with which many of the volunteer officers of this Department have performed the important duties committed to them.

It is not only a matter of duty on my part, but also one of great pleasure, to here record my sincere appreciation of the able and efficient service of the officers associated with me in this office. They justly deserve the highest possible commendation for their intelligent and loyal discharge of the responsible and laborious duties imposed upon them. Day and night have they been at their posts of duty rendering invaluable assistance, and only with their constant and untiring helpfulness has this office been able to promptly dispose of the immense volume of work coming daily to this office for consideration and action.

EMPLOYEES.

I do not forget the clerks and other employees serving in this office and throughout the Department at large. Without their assistance the work of this Department could not have been accomplished during the war emergency. Many of the permanent and experienced employees rendered most invaluable and efficient service, some often working twelve and fifteen hours a day, including Sundays and holidays. In a number of cases, by reason of their efficiency and experience, employees at department headquarters were required to leave their homes and families to go to the field, and thereby were put to considerable expense without receiving additional compensation. These employees devoted all their energies to the interest of the public service. I strongly recommend that some action be taken by Congress to recompense all regular employees of this Department who performed this extraordinary service at a time when such service was of the greatest importance to the Government. A 20 per cent increase of their pay for one year would not be more than they justly deserve.

MEMORIAL BRIDGE.

I renew the recommendations of my predecessor that an appropriation be made by Congress for the construction of a bridge over the Potomac River between the Naval Observatory grounds and the Arlington Reservation, which will furnish a short and direct route to the cemetery and park, and afford rapid communication between the Capitol and the large military post of Fort Myer, Va. This is an important matter, and it is hoped it may receive the consideration of Congress at its coming session.

ESTIMATES.

The estimates for the ensuing fiscal year differ from the appropriations for the current fiscal year as follows:

	Increase.
Regular supplies.....	\$12, 200, 000
Incidental expenses.....	3, 300, 000
Horses for cavalry and artillery.....	715, 000
Barracks and quarters	1, 750, 000
Army transportation	27, 513, 875
Clothing and equipage.....	13, 769, 431

Because of the fact that the estimate is made for 160,000 men instead of 25,000.

	Increase.
Construction and repair of hospitals	\$60, 000
Quarters for hospital stewards	13, 000

Because of increased accommodations required and urgent repairs shown to be necessary in the estimate submitted by the Surgeon-General of the Army.

	Increase.
Repairing roads to national cemeteries	\$7, 000

Because of much-needed repairs which in the past it has been impossible to make because of insufficiency of appropriations provided.

	Increase.
Military posts	\$380, 000

Because of the necessity for the construction of barracks and quarters in connection with the modern seacoast armaments involving the establishment on the coast of new military posts, and the enlargement of others.

Respectfully,

M. I. LUDINGTON,
Quartermaster-General, U. S. A.

The SECRETARY OF WAR.

WAR DEPARTMENT,
QUARTERMASTER-GENERAL'S OFFICE,
Washington, November 25, 1898.

The amount of transportation that went with General Shafter's command, which embarked on June 14, from Tampa to Santiago, according to report of General Humphrey, is as follows:

Draft mules.....	946
Pack mules.....	390
Government horses.....	578
Private horses.....	381
<hr/>	
Total animals.....	2,295
Army wagons.....	114
Escort wagons.....	81
Red Cross ambulances.....	7
<hr/>	
Total vehicles.....	202

The amount of transportation sent to Santiago from June 14 to August 24, as far as can be shown from the records of this office, is as follows:

Draft mules.....	877
Pack mules.....	130
<hr/>	
Total animals.....	1,007
<hr/>	
Army wagons.....	71
Escort wagons.....	41
Ambulances.....	35
Signal Corps wagons.....	2
Field telegraph wagon.....	1
Wire wagons.....	2
Telephone wagon.....	1
Tool wagons.....	2
<hr/>	
Total vehicles.....	155

M. I. LUDINGTON,
Quartermaster-General, U. S. A.

When war was declared the Department was amply provided with all necessary clothing and equipage supplies for the then existing small army of 25,000 men, but had no equipments for the volunteer soldiers, and no transportation for so large an army, such as horses, mules, wagons, ambulances, harness, etc.; neither had it a single transport ship.

The Department has purchased 36,800 horses and mules, 5,179 wagons, 559 ambulances, 28,012 sets of harness, and 83,078 tons of coal for vessels—chartered 77 vessels for the Atlantic, Gulf, and Pacific coasts, and purchased 16 steamships, which are now the property of the United States, in excellent condition. Mr. B. N. Baker, of Baltimore, Md., generously tendered the use of the steamship *Missouri* to the United States, with the services of her captain and crew. She has been fitted

out as a hospital ship, and is a most excellent and valuable one. The hospital ship *Relief* was also of great service.

The small hospital ship *Bay State* has recently been purchased from the Massachusetts Relief Association. She cost that association \$175,000. The amount paid by the Government was \$100,000. She is fitted out in first-class order and can be used in the shallow waters around the islands. The vessel ran between Porto Rico, Santiago, and Boston during the war, conveying the sick soldiers of Massachusetts regiments.

The cost of transporting the Spanish prisoners to Spain amounted to \$513,860.

A weekly steamship line has been established by the Department, sailing every Wednesday from New York for Ponce, Santiago, and return.

The graves of our soldiers in Santiago and vicinity and in Porto Rico and the Philippines are being carefully marked and a complete record is being made. So soon as plans now under consideration are completed, the remains of these officers and soldiers will be brought to the United States and transported to their former homes under the act of Congress approved July 8, 1898, which appropriated \$200,000 for the purpose.

MILITARY POSTS.

The new site tendered by the citizens of Bismarck, N. Dak., for the proposed military post at or near that city has been accepted, and the deeds and title papers for the lands have been transmitted to the Attorney-General, with request for his opinion as to the sufficiency of the papers to vest in the United States a valid title to the premises in question. If in his opinion the title is good, action will be taken at once to begin the construction of the post under the appropriation made therefor by the sundry civil appropriation act approved July 1, 1898 (30 Stats., 629).

Upon the recommendation of this Department certain public lands, situated near Sheridan, Sheridan County, Wyo., have been reserved by Executive order for the purpose of a military reservation, it being the intention of the Department to ask an appropriation by Congress to establish there a military post.

In March, 1898, an order was issued for the abandonment of Whipple Barracks, Ariz., but upon further consideration it was decided to withhold the order, since which time a detachment of troops has been kept at the post guarding public property. The necessity for the continu-

ance of Whipple Barracks as a military post is, in the opinion of the Department, imperative, and it is recommended that an appropriation of \$75,000 be made for the reconstruction of the buildings and other appurtenances at the post, which are very much needed.

SUBSISTENCE DEPARTMENT.

WAR DEPARTMENT,
OFFICE COMMISSARY-GENERAL OF SUBSISTENCE,
Washington, October 17, 1898.

SIR: I have the honor to submit the following summary of my annual report:

The settled practice of the Department has heretofore been to limit the scope of its annual reports to the transactions of the fiscal years ending on June 30; but owing to the importance of transactions which were begun prior to that date in 1898, and which have been continued in unbroken sequence to the present date, the limit of June 30 has in some instances been exceeded in the present report, in order that a connected view of a portion of the incidents of the war with Spain may be given.

The personnel of the Department on April 1, 1898, consisted of 22 officers. Appropriation for the subsistence of the Regular Army of 25,000 men had been made for the fiscal year ending June 30, 1898, amounting to \$1,650,000. Of this sum \$314,314 remained undrawn from the Treasury on April 1. The acts passed by Congress on the breaking out of hostilities with Spain placed, successively, the sums of \$2,739,643.50, \$5,000,000, and \$15,367,112.28, or a total of \$23,106,755.78, at the disposal of the Department.

In anticipation of the breaking out of the war, all chief and purchasing commissaries had been advised to make preparation for meeting the demands that would be made upon them as soon as war was declared. Upon the calling out of volunteers and the stationing of troops upon the southern coast, officers of the regular establishment of the Subsistence Department were sent to locate subsistence depots of supply near each considerable body of troops, from which all food of the soldiers was drawn. Upon the establishment of great camps of concentration the same system of locating subsistence depots in close relation to them was followed. By this system the food supply of the men was always accessible to those officers of the combatant forces whose special duty it was to draw and distribute the allowances due to the men.

The acts of April 22, 1898, and July 7, 1898, for temporarily increasing the military establishment, and for increasing the efficiency of the Subsistence Department, added about 120 commissaries of subsistence of volunteers to the Department. As fast as these officers accepted their commissions and qualified by filing their official bonds, they were assigned to duty.

The first objective point of the war was the invasion of Cuba. An army of 16,000 men was dispatched from Tampa, Fla., on June 14, 1898 (within fifty-six days after war had been declared), and subsistence supplies for the entire force for a period of one hundred and twenty days accompanied the expedition. Eight days later reinforcements to the number of 6,400 men were sent, and they were followed imme-

diately by subsistence supplies for the reenforcements to last a period of seventy-six days. Before the end of the month a large cargo of provisions was sent to Cuba with the provisional brigade of the Second Army Corps. These shipments were followed in July, 1898, by other shipments of food supplies, including refrigerated fresh beef sufficient for the supply of the whole command. The supplies of subsistence stores shipped to Cuba were at all times ample for all purposes—our army, Spanish prisoners, and starving Cubans. The returns showing the issues made to the army, the Cuban army, the destitute and prisoners of war in Cuba have not yet been received.

In order to enable surgeons in charge of hospitals to procure needful food for the sick under their charge, General Order No. 116 was issued August 10, 1898, which authorized them to expend from the appropriation, "Subsistence of the Army," the sum of 60 cents per man per day for the period each man was undergoing treatment, and ample provision was made for furloughing convalescents and paying them commutations of rations while traveling to and from their homes.

The provisioning of the troops ordered to Montauk Point was accomplished without difficulty outside of the confusion incident to the occupation of a large camp by a large body of men within a short period of time. There appearing to be a necessity for supplying a portion of the troops assembled thereat, who were not in hospital or who were recuperating after discharge from hospital, with varieties of food differing from the articles of the ration, the Secretary of War ordered the purchase and distribution of large quantities of food of this character, the purchases being made from the appropriation for "Subsistence of the Army."

Rations were sent with the expedition to Porto Rico in quantities to last the command for a period of one hundred days; to the Hawaiian Islands to last for a period of ninety days, and to the Philippine Islands to last for a period of from four to six months.

Field bake ovens and coffee roasters were furnished to troops in the field by the Subsistence Department, and the permanent transfer to the Subsistence Department of the duty of furnishing them is recommended.

Regimental commissaries should be authorized by law, who should be charged with the receipt and distribution of the food supplies of the regiment.

The experience obtained in the recent war with Spain has demonstrated the necessity of having a larger number of commissary-sergeants in service than are now allowed. They were in demand from all quarters, and their services were invaluable in assisting officers in receiving, caring for, issuing, and accounting for subsistence stores. There should be a commissary-sergeant for each regiment in service, in addition to those now authorized for the various garrisoned posts and places of deposit of subsistence supplies, and legislation authorizing their appointment from the noncommissioned officers of the Regular Army is earnestly recommended.

The system of keeping records prescribed by War Department circular of May 15, 1894, failed to meet expectations during a state of war, and had to be partially abandoned in favor of an improvised method. Great confusion and embarrassment resulted, and the experience is not thought to be limited to the Commissary-General's Bureau alone.

The increase of the number of higher grade clerkships in the Commissary-General's Bureau is recommended, in view of the increase of employees necessitated by

the war and the probable continuance of the Volunteer Army in service for some time to come.

As much clerical work has been done beyond office hours, extra compensation should be paid for the extra work, and it is respectfully recommended that the Secretary of War will give the matter his favorable consideration.

Very respectfully,

CHAS. P. EAGAN,
Commissary-General of Subsistence.

The SECRETARY OF WAR.

Amount of articles of the ration issued at Santiago up to October 1, 1898.

	Pounds.	Rations.	Days.
Bacon	1, 851, 671	2, 468, 684	154

Sugar	383, 572	2, 557, 146	159

Other components of the ration issued proportionately. Issue based on an estimate of 16,000 men.

CHAS. P. EAGAN,
Commissary-General of Subsistence.

The summary of the Commissary-General of Subsistence shows the operations of his department, which was enabled to furnish an ample supply of food for the Army, and also much for the Cuban army and the destitute and prisoners of war in Cuba.

The order issued August 10, 1898, authorized surgeons in charge of hospitals to expend from the appropriation for the subsistence of the Army the sum of 60 cents per man per day for the period each man was undergoing treatment, and ample provision was made for convalescents on furlough.

A personal visit to Montauk Point convinced me that there was need of an issue to the troops just returned from Cuba (many of whom were suffering from the effects of the climate there) of food supplies different from those composing the ration, and accordingly large quantities of suitable food were ordered purchased and distributed to the hospitals, as also to the troops in camp.

Field bake ovens and coffee roasters should be furnished to the troops by the Subsistence Department, as stated by the Commissary-General. These appliances are now provided for in the act making appropriation for the support of the Army, under the heading "Regular supplies, Quartermaster's Department."

The experience of our late war has demonstrated the need of a regimental commissary, and also for a commissary-sergeant for each regiment in service. The recommendation of the Commissary-General in this respect is therefore concurred in.

MEDICAL DEPARTMENT.

WAR DEPARTMENT, SURGEON-GENERAL'S OFFICE,

Washington, D. C., November 10, 1898.

SIR: I have the honor to submit the following as a summary of my report for the year ended June 30, 1898:

THE WORK OF THE MEDICAL DEPARTMENT DURING THE SPANISH WAR.

Medical officers.—The number of medical officers, 192, allowed by law to the Army, is inadequate in time of peace. The insufficiency in time of war was met by the assignment of over 650 contract surgeons under the provision of the act approved May 12, 1898. All volunteer regiments had 3 medical officers appointed by the governors of States. Volunteer surgeons, to fill the staff positions authorized by the act approved April 22, 1898, were appointed by the President: Eight corps surgeons with the rank of lieutenant-colonel, and 110 division and brigade surgeons with the rank of major; 5 of the former and 36 of the latter positions were filled by the appointment of officers of the Army Medical Department. The President also appointed three medical officers for each of the regiments of United States volunteer infantry, cavalry, and engineers. The very small proportion of medical officers having experience of a military character impaired the efficiency of the Department at the outset, but many of the staff surgeons from civil life showed great aptitude for the service and speedily became of value as administrative and sanitary officers.

Hospital Corps.—No provision was made for hospital corps men for the volunteer troops except that which empowered the Secretary of War (act March 1, 1897) to enlist as many privates of the Hospital Corps as the service may require. To provide this corps with the necessary number of men recruiting officers were urged to secure suitable men and medical officers to effect the transfer of men from the line of the Army. General Orders, No. 58, Headquarters of the Army, Adjutant-General's Office, May 31, 1898, authorized the transfer of men from the line of the volunteers to the Hospital Corps of the Regular Army upon the recommendation of the Chief Surgeon and suspended the provisions of Army Regulations governing the Hospital Corps so far as they were inapplicable in time of war and with troops in the field. Commanders of corps and of independent divisions and brigades were charged with the full control of the transfer from the line, the enlistment and discharge of members of the Hospital Corps, the detail of acting hospital stewards, and the appoint-

ment of stewards, the last limited by subsequent orders to 10 stewards for an army corps in addition to those authorized for the volunteer regiments.

The number of men enlisted and transferred during the war was approximately 6,000.

Contract nurses.—The want of a sufficient body of trained hospital corps men necessitated the detail of enlisted men from the regiments for hospital duty in several of the camps and the employment of trained nurses at the general hospitals. Foreseeing the necessity for a large force of the latter, I applied to Congress April 28, 1898, for authority to employ by contract as many nurses as might be required during the war. This was promptly granted. Over 1,700 female nurses have been employed, at first at the general hospitals and later at the field division hospitals when it became evident that the field service purposes for which the latter had been organized would have to give place to the imperative need of caring for the many sick men coming from the regimental camps.

Medical and hospital supplies.—Immediately upon the declaration of war, April 21, steps were taken to obtain medical supplies for the new Volunteer Army. Orders were given, and the manufacture expedited with the utmost dispatch. On May 3, foreseeing that it would be impossible to have ready for issue to the volunteer regiments, as soon as they were mustered in, the necessary articles of field equipment, I telegraphed the governors of the several States for authority to use the medical equipment of the National Guard in the service of the State until our Army medical supplies were ready for issue. Most of the governors, who had field equipment, responded promptly and satisfactorily, but unfortunately many of the State medical departments had no such equipment. Meanwhile the officers in charge of medical supply depots were directed to make arrangements so that supplies could be immediately obtained for 100,000 men for six months.

A field supply table was prepared and approved by the Secretary of War May 9, 1898. It was intended to provide for the needs of commands in active service where only a limited supply of articles could be carried owing to the necessity of restricting transportation. But as soon as it was evident that the troops were likely to be retained in camps of instruction, notification was given that articles on the regular supply table could also be obtained.

To provide, temporarily, for volunteer regiments, supplies of medicines, instruments, hospital stores, stationery, and miscellaneous articles, according to a prescribed list, and packed in convenient boxes, were prepared at the supply depots. An important article to be provided was the first-aid packet, containing antiseptic dressings for immediate use in emergencies and intended to be carried by each individual soldier. These were promptly and liberally supplied. Whenever notice was received from the Adjutant-General's Office that commands were to be moved or camps formed, I endeavored to anticipate the wants of the troops by telegraphing to the officer in charge of the nearest supply depot to forward supplies for the stated number of men according to the field supply table.

Requests from medical officers for supplies and orders based thereon transmitted to the supply depots were largely by telegraph, and orders were given that when the supplies were needed promptly they should be forwarded by express to their destination. When a medical officer desired to purchase medical and other supplies for use in emergencies authority to do so was always granted,

The medical supply depot in New York supplied the posts in New England, the Middle States, and along the Atlantic coast, including Florida, and the troops that have been sent to and are now serving in Cuba and Porto Rico. The depot at St. Louis, Mo., supplied the States of the Mississippi Valley and the region east of the Rocky Mountains, including Texas, the large camp at Chickamauga, and the camps formed at Knoxville, Lexington, Anniston, Huntsville, etc. To provide for the large aggregation of troops at Chickamauga, Ga., a subdepot, drawing its supplies from St. Louis, was organized. The officers in charge of the depots at New York and St. Louis were directed, July 8, to keep in stock 1,000 iron beds or cots with a full supply of bedding ready for immediate use. The distance of San Francisco from the center of the Government was so considerable that the officer in charge of that depot was necessarily given large discretion in the purchase of supplies and the expenditure of funds.

Railroad ambulance train.—On June 16 a railroad ambulance train, consisting of 10 tourist sleepers, a dining car, a private car, and a combination car, was equipped for service and placed under the command of Maj. Charles Richard, surgeon, U. S. A. One assistant surgeon, 2 stewards, 20 privates of the Hospital Corps, and 3 civilian employees were assigned to him for service. The train was amply provided with all the medicines, hospital stores, and comforts required for the patients to be transported.

HOSPITAL SHIPS.

The hospital ship Relief.—On April 15, 1898, I applied for a ship to be used as a hospital ship. On May 18, by direction of the President, the *John Engle* was purchased, and the Quartermaster's Department took charge of her to prepare her for the special service required. Maj. George H. Torney, surgeon, U. S. A., was placed in command of the ship. Specific instructions were sent to him to provide every thing needful so that there might be no delay attributable to the Medical Department, and these instructions were complied with to the letter. The *Relief*, however, was unable to sail from New York until July 2. She arrived at Siboney on the 7th, where she received many of the wounded from the attack on Santiago.

The hospital ship Missouri.—On July 1, 1898, Mr. B. N. Baker, of Baltimore, Md., tendered the steamship *Missouri*, with her captain and crew, to the Government as a hospital ship. Ten days or two weeks was the period estimated as needful to permit of making the necessary alterations and providing the vessel with a steam laundry, steam sterilizing apparatus, and ice and carbonating plants, but it was not until August 23 that the ship was reported ready to sail, and even then a good deal of work had to be done on board during a stormy passage to Santiago.

The hospital ship Olivette.—This vessel was a steamship which had been doing service as a water boat for the fleet of transports when Lieutenant-Colonel Pope, chief surgeon of the Fifth Army Corps, selected her for use as a hospital ship during the voyage from Tampa to Santiago. The equipment of one of the field division hospitals of the corps was used in outfitting her. The *Olivette* answered her extemporized purpose excellently.

The health of the troops.—In my opinion the reduction of the age limit from 21 to 18 years and the haste with which the volunteer regiments were organized and mustered into the service were responsible for much of the sickness which was

reported in the early days of their camp life. All military experience shows that young men under 21 years break down readily under the strain of war service; and every regiment had many of these youths in its ranks. Medical examiners were appointed to testify to the physical qualifications of each man before acceptance, but, notwithstanding this, which at the time was characterized in the press as a very rigorous procedure, so many men were afterwards found on the sick lists of the camps unfit for service, from causes existing prior to enlistment, that special arrangements had to be made for their discharge.

Soon after the newly raised levies were aggregated in large camps sickness began to increase progressively from causes that were so general in their operation that scarcely a regiment escaped from their harmful influence. These causes may largely be referred to ignorance on the part of officers of the principles of camp sanitation and of their duties and responsibilities as regards the welfare of the enlisted men in their commands.

Medical officers, as a rule, were also without experience in the sanitation of camps and the prevention of disease among troops. The few who knew what should be done were insufficient to control the sanitary situation in the large aggregations of men hastily gathered together.

Officers and men in these camps were rife for war, and drill, parades, practice marches, and military camp duties occupied the whole of their time and energies. Considerations of domestic economy and sanitation in the companies and regiments were not given proper attention and men who were being taught to meet the enemy in battle succumbed to the hardships and insanitary conditions of life in their camps of instruction.

The sites of certain of the camps have been instanced in the newspapers as the cause of the sickness which was developed in them; but a review of the whole situation shows that it was not the site, but the manner of its occupation which must be held responsible for the general spread of disease among the troops. On April 25, 1898, foreseeing the likelihood of insanitary conditions in the camps of our newly raised troops, and with the view of preventing them, I issued Circular No. 1 from this office, impressing upon medical officers their responsibility in sanitary matters, and the necessity for a strict sanitary police, particularly in the care of the sinks and in the preservation of the camp area from contamination. But the density of the military population on the area of these contracted camps prevented the possibility of a good sanitary condition. Camps of this character may be occupied for a week or two at a time without serious results, as in the case of national guardsmen out for ten days' field practice during the summer, but their continued occupation will inevitably result in the breaking down of the command by diarrhea, dysentery, and typhoid fever.

Practically nothing was done to make the men comfortable or to remedy the insanitary conditions until these were brought to the attention of the Secretary of War by inspectors sent out by special orders from the War Department. Then the camps held for so long were abandoned, but not before the manifestations of typhoid infection were rife in them. New sites were carefully selected, regimental camps were expanded, company tentage increased, and board flooring provided. Then for the first time the troops went into camps suitable for continued occupation.

One prominent cause of the increase of sickness in the early camps has been commented upon by only a few of our medical officers. These cite the prevalence of drunkenness and of venereal diseases due to the facilities and temptations afforded by the proximity of cities to the larger camps. They hold that if the systems of the men had not been weakened by dissipation they would not have succumbed so readily to the other influences which affected them.

Malarial fevers added to the sick lists of camps in Florida and of Southern regiments in the camps in Georgia and Virginia.

It was, however, typhoid fever which broke down the strength of the commands generally, the outbreak becoming distinctly manifest in July. Sporadic cases appeared in most of the regiments in May and June, these cases having been brought in many instances from the State camps. In fact, some regiments, as the Fifteenth Minnesota, suffered more from this disease at their State rendezvous than any of the regiments in the large Federal camps. A few of the regimental commands in the latter may be said to have escaped visitation. The sanitary conditions affecting the commands in the various camps have been studied in connection with the prevalence of typhoid fever among the men by a board of medical officers consisting of Majors Reed, Vaughan, and Shakespeare, but the results of the investigations of this board have not as yet been reported in full. It appears to me, however, from a general review of the sanitary reports already filed, that the prevalence of the disease was proportioned to the insanitary camp conditions which I have referred to. My circular No. 1, already cited, was intended to bring the danger from this fever to the notice of medical officers, with a view of obviating it. The probability of its communication to soldiers in camp through the agency of flies was pointed out as a reason for insisting on a sanitary police of the strictest character.

It is well known to the medical profession that this fever is propagated by a contaminated water supply, and it is now recognized that the great prevalence of this disease in an aggravated form in the camps of the civil war was due to the use of surface and shallow well waters infected by typhoid excreta. To prevent transmission by the water supply I recommended the use of boiled and filtered water when a pure spring supply could not be obtained, and to enable an efficient filtration of suspected waters to be made field filters of approved construction were issued on my recommendation by the Quartermaster's Department.

The care of the sick and wounded.—As soon as the regiments were organized into brigades and divisions preparatory to active service, it became the duty of each chief surgeon of an army corps to see that the medical department of his command was organized to meet the casualties of battle. The object of the concentration of the troops was to accustom the regiments to operations in which they constituted the units of a higher organization. The experience of the civil war demonstrated that for efficient service in an active campaign the medical department also required a higher organization. Circular No. 3, from this office, dated May 18, 1898, in specifying the duties of the various medical officers in an army corps indicated the character of the organization to be adopted. The seriously sick were to be treated in division field hospitals (unless their transfer to a general hospital was advisable) under the care of the most experienced physicians and able surgeons on duty with each division. Medical officers left on duty with their regiments were

to exercise sanitary supervision over the well men and to determine whether a soldier reporting himself sick should be sent to hospital or remain as a trivial case under treatment in quarters. This consolidation of the medical force by divisions, implying as it did the breaking up of the regimental hospitals, met with a strong opposition from regimental medical officers, particularly from those who were not detailed for special service at the division hospitals. Regimental commanders also were in many instances opposed to it, forgetful that the object of the medical department, as of the line, was to get into training for field service. Similar objections were raised in 1862 and 1863, to the disestablishment of the regimental hospitals, but the civil war lasted long enough to demonstrate the superiority of the divisional system.

The Fifth Army Corps.—Long before this corps embarked for Cuba its field hospitals were in condition for efficient service. Subsequent events, however, rendered valueless these preparations of the Medical Department. When the command embarked on the transport vessels, the baggage wagons and mules were left behind. The ambulance trains of all the divisions, with a large part of the outfit of each of the hospitals, were also left behind. Three ambulance wagons were taken apart and stored on one of the vessels. These did excellent service at San Juan and El Caney. Ten of the ambulances of the Third or reserve divisional hospital were subsequently shipped to Cuba, where they arrived July 2, and were of value in moving the sick and wounded to the hospital at Siboney and to the hospital ships and transports.

Of the property and supplies carried to Cuba, a portion was not available for service at the time it was most needed, to wit, on July 1, 2, and 3, when the wounded from El Caney and San Juan were coming from the front for care and treatment. This was because, in general, no opportunity was afforded to land the medical property. Earnest efforts were made by medical officers to have supplies at the front with the troops. Some having succeeded in getting their medicine chests and other articles of medical property ashore, had these carried forward on litters by hospital-corps men to the camps near Sevilla, while others turned their private mounts into pack horses for this purpose. During and after the battles at El Caney and San Juan there was an insufficiency of tents, cots, bedding, and medicines due to the causes stated, but all the hospitals were well equipped for surgical work.

After the capitulation of Santiago the troops at the front broke down rapidly under the fatigues they had undergone and the malarial influences to which they were exposed; but by this time an ample supply of tents, furniture, bedding, clothing, and medical stores had reached Siboney, together with a corps of trained nurses and a force of surgeons—those sent to duty at the yellow fever hospital being immune to that disease. Meanwhile, to relieve the pressure on the field hospitals, such convalescents and sick as could bear the journey home were sent to the United States on transport vessels. This was an emergency measure to relieve the hospitals at Siboney and permit of the transfer to them of the men who were sick in regimental camps.

The transfer of troops from Santiago to Montauk Point, New York, was also an emergency measure, and the great responsibility of excluding yellow fever infection from every transport rested on the medical officers who had charge of the embarkation. Had they failed in this duty the effect would have been disastrous during the

voyage to the men confined on shipboard, and the risk of importing the disease into this country would have been greatly increased.

In view of the necessity for the return of the troops of the Fifth Army Corps from Santiago, Cuba, preparations were made for encamping them at Montauk Point, Long Island. These included the establishment of temporary tent hospitals, not only for the treatment of the large number of sick brought by each command from Cuba, but for the isolation and treatment of those from transports lying under the suspicion of yellow fever infection.

The difficulties in the way of administering the affairs of the detention hospital were very great, owing to the rapidity with which the transports followed each other in their arrival. As many as four reached the Point on some days from August 13 to 31, most of them bringing sick requiring detention for medical observation. But the sick men were as well cared for and as comfortable in their cots here as afterwards when transferred to the general hospital at Montauk Point. There was an excellent steam disinfecting plant on the grounds with a formaldehyde chamber attached. The laundry work was done at a steam laundry near the hospital.

The temporary hospital, which was locally known as the General Hospital, Montauk Point, consisted of tent pavilions containing 1,600 cots. Its personnel consisted of 40 medical men, 8 stewards, 10 acting stewards, 130 privates of the Hospital Corps, 15 cooks, and 50 male nurses, and an average of about 200 female nurses, one-half of whom were Sisters of Charity. Supplies of all kinds were amply provided.

It is needless to refer at this time to the complaints of starvation which appeared almost daily in the newspapers during the occupation of Camp Wikoff, for it is now generally understood that the weakness, prostration, anæmia, and emaciation of so many of the troops were the results of malarial, typhoid, and yellow fever, from which the army suffered as a consequence of its exposure to the climatic influences and local infections of Santiago and its neighborhood pending and subsequent to the surrender of the city.

Troops in the home camps.—The method of hospital organization in these camps was practically the same, and there was much similarity in the conditions affecting them and correspondingly in their history. Regiments reported provided in but few instances with the material and supplies for their medical care; but they brought sick men with them, and these required immediate care. Provision had to be made for division hospitals in view of future field service and for regimental hospitals in view of the immediate necessity. The difficulties in the way of the contemporaneous accomplishment of these two objects were great, and they were greatly augmented by the inexperience of a majority of the regimental medical officers and of many of the chief surgeons, which prevented them from seeing beyond the immediate necessity. The sick had to be cared for, and to this end medicines and other things had to be procured. Relief societies offered assistance and this was eagerly accepted by many of these medical officers, not alone for delicacies or luxuries not otherwise provided for, but for "supply table" articles which could have been had from the medical purveyors in their camps or by telegraphic requisition on the Surgeon-General. It was easier to accept what was so

freely offered than to learn how to obtain the articles from the proper source. To explain their prompt acceptance of this assistance these officers referred to the red tape of the War Department methods, and the insinuation that the said methods were beyond the comprehension of the ordinary intellect was accepted by the sensational press as an explanation in full.

Meanwhile chief surgeons of corps and divisions began the organization and equipment of their field division hospitals and ambulance companies, but they were met at the outset by the apparent impossibility of securing men for service as cooks, nurses, litter bearers, ambulance drivers, teamsters, etc. The hospital corps of the Regular Army could not supply these men, because recruiting for this corps progressed slowly. The popular tendency to volunteer led men away from the regular recruiting offices. When transfers from the volunteer regiments to the Regular Hospital Corps were authorized, the men did not care to leave their local connections for service in the Army at large as regular soldiers. The transfers so much desired by the Medical Department to enable it to complete its organization were not regarded favorably by line officers, for although every line officer will probably acknowledge, as a general principle, that only the most intelligent and capable men should be employed to care for the sick and wounded, he is not likely to act on this general principle when it is a question of withdrawing for such service the most intelligent and capable men of his own company or regiment.

The division hospitals of the army corps were usually established in the immediate neighborhood of the regimental camps of the divisions. The pavilions were arranged in various ways, according to the configuration of the area available as a site, but in general there was a tendency to crowd the area. Surgeons in charge recognized that a tent should not be occupied by more than six patients, but sometimes this number was exceeded temporarily while waiting an increase of tentage. As a rule, the hospitals were kept in campaigning condition—that is, the tents were neither framed nor floored—until the increased prevalence of typhoid fever attracted attention to their crowded condition, when the object of their existence became suddenly changed from a school for field service to a hospital for the treatment of a local outbreak of disease.

Special-diet kitchens, under the management of capable individuals, were opened at most of the hospitals. Money for this purpose was sent to them by me from funds contributed and placed at my disposal. Money was also sent directly by individuals and by representatives of aid societies, and the Red Cross committees supplied quantities of ice and milk, chicken, eggs, lemons, etc. Pajamas, nightshirts, and other articles of hospital clothing were also provided by the Red Cross and other aid societies. Subsequently the order authorizing the commutation of the sick soldier's ration at 60 cents rendered these hospitals wholly independent of outside assistance.

About July 20 the troops for the invasion of Porto Rico embarked and sailed. The field-hospital accommodation with this expeditionary force was ample and the supplies abundant.

Troops on the Pacific coast.—The troops on the Pacific coast were concentrated mostly at San Francisco, Cal., from which port 18,000 men were dispatched to the Philippine Islands. They were carried on twenty transport steamers, the first expe-

dition sailing on May 25. Each steamship before being accepted by the Government was inspected by a board of medical officers, and in each instance the vessel was thoroughly disinfected before the troops went on board.

The precautions taken to secure a good sanitary condition of the vessels prior to embarkation and the sanitary supervision exercised over the men during their long voyage must be credited with the excellent condition in which the troops arrived at Manila.

DIVISION HOSPITALS.

The want of hospital corps men was the main cause of the failure of chief surgeons to establish their division hospitals promptly. Instead of organizing for field service, their time was occupied and their energies spent in endeavoring to procure the necessary men by enlistment or transfer.

After a time, when sickness invaded the camps and the division hospitals became filled, operations for field service had to give place to the immediate necessity of caring for the sick. The division hospitals became expanded, as at Siboney and Tampa, into base hospitals, with increased needs and increased responsibilities. To these I sent with the utmost dispatch physicians and surgeons under contract, to relieve the strain on the medical officers attached to the troops and trained nurses to relieve the details from the regiments who were temporarily acting as hospital corps men. At Camp George H. Thomas, Ga., the expansions of the division hospitals, under the conditions brought about by the typhoid invasion of the camps, became officially recognized as general hospitals, and were promptly provided by me with the best available medical service, with trained nurses, with all permissible medical and hospital supplies, and with funds for special purchases. The altered conditions under which the division hospitals were operating were immediately recognized by the chief surgeon of the Fifth Army Corps at Santiago on the breakdown of that corps after the surrender of the city, and every effort on the part of his medical officers to care for their sick in regimental hospitals was encouraged by giving them every available facility. Similarly, in other camps, regimental hospitals were in many instances equipped to meet the necessities of the occasion.

General hospitals.—Up to September 30, eleven general hospitals were established and fully manned and equipped. These had a capacity of nearly 7,000 beds. At the same time certain post hospitals having good accommodations were used for the treatment of army cases generally, without alteration of their official status as post hospitals. Those, for instance, at Forts Columbus, Hamilton, and Wadsworth, N. Y., in the East and at the Presidio of San Francisco, Cal., and Vancouver Barracks, Wash., on the Pacific coast, were expanded in this manner. The vacant-beds in the hospitals of the Marine-Hospital Service of the Treasury Department were placed at my disposal and the civil hospitals of the country were ready on call to receive and care for sick and wounded soldiers. These offers of hospital accommodations and medical care were accepted by me in many instances, particularly in New York, Boston, Philadelphia, and Providence, to relieve the tent hospitals at Montauk Point when crowded by the rapid transfer of sick from Santiago.

The medical statistics of the war.—The work of gathering up the records of sickness of the various commands in service during the war has been one of great difficulty. Volunteer medical officers were ignorant of the methods of keeping their records,

and many failed to appreciate the importance of what was frequently regarded as "mere paper work" which had no practical bearing on the welfare of their men. Nevertheless their work in this regard must be considered as satisfactory when compared with that of the volunteer medical officers of the war of the rebellion.

My report presents tabulations compiled from monthly reports of sick and wounded rendered from May to September, inclusive, and representing a strength present of 167,168 men. These give full particulars of 1,715 deaths,* of which number 640 were occasioned by typhoid fever, 97 by malarial fevers, and 393 by diarrhea and dysentery. The death rates for May and June—0.46 and 0.70—were not in excess of those of the Army in time of peace. In July the rate became somewhat higher than that of most well-cared-for cities, 2.15 for the month, or the equivalent of an annual rate of 25.80 per thousand living. In August it became excessive—4.08 for the month, equal to an annual rate of 48.96 per thousand. In September the influence of the energetic measures taken in July and August to improve the health of the Army becomes manifest in the falling of the death rate to 2.45, or the equivalent of an annual rate of 29.40. The same progression to an acme in August, with a sudden fall in September, is seen in the various ratios given under the specific titles "Typhoid fever,"

larial fever," and "Diarrheal diseases." This is exceedingly gratifying, and must be credited, as stated, to the sanitary measures adopted; for our experience in the civil war demonstrates that in the absence of these measures the high ratio of August would have been continued for many months to come.

I submit also tables of absolute numbers and of ratios by which the incidence of sickness and mortality of the regular and volunteer troops may be contrasted. From these it will be seen that the exposure of the regular troops during the Santiago campaign gave them from June to September a higher death rate than the volunteers, and that the rate of the latter during August, the month of maximum mortality, was 3.62 as compared with 5.83 among the regular troops.

Volunteer relief work.—My guiding principle throughout the war has been that relief, when needed, should be promptly accepted without reference to the source from which it came. The relief afforded by the National Red Cross at Siboney was promptly accepted by the surgeons on the spot, but it is evident that it was entirely inadequate to meet the emergency. This association has had full authority to send agents and supplies to all of our camps since June 9, 1898, and it has contributed supplies of various kinds in a most liberal manner for the use of our field hospitals.

Other organizations which have rendered very valuable services are the National Relief Commission, having its headquarters in Philadelphia, and the Massachusetts Volunteer Aid Association, with headquarters in Boston. Both of these organizations fitted out hospital ships, which were placed at my service for the transportation of our sick from Porto Rico, and I take pleasure in testifying to the valuable services rendered by the yacht *May*, of the National Relief Commission, and the hospital ship *Bay State*, of the Massachusetts Volunteer Aid Association.

Special fund.—Sums of money varying from 33 cents sent by Master Oliver S. Whitaker, of Detroit, Mich., to \$5,000 by Mr. Cleveland H. Dodge, chairman of the supply committee National Red Cross Society, have been sent to me to be used

* Reports to the Adjutant-General to September 30, 1898, show 345 killed and died of wounds and 2,485 died of disease, in a mean strength of about 275,000 men.

according to my discretion for the benefit of our sick and wounded soldiers. In all I have received \$24,244.94. Among the contributors have been the Colonial Dames of America, through the treasurer, Miss E. B. Nicholas, of Washington, D. C., \$3,500; the Red Cross Auxiliary No. 3, through Mrs. Winthrop Cowdin, of New York, \$2,000; The Women's War Relief Association, through Mrs. Victoria Raymond, treasurer (contributed for hospital ship *Relief*), \$2,275.

This money has been sent by me principally to general hospitals, to chief surgeons of army corps in the field, and to commanding officers of hospital ships, for use in the purchase of delicacies for the sick.

The medical corps.—Before concluding my report of the operations of the medical department during our short and glorious war with Spain, I feel it my duty to call special attention to the efficient services rendered by the medical officers of the army in the various responsible positions which the exigencies of the service have made it necessary for them to fill. The inadequacy in the number of trained and experienced medical officers has been a source of great embarrassment to me in my efforts to meet the demands of the service; but as a rule our medical officers have performed the duties imposed upon them in a most loyal, intelligent, and zealous manner. They have shared with line officers the dangers of battle, and they have encountered with unflinching courage the more difficult and protracted combat with the infectious diseases which have invaded our camps and filled our hospitals. Many of them have suffered attacks of typhoid and malarial fevers, and at one time no less than 15 per cent of the corps was disabled by sickness.

Of those who accompanied General Shafter's army to Santiago few escaped serious sickness, and two of those who distinguished themselves for their devotion to duty lost their lives as a result of exposure to the malign influences which in so short a time sapped the vitality of the flower of the American Army. But credit is due not alone to those in the field. The labors of those on duty as chief surgeons of military departments, in charge of medical supply depots, and in other important positions, have been enormously increased, and it has required unremitting effort to meet the exigencies of the war.

RECOMMENDATIONS.

The increase of the enlisted strength of the Army to a total of 60,000, and the large number of new stations to be garrisoned in the islands acquired and occupied by the United States, makes an increase in the Medical Corps absolutely essential. I therefore recommend an addition to the number of medical officers now allowed by law, of 2 assistant surgeons-general with the rank of colonel, 6 deputy surgeons-general with the rank of lieutenant-colonel, 30 surgeons with the rank of major, and 50 assistant surgeons with the rank of first lieutenant.

This recommendation is based upon the present organization of the Army. Any increase made by Congress during the coming session will necessitate a further increase of the Medical Corps.

Very respectfully,

GEO. M. STERNBERG,

Surgeon-General, U. S. A.

The SECRETARY OF WAR,
Washington, D. C.

[Memorandum.]

WAR DEPARTMENT, SURGEON-GENERAL'S OFFICE,
Washington, November 26, 1898.

Upon the declaration of war, surgeons were appointed on brigade, division, and corps staffs, as provided by law, but no provision was made in the law for large hospitals; consequently regimental surgeons were detailed to these hospitals and their regiments left with one surgeon only, and he a junior. This should not be. The breaking up of the regimental hospitals was, in my judgment, after the experience we passed through, a mistake; but it could not be avoided and maintain the division and general hospitals, which were indispensable. This branch of the service should be thoroughly equipped and ample provision made to supply the places of surgeons who fall sick or are otherwise unable to attend to their duties. One of the great mercies of the campaign were the female nurses. Until one has had experience or made careful observation he can not realize the work that these noble women did for our sick soldiers in hospitals; but they can not well be employed at regimental hospitals, especially in an active campaign.

The division and general hospitals are an absolute necessity. Where large numbers of sick are gathered together a supply of all delicacies

can be kept in abundance, and refrigerators, cooking outfits, and everything needed for the sick can be constantly kept on hand. The general or division hospitals should, however, in my opinion, be divided into wards assigned to separate regiments, and, as far as possible, to the companies of those regiments, thus keeping the men who serve in the same command as much together during their sickness as possible. It cheers them when their comrades are near at hand, and they are more confident and hopeful than when placed upon cots among strangers.

The Red Cross and other relief associations contributed in a very large degree to the care and comfort of our sick soldiers, and should receive the grateful thanks of the nation for the work they so nobly and unselfishly rendered.

On April 25, 1898, the following circular was issued by the Surgeon-General and distributed throughout the Army for observance in the field. Had it been strictly followed, less sickness would have resulted:

CIRCULAR }
No. 1. }

WAR DEPARTMENT, SURGEON-GENERAL'S OFFICE,

Washington, April 25, 1898.

In time of war a great responsibility rests upon medical officers of the Army, for the result of a campaign may depend upon the sanitary measures adopted or neglected by commanding generals of armies in the field. The medical officer is responsible for proper recommendations relating to the protection of the health of troops in camp or in garrison, and it is believed that, as a rule, medical officers of the United States Army are well informed as to the necessary measures of prophylaxis and the serious results which infallibly follow a neglect of these measures, especially when unacclimated troops are called upon for service in a tropical or semitropical country during the sickly season. In Cuba our armies will have to contend not only with malarial fevers and the usual camp diseases—typhoid fever, diarrhea, and dysentery—but they will be more or less exposed in localities where yellow fever is endemic and under conditions extremely favorable for the development of an epidemic among unacclimated troops. In view of this danger, the attention of medical officers and of all others responsible for the health of our troops in the field is invited to the following recommendations:

When practicable, camps should be established on high and well-drained ground not previously occupied.

Sinks should be dug before a camp is occupied, or as soon after as practicable. The surface of fecal matter should be covered with fresh earth or quicklime or ashes three times a day.

New sinks should be dug and old ones filled when contents of old ones are two feet from surface of ground.

Every man should be punished who fails to make use of the sinks.

All kitchen refuse should be promptly buried and perfect sanitary police maintained.

Troops should drink only boiled or filtered water and coffee or tea (hot or cold), except where spring water can be obtained which is pronounced to be wholesome by a medical officer.

Every case of fever should receive prompt attention. If albumen is found in the urine of a patient with fever, it should be considered suspicious (of yellow fever) and he should be placed in an isolated tent. The discharges of patients with fever should always be disinfected at once with a solution of carbolic acid (5 per cent) or of chloride of lime (6 ounces to gallon of water), or with milk of lime, made from fresh quicklime.

Whenever a case of yellow fever occurs in camp, the troops should be promptly moved to a fresh camping ground located a mile or more from infected camp.

No doubt typhoid fever, camp diarrhea, and probably yellow fever are frequently communicated to soldiers in camp through the agency of flies, which swarm about fecal matter and filth of all kinds deposited upon the ground or in shallow pits, and directly convey infectious material, attached to their feet or contained in their excreta, to the food which is exposed while being prepared at the company kitchens or while being served in the mess tent. It is for this reason that a strict sanitary police is so important. Also because the water supply may be contaminated in the same way or by surface drainage.

If it can be avoided, marches should not be made in the hottest part of the day—from 10 a. m. to 5 p. m.

When called upon for duty at night or early in the morning, a cup of hot coffee should be taken.

It is unsafe to eat heartily or drink freely when greatly fatigued or overheated.

Ripe fruit may be eaten in moderation, but green or overripe fruit will give rise to bowel complaints. Food should be thoroughly cooked and free from fermentation or putrefactive changes.

In decidedly malarious localities from 3 to 5 grains of quinine may be taken in the early morning as a prophylactic; but the taking of quinine as a routine practice should only be recommended under exceptional circumstances.

Light woolen underclothing should be worn, and when a soldier's clothing or bedding becomes damp from exposure to rain or heavy dews, the first opportunity should be taken to dry it in the sun or by fires.

GEO. M. STERNBERG,
Surgeon-General, U. S. A.

PAY DEPARTMENT.

WAR DEPARTMENT, PAYMASTER-GENERAL'S OFFICE,

Washington, October 21, 1898.

SIR: I have the honor to submit the following summary of my annual report for the fiscal year ending June 30, 1898:

RECEIPTS AND EXPENDITURES.

A general statement of all amounts received and expended during the year ending June 30, 1898. Total received and accounted for, \$23,499,969.47.

The expenditures of the present fiscal year exceeded those of the preceding year by \$2,326,804.11. The increase is accounted for by the fact that by act of March 8, 1898, two additional regiments were added to the strength of the Regular Army, and again under act of April 22, 1898, the Regular Army was increased to its maximum strength—61,000. Under the same act about 220,000 volunteers were called into the service, making an aggregate army of regulars and volunteers of about 280,000 enlisted men. Estimates were prepared and submitted to Congress, and liberal appropriations were made to meet the payment of this extraordinary force.

COLLECTIONS.

Statement of collections in favor of other bureaus of the War Department aggregate \$169,624.18.

SOLDIERS' DEPOSITS.

A recapitulation by years of soldiers' deposits show a steady increase in the number and aggregate amount of deposits.

The increase in deposits is an evidence of a growing interest on the part of the enlisted men of the Army in the provisions of the Government to assist the soldier to save his earnings. The deposit system applies to both regular and volunteer soldiers.

MILEAGE PAYMENTS.

An analytical statement of mileage disbursed during the year.

The question of mileage has been quite satisfactorily and equitably settled by the allowance of 7 cents per mile. I have two recommendations to make, however, in regard to this matter of mileage which will expedite the settlement of accounts.

First. That a uniform rate of 3 cents per mile be deducted for travel over all bond-aided and land-grant railroads.

Second. That the table of distances prepared by the War Department, under the direction of the Secretary of War, be adopted as the authority for the settling of the mileage accounts, both in this Department and in the Treasury Department, and be so recognized by law.

SYSTEM OF PAYMENT.

During the past year all payments to the Army have been made monthly. While a portion of the Army has been paid by check or currency by express, all of the forces in active service have been paid by the paymaster in person. The payments in many cases have been quite complicated, owing to the fact that authority was given to muster the several State organizations into the service in accordance with the State laws. In many instances the State organizations differed from the organization of the United States Army, both in number and rank of officers and enlisted men. This gave rise to many questions of rank and pay, which required settlement, and the Department was continually appealed to for instructions and directions in settling these questions. The payments, however, have been met with promptness and regularity.

Since the close of the fiscal year covered by this report, and up to the date of its rendition, October 25, this Department has endeavored to pay monthly the troops

in the field, scattered over two hemispheres, and has fairly well accomplished the task.

In addition to the regular payments, the payment of mustered-out troops has imposed much additional labor, but so far all have been paid without delay.

The large number of regiments and independent commands yet to be mustered out will severely tax the energies of the entire Pay Corps, but the zeal they have shown gives assurance that, however arduous the labor, it will be promptly and satisfactorily performed.

ADDITIONAL PAYMASTERS.

The increase in the Army necessitated an increase in the force of the Pay Corps to enable the Department to make prompt payments; therefore, on request of the Paymaster-General, the President had, on June 30, 1898, increased the corps by 72 additional paymasters.

These officers and their clerks entered the service with very little or no knowledge or experience in regard to army accounts, and it appeared necessary to place them under instruction to fit them for their duties. Accordingly a school of instruction was organized in which each was made familiar with the necessary forms to be used in payments and the principles of making and rendering accounts. As a result each officer entered upon his duties with a fair knowledge of the business before him.

This preparation has borne its result, as the payments to troops have been made promptly and intelligently, resulting in fewer errors than would have otherwise occurred.

EXAMINATION OF ACCOUNTS.

By section 12, act of July 31, 1894, it is required that accounts in this office shall be transmitted to the Auditor for the War Department within twenty days after receipt. With the increased amount of work it is very difficult to comply with the above requirements and do justice to the accounts, and I therefore ask that legislation may be had giving the Secretary of the Treasury the same authority in regard to relaxing the rules and regulations in regard to the rendition of accounts by the administrative departments beyond the limit of twenty or sixty days as in the case of rendition of accounts by the accounting officers.

INCREASE IN THE REGULAR FORCE OF THE PAY CORPS.

While the strength of the Regular Army has been more than doubled numerically, the number of regular paymasters has remained the same. The duties of regular paymasters, when assigned as senior officers in charge of additional paymasters, in making payments have been both responsible and difficult, as they were not only required to make their own payments, but also direct and assist the new officers in their duties. Several of the majors have been assigned to new stations at very remote points, as at Manila, Porto Rico, and Cuba, with large sums of money in their charge for distribution to the paymasters accompanying them. Being so far distant, they have been called upon to decide many important and difficult questions, in the matter of payments, requiring thorough knowledge and experience in their line of work. Very capable officers have been found for these responsible positions,

and while other staff officers, with the rank of colonel and lieutenant-colonel, are filling similar positions in their several departments, the paymasters, with quite as great responsibilities, are only ranked as majors.

In view of the foregoing facts—the increased Army and added responsibilities—I earnestly recommend that to the present Pay Corps of the Army there may be added 3 assistant paymasters-general, 5 deputy paymasters-general, and 20 majors and paymasters. The promotions to colonel and lieutenant-colonel to be made from the officers now in the Pay Department, according to seniority, and upon the mustering out of the volunteer forces and the reduction of the Regular Army to the basis prior to the act of April 26, 1898, no appointments to be made in the Pay Department until the number of officers in each grade shall be reduced to the number authorized prior to the date of the act above mentioned.

PERSONNEL.

April 30, 1898, Maj. William Arthur retired from active service, under section 1243, Revised Statutes.

May 2, 1898, Harry L. Rogers was appointed major and paymaster to fill vacancy.

June 10, 1898, Col. G. W. Candee, assistant paymaster-general, died at Chicago, Ill.

June 10, 1898, Lient. Col. A. B. Carey was promoted to colonel and assistant paymaster-general to fill vacancy.

June 10, 1898, Maj. C. I. Wilson was promoted to lieutenant-colonel and deputy paymaster-general to fill vacancy.

June 15, 1898, J. A. Watrous was appointed major and paymaster to fill vacancy.

PAYMASTERS' CLERKS.

There is no class of employees in the service of the Government who are so poorly paid in proportion to their services as the paymaster's clerk. The work requires men of first-class abilities and they have expenses to bear in change of station, etc., corresponding with that of an officer. I, therefore, again recommend an increase in their compensation.

CLERICAL FORCE.

The regular clerical force in the Paymaster-General's Office has shown the result of thorough training and experience in official duties. Their work has been very heavy and required many extra hours service daily. This they have accomplished willingly, at the same time instructing the new appointees and additional paymasters in their several duties.

I would earnestly recommend that Congress be requested to make appropriation for payment to the clerks who have rendered extra service during the period of the war.

Very respectfully,

T. H. STANTON,
Paymaster-General, U. S. A.

The SECRETARY OF WAR.

From the report of the Paymaster-General it appears that all payments to the Army have been made with promptness and regularity, as well as the payment of troops mustered out of service.

He recommends that in the payment of mileage to officers a uniform rate of 3 cents per mile be deducted for travel over all bond-aided and land-grant railroads; and that the table of distances prepared by the Department be recognized by law as authority for the settling of mileage accounts. These recommendations are concurred in, as also his recommendation for an increase of the Pay Corps of the Army, and the compensation of paymasters' clerks.

ENGINEER DEPARTMENT.

OFFICE OF THE CHIEF OF ENGINEERS,

UNITED STATES ARMY,

Washington, September 29, 1898.

SIR: In compliance with your instructions I have the honor to present the following synopsis of my annual report for the fiscal year ending June 30, 1898:

OFFICERS OF THE CORPS OF ENGINEERS.

At the close of the fiscal year the Corps of Engineers consisted of 123 officers, 85 of whom were detached from the command of the Chief of Engineers and on duty with the armies in the field, at the United States Military Academy, with the Light-House Establishment, and with the Commissioners of the District of Columbia.

The other officers of the corps were busily engaged during the year in charge of important public works connected with permanent fortifications, submarine-mine defenses, improvement of rivers and harbors, construction of canals, construction and repair of light-houses, public buildings and grounds in the District of Columbia, Washington Aqueduct, as members of Board of Engineers, the Mississippi River Commission, the Missouri River Commission, the Deep Waterways Commission, the California Débris Commission, and on duty with the Battalion of Engineers and the United States Engineer School at Willets Point, N. Y.

The calls for engineer officers for duty with the armies in the field could be met only in part, owing to the necessity of constructing the numerous works of fortifications, the planting and maintenance of submarine mines for defense, and the continuance of the elaborate works of river and harbor improvement.

This fact was brought to the attention of Congress, and by the act approved July 5, 1898, the Corps of Engineers was increased from 109 to 127 officers.

BATTALION OF ENGINEERS.

The maximum authorized enlisted strength of the Battalion of Engineers is 5 companies of 150 men each. During the war with Spain Company A has been serving with troops at the Philippine Islands; Companies C and E have been serving with the army operating in Cuba; Company D, with details from other companies (in all, 153 men), has been detached for submarine mining duty at 19 harbors on the Atlantic, Gulf, and Pacific coasts, and Company B has been busily engaged at the engineer depot at Willets Point, receiving, storing, and distributing the vast amount of torpedo materials, instruments, ponton equipage, and siege materials purchased and

distributed from the depot, and in preparing and maintaining the submarine-mine defenses at the eastern entrance to New York Harbor.

SEACOAST DEFENSES.

During the fiscal year projects for permanent seacoast defenses were prepared, and approved by the Secretary of War, for Port Royal, S. C., St. Johns River, Florida, Tampa, Fla., and Sabine Pass, Tex., making thirty localities in the United States for which permanent defenses have thus far been approved under the general scheme recommended in 1886 by the Board on Fortifications, generally known as the Endicott Board.

At the close of the fiscal year the construction of permanent modern defensive works was in progress at twenty-five localities.

In consequence of the war with Spain and the possibility of hostile attacks upon our coasts, urgent and pressing demands were made by Senators, Representatives, and local business interests for the immediate erection of seacoast batteries at numerous points not contemplated in the general scheme of national defense. When it is considered that the aggregate length of the coast of the United States, exclusive of Alaska, is about 5,715 miles, and that more than 700 towns and villages on this extensive line can be attacked by ships drawing 10 feet or more of water, the practical impossibility of immediately and adequately defending every vulnerable point becomes readily apparent.

Temporary batteries were ordered at Bar Harbor, Me., Stonington, Bridgeport, and New Haven, Conn., Port Royal and Georgetown, S. C., Brunswick and Darien, Ga., mouth of St. Johns River, St. Augustine, Miami, and Tampa, Fla., and Sabine Pass, Tex.

The armaments were overhauled and additional guns mounted at Fort Knox, Fort Popham, Fort Trumbull, Fort Monroe, Fort Macon, Fort Pulaski, Fort Clinch, Fort Morgan, Fort Jackson, and the forts in San Francisco Bay.

While no hostile attacks were made upon our coasts during the war with Spain, the operations of the American fleet on the coasts of Cuba and Porto Rico have amply demonstrated the value of coast defenses, including shore batteries and submarine mines, in resisting naval attacks.

It may be confidently asserted that the completion of the projects upon which operations are now in progress will practically insure the safety of our principal harbors and seacoast cities against any attacks from sea. One other important deduction may also be drawn from the results of the war, namely, the great value and efficacy of the rapid-fire gun.

GUN AND MORTAR BATTERIES.

Existing projects for seacoast defenses contemplate the emplacement of about 500 heavy guns of 8, 10, 12, and 16 inches caliber, of about 700 rapid-fire guns of various calibers, and of about 1,000 mortars. The estimated approximate cost of the engineering work connected with the installation of this armament is \$55,000,000.

Since the inauguration of the modern system of coast defense, Congress has made appropriations for the construction of permanent gun and mortar batteries as follows:

Act of—		Act of—	
August 18, 1890.....	\$1, 221, 000	Allotted by the President	
February 24, 1891.....	750, 000	from act of March 9,	
July 23, 1892.....	500, 000	1898.....	*\$3, 797, 000
February 18, 1893.....	50, 000	May 7, 1898.....	3, 000, 000
August 1, 1894.....	500, 000	July 7, 1898.....	2, 562, 000
March 2, 1895.....	500, 000		
June 6, 1896.....	2, 400, 000	Total	19, 121, 333
March 3, 1897.....	3, 841, 333		

With the funds indicated in the foregoing table, provision has been made for mounting 288 heavy seacoast guns, 254 rapid-fire guns, and 312 mortars, or about 57 per cent of the total projected armament of heavy guns, 36 per cent of the rapid-fire guns, and 31 per cent of the mortars.

This armament has been placed at 71 localities in 29 harbors of the United States.

The total number of emplacements provided for, and either completed or under construction at the beginning of the fiscal year, was as follows:

12-inch	24
10-inch	82
8-inch	33
Rapid-fire	16
12-inch mortars.....	232

The total number of emplacements completed or under construction at the close of the fiscal year was as follows:

12-inch	74
10-inch	102
8-inch	80
Rapid-fire	62
12-inch mortars.....	312

When the diplomatic relations with Spain began to assume a threatening character, orders were given to push work with all possible energy and to mount every available gun as fast as delivered. Operations were carried on with double, and in some cases three shifts of workmen, and were pushed regardless of weather and climate; the extraordinary efforts made have resulted in most gratifying progress, especially in the number of guns available for service; there were mounted during the year six 12-inch guns, fifty-two 10-inch guns, thirty 8-inch guns, twenty-six rapid-fire guns, and seventy-one 12-inch mortars.

* Includes twenty-one 8-inch breech-loading rifles temporarily mounted on modified 15-inch smoothbore carriages.

The status of works at the close of the year was as follows:

	12-inch.	10-inch.	8-inch.	Rapid-fire.	12-inch mortars.
Guns mounted	16	70	35	26	144
Platforms ready for armament	27	28	7	16	64
Under construction	81	4	38	20	104
Total.....	74	102	80	62	312

The care and service of this modern armament has largely increased the responsibilities devolving upon the artillery arm of the service and has developed a defect in its organization which calls for prompt remedy through Congressional legislation.

The new batteries either have been or will shortly be equipped with electric-light and power plants for lighting magazines and passageways, and for operating ammunition lifts; a still further extension of the application of electrical power is sought by the artillery arm, and may be realized in the near future. The plants installed for the purpose by the Engineer Department, while as simple as circumstances will permit, demand for their proper care, preservation, and operation a greater degree of mechanical and electrical intelligence than can ordinarily be supplied by the enlisted men of the artillery. It is very desirable that all operations connected with the service of modern batteries be conducted by men regularly enlisted and amenable to military discipline, and it is earnestly recommended that legislation be obtained providing for the enlistment in each battery of artillery of two or more machinist electricians, with the rank of sergeant, and at a rate of pay which will secure a class of men capable of properly caring for and operating the electric-light and power plants of modern batteries.

As new batteries are being completed and transferred to the artillery, questions of tactics and organization are arising which require careful consideration in order that the highest efficiency may be realized from the new system of defenses. These defenses for any locality comprise not only gun and mortar batteries, but submarine mines, search lights, and position-finding instruments, each separate element demanding a high degree of technical skill and involving the functions of the artillery arm and of the Engineers, the Ordnance, and Signal departments. The complexity and variety of the elements of a perfected modern scheme of seacoast defense demand a single head at each locality, who shall be responsible for the conduct of the defense and to whom all others shall be subordinate.

In this connection attention is invited to the views of Brig. Gen. George L. Gillespie, U. S. Volunteers, colonel, Corps of Engineers, upon the duties of a fortress commander as applied to the defenses of New York Harbor, printed as Appendix 3 of my report.

SUBMARINE MINES.

During the past two years the question of the revision of the torpedo system has been under consideration by a special board of engineer officers. A number of improvements in the details of the materials and in the operation of the system were recommended after their superiority had been demonstrated by practical trials at the United States Engineer School at Willets Point. The labors of the board

had been practically completed at the outbreak of the war; but, unfortunately, neither time nor funds were available for immediately replacing the old-style apparatus with the new and improved, and it became necessary to use the former to a large extent in mining the various harbors of the country for defense.

At the outbreak of hostilities there were on hand a considerable number of mine cases and a limited quantity of operating apparatus, but no cable, explosives, search lights, or any of the multitude of minor articles needed to plant and operate the mines. Steps were at once taken to procure as rapidly as possible all needed material for placing in position at every important harbor a preliminary line of mines.

The total allotments from the appropriation for national defense, made for the torpedo defenses of the country, aggregated \$1,540,000; in addition, the deficiency act of May 4, 1898, appropriated \$50,000 for purchase of material and \$300,000 for planting and maintaining mine fields.

Only the more important items of torpedo material purchased can be given here. They comprise about 400 miles of single and multiple cable, 150 tons of explosives, 1,650 new torpedo cases, 44 electric search lights, 1,500 compound plugs for mines, 4,500 circuit closers and regulators, and 17 sets of casemate operating apparatus.

At the close of the fiscal year over 1,500 submarine mines had been planted in 28 different harbors, with all their cables, anchors, junction boxes, and the necessary operating apparatus installed.

For the preservation and maintenance of the mine fields it was necessary to enforce special rules, approved by the Secretary of War, for the navigation of friendly vessels, involving the employment of a large number of tugs and boats, with a numerous personnel, at an approximate daily cost of about \$3,000.

To enable further alterations and improvements to be made in existing mining casemates, and for the construction of additional casemates, cable tanks, and storehouses at a number of localities, an appropriation of \$100,000 is requested.

SITES FOR FORTIFICATIONS.

During the past fiscal year title has been obtained to sites required for seacoast defenses at Boston, Mass.; eastern entrance to Long Island Sound; southern entrance to New York Harbor; Port Royal, S. C.; Key West, Fla.; Galveston, Tex., and Puget Sound, Washington. Negotiations are still in progress for the acquisition of sites at Boston, Mass.; Narragansett Bay, Rhode Island, and Puget Sound, Washington. Since the close of the fiscal year the land required on Fishers Island, at the eastern entrance to Long Island Sound, has been obtained.

The acquisition of land for seacoast defenses is in nearly every case attended by annoying delays, particularly where the aid of courts must be invoked through the medium of condemnation proceedings. A number of important sites must still be acquired, and, as all funds hitherto appropriated have been expended or pledged, an appropriation of \$300,000 is requested to continue acquisition of sites.

ESTIMATES.

The estimates for engineering work of seacoast defenses, submarine mines, and sites for fortifications for the fiscal year ending June 30, 1900, is as follows:

For gun and mortar batteries.....	\$4, 300, 000
For parapets and magazines for pneumatic dynamite guns	110, 000
For torpedoes for harbor defense.....	100, 000
For sites for fortifications	300, 000
For preservation and repair of fortifications.....	100, 000
For plans for fortifications	5, 000
For sea walls and embankments.....	2, 500
Total	4, 917, 500

THE UNITED STATES ENGINEER SCHOOL AND ENGINEER DEPOT AT WILLETS POINT, N. Y.

The object of the Engineer School at Willets Point, N. Y., is to provide a post-graduate course in engineering for the young officers of the Corps of Engineers, and to give them practical instruction in their duties with engineer troops, in submarine mining, and in higher civil and military engineering, in order to better fit them for the important and responsible work which devolves on the Corps of Engineers. The advantages offered by the school in training young engineer officers for their future duties and in imparting a knowledge of the submarine-mine system were fully demonstrated during the recent war with Spain.

The garrison consisted of three companies of engineer troops until the declaration of war, when the operations of the school were suspended and nearly all the officers assigned to duty in the field.

The object of the Engineer Depot is to continue torpedo experiments, both for offensive and defensive purposes; to purchase, test, receive, store, and distribute submarine mining material, ponton equipage, intrenching tools, instruments, etc.

Attention is invited to the estimate of \$10,000, presented in detail in my report of September 29, 1898, for the Engineer Depot and School at Willets Point, N. Y.

RIVERS AND HARBORS.

The condition of the various works for the improvement of rivers and harbors carried on under appropriations made by Congress is given in detail in my report for the past fiscal year. No additional appropriations were made by Congress at its last session for the general improvement of rivers and harbors, except in the case of works carried on under continuous contract, and the only funds available have been balances remaining available from appropriations of June 3, 1896. Work has therefore been suspended at many points during the past year.

The total amount actually expended for the improvement of rivers and harbors during the fiscal year ending June 30, 1898, is as follows:

For general improvement of rivers and harbors.....	\$13, 395, 428. 84
For removal of wrecks	51, 334. 19
For operating dredge boats and snag boats	66, 432. 36
For operating canals and other works of navigation.....	671, 368. 04

For work under Mississippi River Commission	\$2, 536, 786. 09
For work under Missouri River Commission, including improvement of Gasconade and Osage rivers, Missouri	424, 741. 60
For gauging waters of the Lower Mississippi River and its principal tributaries	5, 998. 39
For examinations and surveys of South Pass, Mississippi River	* 9, 709. 57
Total	17, 161, 799. 08

Since the last report was submitted appropriations for rivers and harbors have been made by joint resolution approved April 11, 1898, providing \$2,000, the sundry civil act, approved July 1, 1898, providing \$14,492,459.56, and the deficiency act, approved July 7, 1898, providing \$360,001.02.

The total estimate submitted for the fiscal year ending June 30, 1900, for continuous work authorized by Congress and by the Secretary of War, is \$12,883,437. The items making up this amount are such as Congress has authorized to be expended during the year ending June 30, 1900, at the various localities for which continuing work is authorized, and Congress has virtually pledged itself to provide the amounts for which requisition is made.

In addition to the estimate submitted for work under continuing contracts, an estimate is presented for the construction and maintenance of works which have been authorized by Congress, but not provided for by such continuing contracts, amounting to \$15,580,341. The items making up this amount are the amounts which can be profitably expended in carrying on during the fiscal year ending June 30, 1900, the projects adopted by Congress. The estimates are submitted in accordance with the requirements of the sundry civil act of June 4, 1897, which provide " * * And hereafter the Secretary of War shall annually submit estimates in detail for river and harbor improvements required for the ensuing fiscal year to the Secretary of the Treasury to be included in, and carried into the sum total of, the Book of Estimates."

The act of June 3, 1896, authorized the Secretary of War to enter into contract for the completion of a number of works, and contracts have already been made, or the required preliminary steps to that end have been taken in all cases.

The work of the Mississippi River Commission during the past year has been in accord with the plan adopted by the Commission January 11, 1896, which provided for the dredging of channels and the construction and maintenance, in cooperation with the State and local authorities, of an effective levee system. The Commission has now provided 7 dredges for service at shoal places during low water.

The Missouri River Commission again calls attention to the fact that the progress of work for the systematic improvement of the river by continuous work by reaches is seriously interfered with by requirements of law which specify numerous localities, separated by many miles, where work is required to be done, and directing that the money to do such work be taken from the appropriation made for systematic improvement of the river. Work at special localities, if directed by Congress, should be provided for by separate appropriations.

* This amount is exclusive of the sum paid the executors of the estate of James B. Eads for "maintaining jetties and other works at South Pass, Mississippi River."

The results obtained on this river have shown beyond question the practicability of controlling the river, holding its banks, and giving ample channels for navigation; but the cost and uncertainty of permanence of the work and the slow progress heretofore made have been such as to discourage those interested in the effort to improve the river for such a distance as would give promise of building up its commerce to a degree commensurate with the cost of the work.

The commerce passing through the St. Marys Falls Canal during the navigable season of 1897 comprised 18,982,755 tons of freight, an increase of nearly two and three-quarter millions, or about 17 per cent, over that for 1896, and valued at \$218,235,927.77; and that through the Detroit River is estimated to be something over 30,000,000 tons.

The commerce of the Great Lakes has increased so enormously that accurate charts can only be procured by constant examinations and surveys of new shoals as they become known, and corresponding corrections of and additions to the engraved plates; therefore the appropriations asked for these purposes are recommended.

The item of appropriation for completing the 20-foot connecting channel on the Great Lakes, in sundry civil act of June 4, 1897, provided for certain observations and investigations in connection with the preservation of such channel depth. A limited allotment from this appropriation, together with the allotments from Lake Survey appropriations, is being used for the inauguration of the observations and investigations necessary for determining the variation of lake levels and the extent to which they may be regulated, and in what way the navigable channels may be best preserved. The Deep Waterways Commission is cooperating in the work so far as their means permit. This work is of very great importance to the immense commerce of the lakes and should be continued through several years. It is estimated that the cost of the work which it is desirable to have carried out during three years is \$250,000, and an appropriation of \$100,000 for continuing the work during the year 1900 is urgently recommended.

WASHINGTON WATER SUPPLY.

The District appropriation act for the year 1899 provides for an investigation as to the feasibility and propriety of filtering the water supply of Washington. This work is now under way, and a full report thereon will be submitted to Congress.

The same act provided for resumption of work on the Washington Aqueduct tunnel and the Howard University reservoir. The necessity for an additional conduit between Great Falls and the distributing reservoir has become most apparent, and I strongly recommend that provision be made for this work in the near future.

ARLINGTON MEMORIAL BRIDGE.

The sundry civil act of June 4, 1897, made provision for surveys, etc., for a memorial bridge from the old Naval Observatory grounds in this city to Arlington National Cemetery. A report upon this subject was submitted in March, 1898, and is printed as House Doc. No. 388, Fifty-fifth Congress, second session.

DEEP WATERWAYS BOARD.

The sundry civil act of June 4, 1897, also provided for the appointment of a board to make such surveys and examinations of deep waterways between the Great Lakes

and the Atlantic tide waters as were recommended in the report of the Deep Waterways Commission transmitted to Congress January 18, 1897. The board, consisting of Lieut. Col. Charles W. Raymond, Corps of Engineers, and Messrs. Alfred Noble and George Y. Wisner, civil engineers, is now engaged in the duties assigned under the provisions of the act.

SOUTHWEST PASS BOARD.

The board of engineer officers appointed under the provisions of joint resolution No. 9, approved February 17, 1898, for the purpose of making a survey and report upon the practicability of securing a navigable channel of adequate width and of 35-foot depth at mean low water of the Gulf of Mexico throughout the Southwest Pass of the Mississippi River, is now engaged in the performance of the duty imposed, and it is expected that their report on this subject will be completed in time to permit of its submission to Congress before the close of its next session.

PUBLIC BUILDINGS AND GROUNDS IN WASHINGTON, D. C.

The improvement of public buildings and grounds and maintenance of the Washington Monument have been carried on under appropriations made by Congress, and, as far as funds permitted, the work has progressed in such manner as to secure the best results. The estimates for this purpose for the coming fiscal year are given in detail in my annual report, and amount to \$181,846.

MILITARY MAPS.

Special attention is invited to the item relative to the compilation and publication of military maps for use of the War Department, and particularly those required in connection with harbors adjacent to new fortifications. An appropriation of the small amount asked for is strongly recommended.

Very respectfully, your obedient servant,

JOHN M. WILSON,

Brig. Gen., Chief of Engineers, U. S. Army.

Hon. R. A. ALGER, *Secretary of War.*

Attention is invited to the details given in the report of the Chief of Engineers, which show the progress made in the erection of permanent and temporary batteries for seacoast defense, and the great amount of work accomplished. The mines planted in the harbors have been removed and most of them safely stored for preservation.

There should be in the service a force of practical engineers skilled in the manufacture and setting up of all electrical appliances and machinery; and attention is invited to the recommendation of the Chief of Engineers on this subject. It is important that the legislation recommended be enacted at the present session of Congress, in order that the valuable electric-light and power plants at fortifications may not deteriorate.

In all cases of new works for river and harbor improvements it is recommended that a board of skilled engineers examine the proposed

work, reporting upon the cost and also upon the need for such improvements before appropriations for such works are made.

A large number of engineers should be educated at West Point for assignment to that branch of the service. The Government is spending many millions of dollars upon great works of harbor and other improvements, and a single officer is given a number of public works to look after, taking much of his time traveling from one to another. A young officer should, in my judgment, be placed permanently with each work and supervise it constantly, reporting to his chief.

The several recommendations of the Chief of Engineers are the result of mature judgment and careful consideration, and the favorable action of Congress thereon is recommended.

MEMORIAL BRIDGE.

Attention is invited to the report submitted to Congress in March last upon the proposed memorial bridge across the Potomac River from the old Naval Observatory grounds to the Arlington Reservation. The recommendations heretofore made for the construction of this bridge are renewed.

DEEP WATERWAYS COMMISSION.

The Deep Waterways Commission has not yet filed its report, but is steadily at work and will be enabled to report in time for the next session of Congress.

Especial attention is called to the remarkable increase of the commerce of the Great Lakes as shown in the report of the Chief of Engineers, much of which is due to the deep waterways channel through the connecting waters of the lakes, which has been completed.

ORDNANCE DEPARTMENT.

OFFICE OF THE CHIEF OF ORDNANCE,

UNITED STATES ARMY,

Washington, October 19, 1898.

SIR: In compliance with your instructions of 18th instant, I have the honor to submit herewith a synopsis of the report of the operations of the Ordnance Department for the fiscal year beginning July 1, 1897, and ending June 30, 1898.

When the first call for volunteers from the States for the war with Spain was made, it was decided to take as many of the regiments of the National Guard as possible, already armed and equipped by the States. Steps were taken to get correct records and lists of the stores furnished, with a view to submitting the same to Congress at its next session for such action as might be deemed advisable for restoring to the States material furnished by them. When the muster out of the volun-

teer troops commenced, it was necessary in some cases, on account of the needs of the National Guard, to return a portion of the arms and equipments turned over. This was authorized and the stores turned over to the States are charged against their credit for the present.

The question as to the advantage of having States furnish arms and equipments to troops mustered into the United States service requires careful consideration. The supposition was that by following this method, the State troops, being already armed and equipped, would be ready for immediate service. This was based on the supposition that the arms and equipments were in good condition, an expectation not generally realized during the war. It is probable that the troops would have been ready for service as quickly by being equipped anew. Some organizations would not have been ready for service quite as soon; others would probably have been ready earlier, and the difficulty of making settlements satisfactory to the States and the United States with reference to ordnance property turned over would have been avoided. Also, it would have been known that all material furnished was in good order, and the confusion that resulted from having regiments in the service with arms and equipments which had to be almost immediately condemned and afterwards replaced would have been avoided.

The work at the arsenals and other ordnance establishments and the work under contract was enormously increased during a portion of the year, in consequence of the war with Spain. The greatest and most important part of the work in the origin was increasing rapidly the coast defense. Later, after the first call for troops, the duty was imposed upon the Department of arming and equipping, almost immediately, a large army of infantry, cavalry, and artillery. So long as the principal dependence in this country in time of war is on a force newly levied, it will hardly be practicable to keep on hand large supplies of equipments which in a few years will deteriorate and have to be materially modified to keep pace with improvements. The major portion of such material can, by taking advantage of the resources of Rock Island and other arsenals and numerous private establishments capable of producing it, be supplied as rapidly as troops can be mustered into service and prepared for campaign. There should, however, be on hand field and siege artillery, with carriages and a portion of the harness for 500,000 men, as such guns and carriages can not be turned out in large numbers until after about six months' preparation; but if sufficient of this material were on hand for an army of 500,000 men, the resources of the Department and the country would provide additional field and siege material rapidly enough to supply the troops as raised.

A supply of ammunition for field and siege guns sufficient for three months should at all times be kept on hand, as by the expiration of that period the plant now established at Frankford Arsenal and the one which should be installed at Rock Island would then be capable of meeting all requirements.

The question of the supply of small arms presents difficulties. Changes and improvements in such arms make it impracticable to keep even large standing armies armed with the very latest and best arms. A nation that does not keep a standing army is less likely to undergo the great cost of changing arms in store to be ready to furnish the latest patterns immediately. When the model of a rifle is changed, however, it is thought that a supply of at least 100,000 should be procured

by purchase and manufacture at the earliest moment that the resources of the arsenals and country can produce them, and machinery should be installed at Springfield and Rock Island for the production of about 2,500 stand per day. After a sufficient reserve is established, some 35,000 per year should be manufactured, as experience has shown that this number will add to the supply required as rapidly as is desirable, provided always that machinery has been installed for rapid increase of output.

The machines principally used in the manufacture of small arms are of commercial pattern, while the special cutters and other tools actuated by the machines alone, as a rule, change with the pattern of the gun. Although many arms might, if sufficient warning were given, be purchased abroad, the very best would not likely be on hand and could not be purchased in time even if they could be delivered in this country, which a state of war might render difficult. Therefore the policy of relying upon our own resources is best. In this way the arms produced would always be of the latest and best patterns. With a sufficient supply on hand for immediate issue and the installation of a large enough plant at the armories, they could be produced as rapidly as the armies could be raised and disciplined. When changes of pattern are necessary, we can hardly expect that Congress will provide for changing at once the reserve arms kept on hand, and it must always be anticipated that patterns not the very latest may have to be issued temporarily until others can be manufactured.

It is not possible to provide quickly for coast defense. Estimates should be submitted each year for so much work as the facilities of production will permit. This is the plan which has been adopted and consistently worked on for some years for providing and completing coast defense, and which could soon be finished; but the work can not progress faster than the appropriations. Large reductions from time to time have been made in the estimates of this Department, and where such reductions have occurred effort has been made to leave those which relate to material that is procured with difficulty as great as possible. Following this course, the Department had on hand at the outbreak of the war, for coast defense, more guns than carriages, because the carriages could be procured at several establishments, the guns at only two. There were more guns and carriages on hand than projectiles or powder, because these can be procured more rapidly than the guns and carriages. A well-balanced system, however, with estimates filled for all the material necessary to install the guns and carriages and provide them with a sufficient number of rounds of ammunition and with all their equipments, should be made at one time.

It was necessary to arm a large portion of the army with the caliber .45 rifle, owing to the fact that it was the only gun available in large quantities for the purpose, and that a large portion of the troops called into service were already armed with it and familiar with its use. It is not claimed by the Ordnance Department that the caliber .45 single-loader is equal to the United States magazine rifle, caliber .30, which replaced it, but it is claimed that it is by no means as inferior as has been asserted. Its simplicity and security from getting out of order under the roughest usage made it valuable to new troops. Its rate of fire is sufficient for all cases where aimed fire is to be delivered. Its extreme range—2 miles—does not differ materially from that of the caliber .30 rifle, the range for the one being 3,500 yards,

for the other a little over 4,000 yards. These latter ranges are far beyond the vision of a man for aimed firing at men, and would probably never be used. The effect of the bullet of the caliber .45 rifle is much more serious than that of the caliber .30.

The especial advantage of the magazine rifle is its reserve of five cartridges in the magazine, the very important advantage of its flatter trajectory, and the lighter weight of its ammunition, which enables the soldier to carry more cartridges. The most serious defect of the Springfield rifle during the war was the fact that at the origin nothing but charcoal powder could be furnished for it. As rapidly as possible this defect was overcome, and the manufacture of smokeless ammunition for the caliber .45 rifle was carried on extensively. The large reserve of Springfield rifles on hand will be supplied with smokeless-powder cartridges should their use become necessary in the future, a use which is not now anticipated. The arms, however, are being cleaned and repaired and made fit for service as rapidly as turned in.

Reports of officers who were in the Santiago campaign, as received by a special board which proceeded to Montauk Point to investigate the subject, confirm the excellence of the magazine rifle, caliber .30, in all respects. Notwithstanding rough usage, unusual exposure in a bad climate, which prevented the exercise of the usual care in preserving the arm, the breech mechanism is reported to have worked smoothly and well.

Investigations at different times during the last few years had led to the conclusion that there was in this country capacity for the manufacture of nearly all, if not all, the small-arm cartridges needed to meet the demands of any emergency. This expectation was realized and a greater amount of this ammunition was furnished than was needed—more than would have been needed had the war been protracted.

For many years the annual appropriations for infantry, cavalry, artillery, and horse equipments have been barely sufficient, with the utmost economy, to meet the annual consumption of the Regular Army. There was, therefore, only a small supply of them on hand at the commencement of the war. It has not been the plan of the Department to keep a very large supply of these equipments on hand, as they are subject to rapid deterioration. Instead of this it has been the plan of the Department to be prepared to manufacture a supply of the equipments as fast as armies could be raised, a portion of Rock Island Arsenal having been constructed for this purpose.

Although the buildings were available, the plant had not been installed, because of failure to procure appropriations therefor. Notwithstanding the delays encountered in getting ready for this manufacture, the Department made provision for meeting the call for equipments for the first call for troops as fast as they had been anticipated. As these troops were mainly from the National Guards of the different States, it was understood that they were well equipped, and the plans made for providing equipments were based on this supposition, which, however, was not realized. Various causes combined to increase the difficulties of meeting the demands for these equipments. Without any of these causes it is believed the Department could have been, in a month or six weeks, ahead of all requirements. The difficulties referred to above would indicate that the plan made of providing equipments for large armies raised suddenly in this country is feasible, and that in general they can be supplied as fast as troops can be raised, organized, drilled, and prepared to receive them.

One of the greatest difficulties encountered was to meet the large demands for cartridge belts. The impossibility of meeting the sudden and great demand for these belts at one time caused the purchase of a limited number of inferior pattern for temporary use until others could be procured. On August 15, 1898, the output of belts of satisfactory pattern was 7,500 per day. From April 21 to August 31 the Department procured about 250,000 sets of infantry equipments, and about 26,000 sets of horse equipments.

At the outbreak of the war, as stated, the most urgent demand was for arrangements for coast defense. But little could be done to hasten deliveries of the larger seacoast guns. Night shifts were employed, however, the force was largely increased, and the work pushed to the utmost.

It was practicable to accomplish more with regard to rapid-fire guns, and emergency orders were given for their purchase. Up to August 31 some 44 of these guns, with from 200 to 300 rounds of ammunition, were purchased and installed.

As a result of the efforts made by the Department there were delivered to the service, between April 1 and August 31, 1898, 102 seacoast carriages of all calibers.

When hostilities were apprehended the supply of powder and projectiles for seacoast guns was entirely inadequate, only about one-fifth of the supply required being on hand. Appropriations for seacoast ammunition for several years have been reduced to from one-third to one-half—in one case about one-tenth of the estimates. This, as is elsewhere stated, is due to the fact that, where appropriations had to be diminished, diminution was made in powder and projectiles rather than in guns and carriages, which take so much longer to procure. In anticipation of appropriations for the purpose of purchasing ammunition, measures were taken to procure a large supply. The powder and projectile manufacturers came to Washington and arranged to greatly increase their plants. It is evident, however, that it must be the policy of the Government to make appropriations sufficient for keeping up the supply of ammunition as rapidly as the guns can be mounted.

The plant for producing smokeless powder was so small at the outbreak of the war that it was necessary to procure all powders of any kind that could be manufactured. Thus for a time large quantities of cocoa and prismatic powders were obtained. As rapidly as possible, however, this production was diminished and that of smokeless powder increased.

No funds were available for enabling the Department to take any action for increasing field artillery for armies taking the field until April 21, 1898. With the guns and carriages on hand, the number of guns of the ten regular batteries was increased from four to six. They were also provided with the necessary harness. The four new batteries of the Sixth and Seventh Artillery were equipped with their guns, battery wagons, and harness. With the additional guns remaining on hand and those received from the States and the military schools, with the completion of caissons, carriages, harness, and implements, already in an advanced stage, the Department was able to equip sixteen volunteer batteries under the first call for troops early in the war, and was prepared to equip the remaining batteries as fast as they were ready to receive their equipment. Many of the batteries under the second call, however, were not equipped, the necessity therefor no longer existing. By August 20 the output of the Department in guns and carriages would have enabled it to arm and equip a four-gun battery every ten days.

Various depots were established to facilitate the equipment of troops. A large one was established at Tampa, Fla., for arming and equipping all organizations in that vicinity. Benicia Arsenal was used as a depot in the same manner for supplying the Philippine expedition. On the establishment of the camp at Chickamanga it was proposed to establish a depot at that point, but on conference with the Commanding General the plan of supplying troops from Columbia Arsenal was adopted. The distance of this depot from the camp, the congestion of lines of transportation, the difficulty of distributing supplies promptly and correctly, and the necessity for giving precedence for supplies for Tampa caused delays in equipping the troops at Chickamanga. Depots were established at Camp Alger, at Jacksonville, smaller depots at Atlanta, Mobile, and other points. Depots under charge of ordnance officers were also established at Santiago de Cuba and at Ponce, Porto Rico, after the occupation of these places by the United States troops. A detailed account of the very extensive issues of equipments is given in the report of the Chief of Ordnance.

The different arsenals were worked to their full capacity wherever it was practicable to obtain material and the necessary number of employees. Articles obtained by purchase, especially where haste was necessary, were often inferior, both in material and workmanship, to those produced at the arsenals, a fact generally acknowledged by contractors who examined the work. Contract stores are therefore not only expensive, but will have to be replaced sooner than those made at arsenals.

At Springfield Arsenal there were manufactured up to June 30, 1898, some 30,000 magazine rifles, 12,000 magazine carbines, an output of about 11,000 more than during the last fiscal year, but this does not show the large increase incident to the war. The maximum was not reached until August 13, when about 370 per day, or over 100,000 per year, were being manufactured. The average daily output before March 15 was about 120. This output was gradually increased to the maximum by working double shifts of men and putting them on as rapidly as was practicable. The utmost output at Springfield with the present plant would not exceed about 500 per day. This emphasizes the necessity for increasing this plant, and also establishing the plant at Rock Island Arsenal previously referred to.

The lack of sufficient capacity at Frankford Arsenal to meet the demands of the war was seriously felt. Considerable increase is now being made to the plant. The output of caliber .30 smokeless cartridges was increased from 48,000 to 180,000 per day. Of course a large amount of smokeless ammunition for this gun was purchased from private manufacturers.

The total number of seacoast guns and mortars procured from all sources up to the present time has been about 486.

The Department placed under manufacture, partly at the gun factory and partly by contract, 45 rapid-fire guns, and is now preparing to early contract for 93 rapid-fire guns, and these guns will be completed during the coming year. These, with others previously ordered, will give a total number of 336 rapid-fire guns, all of which will use smokeless powder.

The number of seacoast carriages of all patterns contracted for or ordered since October 1, 1897, is 203. The number of rapid-fire carriages of all calibers for the same period is 254. The total number of rapid-fire guns, seacoast guns, and mortars estimated to be mounted by September 30, 1898, is 447.

The 12-inch disappearing gun carriage, reported last year as the most important gun-carriage work of the year, has been completed, and it was found that the time required for firing ten rounds was sixteen minutes fifty-seven and one-half seconds, or an average of one round every one and two-thirds minutes. Considering that the amount of ammunition handled for the ten rounds was about 14,500 pounds, the rate of fire mentioned is a strong testimonial to the excellence of the results obtained. These carriages can be traversed in a complete circle by four men in two minutes, the weight being about 442,000 pounds moved through the angle.

In connection with the rapid firing to be obtained from seacoast carriages, it is believed that an arrangement can be made by which the 8-inch disappearing carriage can be elevated, traversed, and fired by one man, and steps have been taken to have such an arrangement placed on one carriage for trial.

Experiments are being made with two 3-inch field guns, one of which will be made from a single forging and the other built up in the usual manner. The first is about completed. The carriage will be of the nonrecoil type, with a suitable arrangement for a certain amount of lateral traverse, and with a spade to maintain it in a comparatively fixed position. Many minor improvements are being tried with this carriage, such as an improved brake and an improved nave box, which will protect the axles from dust and also preserve the lubricant.

A considerable amount of charcoal powder for seacoast guns had to be obtained for war supply and in order to increase the rate of supply, as there was not sufficient powder of any kind on hand at the outbreak of hostilities; but when it became apparent that there was no danger of attack to be apprehended on the seacoast, orders for this kind of powder were brought to a close.

A suitable formula for smokeless powder has been obtained for cannon of all calibers, and orders were given for its manufacture in large quantities in anticipation of hostilities. It took some time to increase the plant to the necessary magnitude, and therefore a large quantity of charcoal powder, as stated, had to be secured.

A satisfactory powder for the .45-caliber rifle had been determined upon, but, for reasons to be stated, was not available at first.

In February the manufacturers were given orders to work on smokeless powder to their full capacity. Under these orders, with the charcoal powder obtained, the amount on hand brought the supply up to a reasonably safe point. The first issues of powder for field and siege guns were made from charcoal powder on hand; but before the end of May the supply of smokeless powder was ready, and this was issued thereafter.

At the outbreak of hostilities the demand for smokeless powder for the .30-caliber rifle was so great as to preclude the diversion of any of it for the .45-caliber Springfield until a sufficient increase of plant could be made to meet the demand for both rifles. Accidents at the powder works crippled for a time their output and delayed the installation of new machinery. As soon as the increase of plant permitted, that for the .45-caliber was begun, and it replaced the black powder in the manufacture of these cartridges. Though the supply of smokeless powder for the .30-caliber was at one time rendered precarious by accident, yet it was always equal to the demand.

The supply of seacoast ammunition on hand was insufficient, as stated; but pre-

vions to the outbreak of hostilities arrangements were made to supply by June 30 about eighteen projectiles per gun for 8-inch guns, twenty-three for 10-inch guns, eighty for 12-inch guns, and about thirteen for steel mortars.

The supply of powder fairly kept pace with the supply of projectiles.

The number of companies that can manufacture armor-piercing and deck-piercing projectiles is limited, so that orders should be given to have a sufficient number of these on hand at all times.

One hundred range finders, permanent type, and 100 for secondary stations were procured. They were installed as rapidly as turned out by the manufacturers while the war was in progress. This led to some errors in the location of the instruments and in their adjustment, a matter that is being rapidly corrected at the present time.

Very respectfully,

D. W. FLAGLER,
Brigadier-General, Chief of Ordnance.

The SECRETARY OF WAR.

Statement showing amount of funds furnished the Ordnance Department, United States Army, for armament of fortifications.

For—	Amount ap- propriated by Congress to November 10, 1898.	Amount allot- ted by the President from "National defense."	Total appro- priated and al- lotted.	Amount re- quired to complete the project for sea- coast defense (exclusive of ammunition).
Seacoast guns, mortars, gun car- riages, mortar carriages, ammuni- tion, etc	\$24,789,903.00	\$7,085,035.38	\$31,874,938.38	\$28,369,707.00
Army Gun Factory plant.....	2,251,587.00	2,251,587.00
Gun-carriage plant	481,750.00	481,750.00
Total	27,473,240.00	7,085,035.38	34,558,275.38	28,369,707.00

The supply of powder was a most troublesome question at the outbreak of the war. There are only two establishments in this country which manufacture smokeless powder, and they own patents upon the process. These, however, like all other companies called to aid the Government, responded with alacrity, ran their works day and night, and produced in a short time an ample supply. The same can be said for all manufacturers of tents, clothing, all kinds of guns, cartridges, and other war material, and but for their most energetic exertions we would have been sadly deficient.

The Krag-Jorgensen, or a similar .30-caliber magazine gun, should be manufactured until we have at an early date at least 500,000 stand of those arms in our arsenals, and an ample supply of ammunition for the same. The sea-coast defense should also be brought to completion without delay, so that hereafter no emergency will find us unprepared to meet it.

In this connection attention is called to the difference in the caliber both of the heavy guns and small arms in the Army and Navy. In my judgment they should be alike in both branches of the service, to enable either branch to supply the other with ammunition. The reasons for this are too patent to need elaboration.

SIGNAL SERVICE.

WAR DEPARTMENT, SIGNAL OFFICE,

Washington, October 24, 1898.

SIR: I have the honor to submit the following summary of the essential points of my annual report:

MILITARY TELEGRAPH CABLES.

The necessities of war enlarged the operations of the Signal Corps more than those of any other part of the Army, increasing the corps twentyfold—from an aggregate of 60 to 1,300. The insistent demands for electrical communication left no leisure to the Signal Corps, whose active operations have extended to the Philippines, Porto Rico, and Cuba. Armies in the field, equally with the great military camps of the United States, have never waited for their individual system of electrical intercommunication.

The national policy that left electrical communications of the Army to a corps of 10 officers and 50 men likewise restricted its appropriations, so that less than \$1,000 was available at the beginning of the war, and not exceeding two men were stationed at any single place. The supplementary system of details in the line broke down absolutely, as the Chief Signal Officer has repeatedly pointed out it always has in past campaigns.

The important work of the Signal Corps waited for allotments from the national defense and the authority of Congress for a volunteer corps, both of which came so late as to threaten serious deficiencies in the operations of the corps, but fortunately the high professional standing and ability of the regular officers appointed to the highest grades, reenforced by the practical skill and knowledge of the regular sergeants promoted to second lieutenants, made the untrained material valuable in a wonderfully short time, a result that depended very largely on the intelligence and skill of the volunteers of the Signal Corps.

The first important work was a system of military telegraph cables between the adjacent forts in the neighborhood of important cities, thus perfecting the electrical intercommunications that the Chief Signal Officer had urged unavailingly on Congress for the past six years. Cables have been laid near Boston, New York, Philadelphia, Washington, Newport, R. I., Charleston, New Orleans, and are on the ground for San Francisco.

ELECTRICAL INSTALLATION AT ARMY POSTS.

On the approach of the war the electrical installations for the fire-control system, an absolutely necessary adjunct of disappearing guns, developed an important duty on the Signal Corps, which has promptly carried out the plan. Electrical communications between the range, control, and firing officers have been provided for every

battery established, and such instruments furnished as have been indicated to the Chief Signal Officer. In connection with this work the Signal Corps has performed any duties connected with electrical work at artillery posts, temporary camps, or elsewhere demanded by public interest.

PROPOSED HAVANA CAMPAIGN.

With the assembly of an army in Florida, the Chief Signal Officer brought together every available signal corps man, and supplemented them by details from the line. The promotion of sergeants left only 30 skilled signal men, and the enlargement in time of war of this corps necessarily produced an organization far below the high standing set for the regular establishment. Herculean efforts on the part of the officers supplemented the lack of time, and the adaptability of the American soldier contributed its share, so that the work of the corps was satisfactory, though, doubtless in some instances its efficiency could have been increased.

MANILA CAMPAIGN.

The organization of a force for operations in the Philippines, necessitated the withdrawal of officers and men from Florida. As the Pacific coast had been stripped of men and available material, the work of the organization was hampered. The corps was, however, able to furnish Lieut. Col. Richard E. Thompson and Maj. George P. Scriven, both Spanish speaking officers, with an effective force suitably equipped by a lavish expenditure of money and energy. Official reports indicate that Lieutenant-Colonel Thompson and his command have justified the confidence imposed in them, and in addition to the efficient discharge of ordinary duties, have contributed their share to the luster gained by the American arms in the far East. The war cable was laid in the harbor, and at a suitable time the English cable to Hong-kong repaired. Telephonic and telegraphic connections were maintained in garrison and field, and the Signal Corps carried its lines into advanced trenches, repaired them under fire, and in the final assault ran a flying line up the open beach and established an advance station. In addition, a signal detachment led the army with signal flags displayed so that the fire of the navy would fall in advance of the army, and displayed these flags as the first emblems of the United States in the enemy's forts. The gallantry and efficiency of Lieutenant-Colonel Thompson and officers and men of the Signal Corps have attracted the attention of the commanding general of the Philippines expedition, and have received notice at the hands of the President.

VOLUNTEER SIGNAL CORPS.

As the regular corps could not furnish even one officer to each authorized army corps, Congress authorized a volunteer Signal Corps for 21 divisions, but only 17 divisions were provided for. The principle on which this corps was organized determined its subsequent efficiency in the field. Congress restricted two-thirds of the appointments to skilled electricians and operators, and both the President and Secretary of War supported the desires of the Chief Signal Officer to make it a corps d'elite. The regular officers, selected originally by competition, filled the field positions. They were without exception in the prime of life, thoroughly skilled in specialties, admirably fitted for administrative duties, and so capable of arduous

campaigning that not a single officer was invalided during the war, whether at Santiago, Porto Rico, or Manila. Subordinates were procured from lieutenantancies in the regular line, from graduates of West Point in civil life, from trained sergeants of the Signal Corps, and most of the others were selected from men trained in electrical pursuits, with especial ability necessary to success. Time failed for examination and the appointments were made by selection. The corps was not only organized in thirty days, but one company was put in the field before Santiago de Cuba. Almost without exception the officers proved efficient, and the enlisted men challenged any other corps to produce their equals.

SANTIAGO DE CUBA CAMPAIGN.

The work in connection with this campaign consisted, first, of electrical communications between the War Department and Santiago de Cuba; second, signal work proper, and third, war ballooning.

The establishment of electrical communications with the Fifth Army Corps at Santiago was an extremely important and difficult piece of work, which was fortunately facilitated by the previous requests of Major-General Miles that the Chief Signal Officer should arrange similar communications for the Havana campaign. Under the personal direction of the Chief Signal Officer, the field work was done by Col. James Allen, whose executive and administrative efforts, both while acting under the orders of the Chief Signal Officer, and also while acting independently in the field, were characterized by an energy, skill, and intelligence that marks him as an officer of no mean ability. Cables had to be manufactured to order, steamer chartered, cable gear obtained, and the Chief Signal Officer opened negotiations with commercial telegraph companies whereby the whole system would be harmonious. As a result of two months' labor, the Signal Corps opened a station at Cainanera, Guantanamo Bay, June 20, a day in advance of the landing of General Shafter's army, and within five minutes telegraphically of the Executive Mansion and War Department. Later, Colonel Allen furnished General Shafter's army with material for field telegraphs to replace those left at Tampa, repaired the French cable, and later, laying a signal-corps cable, opened up communication with General Shafter's headquarters, placing it within twenty minutes of the War Department. The discouragements, difficulties, and hardships involved in this work were such as to make its successful completion a source of congratulation to every American.

Prior to the establishment of this system of electrical communication, Colonel Allen had been engaged in destroying the enemy's cables off Santiago, with a chartered ship only partially equipped and working within range of the enemies batteries. Two cables were raised and broken or cut—one from a depth of 5,000 feet and the other in a depth exceeding 6,000—under conditions that make this a notable achievement, which was possible only by the unremitting zeal and persistency of Colonel Allen and his subordinates. Off Santiago all cables except one leading from Cuba were interrupted, the work being continued until the bombardment of the forts. The cable steamer was then so exposed to the enemy's fire that the captain and crew refused to longer navigate the vessel, the work of cable cutting being done by Colonel Allen's military force. Brevets have been recommended for Colonel Allen and Capt. M. L. Hellings for this work under the fire of the enemy.

TELEGRAPH AND SIGNAL WORK AT SANTIAGO.

These operations were under Lieut. Col. Frank Greene, Chief Signal Officer Fifth Army Corps, who worked under the disadvantages involved under orders to leave the field telegraph section at Tampa. The successful installation and operation of telephone and telegraph lines between the headquarters of the commanding general and his subordinate commanders and supply depot, as well as cable to Washington, depended primarily on material supplied by Colonel Allen, independent of the Fifth Corps, which had been provided by the Chief Signal Officer of the Army, who foresaw the absolute necessity of telegraphic facilities in such a country. Telephone lines were constructed as rapidly as the commanding general advanced, and the lines were operated continuously and successfully in range of the fire of the enemy and all other adverse conditions, and ultimately the lines extended along the whole front of the army, stations being maintained in trenches within 400 yards of the enemy's lines.

MILITARY BALLOONING.

Lack of funds made it impossible for the Signal Corps to supply in time new balloons, and the balloon in the Santiago campaign was one made by the Signal Corps with most limited accessories. The balloon party landed June 28, and three ascensions were made, on June 30, under Colonel Maxfield's directions, at suitable points without range of the enemy's fire, which resulted in increased knowledge as to the direction and course of such roads and streams as had remained undiscovered during the previous week.

The ascent of July 2 was made at a point designated by the chief engineer officer, Fifth Army Corps, Lieutenant-Colonel Derby.

The utility of the balloon was then demonstrated, and as Brigadier-General Kent, in his official report, says:

"Lieutenant-Colonel Derby, of General Shafter's staff, met me about this time and informed me that a trail or narrow way had been discovered from the balloon a short distance back, leading to the left to a ford lower down the stream."

This discovery relieved the congested conditions of the main road and allowed the speedy delivery of troops of this brigade in their proper place.

TELEGRAPH CENSORSHIP.

A most responsible as well as a most delicate duty of the Chief Signal Officer was the exercising, not of press censorship, but of telegraph censorship, principally over the cables whose operations are conducted on American soil.

Thanks are due to the officials of the Western Union Telegraph Company, the Commercial Telegraph Company, the United States and Hayti Cable Company, the French Telegraphic Cables Company, the Mexican Telegraph Company, the Direct Cable Company, and the Anglo-American Cable Company for the loyal spirit displayed by their presidents and prominent officials and for their hearty cooperation in many emergencies. Cipher dispatches were forbidden to the West Indies and any messages in plain text which conveyed important information concerning military operations or such as were detrimental to the interests of the country. The Associated Press and Sun Press Association and the great daily journals of the

country not only held up the hands of the Chief Signal Officer in this duty, but also refrained at critical times from publishing information detrimental to the public interests. All messages to or from the West Indies were carefully supervised. Through the Signal Corps censorship a rich harvest of information was reaped from the telegrams of newspaper correspondents, blockade runners, merchants, personal dispatches, etc.

While hundreds of improper messages were quietly deposited in the wastebasket, others were allowed to pass freely as leading up to other and more valuable information. Thus was gained information as to operations of blockade runners, the activity of Spanish agents, and the movements of Spanish ships. The most valuable service rendered by the Signal Corps was the announcement to the President and the Secretary of the Navy on May 19 that Admiral Cervera's squadron had that very day entered the harbor of Santiago, information due to the extraordinary activity and intelligence of Colonel Allen, of the Signal Corps. Fortunately for the country the President and Secretary of the Navy were both alive to the situation, and, acting on the reports and representations made to them by the Chief Signal Officer, gave orders the very next day that led to the blockading of Santiago and the ultimate destruction of Cervera's squadron. As has been officially said by Secretary Long, all military and naval movements depended upon the locating of this fleet, and on this information was based the plan of the Santiago campaign, which ended the war.

It is an interesting anticlimax that Colonel Allen also reported to the Chief Signal Officer the destruction of Cervera's fleet, and this information was conveyed to the President fourteen hours in advance of other official advice.

PORTO RICAN CAMPAIGN.

The work of the Signal Corps in this campaign affords a beautiful example of the rapidity and efficiency with which electrical communications can be established and maintained between military posts and advancing armies when the commanding general of such armies takes proper equipments. Colonel Allen, in general charge of the Signal Corps work, added to his laurels gained in the Cuban campaign, and the efficient services rendered by Lieut. Cols. Samuel Reber and William A. Glassford kept in direct communication the commanding general, Major-General Miles, with every advance command with which speedy communication was desired. As a consequence, the peace protocol reached the outposts of Generals Brooke, Wilson, and Henry within thirty-three minutes of the time it was received at Ponce, and thus prevented battles at two points where the troops were moving out. Such was the activity of the Signal Corps that at the date of the peace protocol it was operating 170 miles of line, covering nearly one-half of Porto Rico, and more than 200 messages were handled daily at Ponce alone.

FLYING-TELEGRAPH LINES.

At every large camp within the limits of the United States has been established an independent system of either or both telegraph or telephone lines whereby commanders have direct communication with subordinate headquarters, quartermasters, hospitals, etc. Similar facilities have been arranged for the great military

hospitals. In these operations more than 250 miles of line have been built and operated. It is gratifying to report that the flying-telegraph system has stood successfully the test of camp service and field campaigning.

TELEGRAPH LINES OF CUBA AND PORTO RICO.

As these lines belonged to Spain, their ultimate disposition is a matter which rests on future legislation. At present, however, these lines are under the administration of the Signal Corps of the Army. Such reconstructions and repairs are being made of Cuban lines as are necessary for military administration. The question of connecting Porto Rico with Cuba by cable is worthy of attention. A cable could be laid from Porto Rico to Mayaguez for about \$600,000, and for \$50,000 the lines between Santiago de Cuba and Havana could be put in first-class condition. This would bring Cuba and Porto Rico in communication with the lines of the International Ocean Telegraph Company, an American corporation operating cables to Florida.

OFFICE OF THE CHIEF SIGNAL OFFICER.

This office, undermanned at the beginning of the war, has been subjected to a tremendous strain in doing its work. The necessity of providing a proper permanent clerical force should receive prompt and favorable action of Congress.

APPROPRIATIONS AND ESTIMATES.

Several years since the appropriations for the Signal Corps were reduced from \$22,000 to \$18,000, this seriously crippling the service. Out of the very liberal appropriations made by Congress for war purposes there will remain nearly \$200,000. Reasonable appropriations in times of peace are however far more efficient for public purposes than the most lavish in times of war.

REGULAR SIGNAL CORPS.

The necessity of reorganizing and enlarging the Signal Corps of the Army is beyond question. The regular Signal Corps now consists of 1 brigadier-general, 1 colonel, 1 lieutenant-colonel, 1 major, 5 captains, 1 first lieutenant, and 50 sergeants. It should be increased by 1 colonel, 1 lieutenant-colonel, 2 majors, 5 captains, 9 first lieutenants, 40 first-class sergeants, 50 corporals, 250 first-class privates, and 50 second-class privates. Original vacancies should be filled from officers who have served in the war, and no officer should be appointed until he has been approved by a Signal Corps board as to his physical, moral, and mental qualifications. The high standing of the regular officers has insured during the present war the efficiency of the corps, and its future can only be assured by similar restrictive methods, which should insure the highest order of ability in the Army.

THE LIBRARY AND WAR DEPARTMENT DOCUMENTS.

The library has proved of great utility to the Army, although the demands upon it have been necessarily intermittent during the war. The librarian should receive a salary of \$1,600 and have two assistants, the present system of detailing temporary clerks being more expensive and less efficient than would a regular assignment.

Action was taken by the Chief Signal Officer to insure the printing and distribution of such military works to the Volunteer Army as are indispensable for instruction

and drill. More than 100,000 copies of such publications, for the use of the Volunteer Army and National Guard, have been printed and distributed.

Congressional legislation is recommended so that the National Guard may be permitted to purchase military publications, such as Army Regulations, Infantry Tactics, and the Service Manuals.

A. W. GREELY,

Brigadier-General, Chief Signal Officer of the Army.

The SECRETARY OF WAR.

The skill and perseverance displayed by the Signal Corps are worthy of commendation, and the excellent work performed is duly recognized.

The recommendations of the Chief Signal Officer are commended to the favorable consideration of Congress.

RECORD AND PENSION OFFICE.

RECORD AND PENSION OFFICE, WAR DEPARTMENT,

Washington City, October 20, 1898.

SIR: In compliance with your instructions, I have the honor to submit the following summary of my annual report, dated the 1st instant:

During the fiscal year ended June 30, 1898, as in former years since the organization of the Record and Pension Office, the public business was promptly dispatched, more than 95 per cent of all cases received having been disposed of within twenty-four hours from the time they reached the office, and at the close of business hours on the last day of the fiscal year not one case remained unacted upon.

One hundred and ninety-three thousand two hundred and ninety-six cases were received during the fiscal year, being a large increase over the receipts for the preceding fiscal year, showing a corresponding increase in the current business of the office. This increase is distributed among all classes of cases with which the office has to deal, including applications for "remuster" under the act of February 24, 1897, calls from the Commissioner of Pensions and the Auditor for the War Department for the military histories of former officers and enlisted men, desertion cases, and the general correspondence of the office.

The "remuster" cases arise under the act of Congress approved February 24, 1897, "to provide for the relief of certain officers and enlisted men of the volunteer forces" in service during the war of the rebellion. This act was adopted as a substitute for the similar act of June 3, 1884, and the acts amendatory thereof, which expired by limitation June 3, 1895. The old law provided for payment for services rendered as commissioned officers by persons who were not recognized by their muster into service as of the grades to which commissioned at or for the time the service was performed, and it also gave to its beneficiaries a pensionable status. The new law confers the same material benefits, and, in addition, recognizes the persons to whom it is applied as having been in the United States military service in the grades to which they were commissioned from the dates upon which they entered upon duty, under the conditions specified in the law, or otherwise fulfilled the requirements of the law.

During the fiscal year 5,038 applications were received for removal of the charge of desertion under the provisions of the act of Congress approved March 2, 1889, and

the acts amendatory thereof. These applications, however, do not include the cases in which the charge of desertion was incidentally encountered and considered under the law without a formal application therefor. This latter class of cases exceeded the former class in number, the incidental cases having numbered 7,897, making a total of 12,935 cases adjudicated during the fiscal year under the provisions of the act referred to.

By an act approved January 26, 1897, "for the relief of telegraph operators who served in the war of the rebellion," the Secretary of War was "authorized and directed to prepare a roll of all persons who served not less than ninety days in the operation of military telegraph lines during the late civil war, and to issue to each, upon application, unless it appears that his service was not creditably performed, or to the representatives of those who are dead, suitable certificates of honorable service in the military telegraph corps of the Army of the United States." * * * It was provided in the enactment that it should not be construed to entitle its beneficiaries to "any pay, pension, bounty, or rights not herein specifically provided for."

By direction of the Secretary of War the Record and Pension Office was charged with the preparation of the certificates provided for by the law, and with their transmission to the persons entitled thereto, as well as with all correspondence or other details in connection with the subject. One hundred and twenty-eight certificates were issued up to the end of the fiscal year.

The work of reproducing the individual military and medical records of the officers and enlisted men of the volunteer forces by the index record-card system has been prosecuted with all of the clerical force available for the purpose, and such progress has been made as the nature of the records would permit. The great mass of the volunteer records of all wars in which the country has been engaged (except those of the recent war with Spain, which have not yet been filed in this office) have been carded, and the work during the past year has been generally confined to records of a miscellaneous character, difficult of reproduction, and the transcription of which is necessarily slow, but which it is important should be included in the general system of index-record cards.

The index-record card work for the fiscal year included the preparation of 637,633 military cards (479,811 of this number were a consolidation of 2,898,781 cards made from monthly returns) and 9,067 medical cards, making, with the number prepared in prior years, a total of 40,215,914 of the former and 6,970,663 of the latter class, aggregating 47,186,577 index-record cards prepared up to and including June 30, 1898.

One object of the transfer of the records of the Revolutionary War and the War of 1812 to the War Department, as announced in the act approved August 18, 1894, providing for their transfer, was that they should be "prepared for publication." Congress will doubtless make the necessary appropriation for the publication of these records at the proper time, but it is clearly not advisable to undertake the publication of any portion of them, especially of those relating to the individual histories of officers and enlisted men, until the compilation shall have been completed and every available source of information shall have been exhausted. In view of the difficulties encountered and the consequent slow progress of the work of compilation, the date of the contemplated publication is necessarily uncertain and can not even be approximated with any degree of accuracy, but it is evident that the date of publication is still somewhat remote.

It is due to the employees of this office to state that the prompt and satisfactory dispatch of the business of the office is the natural result of the commendable industry, faithfulness, and zeal which they display in the performance of their respective duties.

Very respectfully,

F. C. AINSWORTH,

Colonel, United States Army, Chief Record and Pension Office.

The SECRETARY OF WAR.

HALL OF RECORDS.

Section 8 of the act "to provide for temporarily increasing the military establishment of the United States in time of war, and for other purposes," approved April 22, 1898, provides:

That all returns and muster rolls of organizations of the Volunteer Army and of militia organizations while in the service of the United States shall be rendered to the Adjutant-General of the Army, and upon the disbandment of such organizations the records pertaining to them shall be transferred to and filed in the Record and Pension Office of the War Department. And regimental and all other medical officers serving with volunteer troops in the field or elsewhere shall keep a daily record of all soldiers reported sick or wounded, as shown by the morning calls or reports, and shall deposit such reports with other reports provided for in this section with the Record and Pension Office as provided herein for other reports, returns, and muster rolls.

As indicated in the above-quoted law, there will soon be a large increase in the records and files of this Department, and the need for additional office room is very urgent. Immediate provision to meet the needs of the Department is necessary, and in this connection the statement on this subject contained in my last annual report is repeated:

The departments are crowded with files of official papers to the detriment of the working force and the serious inconvenience of the public business. Costly public buildings erected for office purposes should not be used for storage. The files not in current use should be stored elsewhere. A hall of records becomes more and more necessary each year.

The superintendent of the State, War, and Navy Department building, in his report for 1896, submitted the following remarks on this subject:

The accumulation of records in this building not only displaces space needed by clerks, but adds considerable weight upon the floors. Some of these records are rarely referred to, while others may be frequently called for. All are too valuable to be destroyed. The corridors of the State Department are stacked with records, not only in a comparatively exposed place, but obstructing the corridor. The log-books and other records of the Navy Department, most of which have only a

historic value, have already filled the space allotted and are still accumulating. The records of the War Department are quite as bulky as those above mentioned. From the report of the Quartermaster-General for 1880, I quote the following:

"The papers relating to the claims filed in this office are very bulky and are valuable. They contain the evidence for and against claims reported above as amounting, on 1st of July last, to 12,778 miscellaneous claims and accounts, \$6,947,000, and 11,676 claims under act of 4th of July, 1864, \$5,960,172.55.

"A fireproof storehouse of simple and cheap construction could be built on some place convenient to the executive offices for about \$200,000, which would afford perfectly safe and convenient storage for such of these papers as have been finally disposed of, and for such others as are seldom consulted. Telegraphic or telephonic communications with the superintendent would bring to every office in a few minutes any paper needed for reference."

It will be observed that the remarks quoted contemplate the erection of a building, and while this is necessary to secure a suitable fireproof structure, the contingency mentioned will be a reality before a building can be erected, and therefore it will be necessary, for the present, to rent the most suitable building that can be obtained. The Lemon Building, on New York avenue, between Seventeenth and Eighteenth streets, has been rented for \$6,000 per annum. The building is five stories, with windows on all sides, and well adapted for office purposes, but not fireproof. It is, however, completely occupied by several of the bureaus of the Department, and more room will soon be needed for the records of the Volunteer Army.

WAR RECORDS OFFICE.

WAR DEPARTMENT, WAR RECORDS OFFICE,

Washington, October 1, 1898.

SIR: I have the honor to submit the following summary of the annual report of the Board of Publication of the Official Records of the War of the Rebellion:

The publication was carried forward; six books were published and four put in type during the fiscal year. Series I is now completed, save two volumes reserved or future supplemental matter.

The office has received 108,357 books and 60,000 atlas plates during the year. Of these all the plates and 99,727 books were distributed, leaving an increase of 8,630 in the number stored in the War Department unclaimed, amounting now to 67,505 books and 105,015 plates of the atlas. A general distribution of these books and plates can only be made by authority of Congress, and it is respectfully recommended that such authority be requested.

There was appropriated for the service of the last fiscal year, \$145,380, of which was expended \$127,291.05, leaving a balance of \$18,088.95, against which there are outstanding obligations estimated at \$10,147.84.

The appropriation for the current year is \$94,080.

There are now 22 civilian employees on the rolls of this office—less than one-third of the number given in the last annual report; and this reduction has been accomplished without material decrease in the capacity of the office.

Respectfully,

F. C. AINSWORTH,

Colonel, United States Army, President of the Board of Publication.

The SECRETARY OF WAR.

The recommendation of the president of the Board of Publication of the Official Records of the War of the Rebellion is concurred in, that Congress authorize a distribution of the volumes of this publication and the plates of the atlas now stored away, and occupying space needed for other purposes.

THE BATTLEFIELD COMMISSIONS.

WAR DEPARTMENT,

GETTYSBURG NATIONAL MILITARY PARK,

Gettysburg, Pa., October 24, 1898.

SIR: The Gettysburg National Park Commission respectfully submit the following summary of their work at Gettysburg, with suggestions for its successful prosecution and completion:

Crawford avenue has been completed, leading northward from Devil's Den through the Valley of Death and across Plum Run to the Wheatfield road. The bridge over Plum Run was constructed in the same substantial style as the others which have been built on this field.

The Commission having heretofore given attention to the avenues of the park on the Second and Third Days' field have thought it proper this year to look after those on the First Day's, and have entered into contracts for the construction of Reynolds and Howard avenues, which mark the lines respectively of the First and the Eleventh Corps of the Union Army and are together nearly 3 miles long. Howard avenue is finished. It leads from the Harrisburg road near Rock Creek westward by Barlow's Knoll to the Mummasburg road, is 20 feet wide, and constructed on the Telford plan in the best manner. Reynolds avenue is in two sections. Section 1 is about completed, and section 2 will be finished early next spring.

A number of other avenues mentioned in previous reports are urgently needed to render accessible important parts of this battlefield. The Commissioners would have pushed them this year but for the lack of adequate means. Among them are the avenues on the Cavalry field and the road leading there.

The Commission long since constructed Telford avenues along the Confederate battle line of the second and third days' fight on Seminary Ridge, on each extreme of said line, the left of Hill's corps and the right of Longstreet's, aggregating over 3 miles in length. Between these two parts of Confederate avenue there is a gap of 2 miles along the left of Longstreet's corps and the right of Hill's, across which the Commission have been very anxious to construct the link needed to connect the two extremities aforesaid, and thus complete the Confederate avenue from

the Chambersburg pike, northwest of the town, southward and eastward to Round Top, a distance of 5 miles.

No part of this battlefield is more interesting than the part covered by that gap in the Confederate avenue. Not only did important movements of the second day's battle originate there, but it was there the Confederate column of the third day under Longstreet was formed and began its advance on that final charge led by Pickett, so sublime in its daring and so tragic in its fate.

There is no part of this battlefield so inaccessible as this. Encumbered by bushes and briars and cross fences, with not even an open footpath over it, visitors here never see this ground.

The Commission have not constructed this avenue because the Government does not own the land, and the owners ask exorbitant prices which the Secretary of War and the Commission do not feel justified in paying. Most of it is owned by a land company, and the price they ask is \$500 an acre, or \$400 per acre if the Government will buy their entire holdings of 1,000 acres or more, either of which prices is more than ten times its market value. More than two years ago the Secretary of War instructed the Commission to begin proceedings in the circuit court to condemn the lands needed for said avenue, together with some adjacent woodlands which it was important to preserve, the area being 105 acres, and the said proceedings were begun at once and are still pending. A jury of view was appointed, inspected the lands, heard the testimony offered on both sides, and made an award that was liberal to the respondents, ranging from \$46 to \$200 per acre, but they appealed to the court in term at Philadelphia, and have since resorted to vexatious delays and continuances, so that the case is still pending and undetermined. Thus this important part of the Confederate lines is prevented from being opened and the military positions on it fixed and marked as intended by the Government.

The Commission wish to emphasize the fact that the main hindrance to marking Confederate lines and positions, not only on the grounds just above spoken of, but on almost all of this field—as was the intention of Congress in establishing the Gettysburg National Park—is that the lands whereon said lines and positions are situated are not yet owned by the United States. Prompt action by the courts in condemning the needed lands when held at exorbitant prices, and liberal appropriations by Congress for the purchase of lands which can be bought at reasonable rates, are the two main requisites for the realization of the patriotic purposes of the Government with reference to this battlefield.

The positions of the United States regular troops in this battle, consisting of 11 regiments of infantry, 4 regiments of cavalry, and 22 batteries of artillery, have been accurately located, and are carefully noted on the maps and on the ground by markers, so that when the Government shall take steps to erect monuments to these troops, which their gallant services here entitle them to, there will be no difficulty in placing them.

Handsome and durable iron tablets with appropriate inscriptions are erected on substantial iron pillars designating and briefly describing the services rendered by each of the following Confederate batteries, the respective positions of which have been marked for some time by mounted guns of like caliber as those of which each battery was composed, viz:

Taylor's Virginia Battery, Woolfolk's Ashland (Va.) Artillery, Parker's Virginia Battery, and Jordan's Bedford (Va.) Artillery, of Alexander's Battalion. Manly's North Carolina Artillery, Fraser's Pulaski (Ga.) Artillery, McCarthy's First Richmond Howitzers, and Carlton's Troop (Ga.) Artillery, of Cabell's Battalion. Bachman's German (S. C.) Artillery, Garden's Palmetto (S. C.) Light Artillery, Latham's Branch (N. C.) Artillery, and Reilly's Rowan (N. C.) Artillery, of Henry's Battalion. Johnson's Virginia Battery, Rice's Danville (Va.) Artillery, Hurt's Hardaway (Ala.) Artillery, and Wallace's Second Rockbridge (Va.) Artillery, of McIntosh's Battalion. Cunningham's Powhatan (Va.) Artillery, Watson's Second Richmond Howitzers, and Smith's Third Richmond Howitzers, of Dance's Battalion.

The above are all the Confederate batteries which occupied positions on ground of which the title has yet been acquired by the Government.

Inscriptions are prepared and tablets of iron similar to those mentioned above will shortly be erected to designate the positions and briefly describe the evolutions and achievements of the following Confederate infantry commands, viz:

Kershaw's Brigade of McLaws's Division, and with its Second, Third, Seventh, Eighth, and Fifteenth South Carolina and Third South Carolina Battalion; Semmes's Brigade of McLaws's Division, with its Tenth, Fiftieth, Fifty-first, and Fifty-third Georgia regiments; Anderson's Brigade of Hood's Division, with its Seventh, Eighth, Ninth, Eleventh, and Fifty-ninth Georgia regiments; Benning's Brigade of Hood's Division, with its Second, Fifteenth, Seventeenth, and Twentieth Georgia regiments; Robertson's Brigade of Hood's Division, with its First, Fourth, and Fifth Texas and Third Arkansas regiments; Law's Brigade of Hood's Division, with its Fourth, Fifteenth, Forty-fourth, Forty-seventh, and Forty-eighth Alabama regiments.

The method of marking the positions of troops on this field, as approved by the War Department, is to place the principal tablet or monument of each command at the position occupied by the command in the main line of battle, and to mark the several important positions subsequently reached by each command in the course of the battle by ancillary tablets with appropriate brief inscriptions giving details and noting the day and hour as nearly as possible.

The Confederate commands above mentioned are the only ones whose chief positions were upon ground now owned by the United States and are therefore the only ones which can be marked until the Government shall acquire the lands on which they formed and fought.

The Commission are much gratified to notice an awakening of interest in influential quarters among the people of the Southern States concerning this battlefield and the importance of erecting monuments to commemorate the heroism of their soldiers here, as the people and States of the North have done, and it is hoped that Congress will recognize and foster this praiseworthy sentiment springing up in the South by liberal appropriations needed to purchase and acquire title to the lands on which the Confederate troops operated and where their monuments must be placed.

They feel warranted in declaring that the Gettysburg National Park, though yet incomplete, is already the best marked battlefield in the world, and to all those who desire to understand the character and the extent of the work they say, Come and see.

While the Commission are satisfied that they could judiciously and economically

use, during the next year, a much larger sum, they earnestly request and recommend that not less than \$75,000 be appropriated.

JOHN P. NICHOLSON,
WM. M. ROBBINS,
CHAS. A. RICHARDSON,
Commissioners.

HON. RUSSELL A. ALGER,
Secretary of War.

WAR DEPARTMENT,
CHICKAMAUGA AND CHATTANOOGA NATIONAL PARK COMMISSION,
Chattanooga, Tenn., October 26, 1898.

SIR: I have the honor to submit for your consideration a synopsis of the Annual Report of the Chickamauga and Chattanooga National Park.

Notwithstanding the occupation of the Chickamauga section of the park by the National troops during most of the season just closing, an unusual amount of monument work of a high grade was undertaken by the State commissions. The States of Wisconsin, Illinois, Kentucky, and Georgia have each been engaged in erecting general monuments for their respective States, which are in addition to the monuments and markers to individual organizations. This work made a new departure in State work, as this has heretofore been confined chiefly to monuments commemorating regiments and batteries. The information of the commission indicates that from this time forward there will be earnest rivalry among the States in this matter of general monuments.

The State of Illinois is erecting two of this class, one on Missionary Ridge, near Bragg's headquarters, of most commanding proportions, and a second on Orchard Knob. Georgia has nearly completed the most imposing shaft on the Chickamauga field. Kentucky will, next month, dedicate a monument of unique character, there being no other like it in the park. It commemorates both Union and Confederate troops, and the design is striking and most interesting. Wisconsin has completed a fine State monument on Orchard Knob. Indiana has secured locations for two of most imposing proportions. New York has completed two, one on Orchard Knob, and one on the Hooker battlefield on Lookout, which are not exceeded by any of their class in the country, and the commission of that State has prepared designs for a general monument on Lookout, to cost \$50,000. All of these are of granite and bronze.

In addition to this work, Tennessee has erected 47 markers of beautiful design; Georgia has placed 55, which are really monuments; Indiana has erected 50, and 25 more await their turn. Wisconsin is also preparing to erect markers on Missionary Ridge. The State of New York has also secured sites and is erecting monuments throughout Lookout Valley, where her troops were engaged under General Hooker; and also at Ringgold, Ga., at the extremity of the Government road which reaches that battlefield from Chickamauga. This is all work of the very first class, and it is to be followed by the location of markers on these fields by several of the other States whose troops were there engaged. Measures are in process for adding these sites to the park for a nominal consideration.

At the opening of the season the entire park tract was in excellent condition. The roads were resurfaced during the damp weather of the winter and early spring, and the spring burning of the leaves in the forests had finally very nearly overcome the sprouting of underbrush. All the dead timber had been cleared out of the forests. In short, if it had been known in advance that an army was to occupy the park it is difficult to see how the entire tract could have been put in better shape than the troops found it upon their arrival.

From the first week of April, when it was determined to assemble the regulars at Chickamauga, until the present time, the labors of the park force have been mainly directed, under your orders, to assisting in securing the comfort and convenience of the troops. Upon learning that the regulars would begin to arrive April 14, a large supply of wood was gathered from the park, and teams procured to haul it, until the wagon transportation on the way could be set up and made ready for use, and the quartermaster could procure wood under the regular methods of advertising for proposals and awarding contracts. The park force in this way furnished the 7 regiments of infantry, 6 of cavalry, and 10 batteries with wood for ten days, and in the meantime hauled the baggage of a number of the commands.

Lumber was also furnished for floors of all hospital tents, and water barrels from the park water supply for each hospital, for regimental headquarters, and for each company mess. Later, all of these liabilities were assumed and paid by the chief quartermaster. The regulars were in the park from the middle of April until after the middle of May. The water supply was abundant, and the same as afterward caused much complaint on the part of volunteers. It consisted of nine artesian wells and four bold springs of inexhaustible capacity. These latter, in addition to the drafts upon them for the men, furnished the horses of the six cavalry regiments and of the ten batteries, together with all the mules of the trains. There was no serious sickness among the regulars, and only one death. This healthful condition was the same as with the regulars assembled at the time of the dedication of the park, when some 1,200 were camped here for a month without a single patient in the hospital. The conditions were the same with the two companies of regular artillery which were brought one year since from near New Orleans to escape yellow fever and remained through the remainder of autumn without sickness.

Upon notification that 50,000 volunteers were to be assembled in the park, the necessity of rapidly perfecting their drill made it imperative to use the open grounds where the regulars had camped for drill grounds, and put the camps in the forests, of which there were about 5,000 acres in the park. These were, however, very open woods, with all underbrush cut out, and grass growing everywhere. The average number of trees to the acre is about 60, and shade just sufficient for comfort in the hot months. The surface soil is mixed with gravel, and after rains camps became speedily dry. There was no part of this wooded surface that the sun did not reach some time during every clear day. These statements as to the camps in the woods seem pertinent in view of the widespread misrepresentations of this feature of the encampment.

Placing the camps in the forests left about 2,000 acres of open fields for drill purposes. With the large force present, even this area was barely sufficient for the work in hand of rapidly preparing a large army for active field service.

As the wells in the park had been arranged for the visiting public, they were mainly in the open grounds in the western portion of the park. Four of the five large springs of the park were also in this section. It therefore became necessary to provide a supply in the forest section, and work with this end in view was at once undertaken and pushed to completion with great energy by the engineer of the park. During the encampment twenty-seven additional wells were drilled through the solid rock underlying the park. By casing and surrounding the wells at the surface with masonry set in hydraulic cement, surface contamination was rendered impossible.

While this work was in progress an emergency pipe line, designed primarily to provide water for cooking, for the large number of animals, and for washing, was recommended and authorized by the Secretary of War, and constructed by the engineer of the park. The intake was established on Chickamanga Creek at the farthest point of park ownership of the stream, and above any possible wash from the camps, in spite of all that has been asserted to the contrary. This stream is fed entirely from mountain springs, and the valley it flows through is exceptionally clean and wholesome. Ten miles of mains and laterals were expeditiously laid, furnishing abundant water to nearly all the camps, and shower baths for all who cared to arrange them.

All the springs and wells on the park, and the water of the pipe line, were analyzed by competent chemical authority as soon as any question was raised as to the purity of the water supply, and all in use by troops pronounced fit for domestic use, except two wells, which at first were regarded as doubtful, and their use stopped, but which were found by more thorough analyses to be good. The pipe-line water was twice analyzed chemically, and once bacteriologically by Dr. C. F. Craig of the Army, a recognized authority, and pronounced good. While the water supply of the park was abundant and wholesome, the outcry against it, though not based on analyses, became so general as to lead to much hauling of spring water for considerable distances, to the great inconvenience of the troops and the hospitals, and the unnecessary disturbance of the country.

The damage done to the park by the troops proves inconsiderable. The soldiers manifested unceasing interest in the monuments, markers, tablets, and batteries, and very few accidents to any of these occurred, and none to the monuments, because of the universal inclination to take good care of them.

The roads were severely tested by the immense hauling over them. They stood this wear in a way to excite general surprise, and to demonstrate their thorough construction.

The damage to timber by animals was the most serious injury, but when the trees thus killed are cut out there are very few spots where they will be missed.

One important result has followed which goes far toward compensating for all damage. The hay fed to animals in every camp has spread grass, which is now growing vigorously in all parts of the park, and has already established so many centers of growth as must lead to a carpet of grass through the entire forest section, which will rapidly replace the wild grass.

The work of restoring the park is rapidly progressing. With the exception of resurfacing the roads where necessary and cutting out the dead timber, it will be

virtually finished by the close of the present season. The road work and timber cutting will be carried forward during the winter.

Thanking you for the promptness with which every suggestion was approved looking to increasing and maintaining the convenience and comfort of the soldiers through any assistance that the park force could give, I have the honor to remain,

Very respectfully, your obedient servant,

H. V. BOYNTON,
Chairman Park Commission.

The SECRETARY OF WAR,
Washington, D. C.

WAR DEPARTMENT, SHILOH BATTLEFIELD COMMISSION,
Pittsburg Landing, Tenn., October 31, 1898.

SIR: The Shiloh Battlefield Commission submits this summary of its annual report:

Since the last report the examination of the field of Shiloh and the study of the reports for locating camps, battle lines, and roads has progressed, and the commission is now at work on the battle of the second day.

The clearing of the underbrush on the field is being rapidly done, and the expenditure in this respect is shown below.

A force consisting of three gangs of laborers, each under a foreman, is at work building roads and is now on the main Pittsburg Landing and Corinth road, the road being built having been ceded to us by both the State and county. Application has been made to the county court for the cession of other roads that are intended to be put in condition. The roads are to be covered with gravel and very little grading will be done, the contour of the land being kept nearly as possible.

During the year a commission authorized by the legislature of Illinois, consisting of survivors engaged in the battle of Shiloh, were with us at Shiloh and confirmed the lines and camps as we had them plotted upon the maps. The legislature of Ohio has authorized, and the governor has appointed, a similar commission, and we meet them at Pittsburg Landing on November 18, 1898. Other States that had troops at Shiloh have been asked to appoint similar commissions.

Since the last report the titles to the following lands have been perfected and the land paid for:

	Acres.
J. W. Sowell.....	37.54
S. M. Rogers.....	69.81
J. J. Fraley.....	212.97
G. H. Hurley	43.50
D. H. Cantrell.....	36.28
W. A. Rowsey	89.65
Total	489.75

The amount of expenditures since the last report, from October 1, 1897, to November 1, 1898, is as follows:

Salaries.....	\$13,000.00
Traveling expenses	251.86
Office expenses	1,437.94

Land and conveyancing.....	\$5, 689. 30
Topography and maps	6, 617. 24
Engineering superintendence.....	320. 00
Buildings and quarters	242. 54
Clearing land.....	809. 59
Roads and bridges.....	1, 279. 46
Monuments and markers	54. 42
Watchmen and guards	653. 33
Total.....	30, 355. 88

The appropriation for the present year was \$55,000, and one of \$75,000 is asked for the fiscal year commencing July 1, 1899. The balance now on hand, \$87,737.24, will continue the work in progress and pay for the land contracted for to the end of the present year.

Very respectfully, your obedient servant,

CORNELIUS CADLE, *Chairman.*

The SECRETARY OF WAR.

Inviting attention to these interesting reports, special attention is called to the report of the Chickamauga and Chattanooga National Park Commission, which contains a statement as to the conditions at the park during the period it was occupied by the troops.

The marking of the Antietam battlefield is finished. No report is therefore submitted for this park.

R. A. ALGER,
Secretary of War.

A P P E N D I X .

ANNUAL REPORT
OF THE
ADJUTANT-GENERAL TO THE SECRETARY OF WAR.

WAR DEPARTMENT,
ADJUTANT-GENERAL'S OFFICE,
Washington, November 1, 1898.

SIR: The following report for the year ending September 30, 1898, is respectfully submitted:

THE REGULAR ARMY.

The strength of the Regular Army on the 1st of April, 1898, just before the breaking out of the war, was as follows:

	Officers.	Enlisted men.
General officers and staff corps	532	2, 026
Cavalry	437	6, 047
Artillery	288	4, 486
Infantry	886	12, 828
Miscellaneous	653
Total	2, 143	26, 040

By the act of March 8, 1898, the artillery arm was increased by two regiments, the additional organizations to be composed of twelve batteries each, two of which in each regiment to be organized, in the discretion of the President, as field artillery. These regiments were designated in orders as the Sixth and Seventh, respectively; the headquarters of the Sixth established at Fort McHenry, Md., and those of the Seventh at Fort Slocum, N. Y.; the nucleus of each battery to be formed by the detail of fifteen enlisted men obtained by transfer from existing batteries, other than those on the Pacific coast, and regulated by the proper department commanders.

Under General Orders, No. 21, dated April 20, 1898, the equipment of each battery of light artillery was directed to include 6 guns and caissons, 1 combined forge and battery wagon, and 100 horses.

The act of Congress approved April 22, 1898, constituted the Regular Army one of the two branches of the Army of the United States in time of war, the second branch being designated as the Volunteer Army.

April 26, 1898, Congress passed a law prescribing the peace organization of each regiment of infantry, to consist of two battalions of four companies each and two unmanned companies, and authorized the President, upon a declaration of war, to establish a third battalion of

four companies each in the infantry arm, and increased the enlisted strength of a company of infantry to 106; that of a troop of cavalry to 100; of a battery of heavy artillery to 200; of each battery of light artillery to 173; of each company of engineers to 150, and of the Signal Corps, by the addition of 10 corporals, 100 first-class privates, and 40 second-class privates. Under the authority thus given a third battalion was established for each regiment of infantry, to take effect from the date of the law, and a sufficient number, not less than 20, of non-commissioned officers and men selected with reference to their ability to assist in the instruction of the recruits, ordered to be transferred to the new companies from other companies of the same regiment, and the company, troop, and battery organizations provided for in that act were ordered recruited to their war strength.

Under the authority conferred upon the President by section 4 of the act approved April 26, 1898, to add one second lieutenant to each battery of artillery when recruited to its war strength, he directed, July 13, 1898, an increase of the artillery arm of the service by the addition of 84 second lieutenants over and above the number provided for by the act of March 8, 1898.

In view of the then possibilities of the near future this office on the 16th of March last recommended an increase in the regular infantry, as follows:

A BILL for the better organization of the line of the Army of the United States.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That hereafter the peace organization of each regiment of infantry now in service shall embrace—

Colonel	1	Second lieutenants	10
Lieutenant-colonel	1	Sergeant-major	1
Majors	2	Quartermaster-sergeant	1
Captains	10	Chief musician	1
First lieutenants	12	Principal musicians	2

Two battalions of four companies each, and two skeleton or unmanned companies; the organized companies to be constituted as now authorized by law: *Provided*, That nothing herein contained shall be construed as abolishing the office of chaplain in each regiment of colored troops: *And provided further*, That the vacancies in the grade of major created by this section shall be filled by promotions according to seniority in the infantry arm.

SEC. 2. That in time of war the President, in his discretion, may establish a third battalion for each infantry regiment, consisting of four companies, to be supplied by manning the two skeleton companies, and by organizing two additional companies. The vacancies of commissioned officers in the additional companies shall be filled by promotions by seniority in the infantry arm, and by appointments in accordance with existing law.

SEC. 3. That in time of war the enlisted strength of a company, troop, and battery, respectively, may, in the discretion of the President, be increased to comprise not exceeding—

For each company of infantry:

First sergeant	1	Artificers	3
Commissary-sergeant	1	Wagoners	2
Sergeants	12	Privates	216
Corporals	12		
Musicians	3	Total enlisted	250

For each troop of cavalry:

First sergeant	1	Saddler	1
Quartermaster-sergeant	1	Wagoner	1
Sergeants	6	Privates	78
Corporals	8		
Farriers and blacksmiths	2	Total enlisted	100
Trumpeters	2		

For each battery of heavy artillery:

First sergeant.....	1	Artificers	2
Commissary-sergeant.....	1	Wagoner.....	1
Sergeants	22	Privates	161
Corporals	10		
Musicians	2	Total enlisted.....	200

For each battery of field artillery:

First sergeant.....	1	Saddler	1
Quartermaster-sergeant	1	Musicians	2
Veterinary sergeant.....	1	Wagoner.....	1
Sergeants	6	Privates	141
Corporals	15		
Farriers.....	2	Total enlisted	173
Artificers	2		

For each company of engineers:

First sergeant.....	1	First-class privates.....	64
Sergeants	10	Second-class privates.....	63
Corporals	10		
Musicians.....	2	Total enlisted	150

The quartermaster, commissary, and veterinary sergeants provided for in this section shall have the pay and allowances of sergeants of their respective arms.

SEC. 4. That when recruited to their war strength, the President may add one second lieutenant to each troop of cavalry and company of infantry, and one first lieutenant and one second lieutenant to each battery of artillery, such offices to be filled by promotions by seniority in the respective arms of the service and by appointments as prescribed by existing law.

SEC. 5. That to facilitate the recruitment to their war strength of troops, batteries, and companies, the President, in his discretion, may, in time of war, authorize each or any regiment of the Army to draw its recruits from such State or States as may be designated by him, the recruits thus obtained to be credited as a part of the quota of troops called for by the United States from any State so designated.

SEC. 6. That in time of war the President shall cause the batteries of artillery authorized by law to be organized as heavy or field artillery, as in his judgment the exigencies of the service may require.

SEC. 7. That in time of war the pay proper of enlisted men actually serving in commands operating against an enemy shall be increased twenty per centum over and above the rates of pay as fixed by law: *Provided*, That in war time no additional increased compensation shall be allowed to soldiers performing what is known as extra or special duty: *Provided further*, That any soldier who deserts shall, besides incurring the penalties now attached to the crime of desertion, forfeit all right to pension which he might otherwise have acquired: *And provided also*, That no bounty or money gratuity shall be paid by State or local authorities to a soldier as an inducement to enlist in the United States military service.

SEC. 8. That whenever the strength of a company of infantry, as established by the President, shall exceed one hundred and fifty enlisted men, the captain or other officer commanding it shall be mounted and be entitled to the pay and allowances of a mounted officer of his grade.

SEC. 9. That in time of war every officer serving with troops operating against an enemy, who shall exercise under assignment in orders issued by competent authority a command above that pertaining to his grade, shall be entitled to receive the pay and allowances of the grade appropriate to the command so exercised: *Provided*, That a rate of pay exceeding that of a brigadier-general shall not be paid in any case by reason of such assignment.

This proposed measure received the approval of the Secretary of War, and was sent to the Congress with the following recommendation:

WAR DEPARTMENT,
Washington, March 16, 1898.

SIR: I have the honor to submit, for the consideration of the House Committee on Military Affairs, the draft of a bill which, while providing for the organization of infantry on a three-battalion basis in war time, leaves its peace establishment substantially as at present, the only change being the addition of one major to the number of officers authorized for each regiment, a change which would involve a maximum annual outlay of \$87,500. A second major is needed to command one of

the battalions to be organized under section 2. All the captains who would be promoted to the grade of major by this act are officers of war service whose promotions have been already too long deferred.

The bill further provides for the expansion of the peace force into one of war strength. The war organization proposed corresponds very nearly with that of most modern military systems. It is in line with, but more specific than, the substitute for H. R. 9361 (Fifty-fourth Congress, second session), recommended by the House Military Committee, and reproduces the substance of the provision contained in that measure for recruiting the Army during war time, in States specially designated, and for crediting the recruits obtained to those States as part of their respective quotas.

All the arguments advanced by the Military Committee in support of the substitute bill referred to (H. R. 10009) apply with equal force to the bill herewith submitted. Upon the outbreak of war the bulk of the enlisted men of each infantry regiment could be consolidated into a single battalion and that of each cavalry regiment into two squadrons of approximately war strength. These organizations would, together with the available National Guard troops, supply an effective force for immediate service. At the same time the nuclei of the skeleton companies and troops could be assigned suitable territory in which to recruit and be ordered to join their regiments after completing their organization. The fighting force (exclusive of the staff of the Army), which as now authorized will consist of 1,610 officers and 25,430 men, might, under sections 3 and 4, be raised to, approximately, 2,348 officers and 104,384 men, distributed as follows: Cavalry, 552 officers and 12,050 men; artillery, 469 officers and 16,457 men; infantry, 1,327 officers and 75,125 men; engineer troops, 752 men.

The increase, leaving out of account the officers assigned to the engineer companies, who, both in peace and war time, are taken from the Corps of Engineers, would thus amount to 738 officers and 78,954 enlisted men.

The superiority of such a force made up of professional officers and noncommissioned officers skilled in their respective duties, over a hastily organized body, officered by men new to the service, both as regards effectiveness in action and economy of administration, would be incalculable.

The clauses which are introduced in the bill relative to deserters and the payment of bounties are based on the experience of the late civil war. At several stages in that war desertions assumed such proportions as to paralyze the operations of our armies in the field. Since then many of the deserters have been rehabilitated under one pretext or another, and are now the beneficiaries of the pension laws, as much so as the faithful soldiers who stood by their colors throughout the contest, or at least until their terms of enlistment expired. Common prudence would seem to require that warning be given beforehand that henceforth deserters need not expect clemency in any form. Nothing so shakes the discipline and effectiveness of an army as wholesale desertions from its ranks.

As to the effect of the bounty system, to which recourse was had extensively by State authorities for the sole purpose of filling their quotas, it may be well to quote here a passage from the final report of Provost-Marshal-General Fry, who had charge of the organization of the volunteer forces (p. 76):

"In general, those States who gave the highest local bounties are marked by the highest proportion of desertions. The bounty was meant to be an inducement to enlistment; it became in fact an inducement to desertion and fraudulent reenlistment."

The purposes of other provisions of the bill are obvious. Junior field officers and even captains are likely to fall into permanent command of regiments, and captains and lieutenants into the command of battalions and companies. Especially is this apt to be the case in the regular regiments, upon whose officers heavy drafts are likely to be made for staff work and for the command of the higher units. It is but fair that the pay of officers should be commensurate with their responsibilities. Apart from their intrinsic justice, these provisions, and the one giving the status of a mounted officer to the commander of a company with an enlisted strength of 150, are necessary for the maintenance of the effectiveness of the organizations concerned. "Extra duty," so called, is less arduous, and certainly less dangerous, than service in the ranks, and should carry with it no extra compensation.

Respectfully, yours,

R. A. ALGER, *Secretary of War.*

Hon. JOHN A. T. HULL,

Chairman, House Military Committee.

The bill failed to receive the approval of the legislative branch of the Government.

The following table exhibits the strength of the Regular Army for each of the four months following the declaration of war with Spain, as shown by the latest returns on file in this office:

Organization.	May.		June.		July.		August.	
	Officers.	Enlisted men.	Officers.	Enlisted men.	Officers.	Enlisted men.	Officers.	Enlisted men.
General officers and staffs	535	2, 674	535	5, 012	550	6, 553	548	7, 980
Cavalry	435	7, 835	430	9, 912	419	10, 591	419	11, 594
Artillery	305	7, 660	317	9, 065	309	11, 308	369	12, 454
Infantry	916	15, 296	916	17, 833	989	18, 883	987	22, 458
Miscellaneous	8, 569	8, 191	6, 496	1, 879
Totals	2, 191	41, 934	2, 198	49, 513	2, 327	53, 931	2, 323	56, 365
Enlistments in Regular Army	9, 569	9, 311	6, 586	3, 400

a Includes 5,365 men of Hospital Corps, which are exclusive of authorized strength.

Three hundred and eighty-seven officers of the Regular Army were appointed in the several grades in the Volunteer Army, as indicated below:

Major-generals	15	Surgeons	44
Brigadier-generals	45	Paymaster	1
Assistant adjutants-general	58	Engineers	22
Inspectors-general	16	Ordnance officers	21
Judge-advocates	3	Signal officers	12
Quartermasters	43	Officers of volunteer regiments	86
Commissaries of subsistence	21		

THE VOLUNTEER ARMY.

The joint resolution approved April 20, 1898, demanding that Spain relinquish its authority and government in the Island of Cuba and withdraw its land and naval forces from Cuba and Cuban waters, authorized the President to use the land and naval forces of the United States to carry the resolve into effect. Congress followed this step by the passage of an act, approved April 22, 1898, providing for the temporary increase of the military establishment of the United States.

By this law the organized and active land forces were declared to consist of the Regular Army and of the militia of the several States when called into service, constituting two branches, designated, respectively, as the Regular Army and the Volunteer Army of the United States. Section 6 provided that—

when the members of any company, troop, battery, battalion, or regiment of the organized militia of any State shall enlist in the Volunteer Army in a body, as such company, troop, battery, battalion, or regiment, the regimental, company, troop, battery, and battalion officers in service with the militia organization thus enlisting may be appointed by the governors of the States and Territories, and shall when so appointed be officers of corresponding grades in the same organization when it shall have been received into the service of the United States as a part of the Volunteer Army.

The same section further provided that the President may authorize—the Secretary of War to organize companies, troops, battalions, or regiments, possessing special qualifications, from the nation at large, not to exceed 3,000 men, under such rules and regulations, including the appointment of the officers thereof, as may be prescribed by the Secretary of War.

Section 7 authorized the recruitment to their maximum strength of all the accepted organizations in the volunteer force, and provided for the organization of regular and volunteer troops into divisions of three brigades, each brigade to be composed of three or more regiments, and

authorized the President, whenever three or more divisions are present in the same army, to organize them into army corps, each corps to consist of not more than three divisions. By section 13 not more than one officer of the Regular Army could hold a commission in any one of the regiments of the Volunteer Army at the same time.

Finally, by the act approved May 11, 1898, Congress authorized, in addition to the volunteer forces provided by the act of April 22, the organization of a volunteer brigade of engineers from the nation at large, to consist of not more than three regiments and not more than 3,500 men possessing the special qualifications for engineer troops, the officers of this brigade to be appointed by the Secretary of War. The same act authorized also the organization of an additional volunteer force, not exceeding 10,000 men possessing immunity from disease incident to tropical climates, the officers of this force to be appointed by the President, by and with the advice and consent of the Senate.

Under the authority conferred upon him by the joint resolution of April 20 and the act of April 22, 1898, the President issued a proclamation, dated April 23, 1898, calling for volunteers to the number of 125,000 men, to be apportioned as far as practicable among the several States, Territories, and the District of Columbia, according to population, to serve for two years unless sooner discharged.

The apportionment under this call, aggregating 5 regiments and 17 troops of cavalry, 16 batteries of light artillery, 1 regiment and 7 batteries of heavy artillery, 119 regiments and 10 battalions of infantry, was as follows:

Alabama, 2 regiments and 1 battalion of infantry.
Arkansas, 2 regiments of infantry.
California, 2 regiments and 2 battalions of infantry, 4 batteries of heavy artillery.
Colorado, 1 regiment of infantry.
Connecticut, 1 regiment of infantry, 1 battery of light artillery, and 2 batteries of heavy artillery.
Delaware, 1 regiment of infantry.
Florida, 1 regiment of infantry.
Georgia, 2 regiments of infantry and 2 batteries of light artillery.
Idaho, 2 battalions of infantry.
Illinois, 7 regiments of infantry, 1 battery of light artillery, and 1 regiment of cavalry.
Indiana, 4 regiments of infantry and 2 batteries of light artillery.
Iowa, 4 regiments of infantry.
Kansas, 3 regiments of infantry.
Kentucky, 3 regiments of infantry and 2 troops of cavalry.
Louisiana, 2 regiments of infantry.
Maine, 1 regiment of infantry and 1 battery of heavy artillery.
Maryland, 1 regiment of infantry.
Massachusetts, 4 regiments of infantry and 1 regiment of heavy artillery.
Michigan, 4 regiments of infantry.
Minnesota, 3 regiments of infantry.
Mississippi, 2 regiments of infantry.
Missouri, 5 regiments of infantry and 1 battery of light artillery.
Montana, 1 regiment of infantry.
Nebraska, 2 regiments of infantry.
Nevada, 1 troop of cavalry.
New Hampshire, 1 regiment of infantry.
New Jersey, 3 regiments of infantry.
New York, 12 regiments of infantry and 2 troops of cavalry.
North Carolina, 2 regiments and 1 battalion of infantry.
North Dakota, 2 battalions of infantry.
Ohio, 8 regiments of infantry, 8 troops of cavalry, and 4 batteries of light artillery.
Oregon, 1 regiment of infantry.
Pennsylvania, 15 regiments of infantry, 3 batteries of light artillery, and 3 troops of cavalry.
Rhode Island, 1 regiment of infantry.
South Carolina, 1 regiment and 1 battalion of infantry, 1 battery of heavy artillery.
South Dakota, 1 regiment of infantry.
Tennessee, 3 regiments of infantry.

Texas, 3 regiments of infantry and 1 regiment of cavalry.
 Utah, 2 batteries of light artillery and 1 troop of cavalry.
 Vermont, 1 regiment of infantry.
 Virginia, 3 regiments of infantry.
 Washington, 1 regiment of infantry.
 West Virginia, 1 regiment of infantry.
 Wisconsin, 3 regiments of infantry.
 Wyoming, 1 battalion of infantry.
 District of Columbia, 1 regiment of infantry.

May 25, 1898, the President issued a proclamation calling for an additional force of 75,000 men. For controlling military reasons, it was determined to utilize so much of this additional force as was necessary to bring up the several State organizations in service to the full legal strength, the remainder to be apportioned among the several States and Territories according to their respective quotas as nearly as possible. The apportionment under this second call is indicated below and comprised 16 batteries of light artillery, 3 battalions of heavy artillery, and 22 regiments, 10 battalions, and 46 companies of infantry.

Alabama, 2 battalions of infantry.
 California, 1 regiment of infantry.
 Colorado, 1 battery of light artillery
 Connecticut, 1 regiment of infantry.
 Georgia, 1 regiment of infantry.
 Illinois, 2 regiments of infantry.
 Indiana, 1 regiment and 2 companies of infantry
 Iowa, 2 batteries of light artillery.
 Kansas, 2 battalions of infantry.
 Kentucky, 1 regiment of infantry.
 Louisiana, 3 batteries of light artillery.
 Maine, 3 batteries of heavy artillery.
 Maryland, 1 battalion of infantry.
 Massachusetts, 1 regiment of infantry.
 Michigan, 1 regiment of infantry.
 Minnesota, 1 regiment of infantry.
 Mississippi, 6 companies of infantry.
 Missouri, 1 regiment of infantry.
 Nebraska, 1 regiment of infantry.
 Nevada, 4 companies of infantry.
 New Jersey, 1 regiment of infantry.
 New York, 3 regiments of infantry and 3 batteries of light artillery.
 North Carolina, 7 companies of infantry.
 Ohio, 1 regiment and 9 companies of infantry.
 Oregon, 2 batteries of light artillery.
 Pennsylvania, 18 companies of infantry.
 Rhode Island, 2 batteries of light artillery.
 South Carolina, 2 battalions of infantry.
 Tennessee, 1 regiment of infantry.
 Texas, 1 regiment of infantry.
 Utah, 1 battery of light artillery.
 Virginia, 2 battalions of infantry.
 Washington, 1 battalion of infantry.
 West Virginia, 1 regiment of infantry.
 Wisconsin, 1 regiment of infantry and 1 battery of light artillery.
 Wyoming, 1 battery of light artillery.
 Arizona, New Mexico, Oklahoma, and Indian Territory, 1 regiment of infantry.

In view of the imminence of war with Spain, and in anticipation of the action of the Congress and of the call of the President for volunteers, carefully prepared regulations were issued April 22, 1898, for the guidance and government of the numerous prospective mustering officers whose duty it would be to critically inspect the volunteer organizations that would be offered for muster into the service of the United States. The general orders, circulars, etc., are attached to this report in appendix for the muster, instruction, health, welfare, and comfort of the volunteers, whether in the field, in camps, in hospitals, on furlough, etc.—in fact, under all conceivable conditions—from the date of their recep-

tion into the service of the United States until their final discharge from military duty.

The following table exhibits the strength of the Volunteer Army at the several periods indicated:

Strength of the Volunteer Army.

Organization.	May.		June.		July.		August.	
	Officers.	Enlisted men.	Officers.	Enlisted men.	Officers.	Enlisted men.	Officers.	Enlisted men.
Major-generals	11	12	18	21
Brigadier-generals.....	25	70	70	71
Adjutant-General's Department	54	98	100	99
Inspector-General's Department	19	30	27	25
Judge-Advocate-General's Department ...	6	7	8	8
Quartermaster-General's Department.....	84	82	114	121
Subsistence Department	25	87	106	108
Medical Department ...	19	84	99	113
Pay Department.....	12	65	80	86
Corps of Engineers	10	24	28	28
Ordnance Department.....	20	24
Signal Corps.....	10	101	897	112	1,089	111	1,173
Engineers	81	704	108	2,458	150	3,286
Cavalry.....	285	5,972	292	6,920	292	7,221	289	7,003
Heavy artillery.....	83	1,836	83	2,010	93	2,540	92	2,570
Light artillery.....	69	1,706	84	2,979	120	4,405	120	4,265
Infantry.....	5,562	109,066	5,969	139,845	7,238	185,748	7,319	188,947
Total	6,224	118,580	7,169	153,355	8,633	203,461	8,785	207,244

The patriotic response of the several states under the first call for volunteers and the activity of the officers detailed for duty in mustering troops is sufficiently indicated by the fact that on May 31, 1898, a little more than a month after the President's call for volunteers, nearly 125,000 men had been mustered into service. The muster in of the three regiments of cavalry was completed by May 30; that of the ten regiments of infantry (immune) by July 30; that of the three regiments of engineers by August 20; the last volunteer organization being mustered in August 24, 1898.

The aggregate strength of the Regular and of the Volunteer armies for each of the months of May, June, July, and August was as follows:

	Officers.	Enlisted men.	Grand total.
May:			
Regular Army	2,191	41,934	44,125
Volunteer Army	6,224	118,580	124,804
Aggregate	8,415	160,514	168,929
June:			
Regular Army	2,198	49,513	51,711
Volunteer Army	7,169	153,355	160,524
Aggregate	9,367	202,868	212,235
July:			
Regular Army	2,327	53,931	56,258
Volunteer Army	8,633	203,461	212,094
Aggregate	10,960	257,392	268,352
August:			
Regular Army	2,323	56,365	58,688
Volunteer Army	8,785	207,244	216,029
Aggregate	11,108	263,609	274,717

The suspension of hostilities, resulting from the short but brilliant operations of the army against Santiago, Cuba, leading to its capture and of that of the Spanish forces defending the city, the surrender of Spanish troops in Porto Rico, no less than the successful operations of our troops in the Philippines, led to the determination to muster out 100,000 men, nearly one-half of the entire volunteer force, and the first order looking to that end was issued on the 18th of August last.

In the performance of the delicate duty of selecting the organizations to be mustered out of service, it is perhaps unnecessary to state that in this case, as in that of the apportionment of the volunteers called into the service of the United States, it has been impossible, for obvious reasons, to preserve the absolutely correct arithmetical proportion, in the first instance, to the State quotas, and, in the second, to the actual number of troops from the several States, accepted and mustered into the service of the United States.

The following statement indicates the several organizations designated for muster out, the station opposite each organization being the State rendezvous to which the organization was ordered prior to final discharge:

Alabama: First Regiment of Infantry, Birmingham, Ala.; Second Regiment of Infantry, Montgomery, Ala.

Arkansas: First Regiment of Infantry, Fort Logan H. Roots, Ark.

California: Sixth Regiment of Infantry, San Francisco, Cal.; Seventh Regiment of Infantry, Los Angeles, Cal.

Colorado: First Colorado Battery, Fort Hancock, N. J.

Connecticut: First Regiment of Infantry, company stations; Light Battery A, New Haven, Conn.; Heavy Battery C, New Haven, Conn.; Heavy Battery B, Bridgeport, Conn.

Delaware: First Regiment of Infantry, Wilmington, Del.

Florida: First and Second battalions, First Regiment of Infantry, Tallahassee, Fla.

Georgia: First Regiment of Infantry, Macon, Ga.; Second Regiment of Infantry, company stations; Light Batteries A and B, Griffin, Ga.

Illinois: First Regiment of Infantry, Chicago, Ill.; Seventh Regiment of Infantry, Chicago, Ill.; Fifth Regiment of Infantry, Springfield, Ill.; Sixth Regiment of Infantry, Springfield, Ill.; First Regiment of Cavalry, Fort Sheridan, Ill.; Light Battery A, Danville, Ill.

Indiana: One hundred and fifty-seventh, One hundred and fifty-eighth, and One hundred and fifty-ninth regiments of infantry, Twenty-seventh and Twenty-eighth Independent batteries, and Fourteenth Volunteer Signal Company, Indianapolis, Ind.

Iowa: Fiftieth and Fifty-second regiments of infantry and Fifth and Sixth batteries, Des Moines, Iowa.

Kansas: Twenty-first and Twenty-second Regiments of Infantry, Fort Leavenworth, Kans.

Kentucky: Second Regiment of Infantry and Troops A and B of Cavalry, Lexington, Ky.

Louisiana: First Regiment of Infantry, Jacksonville, Fla.; Light Batteries A, B, and C, Jackson Barracks, La.

Maine: First Regiment of Infantry, company stations.

Maryland: Fifth Regiment of Infantry, Baltimore, Md.

Massachusetts: Second and Ninth Regiments of Infantry and First Regiment of Heavy Artillery, company stations.

Michigan: Thirty-second, Thirty-third, and Thirty-fourth Regiments of Infantry, company stations.

Minnesota: Twelfth Regiment of Infantry, New Ulm, Minn.; Fourteenth Regiment of Infantry, St. Paul, Minn.

Mississippi: First and Second Regiments of Infantry, Columbia, Tenn.

Missouri: First Regiment of Infantry and Light Battery A, St. Louis, Mo.; Third and Fifth Regiments of Infantry, Kansas City, Mo.

Nebraska: Second Regiment of Infantry, Fort Omaha, Nebr.

Nevada: Battalion of Infantry, Carson City, Nev.

New Hampshire: First Regiment of Infantry, Concord, N. H.

New Jersey: First Regiment of Infantry, Newark, N. J.; Second Regiment of Infantry, Paterson, N. J.

New York: Eighth and Ninth Regiments of Infantry, Fourth and Fifth Light Batteries, Troop A, Cavalry; Seventy-first Regiment of Infantry, New York City, N. Y.; Fourteenth Regiment of Infantry, Troop C, Cavalry, Brooklyn, N. Y.; Second and

Third Regiments of Infantry, company stations; Twenty-second Regiment of Infantry, Fort Slocum, N. Y.; Sixty-fifth Regiment of Infantry, Buffalo, N. Y.; Seventh Light Battery, Rochester, N. Y.

North Carolina: Second Regiment of Infantry, company stations.

Ohio: First Regiment of Infantry, Cincinnati, Ohio; Third and Seventh Regiments of Infantry and First Battalion Light Artillery, Columbus, Ohio; two squadrons of cavalry, Columbus, Cleveland, and Cincinnati, Ohio; Eighth Regiment of Infantry, Wooster, Ohio; Fifth Regiment of Infantry, Cleveland, Ohio.

Oregon: Light Battery A, Vancouver Barracks, Wash.; Light Battery B, Portland, Oreg.

Pennsylvania: First, Second, and Third Regiments of Infantry, Philadelphia City Troop, Cavalry, Light Battery A, Philadelphia, Pa.; Fourth Regiment of Infantry, company stations; Governor's Troop, Cavalry, Harrisburg, Pa.; Fifth Regiment of Infantry, company stations; Sixth Regiment of Infantry, company stations; Ninth Regiment of Infantry, company stations; Twelfth Regiment of Infantry, company stations; Eighteenth Regiment of Infantry and Light Battery B, Pittsburg, Pa.; Sheridan's Troop, Cavalry, Tyrone, Pa.; Light Battery C, Phoenixville, Pa.

Rhode Island: Light Batteries A and B, Quonset Point, R. I.

South Carolina: First Regiment of Infantry, Columbia, S. C.

Texas: Second Regiment of Infantry, Dallas, Tex.; First Regiment of Cavalry, San Antonio, Tex.

Vermont: First Regiment of Infantry, company stations.

Virginia: Second Regiment of Infantry, company stations; Third Regiment of Infantry, Richmond, Va.

Washington: Battalion of Infantry, Vancouver Barracks, Wash.

Wisconsin: First and Second Regiments of Infantry, company stations; Light Battery, Camp Douglas, Wis.

District of Columbia: First Regiment of Infantry, Washington, D. C.

United States Volunteers: First Regiment of Cavalry, Montauk Point, N. Y.; Second Regiment of Cavalry, Jacksonville, Fla.; Third Regiment of Cavalry, Chickamauga, Ga.; First Regiment of Infantry, Galveston, Tex.; Eighth Volunteer Signal Corps Company, Augusta, Me.; Ninth Volunteer Signal Corps Company, New York City, N. Y.; Tenth Volunteer Signal Corps Company, Boston, Mass.; Fifth Volunteer Signal Corps Company, Washington Barracks, D. C.; Seventh Volunteer Signal Corps Company, Chicago, Ill.

The following-named regiments are under orders to return from Porto Rico to the United States and rendezvous at the place opposite their respective designation: Third Illinois, Springfield, Ill.; Sixth Massachusetts Infantry, South Framingham, Mass.; Fourth Ohio Infantry, Columbus, Ohio; Sixteenth Pennsylvania Infantry, Mount Gretna, Pa.; Third Wisconsin Infantry, Milwaukee, Wis.; First United States Volunteer Engineers.

Since the signing of the protocol the officers and men of the volunteer regiments have remained at their posts of duty, in most cases at great personal sacrifice. That they have done this cheerfully and without complaint makes it all the more desirable that a speedy increase of the Regular Army be provided for in order that the volunteers may be released from further service and be allowed to return to their peaceful vocations.

The officers of the Regular Army detailed to make the examination and muster-in of the volunteer regiments, also the officers detailed for mustering out volunteers, performed their duty with promptness and with great care.

STAFF ORGANIZATION.

Much has been said of late concerning the organization of the several staff departments. If, as recommended in another part of this report, additional officers are given the line of the Army, so as to give plenty of trained officers for staff duty in time of war, the main objection will have been met; and it is doubtful, if, under all the conditions peculiar to this Government, a general reorganization of the staff, or the adoption of new systems, will be found to be desirable; certainly nothing radical should be entered upon.

Under the present system, Grant, Sherman, and Sheridan conducted great and successful campaigns; it has worked well in our Indian wars, and it is confidently asserted that, when the work of the staff departments in this war is more fully understood, it will receive the approval of military men and of the people generally.

That there can be improvements in many ways there is no doubt; that this should be done as the result of experience is also true.

The following is the average length of service in the line of officers previous to their appointment in the staff corps: Adjutant-General's Department, 20 years 4 months; Inspector-General's Department, 21 years 8 months; Quartermaster's Department, 13 years 3 months; Subsistence Department, 11 years.

It will be noted that the officers of the general staff are in no sense lacking in actual service with troops.

MILITARY GEOGRAPHICAL DEPARTMENTS.

Important considerations led, early in the year, to a comprehensive rearrangement of the several geographical departments into which, for facility of military administration, the country is divided. Two new departments, those of the Lakes and of the Gulf, were created; the Department of the Missouri was reconstituted; the Departments of the Platte and of Texas discontinued; and the geographical limits of other departments were rectified, by General Orders, No. 7, Headquarters of the Army, dated March 11, 1898.

DEPARTMENT OF THE EAST.

The southern and southwestern portion of this department was created into a new department, that of the Gulf, and the States of Ohio, Kentucky, and Tennessee were transferred to the new Department of the Lakes. The present department consists of the New England States, the States of New York, New Jersey, Pennsylvania, Delaware, Maryland, West Virginia, Virginia, and the District of Columbia.

The declaration of war with Spain made the defense of the entire Atlantic seaboard against possible attack a question of the utmost importance. With this object in view, the governors of the several littoral States were freely consulted and their active cooperation enlisted in favor of providing temporary garrisons, drawn from the State militia, for those exposed points where no defenses containing heavy guns existed, or where the defenses had either no garrisons or only small ones. Infantry supports were drawn, while war was in progress, from some of the volunteer infantry, heavy artillery, and light batteries organized under the first call for troops, and the organizations were recruited to war strength of twelve companies. The number of men so utilized was, approximately, 12,000. The troops, while employed as garrison supports, were constantly drilled, and the discipline and efficiency attained by them was very creditable to the character and length of service of the several organizations. After cessation of hostilities, in July last, the infantry supports were transferred to inland camps, the withdrawal being completed by September 1, 1898.

DEPARTMENT OF THE LAKES.

This department consists of the States of Michigan, Wisconsin, Illinois, and Indiana, taken from the old Department of the Missouri, and of the States of Ohio, Kentucky, and Tennessee, taken from the Department of the East. The concentration, at an early date, of most

of the military organizations in this department almost stripped it of troops, leaving but one officer and a small detachment at each post to guard public property. Later, however, the Fourth, Sixth, and Seventeenth Infantry were ordered back, and, with eight companies of the Seventh Infantry, designated to garrison Fort Wayne, Mich., represent the present military strength in the Department of the Lakes.

DEPARTMENT OF THE GULF.

This new department, created for the more direct control of the troops about to be concentrated at camps in the Southern States, consists of the States of South Carolina, Georgia, Florida, Alabama, and Mississippi, taken from the Department of the East, and of the State of Texas, which constituted the Department of Texas, discontinued.

DEPARTMENT OF DAKOTA.

This department consists of the States of Minnesota, North and South Dakota, Montana, and so much of Wyoming and Idaho as is embraced in the Yellowstone National Park. Part of the State of South Dakota and the Yellowstone National Park were added to this department from the discontinued Department of the Platte.

DEPARTMENT OF THE MISSOURI.

The old Department of the Missouri was dismembered; the States of Missouri, Kansas, Arkansas, the Indian and Oklahoma Territories being constituted part of the new department of the same name, and the States of Michigan, Wisconsin, Indiana, and Illinois transferred to the newly created Department of the Lakes; the States of Iowa and Nebraska, now in this department, were taken from the Department of the Platte, which was abolished.

DEPARTMENT OF THE COLORADO.

This department consists of the States of Wyoming (except so much thereof as is embraced in the Yellowstone National Park), Colorado, and Utah, and the Territories of Arizona and New Mexico. The State of Wyoming, as described above, was taken from the Department of the Platte.

DEPARTMENT OF CALIFORNIA.

The States of California and Nevada constituted this department until July 12, 1898, when, by a Presidential order of that date, the Hawaiian Islands and their dependencies, annexed to the United States by the resolution of Congress approved July 7, 1898, were attached to and included in the Department of California.

DEPARTMENT OF THE COLUMBIA.

The territorial limits of this department were extended eastward, by the addition of so much of the State of Idaho as had, heretofore, been included in the Department of the Platte. On the declaration of war with Spain, the Fourteenth Infantry, except two companies left in Alaska, and four troops of the Fourth Cavalry were withdrawn from this department to form a part of the Philippine expedition, while the Sixteenth Infantry was ordered to the camp established at Chattanooga, Tenn.

DEPARTMENT OF SANTIAGO.

This department, created by General Orders, No. 118, War Department, Adjutant-General's Office, August 10, 1898, consists of all that part of the Island of Cuba and the islands and keys adjacent and belonging thereto, or which have or may hereafter come under the control of the United States, and Maj. Gen. Henry W. Lawton, United States Volunteers, was assigned, in the same orders, to the command of this department, with headquarters in the city of Santiago.*

DEPARTMENT OF PORTO RICO.

Created October 1, 1898, by General Orders, No. 158, Headquarters of the Army, Adjutant-General's Office, consists of the island of Porto Rico and the islands and keys adjacent and belonging thereto. Maj. Gen. John R. Brooke, United States Army, was assigned, by the order above cited, to the command of this department, and was authorized, for the present, to establish his headquarters at such place as he may select. He has since then selected San Juan as the headquarters of the department.

DEPARTMENT OF THE PACIFIC.

Created May 16, 1898, by General Orders, No. 46, Headquarters of the Army, Adjutant-General's Office, consists of Manila and any or all of the Philippine Islands that may come under the control of the United States.

ARMY CORPS AND PORTO RICAN EXPEDITION.

On April 15, 1898, the regiments of the Regular Army, with few exceptions, were ordered to proceed to designated points in the South, viz:

Twenty-fourth United States Infantry.	Utah.....	Chickamauga Park, Ga.
Twenty-fifth United States Infantry..	Montana.....	Do.
Company E, Engineers.....	West Point	Tampa, Fla.

April 23, 1898, the troops assembled in the Chickamauga National Park (Camp George H. Thomas) were constituted a provisional army corps, under Maj. Gen. John R. Brooke.

By direction of the President, May 7, 1898, seven army corps were constituted, embracing both the regular and volunteer branches of the Army, and later, June 21, the forces comprising the Philippine expedition were constituted an army corps, to be known as the Eighth.

FIRST AND THIRD ARMY CORPS,

[Maj. Gen. John R. Brooke, United States Volunteers, and Maj. Gen. James F. Wade, United States Volunteers, respectively, commanding. Headquarters at Camp Thomas, Ga.]

These corps were organized at Camp Thomas, Ga. Their combined strength on the last day of the months of April, May, June, July, and August was as follows:

	Officers.	Enlisted men.
April	383	6,328
May	2,191	42,036
June.....	2,004	56,544
July	1,563	42,260
August.....	436	12,725

In July the First Division of the First Corps, under General Wilson, was detailed for duty in Porto Rico, and August 22 the Second and Third divisions of that corps were sent to Lexington, Ky., and Knoxville, Tenn., respectively.

The Third Army Corps was transferred early in September to the camp established at Anniston, Ala., and by the end of the month but a small detachment remained at Camp Thomas, Ga.

SECOND ARMY CORPS.

[Maj. Gen. William M. Graham, United States Volunteers. Headquarters at Falls Church, Va.]

The Second Corps was organized at Camp Alger, near Falls Church, Va. It having been determined in the latter part of July to discontinue Camp Alger, a new site for a camp was selected near Middletown, Pa. (called Camp Meade). The Second Division of the corps commenced to move about August 2 and early in September the remainder of the corps left the first-named camp. The strength of the corps for the months from May to August is given below, the figures for the last month including the troops at Camp Meade:

	Officers.	Enlisted men.
May	903	17, 406
June.....	887	22, 624
July.....	802	21, 373
August.....	768	20, 686

FOURTH ARMY CORPS.

[Maj. Gen. John J. Coppinger, United States Volunteers. Headquarters at Mobile, Ala.]

The organization of this corps was begun at Mobile, Ala. June 2 the Fourth Corps commenced the march to Tampa, Fla., and July 23 the Third Division of the corps was transferred to Fernandina, Fla. The corps having been ordered to Huntsville, Ala., the movement was begun August 11, and by the end of the month the only troops of the corps remaining at Tampa was 1 officer and 29 men of the Signal Corps. The strength present on the last day of each month was as follows:

	Officers.	Enlisted men.
May	843	7, 456
June.....	763	20, 053
July.....	548	13, 485
August.....	413	9, 933

FIFTH ARMY CORPS.

[Maj. Gen. William R. Shafter, United States Volunteers. Headquarters at Tampa, Fla.]

This corps was organized at Tampa, Fla. On June 7 the corps embarked on transports for Santiago, Cuba, the fleet sailing June 14, and the troops commenced to disembark at Daiquiri on June 22. After the vigorous and successful campaign which resulted in the surrender of Santiago, it was decided, owing to the prevalence of disease which infected the army there, to withdraw the troops that had been operating in Cuba. The repatriation of the United States forces was commenced August 7, and, excepting the sick in hospitals, was completed by August 24 (seventy days from date of sailing from Tampa), when General Shafter and his staff sailed for the United States.

The strength present of this corps, for the months indicated, was as follows:

	Officers.	Enlisted men.
May	769	15, 657
June	791	14, 945
July	840	18, 619
August	518	14, 347

The following troops were sent to relieve the Fifth Army Corps, and now form garrisons of the Department of Santiago: Fifth United States Infantry, Twenty-third Kansas Volunteer Infantry, Eighth Illinois Volunteer Infantry, Second United States Volunteer Infantry, Third United States Volunteer Infantry, Fourth United States Volunteer Infantry, Fifth United States Volunteer Infantry, and Ninth United States Volunteer Infantry.

SIXTH ARMY CORPS.

[Maj. Gen. James H. Wilson, United States Volunteers. Headquarters at Camp Thomas, Ga.]

The Sixth Corps was not organized, and General Wilson was assigned to the command of the First Division of the First Corps.

SEVENTH ARMY CORPS.

[Maj. Gen. Fitzhugh Lee, United States Volunteers. Headquarters at Tampa, Fla.]

The corps was organized at Tampa, Fla., on May 29. General Lee having been authorized to establish his headquarters at Jacksonville, Fla., the corps removed to that place May 31, with the exception of the First Division, which remained at Tampa, Fla.

A division (General Schwan's) of the Fourth Army Corps, at Mobile, Ala., was transferred, June 20, to the Camp at Miami, Fla., and on the 23d of the same month was designated as the First Division of the Seventh Army Corps. This division was subsequently (July 31) transferred from Miami to Jacksonville, Fla.

The following was the strength present of this corps on the last day of the months named:

	Officers.	Enlisted men.
May	496	8, 847
June	781	18, 375
July	909	23, 193
August	1, 025	27, 817

EIGHTH ARMY CORPS.

[Maj. Gen. Wesley Merritt, United States Army.]

This corps embraced the forces comprising the Philippine expedition, the troops being concentrated at San Francisco and forwarded to Manila at different dates.

The first expedition for Manila, under command of Gen. T. M. Anderson, United States Volunteers, sailed May 25, consisting of the First California Infantry, Second Oregon Infantry, five companies Fourteenth United States Infantry, and a detachment of California Artillery—115 officers and 2,386 enlisted men—arriving off Manila June 30.

The second expedition, under the command of Gen. F. V. Greene, United States Volunteers, sailed June 15, and consisted of the First Colorado, First Nebraska, Tenth Pennsylvania Infantry, four companies Eighteenth and four companies Twenty-third United States Infantry, two batteries Utah Artillery, and detachment of United States Engineers—a total of 158 officers and 3,428 enlisted men—arriving at their destination July 17.

The third expedition, under the command of Generals Merritt, United States Army, commanding corps, and MacArthur, United States Volunteers, sailed June 27 and 29, and consisted of four companies of Eighteenth and four companies of Twenty-third United States Infantry, four batteries of Third United States Artillery, one company United States Engineers, First Idaho, First Wyoming, Thirteenth Minnesota, and First North Dakota Infantry, the Astor Battery, and detachments of Hospital and Signal Corps, a total of 197 officers and 4,650 enlisted men, which arrived at their destination July 25 and 31.

The fourth expedition, under command of Gen. E. S. Otis, United States Volunteers, sailed July 15, and consisted of six troops Fourth United States Cavalry, two batteries Sixth United States Artillery, five companies Fourteenth United States Infantry, and detachments of recruits, a total of 42 officers and 1,640 enlisted men, and arrived at its destination August 21.

The fifth expedition, under command of Col. H. C. Kessler, of the First Montana Infantry, sailed July 19, and consisted of the First Montana Infantry and detachment of recruits, a total of 54 officers and 1,294 enlisted men, arriving at destination August 24.

The sixth expedition, under command of Gen. H. G. Otis, United States Volunteers, sailed July 23, and consisted of eight companies of the First South Dakota and detachments, a total of 50 officers and 846 enlisted men, arriving at destination August 24.

The seventh expedition, under command of Lieut. Col. Lee Stover, First South Dakota Infantry, sailed July 29, and consisted of four companies of First South Dakota and detachment of recruits, a total of 25 officers and 814 enlisted men, arriving at destination August 31.

The total forces of the seven expeditions made a grand total of 641 officers and 15,058 enlisted men. [Since then, on October 19, 27, 28, and 30, 1898, the Twentieth Kansas, First Tennessee, and First Washington Infantry Volunteers, and a battalion of California Artillery were sent to the Philippines, numbering 99 officers and 2,565 enlisted men.]

The number of troops present, remaining at San Francisco after sailing of the expeditions, and which had been designated for the Philippines, was, on the last day of each month, as follows:

	Officers.	Enlisted men.
May	523	10,793
June.....	395	11,060
July	276	7,478
August.....	258	5,988

PORTO RICAN EXPEDITION.

Under instructions of June 26, 1898, from the President to Maj. Gen. Nelson A. Miles, commanding the Army, an expedition, under the immediate command of Maj. Gen. John R. Brooke, United States Army, was directed to be organized from the First, Third, and Fourth Army Corps, for movement and operation against the enemy in Porto Rico.

The first of these troops, under command of the Major-General Commanding the Army, sailed from Guantanamo, Cuba, July 21, with the Sixth Massachusetts Volunteer Infantry, Sixth Illinois Volunteer Infantry, of Gen. G. A. Garretson's brigade of General Guy V. Henry's division, and batteries C and F, Third United States Artillery, Battery B, Fourth United States Artillery, Battery D, Fifth United States Artillery, a provisional battalion of engineers formed from Company H, First District of Columbia Volunteers, a provisional company formed from the First Illinois Volunteers, a detachment of 34 privates of the battalion of engineers, United States Army, and a detachment of recruits, Signal and Hospital Corps, making a total of 3,554 officers and men, and landed at Guanica, Porto Rico, July 25, 1898.

On July 21 the Sixteenth Pennsylvania Volunteer Infantry, Second and Third Wisconsin Volunteer Infantry, Companies D and M, Sixth Illinois Volunteer Infantry, making a total of 162 officers and 3,150 enlisted men, under command of Maj. Gen. James H. Wilson, sailed from Charleston, S. O., arriving at Guanica July 27.

July 23 the Eleventh and Nineteenth United States Infantry; Batteries O and M, Seventh United States Artillery; Troop B, Second Cavalry; and Battery B, Fifth Artillery, making total of 80 officers and 2,831 enlisted men, under command of Brig. Gen. Theodore Schwan, United States Volunteers, sailed from Tampa, Fla., arriving at Ponce July 31.

July 23 the Philadelphia City Troop, Pennsylvania Cavalry; A and C, New York Cavalry; B, Pennsylvania Artillery; Twenty-seventh Indiana Light Battery; A, Illinois Artillery; A, Missouri Artillery; Troop H, Sixth United States Cavalry; Company F, Eighth United States Infantry, under command of Maj. Gen. John R. Brooke, United States Army, sailed from Newport News, arriving at Guayama July 31.

July 28 the Third Illinois Volunteer Infantry, Fourth Ohio Volunteer Infantry, and Fourth Pennsylvania Volunteer Infantry, making total of 145 officers and 3,581 enlisted men, under command of Brig. Gen. Peter O. Hains, United States Volunteers, sailed from Newport News, Va., arriving at Arroya August 3.

August 10 the First Kentucky Volunteer Infantry; Batteries A and C, Pennsylvania Volunteer Artillery; Sheridan's Troop, Pennsylvania Cavalry; Governor's Troop, Pennsylvania Cavalry, making total of 48 officers and 1,109 enlisted men, under command of Brig. Gen. F. D. Grant, United States Volunteers, sailed from Newport News, Va., arriving at Ponce August 16.

The strength present for July 31 and August 31 was as follows:

	Officers.	Enlisted men.
July.....	377	9,084
August.....	641	16,332

HAWAIIAN ISLANDS.

On July 7, 1898, Congress ratified and confirmed the cession of the Hawaiian Islands made by the Government of that Republic, and provided that the government of such islands shall be vested in such persons as the President of the United States shall select.

The First New York Volunteer Infantry and four companies of the Second United States Volunteer Engineers sailed July 29 for Honolulu, under command of Col. T. H. Barber, First New York Volunteer Infantry, 57 officers and 1,464 enlisted men arriving at destination August 17.

The subjoined table exhibits the strength and distribution of the Army of the United States:

CASUALTIES.

The following is a statement of the several actions in which United States troops were engaged during the war with Spain, and of the losses sustained by them from April 21 to August 13, 1898:

OPERATIONS IN CUBA.

May 12.—Point Arbolitos: Companies E and G, First Infantry, under Capt. J. H. Dorst, Fourth Cavalry. No casualties.

SIEGE AND SURRENDER OF SANTIAGO, JUNE 22 TO JULY 17.

[Maj. Gen. William R. Shafter, commanding Fifth Army Corps.]

June 24.—La Quasima: Cavalry division, Maj. Gen. Joseph Wheeler, commanding. Second Cavalry Brigade, Brig. Gen. S. B. M. Young.

Present for duty, June 20, 74 officers and 1,067 enlisted men. Killed, 1 officer and 15 enlisted men; wounded, 6 officers and 44 enlisted men.

Officers killed and wounded, 7. Killed: Capt. A. K. Capron, First United States Volunteer Cavalry. Wounded: Maj. J. M. Bell, First Cavalry, and A. O. Brodie, First United States Volunteer Cavalry; Capt. T. T. Knox, First Cavalry, and J. H. McClintock, First United States Volunteer Cavalry; First Lieuts. G. L. Byram, First Cavalry, and J. R. Thomas, jr., First United States Volunteer Cavalry.

July 1-12.—Operations against Santiago, embracing the actions at San Juan, El Caney, and Aguadores, July 1-3, and actions around Santiago, July 10-12. Present for duty, June 30, 858 officers and 17,358 enlisted men. Killed, 22 officers and 222 enlisted men; wounded, 93 officers and 1,288 enlisted men.

Officers killed and wounded, 122. Killed: Col. C. A. Wikoff, Twenty-second Infantry; Lieut. Col. J. M. Hamilton, Ninth Cavalry; Maj. A. G. Forse, First Cavalry; Capt. C. W. Rowell, Second Infantry; A. M.

Wetherill, Sixth Infantry; John Drum, Tenth Infantry; T. W. Morrison, Sixteenth Infantry, and William O'Neill, First United States Volunteer Cavalry; First Lieuts. W. E. Shipp and W. H. Smith, Tenth Cavalry; J. G. Ord, Sixth Infantry; G. H. Field, Second Massachusetts Infantry; Second Lieuts. J. J. Bernard, Fourth Infantry; E. N. Benchley, Sixth Infantry; T. A. Wansboro, Seventh Infantry; L. H. Lewis, Ninth Infantry; W. A. Sater, Thirteenth Infantry; D. M. Michie, Seventeenth Infantry; J. A. Gurney and J. N. Augustin, Twenty-fourth Infantry; H. L. McCorkle, Twenty-fifth Infantry, and Acting Assistant Surgeon H. W. Danforth, who was on duty with Ninth Cavalry.

Wounded: Brig. Gen. H. S. Hawkins. Lieutenant-Colonels Henry Carroll, Ninth Cavalry; H. C. Egbert, Sixth Infantry; W. S. Worth, Thirteenth Infantry; J. T. Haskell, Seventeenth Infantry; E. H. Liscum, Twenty-fourth Infantry; J. H. Patterson, Twenty-second Infantry. Maj. H. W. Wessells, Third Cavalry; T. J. Wint, Tenth Cavalry; J. H. Smith, Second Infantry; A. W. Corliss, Seventh Infantry; S. H. Lincoln and R. I. Eskridge, Tenth Infantry; P. H. Ellis, Thirteenth Infantry, and W. O. Hayes, First Ohio Cavalry. Capt. H. L. Mills, A. A. G. Volunteers (first lieutenant, First Cavalry); G. K. Hunter and G. A. Dodd, Third Cavalry; J. B. Kerr and A. P. Blocksom, Sixth Cavalry; C. W. Taylor, Ninth Cavalry; John Bigelow, jr., Tenth Cavalry; C. D. Parkhurst, Second Artillery; W. J. Turner, Second Infantry; Z. W. Torrey and G. B. Walker, Sixth Infantry; J. B. Jackson, Seventh Infantry; R. C. Van Vliet, Tenth Infantry; James Fornance, J. B. Guthrie, and H. G. Cavanaugh, Thirteenth Infantry; William Lassiter, W. C. McFarland, and T. C. Woodbury, Sixteenth Infantry; H. B. Moon and J. B. Rodman, Twentieth Infantry; F. B. Jones, J. J. Crittenden, and Theodore Mosher, Twenty-second Infantry; A. C. Ducat and J. J. Brereton, Twenty-fourth Infantry; W. S. Warrenner, Second Massachusetts Infantry, and Capt. M. J. Henry, commissary of subsistence volunteers. First Lieuts. Arthur Thayer, A. C. Merrilat, and O. B. Meyer, Third Cavalry; W. S. Wood, Ninth Cavalry; R. L. Livermore, E. D. Anderson, and M. H. Barnum, Tenth Cavalry; W. C. Neary, Fourth Infantry; J. S. Grissard, Seventh Infantry; J. R. Seyburn, Eighth Infantry; Carl Koops, Tenth Infantry; A. B. Scott, Thirteenth Infantry; S. W. Dunning, Sixteenth Infantry; W. M. Dickinson, Seventeenth Infantry; G. J. Godfrey, Twenty-second Infantry; H. G. Lyon and J. E. Brett, Twenty-fourth Infantry; R. C. Day and J. A. Carr, First United States Volunteer Cavalry. Second Lieuts. W. C. Short, Sixth Cavalry; F. R. McCoy, T. A. Roberts, H. C. Whitehead, and H. O. Willard, Tenth Cavalry; B. H. Wells and W. J. Lutz, Second Infantry; J. H. Hughes, Fourth Infantry; L. H. Gross, C. N. Purdy, John Robertson, R. S. Turman, and W. H. Simons, Sixth Infantry; H. A. Lafferty, Seventh Infantry; M. C. Saville, Tenth Infantry; W. E. Dove and Clark Churchman, Twelfth Infantry; L. S. Sorley and R. E. Spence, Sixteenth Infantry; B. F. Hardaway, Seventeenth Infantry; F. R. Meade, Twenty-first Infantry; W. H. Wassell, Twenty-second Infantry; Albert Laws, Twenty-fourth Infantry; J. S. Murdock and H. L. Kinnison, Twenty-fifth Infantry; D. J. Moynehan and C. D. Hapgood, Second Massachusetts Infantry; W. E. Trull, Seventy-first New York Infantry; D. J. Leahy and H. K. Devereaux, First United States Volunteer Cavalry, and Acting Second Lieut. (cadet M. A.) Ernest A. Haskell, First United States Volunteer Cavalry.

OPERATIONS IN PORTO RICO, JULY 25 TO AUGUST 12.

[Maj. Gen. Nelson A. Miles, commanding.]

July 25.—Guanica road: One officer and 3 enlisted men wounded.

August 5.—Guayamo: Four enlisted men wounded.

August 8.—Four miles north of Guayamo: Five enlisted men wounded.

August 9.—Near Coamo: Six enlisted men wounded.

August 10.—Hormigueros: One enlisted man killed; 1 officer and 15 enlisted men wounded. Officer wounded: First Lieut. J. C. Byron, Eighth Cavalry, A. D. C. to General Schwan.

August 12.—Pass near Arbonito: Two enlisted men killed; 2 officers and 3 enlisted men wounded. Officers wounded: Capt. F. T. Lee, Third Wisconsin Infantry, and Lieut. J. P. Hains, Third Artillery.

August 13.—At crossing of the Rio Prieto, near Las Marias: No casualties.

The total casualties in Porto Rico were 3 enlisted men killed and 4 officers and 36 enlisted men wounded.

OPERATIONS IN MANILA, PHILIPPINES, JULY 30 TO AUGUST 12.

[Maj. Gen. Wesley Merritt, commanding.]

July 30–August 5.—In the trenches before Manila: Thirteen enlisted men killed; 7 officers and 57 enlisted men wounded.

Officers wounded: Capts. O. V. Hobbs, Third Artillery, Reinhold Richter, First California Infantry, and J. A. Loar, Tenth Pennsylvania Infantry; First Lieuts. E. F. Davis, First California Infantry, and R. D. Laird, Tenth Pennsylvania Infantry; Second Lieuts. A. J. Buttermore and G. L. Gordon, Tenth Pennsylvania Infantry.

August 13.—Assault on Manila: Four enlisted men killed; 3 officers and 39 enlisted men wounded.

Officers wounded: Capts. Oscar Seabach, A. W. Bjornstad, and First Lieut. O. G. Bunker, Thirteenth Minnesota Infantry.

The total casualties in Manila were 17 enlisted men killed, 10 officers and 96 men wounded.

Grand total of casualties in killed and wounded during the war with Spain.

CHARACTER OF ENLISTED MEN.

In assembling the regiments of the Regular Army at the beginning of the war with Spain the character of the enlisted men arrested attention. A distinguished foreign officer visiting the Fifth Army Corps at Tampa, remarked: "Every man looked fit to command." Their conduct on transports, on the march, in battle at El Caney, San Juan, and Santiago, gave abundant evidence that his good opinion was well placed. The officers and men by their valorous deeds and gallant conduct met the high expectation of the country.

The act of Congress approved August 1, 1894, providing for three-

year enlistments, did much to bring to the service a good class of men; the further provision of the act providing—

That no person (except an Indian) who is not a citizen of the United States, or who has not made a legal declaration of his intention to become a citizen of the United States, or who can not speak, read, and write the English language, or who is over 30 years of age, shall be enlisted for the first enlistment in the Army.

The enforcement of this law gave the country, small though it was, by common consent, the finest army the world has ever known. It is worthy of note that from the time the Fifth Army Corps left Tampa—June 14—until its return to Montauk Point—August 24—the commanding general was not called upon to order a trial of an officer or a soldier by general court-martial.

The new conditions will, however, make a modification of this statute desirable, to the end that the enlistment of from one company to a battalion of natives for each regiment serving in Cuba, Porto Rico, and the Philippines may be authorized. The advantage of this is too obvious for discussion.

THE RECRUITING SERVICE.

REGULAR ARMY.

During the past year the system of sending recruits enlisted at the various stations to regiments and posts with the least practicable delay has been adhered to as far as permitted by the changed conditions resulting from a state of war, and the departure of many regiments from the United States as integral parts of the expeditionary forces organized for service at different and distant points.

Prior to the existence of hostilities with Spain assignments were regularly made every ten days from the several recruiting stations and rendezvouses, and a very large portion of the men enlisted at city rendezvouses were sent direct from the places of enlistment to the posts where they were to serve.

When it became necessary to collect, at some convenient points, the recruits for regiments on foreign service, Fort McPherson, Ga., was selected as the rendezvous for the recruits destined for regiments serving in Cuba and Porto Rico, and the Presidio of San Francisco for those assigned to troops that had been sent to the Philippines. The exigencies of the service, however, having required that Fort McPherson be surrendered to the Medical Department for exclusive use as a general hospital, the recruits at that post were withdrawn to camps established in neighboring sections of Georgia, where those who could not conveniently be forwarded to their commands in the field accumulated, under the care of such officers as were available for the purpose. Most of the recruits for regiments in Porto Rico and the Philippines have now been forwarded to those places, while the recruits destined for the regiments withdrawn from Cuba have joined their respective commands.

The withdrawal of the garrison force of most of the military posts in the several geographical departments has, consequently, largely reduced the number of enlistments heretofore made at those stations, but in all cases where a commissioned officer was left with a detachment such post continued to be a general recruiting station.

The act of Congress approved March 8, 1898, provided for the organization of two additional regiments of artillery, thereby increasing the authorized enlisted strength of the Army by 1,610 men. Instructions were issued March 11, 1898, for manning these additional regiments, and their recruitment to the full number authorized by the above law of April 26, 1898, "for the better organization of the line of the Army

of the United States," which authorized the expansion of these and of all other regiments of the Regular Army to war strength. When Congress declared that war existed between the United States and Spain, orders were at once issued requiring that every proper effort be made by the several regimental commanders to recruit their respective commands to their legal strength on a war basis, and they were authorized to send out regimental recruiting parties for this purpose. At the same time instructions were given to general-service recruiting officers at posts and city stations, with a view to supplementing regimental enlistments by assignments of general-service recruits, each general-service recruiting officer being authorized to forward recruits to his own regiment to fill vacancies therein when requested to do so by his regimental commander.

While the two new artillery regiments were being recruited the number of enlistments increased from 725 in February to 1,439 in March and 2,085 in April. Under the stimulus of war, 25,500 enlistments were made for the Regular Army during the months of May, June, and July, notwithstanding the fact that during all this time the organization and recruitment of volunteers were actively progressing under the President's calls for 200,000 volunteers and the act of Congress, dated May 11, 1898, authorizing the organization of a volunteer brigade of engineers and an additional infantry force (immunes) of 10,000 men. By the end of August the Regular Army, exclusive of the Hospital Corps, had been recruited to an enlisted strength of about 51,000 men.

Most of the regular infantry and cavalry regiments were included in the expeditionary forces sent out of the United States. This fact and the scarcity of line officers (many of whom were necessarily engaged in mustering volunteers, or had received staff appointments in the Regular Army, or had been commissioned in the volunteer force) made it not always practicable for regimental commanders to comply fully with the instructions given them for recruiting their respective regiments. Those, however, who were able to detail a number of recruiting officers soon had their commands filled to the maximum strength. The need of artillery officers with their regiments was so great that the recruitment of those regiments was seriously interfered with.

In April, 1898, there was but 1 special regimental recruiting station in operation; in May there were 126 stations in operation during the whole or a portion of that month; in June, 120; in July, 85, and in August the number was reduced to 58.

A lack of officers for the purpose prevented, also, any considerable increase in the number of city recruiting stations of the general service. The number of such stations in October, 1898, was 15; in April, 1898, it was increased to 22, and this number has been about the average since that date. Recruiting officers at some of these stations have conducted branch stations or have been ordered, from time to time, to other points for the purpose of making enlistments. Instructions have been given for opening 6 additional recruiting stations, to be in charge of artillery officers.

The total number of enlistments and reenlistments in the Regular Army during the fiscal year ending June 30, 1898, exclusive of the Hospital Corps, was 29,521, classified as follows:

For the general service.....	19,988	
For the special recruiting service.....	9,219	
		<hr/> 29,207
For staff departments.....		314
Total		<hr/> 29,521

Of the 29,521 accepted applicants, 24,490 were native born and 5,031 of foreign birth; 27,140 were white, 2,345 colored, and 36 Indians (scouts). The enlistments numbered 24,248, and the reenlistments, 5,273. Excluding reenlistments, the percentage of native-born applicants for original enlistment was 87, the balance being naturalized citizens. The reports show that the recruiting officers making the 29,207 enlistments embraced in the first two items of the foregoing list rejected 98,277 applicants—a little over 77 per cent of the number seeking enlistment—as lacking in legal, mental, and moral or physical qualifications; 5,209 of these were rejected as aliens, and 4,788 for illiteracy.

VOLUNTEER ARMY.

Under and in pursuance of the President's proclamation of May 25, 1898, calling forth volunteers to the aggregate number of 75,000, and of section 7 of the act of April 22, 1898, providing that no new organizations shall be accepted into the service from any State unless the organizations already in service from such State are as near to their maximum strength as the President may deem necessary, general rules were formulated for accomplishing the objections of said proclamation and were published in General Orders, No. 61, dated June 1, 1898.

These instructions provided for recruiting to maximum strength the volunteer organizations already accepted and mustered into the service of the United States, excepting the organizations from certain States and Territories that had already received, under the President's first call, an apportionment to the extent of their combined quotas under the first and second calls.

Recruiting parties from the various volunteer organizations were sent to the localities where the troops had been raised, enlistments being also made at State camps and in the field, and recruiting progressed rapidly, with the result that the greater number of these organizations were rapidly filled prior to the signing of the protocol as a basis for negotiations looking to the reestablishment of peace between the two countries.

Following this action, instructions were given to suspend volunteer recruiting, except the enlistment of cooks, under the provisions of the act of July 7, 1898, for the organizations to remain in the United States service.

The total number of individual volunteer enlistments made is slightly over 40,000.

BREVETS AND MEDALS OF HONOR.

In obedience to your instructions, a board of officers will be convened at an early day to examine with care all recommendations for brevets and medals of honor for services in Cuba, the Philippines, and Porto Rico. It is expected by this means that all deserving cases will be brought to the attention of the President.

INCREASE OF THE REGULAR ARMY.

The organization of the cavalry, artillery, and infantry regiments has stood the test of trial in battle and received the approval of those in command; so that the increase of the line of the Army, demanded by our new possessions, should be by the addition of the necessary number of regiments organized as are those now in service. The number of officers should be increased by one first lieutenant to each troop, battery, and company. This would enable the Department to meet the demands for various details required by law and yet leave the troops

with the necessary number of officers for their proper discipline and instruction, and in war allow the appointment of sufficient generals and general staff officers, without destroying the efficiency of the Army, as threatened by the recent experience of the Department. The number of trained officers as herein provided for at the beginning of the present war would have saved lives and treasure, to say nothing of the increased efficiency of the service. At the beginning of the present war some 400 officers were appointed to the staff and volunteer regiments. With these, and for aids to the generals and other duty absolutely required for the conduct of the war, absent from their commands, the regiments were sent to battle with scarcely more than one officer to the company. It is difficult now, with the sick and wounded officers, for the Department to get one officer to the company, and too frequently there have been two companies with but one officer. The increase proposed would in no way give a greater number of officers than required.

By the date fixed for the assembling of Congress, the Department will, under your direction, be prepared to submit a bill providing for the increase of the Army.

Officers serving in the West Indies and the Philippines will, as a rule, be separated from their families and their living expenses greatly increased. It is recommended that all officers below the rank of major, while so serving, shall have the pay and allowance of the next higher grade.

GENERAL OFFICERS.

The requirements of probable service in Cuba and elsewhere call for an increase of general officers in the permanent establishment. There should be at least an increase of two major-generals and four brigadier-generals. Provision for the grade of lieutenant-general is called for by the best interests of the public service.

THE MILITIA.

The cordial relations which justly exist between the Regular Army and the National Guard of the several States have led, in past years, to the detail of such officers of the Army as could be spared for duty with the State forces at their annual encampments, etc. This course was necessarily interrupted by the war with Spain, but it is hoped will be resumed, with continued mutual benefit, in the near future.

The necessary reorganization of the militia of the several States, resulting from the temporary withdrawal of nearly 200,000 of these troops for active duty in the service of the United States, and the deep interest felt in the welfare and efficiency of the National Guard, prompts the suggestion of the following thoughts for the consideration of the military authorities and legislatures of the several States:

The readmission into the National Guard of the State organizations which volunteered their services to their country is a question having but one possible answer—to refuse admission, when desired, would practically punish men for their patriotic response to the call of the General Government.

While the yearly State encampments have been productive of positive good in imparting practical instruction to the troops participating, the experience of the recent campaign has demonstrated the absolute necessity of further assimilating the condition of encamped troops to the actual necessities of active service by making the men while in camp dependent for their subsistence on the army ration to be furnished

by the State authorities, on ration returns, and cooked by the troops in precisely the same manner as on actual service in the field. An organization ordered to a State camp for military instruction, relying on a caterer to furnish the necessary food, can never acquire that self-reliance which characterizes the regular soldier on active duty, for without previously received instruction in preparing food the natural result when called into service will be poorly cooked and wasted rations, which failing to strengthen the physical man, make him liable to febrile and stomachic troubles incident to service in all kinds of weather, under distressing but unavoidable conditions.

For this purpose, involving the issue of rations and the purchase of field cooking stoves and utensils, the annual appropriation made by Congress for the support, in part, of the militia is totally inadequate, and its increase, urged in past years, has now become a necessity.

POST-GRADUATE SCHOOLS.

The necessity of post-graduate schools for officers of the Regular Army has been thoroughly established, and the practical instruction obtained in all of them has been growing more and more valuable each year.

The total special appropriations for these schools amount only to the meager sum of \$8,500, which is insufficient for the purchase of even a modest allowance of the instruments and technical books required in them. The special attention devoted to practical instruction in reconnaissance, field engineering, minor tactics, outpost duty, etc., has given the young officers of the Army a better insight into these absolute essentials to successful warfare than any amount of individual theoretical study would have done.

INFANTRY AND CAVALRY SCHOOL, FORT LEAVENWORTH, KANS.

The war requiring the concentration of the Regular Army at different points in the South, most of the student officers were relieved and ordered to join their respective regiments. No complete synopsis of the work done during the year can therefore be given. It is recommended that an increase be made in the allotment of funds for the purchase of instruments and books necessary to keep the school abreast of the requirements demanded. The assignment of a light battery at the school is also deemed essential to the proper conduct of practical field exercises in conjunction with other arms.

ARTILLERY SCHOOL, FORT MONROE, VA.

The operations of this school were temporarily suspended and the senior class graduated on March 18. The positive value of the course in steam and mechanism is yearly made more evident, both by the increased interest manifested and by the results accomplished. Systematic instruction in the principles of mechanics is an essential part of the education of artillery officers, modern guns and carriages being complicated machines, requiring sometimes pneumatic and steam plants to operate them. The laboratory of the department of chemistry and explosives is thoroughly organized, and very fully equipped for its special work. The interruption of the exercises of the school, and the assignment to the artillery arm of many young officers who have had no opportunity for the necessary preliminary instruction, renders the present an opportune time for the thorough reorganization of the school along the general lines indicated in the scheme heretofore submitted by the school staff.

CAVALRY AND LIGHT ARTILLERY SCHOOL, FORT RILEY, KANS.

The departure in March last of the three light batteries for the Department of the Gulf, and on April 19 of the cavalry troops at the school for Chickamauga Park, left but a small force at the post for the care and preservation of the public buildings and property. The absence in the field of the directors has prevented any detailed reports of the operations of the school.

The work of the Cavalry and Light Artillery School at Fort Riley is almost entirely practical, and the one thing required to make this one of the most valuable schools for the Army is the presence of a larger garrison. There is a magnificent military reservation at the site of this school, and the climate of the locality is well adapted to the work in hand. The bringing together of a large number of troops, especially of the mounted arm, on this reservation will afford practical instruction to the student officers who compose the garrison as a part of the organizations on duty there, and can not fail to be of the utmost value to the Army in the future.

The recent addition to the Army of a large number of young officers appointed direct from civil life, without previous military education, will necessitate a very careful course of instruction for all of them in the near future at these schools. The difficulty of securing at this time instructors, as well as of sparing the officers from their regimental duty, will prevent the establishment of the schools before the next regular session, but the complete rehabilitation of these several schools at the earliest practicable moment is of the greatest importance, and is recommended.

POST LYCEUMS.

While the regular course at the posts in several military departments was of necessity interrupted by the preparations for war, the reports received indicate that the general purpose in establishing the post lyceums seems to have been accomplished.

It is quite a well-established fact in the minds of conservative and thoughtful line officers interested in the welfare of the service that, while those lyceums have been useful, they have not produced all the results anticipated. There are various reasons for this, but it is hoped that in the near future the lyceums may be made more interesting and valuable, while at the same time relieving them of any features which have heretofore been instrumental in preventing the success which was anticipated when they were originally established. There can be no question that the assembling of the officers of the various posts for discussion of professional subjects must redound to the great benefit of the young officers of the service. In many of the essays read, on subjects selected by the writers, there has been a manifestation of zeal and research which is most creditable.

POST SCHOOLS.

The operation of post schools has been necessarily interrupted by the movement of troops resulting from the war with Spain. It is a question at this time whether or not these schools should be continued. The ineligibility under the law of illiterate men for enlistment in the Army and the general intelligence of men now in the ranks point out the necessity of discontinuing the present elementary and more or less

defective course. Systematic instruction in all of the duties of a soldier could well be supplemented by teaching the preparation of reports and returns, typewriting, and many other useful and necessary things which do not form a part of the ordinary daily drills. There have been a few cases of successful accomplishment of the work in post schools, but, as a whole, the opinion of the line officers has been against the continuance of them for many reasons which have been developed during the progress of attempted instruction at the various posts. The voluntary attendance of grown men in schools is always so limited and uncertain that little interest can be taken in the instruction by those in charge. With enlistments limited to three years, it is a question whether any time should be devoted to teaching rudimentary studies.

It is suggested that an enlargement be made of post libraries at permanent posts, thus affording increased facilities to studious and ambitious noncommissioned officers and men for individual improvement.

ADJUTANT-GENERAL'S DEPARTMENT.

On February 25, 1898, Brig. Gen. Samuel Breck, an officer of high order of ability and of long and faithful service, was retired under the provision of the law. On the same date the undersigned succeeded to the office of Adjutant-General. The vacancy in the junior grade, caused by this promotion, was filled by the appointment of Maj. George Andrews (captain Twenty-fifth United States Infantry).

The promotions of Lieut. Col. Theodore Schwan, to be colonel, and Maj. William H. Carter, to be lieutenant-colonel, resulting from the act of May 18, 1898, temporarily increasing the strength of the Adjutant-General's Department by one colonel and one major, created two vacancies, which were filled by the appointments of Maj. Charles H. Heyl (captain Twenty-third United States Infantry) and Maj. John A. Johnston (captain Eighth United States Cavalry), while the vacancy resulting from the subsequent transfer of Major Heyl to the Inspector-General's Department was filled by the appointment of Maj. William A. Simpson (captain Second United States Artillery).

Five of the officers of the Department, viz, Cols. Michael V. Sheridan, Theodore Schwan, and Lieut. Cols. Arthur MacArthur, John C. Gilmore, and John B. Babcock, have been appointed brigadier-generals of volunteers. General MacArthur, for distinguished services in the battle of Manila, has been promoted to major-general of volunteers.

THE MILITARY INFORMATION DIVISION.

The assignment in May last of Lieut. Col. Arthur L. Wagner, assistant adjutant-general, the chief of the division, for active duty on the staff of the Major-General Commanding the Army, and the relief of most of the line officers heretofore on duty in that branch of the Adjutant-General's Office, devolved the conduct of its business in its numerous ramifications on Capt. Louis C. Scherer, assistant adjutant-general of volunteers, assisted by Second Lieut. Walter C. Babcock, Eighth Cavalry. The capacity and intelligence and industry they have shown in the performance of responsible and important duties are fully recognized.

The following is a list of the publications of the military information division since those enumerated in the last annual report from this office:

No. 15. The Autumn Maneuvers of 1896 in Europe.

No. 16. Part 1, Subsistence and Nursing in European Armies; part 2, Cavalry Pioneer Tools and High Explosives; part 3, Extracts from the New Drill Regulations (edition of 1896) of the Russian Cavalry, translated by Lieut. L. C. Scherer, Fourth Cavalry.

No. 17. Sources of Information on Military Professional Subjects.

No. 18. Selected Professional Papers, translated from European publications.

No. 19. The Organized Militia of the United States in 1897.

Military Notes on Cuba.

Military Notes on Porto Rico.

Notes on Centa.

Notes and Tables on Organization and Establishment of the Spanish Army in the Peninsula and Colonies.

List of Battle Ships, Cruisers, and Torpedo Boats of the Spanish Navy.

In addition to the above, there have been published monthly lists of the military publications—books, pamphlets, etc.—received in the Adjutant-General's Office, with dispatch blanks and envelopes, and road and position blanks.

There remain in course of publication—

No. 20. Military Notes on the Philippines.

No. 21. Revised Cuban Notes.

In the map section, in addition to various maps and sketches, etc., prepared for the publications noted above, the following work has been accomplished:

Published—

Maps of the Island of Cuba, scale 1:500,000, 4 sheets; scale 1:500,000, 8 sheets; scale 1:250,000, 4 sheets; scale 1:250,000, 8 sheets.

Map of Havana province, scale 1:100,000.

Havana city and vicinity, scale 1:18,000.

Map of the Philippines, scale, approximate, 1:810,285.

Map of Luzon, scale, approximate (with plan of Manila), 1:550,000.

Map of province of Cavite, scale 1:135,000.

Map of Porto Rico, scale 1:253,440.

In press—

Map of Porto Rico, scale 1:126,720.

Map of Centa, scale 1:8,000.

Completed—

Bird's-eye view of San Juan and vicinity; Fajardo and vicinity; Santiago and vicinity.

Port of the province of Santiago de Cuba, scale 1:100,000.

Map of Mindanao, scale 1:800,000.

Sketch map of the country between Sarecti Spiritus and Tunas de Zaza, Santa Clara Province, Cuba, scale 1:65.

Map of northeastern portion of Porto Rico, scale 1:63,360.

Map of Sagua La Grande, scale 1:124,706.

In preparation:

Map of the Canary Islands, scale 1:100,000.

Map of the Hawaiian Islands, scale 1:60,000.

Map of Cuba from Mariel to Cardenas, scale 1:63,360.

Map of the battle field of Antietam, scale 1:10,560.

Map of Egypt and the Egyptian Soudan, scale 1:8,000,000.

Bird's-eye view of Havana and vicinity.

In connection with the work of the office in making and distributing maps of Cuba, Porto Rico, the Philippines, etc., a photograph room was established early in 1898, with Second Lieut. W. O. Babcock, Eighth United States Cavalry, in charge. This room has added to the efficiency of the office, and is found to be as cheap and far more satisfactory than having the work done as heretofore, by contract.

MILITARY ATTACHÉS.

The number of military attachés at the several United States embassies and legations abroad is as follows:

In Europe (London and The Hague).....	2
Mexico, South America, etc.....	5

The military attachés at St. Petersburg, Russia, and Berne, Switzerland, were relieved during the past year and, at their urgent solicitation, seven others have been recalled to the United States for active service in the Army.

Recent events have demonstrated that our geographical isolation does not exempt us from foreign war, and that to neglect the employment of every known expedient for keeping abreast of the world's progress in the military art would be neglect of what is due the best interests of the people. Our traditional policy forbids the maintenance of a larger army than is necessary for our national security and dignity; but common prudence demands that our peace establishment, whatever its size, shall be as perfect, both as regards its personnel and material, as it is possible to make it. To bring about and to preserve such a state of excellence requires constant effort. Not only our own experience in the marches, campaigns, and battles, and in the armament and equipment of troops, but that of other nations as well, should be the test of the sufficiency of existing methods and pave the way for needed improvements. Hence, a constant comparison by experts of our military system, in all its details, with the ways and means in vogue in foreign military services, is desirable.

These considerations suggest care in the selection of the officers who are sent abroad to collect military information and attached for that purpose to our embassies and legations. To find officers who meet the requirements of these positions is often a matter of great difficulty. Not only a sufficient professional equipment, but other qualities, and also sufficient pecuniary means to enable the attaché to sustain his representative character, are essential; hence increased rank and allowance, so that an officer without a private fortune can afford to fill such detail. Then, too, it must be borne in mind that the consideration, personal and official, which such an officer receives abroad depends largely upon his rank. The exigencies of our service, in which promotion is slow, have repeatedly constrained the War Department to detail first lieutenants for this duty. The embarrassment, amounting in some cases to humiliation, though entirely unintentional, to which such officers have been subjected on account of their low rank as compared with that of their colleagues, many of whom represent the smaller nations, and not infrequently their junior in years, are cogently set forth in your report for the year 1897, and also in the report of the Senate Committee on Military Affairs (No. 547, Fifty-fifth Congress, second session), which accompanied a bill recommended by the committee for remedying the difficulties mentioned. The bill referred to gives the officer serving as military attaché to an embassy, while so serving, the rank, pay, and emoluments of a colonel and of a major to one attached in a like capacity to a legation. It is requested that you renew your efforts to induce Congress to enact this or a similar measure at its coming session. The field from which officers intrusted with duties of such importance can be chosen would thus be materially widened and the efficiency of the public service promoted.

THE MILITARY ACADEMY.

Col. O. H. Ernst, of the Corps of Engineers and Superintendent of the Military Academy, having been commissioned a brigadier-general of volunteers and assigned to duty with the Porto Rican expedition, the President, on August 22, 1898, under the provisions of section 1313 of the Revised Statutes, appointed First Lieut. Albert L. Mills, First United States Cavalry, as Superintendent of the Military Academy at West Point. The selection of Colonel Mills was a merited recognition of the gallantry and soldierly bearing of this officer in the campaign which terminated in the surrender of Santiago, where he was severely wounded.

In view of the great demand for officers for active duty in the field, the class of 1898 was graduated on the 26th of April and its members ordered to join the regiments to which they had been assigned as second lieutenants. As the exigencies of the service have deprived these young officers of the usual leave granted to cadets on graduating, it is recommended that this indulgence be granted them as soon as the demands of the service will permit.

The number of cadets at the Military Academy September 1, 1898, was 325, or 46 below the legal organization. From various causes there will be, undoubtedly, many more vacancies before the end of the academic year, and the Board of Visitors for some years past have united in the recommendation of the Superintendent of the Academy that the number of cadets (371) authorized by law be increased, there being sufficient instructional and barrack facilities. It is recommended that the number of yearly Presidential appointments be increased to 20, and that two appointments at large be nominated by the Senators representing each State of the Union.

The enlargement and remodeling of the library building is a pressing necessity, and under authority of a former Congress full plans, specifications, and estimates have been prepared, and attention is invited to the need of this work, in order that the full amount of the estimate submitted be allowed and made available at an early day.

The Military Academy Band, now the only Army band directly supported by the Government, should be restored to its status, as to numbers and pay, prior to 1877, when it was reduced. It is recommended that it be made to consist of 1 leader and 40 enlisted men, 10 of whom to receive \$34 per month and the others \$30 per month, with the allowances of other enlisted men; the leader of the band to be given the pay and emoluments of a second lieutenant of infantry. These musicians have no facilities for increasing their present meager compensation by engagements away from the post, and it is, therefore, extremely difficult, if not almost impossible, to obtain accomplished musicians for this band.

The position of assistant librarian at the Military Academy imposes onerous duties and demands intelligence of a high order, joined to indefatigable industry, and therefore there commendation of the Superintendent that the salary of the officer be increased from \$1,200 to \$1,500 is concurred in.

Under section 6 of the act of April 22, 1898, which provides "that in time of war no additional compensation shall be allowed to soldiers performing what is known as extra or special duty," the extra pay of the men of the Army service detachment at West Point was discontinued. As these men were enlisted not for duty as soldiers, but for the performance of specified work, for which, at the time of their enlist-

ment they expected to receive the additional compensation provided for in the appropriations for the support of the Military Academy, the recommendation of the Superintendent that it be restored to them not only in the future but also for the period of the war with Spain, is concurred in. It would be far better if this detachment was done away with and the men be hired as laborers by the Quartermaster's Department. These men care for the horses of the cadets, giving these young gentlemen wrong impressions of the duties and dignity of the soldier.

The use of the same horses for both saddle and draft purposes at the Military Academy is unavoidable at present, but as such use unfits them for cavalry and artillery instruction there should be provided 48 artillery horses and a detachment of artillery for the sole purpose of battery instruction, and it is so recommended. As an object lesson for the cadets, the establishment of a post consisting of not less than two troops of cavalry and one battery of light artillery at the Military Academy is recommended.

It is strongly urged for obvious reasons that all of the obsolete and unserviceable artillery material in the siege and seacoast batteries of instruction be replaced by modern guns, and that the field battery be increased from four to six guns, as the present battery of instruction (four 3.2-inch guns) is inadequate for the standing gun drills of the fourth class, which averages 100 cadets.

The discipline of the cadets is excellent, and the moral tone of the Academy all that could be desired.

MILITARY COLLEGES.

The declaration of war with Spain was immediately followed, almost without exception, by requests for active duty on the part of the officers detailed at the several universities and colleges as professors of military science and tactics, and resulted in the cessation of military instruction at these institutions. In view of the positive benefits to the youths of the land accruing from a systematic blending of military instruction with the usual curriculum of academic studies, cultivating as it does habits of obedience to authority and fostering manliness of deportment and habits, the importance of college details can not be overestimated, and their early resumption is recommended as soon as can be with due regard to the interests of the troops in the field.

PAY OF NONCOMMISSIONED OFFICERS.

While all military men recognize more and more the great value in regimental and company organizations of thoroughly efficient noncommissioned officers, and have deplored the fact that the very slight increase of the pay of that valuable class over that of the men in the ranks is totally inadequate when their duties and responsibilities are considered, no legislative action—excepting the case of first sergeants, whose pay was increased in recent years to \$25 per month—has been obtained to provide such reasonable rates for the several grades of noncommissioned officers as would offer substantial inducements to men in the ranks of superior intelligence and qualifications to strive for these positions. Indeed, it has often happened that regiments and companies have suffered the loss of efficient noncommissioned officers by reason of the extra duty pay (suspended in war times) provided and given by the supply departments.

It is therefore recommended that the attention of the Congress be called to the importance of a well-directed measure that will embrace

all grades of noncommissioned officers of the line, from sergeant-major to corporal.

The selection of suitable men for appointment as noncommissioned officers is a duty upon which depends much of the efficiency of the command; they are to be in immediate contact and control of the men, and the measure of success in the military administration of each command depends largely upon their character, capacity, integrity, energy, and soldierly qualities.

It is suggested whether the best results would not be attained by substituting for the present method of appointment of noncommissioned officers—largely a matter of personal preference—one that, being based on the result of competitive examination by military boards, would more fully develop the physical, moral, and professional fitness of the men offering themselves as candidates, the regimental and company commanders retaining the power of selection, which, however, would be limited to a class of eligibles.

The adoption of this course would, it is thought, awaken the ambition of men in the ranks capable of qualifying, and, by inducing them to select the profession of arms as their future career, secure to the Army a highly trained and thoroughly efficient noncommissioned class; and capable, in time of war, of furnishing good material for volunteer officers.

ARMY BANDS.

The present organization of regimental bands consists of 1 chief musician authorized by law and of 1 sergeant and 20 privates detailed for the purpose because possessing more or less musical ability, but who are, nevertheless, instructed as soldiers and subject to be called on for duty in that capacity. The band is of no expense to the Government other than the cost of instruments and music, being maintained by part of the savings of rations, a small percentage of the profits of the post exchanges, with occasional earnings from private engagements with parties in civil life. This last source of support involving competition with civilian musical organizations, is therefore objectionable and has been kept down; but it has been found impossible to secure first-class musicians for the pay of the private soldier.

This question is one deserving Congressional action. Music has become necessary to the health and well-being of the soldier.

In view of the above faulty organization and lack of proper compensation, it is recommended that regimental bands be increased to at least 30 men, enlisted as "Band musicians," and given the following organization and rates of pay, viz:

1 chief musician	\$75.00
2 principal musicians	50.00
10 first-class musicians	35.00
17 second-class musicians	25.00

At this rate of pay young men of intelligence and character, who desire to make music a profession, would seek positions in our military bands.

CLERICAL DUTY IN THE ARMY.

The general-service corps created in 1886, subject only to assignment for clerical and messenger duty at the headquarters of the Army, as well as at those of the several geographical departments, and arbitrarily divided, as to the clerks, into three grades, receiving, respectively,

\$1,200, \$1,100, and \$1,000 per annum, was superseded, under the provisions of the act of August 6, 1894, by a civilian force placed under civil-service rules. This change operated to deprive the general-service clerks of the privileges of medical attendance, of purchase from the commissary and quartermaster's department, and of retirement, while their pay remained at the rate indicated. This rate of compensation is lower than that allowed to clerks in the supply departments at the same headquarters, works injustice to a meritorious class of men, and great hardship when called on—as has happened—to accompany to the field the commander of the military departments at whose headquarters they had been assigned to duty.

It is recommended that this force be brought under the general classification established by the act of March 3, 1853, as amended by the act of April 22, 1854, which governs the classification of clerks in the several Executive Departments, with the addition of a class at \$1,000. The chief clerk at the headquarters of the Army should be a clerk of class 4, those at the headquarters of important departments of class 3, and at all other department headquarters of class 2. It is further recommended that, in times of active service, this force be increased to 200 men, by selection of suitable men from regiments, to enable the War Department to assign trained and competent clerks to the several corps and divisions in the field. The detail for clerical duty at these important headquarters of untrained men most seriously hampers the commanding general and the adjutant-general of the command, results in delayed and imperfect returns, and necessarily increases the work of this office.

GOVERNMENT HOSPITAL FOR THE INSANE.

The following is a list of persons committed to the Government Hospital for the Insane, under the orders of the Secretary of War, from September 1, 1897, to September 1, 1898:

Officers of the United States Army.....	3
Enlisted men of the United States Army.....	51
Enlisted men of the United States Army (retired).....	2
Late soldiers of the United States Army	5
Total	61

THE ADJUTANT-GENERAL'S OFFICE.

The legal organization of the clerical and other force of the office has remained unchanged during the past year, but the tremendous increase of business immediately following the declaration of war with Spain made an additional force necessary, for which, and its subsequent increase, Congress made suitable provision in the acts of May 31 and July 7, 1898. The number of the temporary clerks appointed in this office steadily increased, and is now 141, largely composed, since the cessation of hostilities, of men from the Regular and the Volunteer Army, who, being found possessed of the requisite qualifications, were thus partially rewarded for the trials and hardships endured by them in the service.

The calls of the President for 200,000 volunteers almost overwhelmed the office with tenders of service from all parts of the country, while thousands of applications for staff and other positions taxed to the utmost the physical endurance of the force, which, regardless of hours, labored with a gratifying degree of success considering the serious

inconvenience resulting from crowded rooms and the growing insufficiency of space for the office records and files. This last condition has been improved from time to time by the assignment of additional quarters:

The muster in of the large Volunteer Army called into the service of the Government in April and May of the present year, and the orders, less than five months afterwards, for mustering out 100,000 men, present an unexampled condition of affairs which sufficiently indicate the many difficulties under which this office has labored. It is estimated that, from May to August, 4,000,000 blank forms and returns were distributed to the Army from Maine to Manila, and the number of packages of blanks and record books put up and forwarded exceeded 15,000.

A serious drawback to business was the nonreceipt at this office of the prescribed returns of the troops, delaying and in many instances preventing satisfactory response being made to the numerous inquiries received daily from all sections of the country.

Of the officers of this Department, six have been appointed general officers of volunteers, five are now serving as brigadier-generals, and one as major-general of volunteers; two others, Lieutenant-Colonel Wagner and Major Barry, served with troops in the field. To those serving in the office—Col. Thomas Ward, Col. Theodore Schwan (brigadier-general of volunteers), Lieut. Col. William H. Carter, Maj. H. O. S. Heistand, and Maj. John A. Johnston—acknowledgment of their devotion, faithful and intelligent performance of duty under trying conditions is freely made. The service contains no more deserving public servants.

To assist in the organization of the volunteer troops, Capt. James S. Pettit, First United States Infantry, and First Lieut. Herbert H. Sargent, Second United States Cavalry, were called to temporary duty in the office and rendered excellent service.

The uniform courtesy and cooperation of the heads and officers of other staff departments are gratefully recognized. It is worthy of note that under all the trying conditions through which the Department has passed there has not been a sign of discord. All have vied with each other in an intelligent and faithful performance of duty. The clerical force of the office has been no less diligent and faithful, and richly deserve recognition due the most meritorious. To Mr. W. S. Coursey, confidential clerk to the Adjutant-General, special acknowledgment is made.

To you, sir, for your uniform courtesy and consideration, sincere thanks are gratefully rendered.

H. C. CORBIN,
Adjutant-General.

The Honorable
The SECRETARY OF WAR.

APPENDIX.

WAR DEPARTMENT, *April 22, 1898.*

The following instructions to mustering officers are approved and will be strictly observed.

R. A. ALGER, *Secretary of War.*

DETAIL OF MUSTERING OFFICERS, ETC.

1. Only officers of the Regular Army (except in case of necessity) will be detailed to muster troops into and out of the service of the United States, and no officer will make such musters unless detailed for that duty by the War Department.

2. For all musters of troops *in the field* a mustering officer will be detailed by the department or corps commander for their respective commands, and also one for each division or district. All rolls and communications sent to and from officers on this duty at division or district headquarters will be through the office of the mustering officer of the department or corps, who will exercise a supervision over the whole subject of the musters of the command.

As soon as the mustering officers are detailed as herein directed their names will be reported to the Adjutant-General of the Army.

Mustering officers are empowered to administer oaths in all matters pertaining to enlistment and mustering of volunteers.

3. Each mustering officer of a district or division will report without delay to the mustering officer at the next superior headquarters all musters made by him, forwarding two copies of the muster-in and four copies of the muster-out rolls, and delivering the third and fifth copies, respectively, to the individual officers or company commanders concerned. These rolls and reports will be forwarded by the mustering officer of a department or corps, who will add his own report of such musters as he may have made and forward them, with one copy of the muster-in and muster-out rolls, in each case, direct to the Adjutant-General of the Army, disposing of the other copies of the rolls as prescribed in the directions printed on the blanks for muster in and out rolls.

4. Mustering officers will not be relieved from this duty or transferred to another command without authority from the War Department.

MUSTERING IN A REGIMENT OR OTHER FORCE.

5. An officer who is appointed to make a muster of any force into the service of the United States, on arriving at the place designated in his instructions, will, if the name of the commander and captains be not given in his order, obtain the information from the proper authority, generally from the executive of the State. And he must be satisfied that the whole number of companies for the designated command are present or on their way there, with organization complete, unless otherwise directed, before he commences the muster.

6. The organization of regiments, battalions, and companies of volunteers or militia will be as authorized by law, or by regulations made by the War Department, of which the mustering officer and all concerned will be duly advised by the Adjutant-General of the Army.

7. Field and staff officers of regiments may be mustered into service upon completion of the organization of regiments or companies, as follows:

Cavalry.—Colonel and chaplain—when an entire regiment is organized. Lieutenant-colonel—when six troops are organized. Majors—one for every four troops.

Artillery.—Colonel and chaplain—when an entire regiment is organized. Lieutenant-colonel—when six batteries are organized. Majors—one for every four batteries.

Infantry.—Colonel and chaplain—when an entire regiment is organized. Lieutenant-colonel—when six companies are organized. Major—when four companies are organized.

Engineers.—Colonel and chaplain—when an entire regiment is organized. Lieutenant-colonel—when six companies are organized. Majors—one for every four companies.

During the organization of a volunteer regiment, the adjutant, quartermaster, and, when absolutely necessary, the medical officers thereof may be mustered into service, to aid in recruiting the regiment, and for the prompt transaction of all other public business. The noncommissioned staff will in no case be mustered in till the regiment is complete.

8. After a regiment has been mustered into service no commissioned officer will be mustered in before producing a commission from the governor of his State. After the commission has been exhibited the mustering officer will satisfy himself that a vacancy exists, in which case only can he make the muster. The muster-in roll must show, over the certificate of the mustering officer, that the vacancy existed, and how it occurred. For example, if the vacancy resulted from death, the remark will be, "vice Captain ———, deceased;" if from resignation, "vice Lieutenant ———, resigned."

9. When volunteers are to be mustered into the service of the United States, they will be minutely examined by a medical officer of the Army detailed for that purpose, when practicable, to ascertain whether they have the physical qualifications necessary for the military service. Medical officers before being mustered into the service of the United States will be required to pass a satisfactory examination as to character and professional ability before a board of Army or civilian surgeons, or both, designated by the Surgeon-General of the Army. If there be no medical officers, duly appointed, present, the mustering officer, on consultation with the regimental commander, will select and engage the services of one or more physicians, having diplomas and of well-established capacities and character, to assist him in inspecting the officers and men to be mustered, and to attend upon and accompany the troops on their march till relieved by others regularly appointed. They will be borne on the muster roll of field and staff as acting surgeon and acting assistant surgeon (not embraced in recapitulation), with dates and place of commencement of service, and in the column of remarks, say, "Engaged at Baltimore, July 25, by mustering officer, with approval of the regimental commander, to serve as acting surgeon (or acting assistant surgeon) in the regiment temporarily, and provisionally mustered at the rate of pay and allowances of that grade while serving, and for mileage from place of discharge to his home, or the place of general rendezvous."

10. Volunteers and militia are not to be less than 18 nor more than 45 years of age. Some exceptions may be admissible for overage in commissioned officers who are otherwise well qualified, but in this the mustering officer must exercise a sound and rigid judgment.

11. The men having been accepted by the surgeon the company will be formed and faced to the right. The mustering officer, accompanied by the surgeon, after inspecting and accepting the captain and lieutenants, will place himself about a dozen paces from, and nearly in front of, the first sergeant, with the captain near him, on his right, to call the names. The second lieutenant will place himself by the left of the first sergeant, with directions to keep the right—now front—file of the company (not called) closed up to his front, and to see that each man, when his name is called, personally answers "*Here*" in a tone to be heard distinctly by the mustering officer. At the instant of answering the man will step off briskly to and in front of the mustering officer, and pass on to join the first lieutenant, who will form the company in the same order as before, see that the rear-rank men cover those in front, and intervals preserved between the grades, so that the number in each may be easily distinguished and counted.

12. The mustering officer will be careful that men from one company or detachment are not borrowed for the occasion, to swell the ranks of others about to be mustered in. To this end, he will, at the conclusion of the muster-in of each battalion or regiment (whether mustered in by companies or not), cause the entire force to be paraded for inspection; and in case any deception or fraud is discovered to have been practiced, he will immediately report the fact to the Adjutant-General, that the guilty parties may be dismissed the service. No volunteer will be mustered into the service who is unable to speak the English language.

13. If the company be a mounted organization the men will be on horseback, in one rank, and the mustering officer will require them to move out of the rank for inspection. The horses will also be examined for soundness and adaptability for service. No horse under 5 nor over 9 years old should be received. In addition to the usual examination of officers and men a test of horsemanship must be made under the direction of the mustering officer; and no person shall be mustered into the mounted service who does not exhibit good horsemanship and practical knowledge of the ordinary care and treatment of horses.

14. Much will depend on the efficiency of the animals, and if the mustering officer is not a good judge of horses in the qualities mentioned he must obtain the services of some reliable disinterested person who is.

15. The horse equipments will consist of a saddle, saddle blanket, bridle with curb bit, and tie rope or halter, all strong, well fitting, and in excellent condition; but

no equipment will be accepted unless of pattern adopted for use in the United States Army for like purposes. Valuation of equipments shall not exceed the United States ordnance price for same, and the valuation of horses shall not exceed the Government contract price for animals for like use and purposes.

16. The mustering officer and captains of companies will select three impartial men of good standing who are judges of the value of horses, and not members of any company, nor owning or having interest in any horse therein, to appraise the horses and horse equipments. The valuation will be the fair cash price at the place and time—what the judges would be willing to give were they purchasing for themselves. And the assessed value for horses and horse equipments, subject to the limitation stated in paragraph 15 of these instructions—the two separate—will be put on the muster-in roll opposite the owners' names, and the appraisers, being sworn by the mustering officers, will sign the certificate for that purpose on the muster-in roll. And the valuation will be continued on the subsequent rolls.

17. Every officer and man should be the owner of the horse in his use; no officer or other person belonging to the command (company or regiment) can be the owner of, or in any manner have interest in, the horse in use by another.

18. When all the men have been called and accepted, the mustering officer, accompanied by the captain, will count the number in each grade, and see that they correspond with the number of names on the muster-in roll, and agree with the prescribed organization.

19. The mustering officer will administer the oath of allegiance as prescribed in the second Article of War to insure subordination and faithful service on the part of officers and men who have by enrollment and muster enlisted into the service of the United States. The company will be directed to uncover heads and hold up right hands, and then in a loud, distinct, and impressive manner the following oath will be administered:

"All and each of you do solemnly swear (or affirm) that you will bear true faith and allegiance to the United States of America, that you will serve them honestly and faithfully against all their enemies whomsoever, and that you will obey the orders of the President of the United States, and the orders of the officers appointed over you, according to the Rules and Articles of War."

The oath having been administered the mustering officer will cause the officers and enlisted men to subscribe to the same by signing their names in the appropriate column on the muster-in roll.

20. Three copies of the muster-in roll will be made and as soon as possible after muster in the mustering officer will forward one copy to the Adjutant-General of the Army, one copy to the adjutant-general of the State, and the third copy will be returned to the regimental, company, or detachment commander.

MUSTERING OUT A REGIMENT OR OTHER FORCE.

21. The rolls for this purpose will be compared with the muster-in rolls. All persons on the muster-in rolls, and absent at the final muster, must be accounted for, whether dead, captured, discharged, or otherwise absent; and if the mustering officer, in any particular case, shall have cause to doubt the report entered on the rolls, he shall demand the oath of one or more persons to prove the fact to his satisfaction. The rolls will also contain the names of all persons who have been borne on all muster rolls subsequent to the muster-in rolls, and the mustering officer will see that no more persons of the several ranks or grades are mustered out of service than were mustered in, unless fully satisfied that any excess was regularly authorized and at the time entered on the rolls.

22. Five copies of the muster-out roll will be made and disposed of by the mustering officer as follows: One to be sent to the Adjutant-General of the Army, two to the paymaster by whom the troops are to be paid, one to the adjutant-general of the State, and the fifth to the company commander, who will retain the same.

23. Whenever volunteers, or militia, are mustered for final discharge, on the expiration of their term of service, a discharge will be furnished for each officer and enlisted man, whether present or absent, except deserters. The blank discharges will be carefully filled in, signed by the commanding officer for the field, staff, and band, by the captains for their respective companies, and all countersigned by the mustering officer and by him returned to those officers for delivery to the individuals.

GENERAL DIRECTIONS.

24. No officer of the general staff of the militia force will be mustered into the service without special authority from the War Department.

25. No muster-in shall be dated back without authority from the Adjutant-General, except upon proof that it could not have been made at an earlier date, which proof shall consist of the affidavit of the officer, accompanied by that of his regi-

mental or detachment commander, setting forth that he has made all proper efforts to have himself mustered in, but without success, before the time at which he now presents himself. These affidavits must be attached to the copy of the muster-in roll intended for the Adjutant-General.

26. No officer shall be mustered in to date prior to the time that he has actually been performing the duties of the grade into which he desires to be mustered, nor prior to the time at which a vacancy is proved to have existed by the regimental or company records. If on the muster and pay rolls the applicant appears mustered for pay in one grade, he can not be mustered into the service, to cover the same period, as of any other.

27. When an officer or enlisted man receives a commission or appointment advancing him to a higher grade, and has not an opportunity of being mustered in, so as to appear on the next muster rolls as of the grade to which he is commissioned or appointed, he shall be mustered on the next muster roll in his proper grade, according to previous muster in, and a remark to the following effect made on the muster rolls opposite his name: "Received commission (or appointment) from the governor of the State of ———, as ———, in the ——— regiment of ——— volunteers, on ——— day of ———; waiting muster-in since that date."

28. Musters into the new and out of the old grade must be made for each appointment of a commissioned officer, as well as when enlisted men are appointed commissioned officers. A discharge in orders, or by order of the proper authority, is in all cases a muster out of the service of the United States, and no muster-out rolls will be furnished in such cases.

29. Individual musters in and musters out must be made on separate rolls, and a separate roll must be made for each individual. Officers or enlisted men of different organizations must not be mustered in or out on the same rolls.

30. A muster once made will in no case be altered, except by authority from the Adjutant-General of the Army, and all applications for alterations must pass through the mustering officer, if possible.

31. Enlisted men having received commissions or appointments will not be mustered in as commissioned officers until they shall have been discharged as soldiers by the department or corps commander.

GENERAL ORDERS, }
No. 26. }

HEADQUARTERS OF THE ARMY,
ADJUTANT-GENERAL'S OFFICE,
Washington, April 27, 1898.

By direction of the Secretary of War, the following is published to the Army for the information and guidance of all concerned:

All absolutely necessary expenses for the subsistence, transportation, sheltering, and generally the maintenance of volunteers during the interval between their enrollment (enlistment) and their muster (or being sworn) into the service of the United States; also all incidental expenses connected therewith, such as the hire of offices, clerks, messengers, etc., for mustering officers, will be met by the Government of the United States from the proper appropriation at the disposal of the several staff departments of the Army. Certified vouchers for all expenditures herein authorized will be forwarded to the War Department for audit and payment. The vouchers should be certified by officers of the proper staff departments and approved by the mustering officers.

By command of Major-General Miles:

H. C. CORBIN, *Adjutant-General.*

GENERAL ORDERS, }
No. 31. }

HEADQUARTERS OF THE ARMY,
ADJUTANT-GENERAL'S OFFICE,
Washington, April 30, 1898.

By direction of the Secretary of War, the following instructions governing the arming and equipping of volunteer troops called into service under the President's proclamation of April 23, 1898, and providing for the proper accountability for the arms and equipments, are published for the information and government of all concerned:

1. As soon as a regiment has been mustered into the United States service, the commanding officer of the regiment shall detail a lieutenant to perform the duties of acting ordnance officer for the regiment.

2. As soon as a regiment or other organization has been mustered into the United States service, the governor of the State is to invoice to the ordnance officer of a regiment, or the commanding officer of an organization, all the ordnance and ordnance stores which are furnished to the regiment or organization by the State.

3. The acting ordnance officer of a regiment, or the commanding officer of other organizations, will, immediately on receipt of this invoice, forward to the Chief of Ordnance a requisition, on blank form 22 to be furnished by the Chief of Ordnance, United States Army, for the ordnance and ordnance stores required to complete the armament and equipment of the regiment or organization. This requisition shall state:

- (a) The number of men mustered into the regiment or organization.
- (b) The total of ordnance and ordnance stores required for the full armament and equipment of the regiment or organization.
- (c) The ordnance and ordnance stores received from the governor of the State.
- (d) The difference, or the stores to be furnished to the regiment or organization by the Chief of Ordnance.
- (e) On receipt of stores from the Ordnance Department, the ordnance officer of a regiment or the commanding officer of an organization will send receipts therefor to the issuing officer.

4. On receipt of the ordnance and ordnance stores, both from the State and from the Chief of Ordnance, United States Army, the acting ordnance officer will, under the direction of the commanding officer of the regiment, turn over to each company or troop commander the stores required by each company or troop, taking receipts therefor, which receipts will be filed as vouchers with the next return to the Chief of Ordnance. Company or troop commanders are then held accountable for property turned over to them, and must make returns for such property to the Chief of Ordnance, United States Army, in accordance with existing law and Army Regulations. The acting ordnance officer will account to the Chief of Ordnance for the surplus stores left in his hands and for the armament and equipment of the non-commissioned staff and band.

5. On receipt of the stores invoiced to the ordnance officer of a regiment or to the commanding officer of an organization from the governor of the State, said officer will furnish the usual receipts to the governor of the State for property received, which receipts will be used as vouchers with the State's next property return to the Chief of Ordnance.

6. The Chief of Ordnance will keep an exact account of all the stores turned over to each regiment or organization by each State, as provided for herein, with a view to making provisions for future settlement with the State therefor.

7. All necessary blanks will be furnished by the Chief of Ordnance upon application, and such application should be made at once. The forms at first needed will be sent by the Chief of Ordnance to the different regiments and organizations as soon as it is ascertained where they are located.

By command of Major-General Miles:

H. C. CORBIN, *Adjutant-General.*

GENERAL ORDERS,)
No. 33.)

HEADQUARTERS OF THE ARMY,
ADJUTANT GENERAL'S OFFICE,
Washington, May 5, 1898.

By direction of the Secretary of War, the following instructions governing the arming and equipping of volunteer troops called into service under the President's proclamation of April 23, 1898, and providing for the proper accountability for the arms and equipments, are published in addition to those contained in General Orders, No. 31, Headquarters of the Army, Adjutant General's Office, April 30, 1898, for the information and government of all concerned:

1. As soon as a regiment has been mustered into the United States service, the commanding officer of the regiment shall appoint a regimental quartermaster for the regiment.

2. As soon as a regiment or other organization has been mustered into the service of the United States, the governor of the State is requested to invoice to the quartermaster of the regiment, or of the organization, all clothing, equipage, and quartermaster's supplies which were supplied and furnished the State by the Government of the United States. Should the clothing, equipage, and quartermaster's supplies furnished to the States by the Government of the United States be insufficient for the complete equipment of the regiments or organizations, then the clothing, equipage, and quartermaster's supplies which have been supplied and furnished by the State should be utilized, as far as possible, in the equipment of the several regiments or organizations, and a separate invoice of such clothing, equipage, and quartermaster's supplies should be made by the governor to the quartermaster of the regiment or organization stating its condition.

3. The quartermaster of a regiment, or of other organizations, will, immediately on receipt of this invoice, forward to the Quartermaster-General requisitions, on blank forms 53 and 60 to be furnished by the Quartermaster-General, United States

Army, for the clothing, equipage, and other quartermaster's supplies, required to complete the equipment of the regiment or organization. This requisition shall state:

- (a) The number of men mustered into the regiment or organization.
 - (b) The total of clothing, equipage, and other quartermaster's supplies required for the full equipment of the regiment or organization.
 - (c) The clothing, equipage, and other quartermaster's supplies received from the governor of the State.
 - (d) The difference to be furnished to the regiment or organization by the Quartermaster-General.
 - (e) On receipt of stores from the Quartermaster's Department, the quartermaster of a regiment or other organization will send receipts therefor to the issuing officer.
4. On receipt of the clothing, equipage, and other quartermaster's supplies, both from the State and from the Quartermaster-General, United States Army, the quartermaster will, under the direction of the commanding officer of the regiment, turn over to each company or troop commander the stores required by each company or troop, taking memorandum receipts therefor as provided in Army Regulation 1053, but the quartermaster will continue to carry said supplies on his returns until they have been transferred or expended and duly accounted for as required by Army Regulations.
5. On receipt of the stores invoiced to the quartermaster of a regiment or of an organization from the governor of the State, said officer will furnish the usual receipts to the governor of the State for property received, which receipts will be used as vouchers with the State's next annual property return to the Quartermaster-General.
6. The Quartermaster-General will keep an account of all the stores turned over to each regiment or organization by each State, as provided for herein, with a view to making provision for future settlement with the State therefor.
7. All necessary blanks will be furnished by the Quartermaster-General upon application, and such application should be made at once. The forms at first needed will be sent by the Quartermaster-General to the different regiments and organizations as soon as it is ascertained where they are located.

By command of Major-General Miles.

H. C. CORBIN, *Adjutant-General*.

GENERAL ORDERS, }
No. 47. }

HEADQUARTERS OF THE ARMY,
ADJUTANT-GENERAL'S OFFICE,
Washington, May 17, 1898.

By direction of the Secretary of War the following instructions from the treaty articles of the Geneva Convention, together with regulations for their observance, are published for the information of all concerned:

EXTRACTS FROM THE TREATY ARTICLES OF THE GENEVA CONVENTION.

ARTICLE I. Ambulances and military hospitals shall be acknowledged to be neuter, and, as such, shall be protected and respected by belligerents so long as any sick or wounded may be therein.

Such neutrality shall cease if the ambulances or hospitals should be held by a military force.

ART. II. Persons employed in hospitals and ambulances, comprising the staff for superintendence, medical service, administration, transport of wounded, as well as chaplains, shall participate in the benefit of neutrality while so employed and so long as there remain any wounded to bring in or to succor.

ART. III. The persons designated in the preceding article may, even after occupation by the enemy, continue to fulfill their duties in the hospital or ambulance which they serve, or may withdraw in order to rejoin the corps to which they belong.

Under such circumstances, when these persons shall cease from their functions, they shall be delivered by the occupying army to the outposts of the enemy.

ART. IV. As the equipment of military hospitals remains subject to the laws of war, persons attached to such hospitals can not, in withdrawing, carry away any articles but such as are their private property.

Under the same circumstances an ambulance shall, on the contrary, retain its equipment.

* * * * *

ART. VI. Wounded or sick soldiers shall be entertained and taken care of, to whatever nation they may belong.

Commanders in chief shall have the power to deliver immediately to the outposts of the enemy soldiers who have been wounded in an engagement, when circumstances permit this to be done, and with the consent of both parties.

Those who are recognized, after their wounds are healed, as incapable of serving, shall be sent back to their country.

The others may also be sent back, on condition of not again bearing arms during the continuance of the war.

Evacuations, together with the persons under whose direction they take place, shall be protected by an absolute neutrality.

ART. VII. A distinctive and uniform flag shall be adopted for hospitals, ambulances, and evacuations. It must, on every occasion, be accompanied by the national flag. An arm badge (brassard) shall also be allowed for individuals neutralized, but the delivery thereof shall be left to military authority.

The flag and the arm badge shall bear a red cross on a white ground.

* * * * *

ADDITIONAL ARTICLES.

ARTICLE I. The persons designated in Article II of the convention shall, after the occupation by the enemy, continue to fulfill their duties, according to their wants, to the sick and wounded in the ambulance or the hospital which they serve. When they request to withdraw, the commander of the occupying troops shall fix the time of departure, which he shall only be allowed to delay for a short time in case of military necessity.

* * * * *

ART. III. Under the conditions provided for in Articles I and IV of the convention, the name "ambulance" applies to field hospitals and other temporary establishments, which follow the troops on the field of battle to receive the sick and wounded.

* * * * *

ART. V. In addition to Article VI of the convention, it is stipulated that, with the reservation of officers whose detention might be important to the fate of arms and within the limits fixed by the second paragraph of that article, the wounded fallen into the hands of the enemy shall be sent back to their country, after they are cured, or sooner if possible, on condition, nevertheless, of not again bearing arms during the continuance of the war.

REGULATIONS.

1. All persons connected with the medical department of the Army in the field, or referred to in Article II of the treaty, shall wear habitually during the war, on the left sleeve of the coat, midway between the shoulder and elbow, a brassard or arm badge, consisting of a red cross on a white ground.

2. All hospitals, ambulances, and field stations of the medical department will habitually display the Red Cross flag accompanied by the national flag.

3. Permits, in duplicate, for civilians to be present with the Army, in the service of the medical department, may be given by authority of a division commander; one copy of the permit will be retained by the person neutralized, and its duplicate should be forwarded promptly to the chief surgeon of the Army.

4. Persons neutralized under this authority will report themselves at once to the chief surgeon of division for instructions.

5. The wearing of the arm brassard by any person not officially neutralized is prohibited.

By command of Major-General Miles:

H. C. CORBIN, *Adjutant-General.*

GENERAL ORDERS, }
No. 54. }

HEADQUARTERS OF THE ARMY,
ADJUTANT-GENERAL'S OFFICE,
Washington, May 25, 1898.

The following standard of supplies and equipment for field service is published for the information and guidance of troops in the military service of the United States. The allowance is regarded as the minimum for field service:

Headquarters of an army corps.—Three wagons for baggage, etc., or 8 pack mules; 1 two-horse wagon; 1 two-horse spring wagon; 10 extra saddle horses for contingent wants; 2 wall tents for commanding general; 1 wall tent for every two officers of his staff.

Headquarters of a division.—Two wagons for baggage, etc., or 5 pack mules; 1 two-horse spring wagon; 1 two-horse wagon; 5 extra saddle horses for contingent wants; 1 wall tent for commanding general; 1 wall tent for every two officers of his staff.

Headquarters of a brigade.—One wagon for baggage, or 5 pack mules; 1 two-horse spring wagon; 2 extra saddle horses for contingent wants; 1 wall tent for the commanding general; 1 wall tent for every two officers of his staff.

Allowance of transportation for regiment of cavalry, 49 wagons or 144 pack animals.

Allowance of transportation for battery light artillery, 4 wagons.

Allowance of transportation for regiment of infantry, 25 wagons.

Supplies to be carried in wagons per company: Ten days' field rations per man; 100 rounds of ammunition per soldier; 250 pounds of officers' baggage and supplies; tentage; grain for animals; utensils for each company mess, not to exceed 350 pounds for each troop, battery, or company; horseshoes, nails, tools, and medicines for cavalry horses, not to exceed 300 pounds; to each soldier or civilian employee (compactly rolled in one piece of shelter tent), 1 blanket, 1 poncho, and 1 extra suit of under-garments.

Whenever the amount of rations or grain varies from the above, the weight to be carried per 6-mule wagon may be increased or diminished, but should not exceed 4,000 pounds, and for 4-mule wagon 3,000, and, if possible, should be less per wagon.

Whenever obtainable on line of march, full forage will be allowed all animals, the rate of purchase to be regulated by the Quartermaster's Department.

To be carried on the person or horse: One overcoat, 1 piece of shelter tent, 50 rounds of rifle or carbine, and 24 rounds of revolver ammunition per soldier.

Supplies to be carried on pack mules for one troop of cavalry: Five days' field rations per man; 100 rounds of ammunition per soldier.

The utensils for each troop of cavalry must not exceed 350 pounds.

The weight of load per aperejo must never exceed 250 pounds, and should, if possible, be less than 200 pounds.

Troop of cavalry, company of infantry, or light battery.

	Troop of cavalry.	Company of infantry.	Light battery.
	<i>Pounds.</i>	<i>Pounds.</i>	<i>Pounds.</i>
Field rations, 10 days: Cavalry, 100 men; infantry, 106; artillery, 125..	3, 640	3, 858	4, 550
Ammunition, 100 rounds: Cavalry, 100 men; infantry, 106 men	725	769
Officers' baggage and supplies.....	250	250	250
Tentage (7 conical wall for cavalry and infantry, each; 9 for light battery).....	854	854	1, 098
Grain for animals, 10 days, 6 lbs.: Cavalry, 115; infantry, 12; artillery, 126	6, 900	720	7, 560
Utensils for each company mess.....	350	350	350
Horseshoes, nails, tools, and medicines for cavalry and artillery horses.	300	325
Soldiers' baggage: Each 1 blanket, 1 poncho, 1 extra suit of under-garments, and 1 piece shelter tent.....	1, 662	1, 761	2, 078
Total.....	14, 681	8, 562	16, 211

By command of Major-General Miles: H. C. CORBIN, *Adjutant-General.*

GENERAL ORDERS,)
No. 55.)

HEADQUARTERS OF THE ARMY,
ADJUTANT-GENERAL'S OFFICE,
Washington, May 26, 1898.

By direction of the Secretary of War, the following law and the regulations established by the President to carry the same into effect are published for the information and guidance of all concerned:

"Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, in addition to the volunteer forces provided for by the act of April twenty-second, eighteen hundred and ninety-eight, entitled 'An act to provide for temporarily increasing the military establishment of the United States in time of war, and for other purposes,' the President may authorize the Secretary of War to organize, under the terms and conditions of the aforesaid act, a volunteer brigade of engineers from the nation at large, to consist of not more than three regiments and not more than three thousand five hundred men, possessing the special qualifications necessary for engineer troops, under such rules and regulations, including the appointment of the officers thereof, as may be prescribed by the Secretary of War: Provided, That not to exceed three officers of the Corps of Engineers of the Regular Army may hold volunteer commissions in any one regiment of the volunteer brigade of engineers at the same time: And provided further, That all officers shall be appointed by the President and with the consent of the Senate.

"SEC. 2. And the President is further empowered, during the present war, under the act of April twenty-second, eighteen hundred and ninety-eight, to authorize the Secretary of War to organize an additional volunteer force of not exceeding ten thousand enlisted men possessing immunity from diseases incident to tropical climates; the officers thereof to be appointed by the President, by and with the advice and consent of the Senate.

"SEC. 3. The provisions of the act of April twenty-second, eighteen hundred and ninety-eight, which provides that volunteers called out by proclamation of the President shall be apportioned to the several States, and the provisions of said act which provides that the governor of the States shall appoint officers shall not apply to this act.

"Approved, May 11, 1898."

I. VOLUNTEER ENGINEER BRIGADE.

1. The brigade of engineers provided for in the above-cited act of Congress will comprise three regiments, to be designated, respectively, the First, Second, and Third regiments, United States Volunteer Engineers.

Each regiment will consist of 1 colonel, 1 lieutenant-colonel, 1 first lieutenant (adjutant), 1 first lieutenant (quartermaster), 1 surgeon, 2 assistant surgeons, 1 chaplain, 1 sergeant-major, 1 quartermaster-sergeant, 1 chief musician, 2 principal musicians, and three battalions.

Each battalion will consist of 1 major, 1 first lieutenant (adjutant), 1 first lieutenant (quartermaster), 1 sergeant major, 1 quartermaster-sergeant, 1 hospital steward, and four companies.

Each company will consist of 1 captain, 1 first lieutenant, 1 second lieutenant, eight sergeants, eight corporals, 2 musicians, 45 first-class privates, and 28 second-class privates.

For each regiment: Total commissioned, 53; total enlisted, 1,106; aggregate, 1,159.

2. The officers will be selected for their skill as military, civil, electrical, mechanical, or topographical engineers. An effort will be made to recruit the enlisted men from every branch of the engineering profession and of mechanical skill. Machinists, steam engineers, blacksmiths, carpenters, plumbers, telegraphers, topographers, draftsmen, photographers, railroad men, riggers, boatmen, and those skilled in the use of explosives are especially desired.

3. Volunteer engineer troops will be armed and equipped as infantry. Their uniform will conform to that prescribed for the use of engineer troops of the Regular Army.

II. U. S. VOLUNTEER INFANTRY.

1. The force provided for in the second section of the afore-quoted act of Congress will, as far as practicable, be made up of officers and men, who, owing to their origin, the places of their residence, and other circumstances affecting their physical characteristics, possess immunity, or are likely to be exempt from diseases incident to tropical climates.

It will be organized into ten regiments of infantry by the Adjutant-General of the Army, who will designate each regiment "_____ Regiment of United States Volunteer Infantry." At least five of the regiments will be composed of white persons and the other regiments of persons of color.

2. Each regiment will consist of 1 colonel, 1 lieutenant-colonel, 2 majors, 12 captains, 14 first lieutenants (including 1 adjutant and 1 quartermaster), 12 second lieutenants, 1 surgeon, 2 assistant surgeons, 1 chaplain, 1 sergeant-major, 1 quartermaster-sergeant, 1 chief musician, 2 principal musicians, and 3 hospital stewards, and of three battalions composed each of four companies.

The enlisted strength of each company will not exceed 1 first sergeant, 1 quartermaster-sergeant, 4 sergeants, 8 corporals, 2 musicians, 1 artificer, 1 wagoner, 64 privates; aggregate, 82. The minimum enlisted strength is fixed at 75.

For each regiment: Total commissioned, 46; total enlisted, 992; aggregate, 1,038.

III. GENERAL PROVISIONS.

1. A board will be instituted for each regiment of engineers and regiment of volunteer infantry, consisting of the colonel and one officer of the Regular Army not connected with the organization, for the purpose of examining such applicants for commissions in the regiment as have been invited by the War Department to present themselves for examination and as have been pronounced by a medical officer of the Army to be free from bodily defects that would disqualify them for the military service. The board will submit their reports to the Adjutant-General of the Army,

specifying the grade of commission which each candidate found qualified as deemed fit to hold, and, when necessary, authority to recruit will be given accordingly.

In order to expedite the organization and equipment of each regiment, the regimental quartermaster and adjutant selected may be at once commissioned first lieutenants, but the commissions of the other officers as prescribed by the law will not be issued from the Adjutant-General's Office until the established number of men are ready for muster into service. Authority to recruit will not be given to any person who has not been passed upon by a board. Regulations for the guidance of examining boards, and establishing the scope of the examination for applicants for commissions for each of the branches of the service herein provided for, will be announced hereafter.

2. Noncommissioned officers will be selected and appointed in accordance with the Army Regulations. Such of them as show aptitude in the handling of men and can demonstrate in other regards their fitness for it to the satisfaction of an examining board will be entitled to promotion to commissioned rank.

3. All applications for commissions in regiments of either branch of the force, or for information concerning them, will be addressed to the Adjutant-General of the Army and be marked "United States Volunteer Engineers" or "United States Volunteer Infantry." Each applicant will state his age, where born, whether a citizen of the United States, his residence, and educational qualifications. If an applicant for appointment in the engineer brigade, his special technical qualifications; if for appointment in a regiment of volunteer infantry, his educational qualifications must be stated.

4. The officers designated to organize regiments under these rules will at the proper time make requisitions on the several staff departments for arms, equipments, clothing, and camp equipage, indicating the point to which supplies are to be sent; and they will keep the Adjutant-General of the Army advised as to progress of the recruitment and organization of their several commands.

5. The provisions of General Orders, No. 26, Adjutant-General's Office, 1898, for meeting expenses connected with the raising of volunteers under said quotas are hereby made applicable to the recruitment of regiments of this force. Expenditures of this account must be limited to cases of absolute necessity. Special care will be observed that no man be enrolled who lacks the requisite moral and physical qualification. To this end and to facilitate the mustering of companies into the United States service, a form of enrollment paper containing the certificate of the recruiting agent that the man enrolled fulfills all physical requirements will be supplied by this office. Subsequent rejections on account of physical defects are to be explained by the enrolling agent.

By command of Major-General Miles:

H. C. CORBIN, *Adjutant-General.*

CIRCULAR)
No. 14.)

HEADQUARTERS OF THE ARMY,
ADJUTANT-GENERAL'S OFFICE,
Washington, May 27, 1898.

By direction of the Secretary of War the following letter of the First Assistant Postmaster-General, in regard to the franking of letters mailed by soldiers in the field, is published for the information of the armies in the field:

POST-OFFICE DEPARTMENT,
FIRST ASSISTANT POSTMASTER-GENERAL,
DIVISION OF CORRESPONDENCE,
Washington, May 24, 1898.

SIR: I have the honor to return herewith your reference, dated May 20, and mailed May 23 at 1.30 p. m., of a telegram from General Shafter in regard to the franking of letters mailed by soldiers in the field. The act of Congress approved March 3, 1879, contains the following provision:

"The Postmaster-General may, however, provide, by regulation, for transmitting unpaid and duly certified letters of soldiers, sailors, and marines in the service of the United States to their destination, to be paid on delivery."

Under the provisions of the above act the Postmaster-General has issued the following regulation:

"Letters written by officers, commissioned or noncommissioned, and privates in the military, naval, or marine service of the United States, to be transmitted unpaid must be plainly marked 'Soldier's letter,' 'Sailor's letter,' or 'Marine's letter,' as the case may be, and signed thereunder with his name and official designation by a field or staff officer, post or detachment commander to whose command the soldier belongs, or by a surgeon or chaplain at a hospital where he may be, and in the Navy

and Marine service by the officer in command of the vessel, or surgeon on board, or officer commanding naval hospital or detachment on shore. Letters so certified will be forwarded charged with postage due at single rates only, to be collected on delivery."

I presume that this will cover the inquiry made by General Shafter.

Very respectfully,

PERRY S. HEATH,
First Assistant Postmaster-General.

The SECRETARY OF WAR.

By command of Major-General Miles:

H. C. CORBIN, *Adjutant-General.*

GENERAL ORDERS, }
No. 57. }

HEADQUARTERS OF THE ARMY,
ADJUTANT-GENERAL'S OFFICE,
Washington, May 30, 1898.

After a prolonged period of peace our Army is once more called upon to engage in war in the cause of justice and humanity. To bring the military forces to the highest state of efficiency and most speedily accomplish what is expected should be the earnest effort and call forth the best energies of all its members, of whatsoever station.

The laws and regulations which govern military bodies in civilized countries have been developed to their present perfection through the experience of hundreds of years, and the faithful observance of those laws and regulations is essential to the honor and efficiency of the Army.

All authority should be exercised with firmness, equity, and decorum on the part of superiors, and should be respected by implicit obedience and loyal support from subordinates.

Every officer of whatever grade will, so far as may be in his power, guard and preserve the health and welfare of those under his charge. He must labor diligently and zealously to perfect himself and his subordinates in military drill, instruction, and discipline; and, above all, he must constantly endeavor, by precept and example, to maintain the highest character, to foster and stimulate that true soldierly spirit and patriotic devotion to duty which must characterize an effective army. The major-general commanding confidently trusts that every officer and soldier in the service of the Republic, each in his proper sphere, will contribute his most zealous efforts to the end that the honor and character of the Army may be preserved untarnished and its best efforts crowned with success.

This order is given upon a day sacred to the memory of the heroic dead, whose services and sacrifices afford us example and inspiration, and it is expected that all will be fully impressed with the sacred duty imposed upon the Army by the Government of our beloved country.

By command of Major-General Miles:

H. C. CORBIN, *Adjutant-General.*

GENERAL ORDERS, }
No. 58. }

HEADQUARTERS OF THE ARMY,
ADJUTANT-GENERAL'S OFFICE,
Washington, May 31, 1898.

I. By direction of the Secretary of War, the following is published to the Army for the information and guidance of all concerned:

Enlisted men of the volunteer organizations may be transferred to the Hospital Corps of the Regular Army by the commanding general of the army corp in which the soldier is serving, upon the recommendation of the chief surgeon of the corps.

The provisions of Army Regulations governing the Hospital Corps, so far as they are inapplicable in time of war and with troops in the field, are hereby suspended during the existence of such conditions.

The commander of an army corps, or of a division or brigade acting independently of a corps, is charged with the full control of the transfer from the line, the enlistment, reenlistment, and discharge of members of the hospital corps of his command, with the detail of acting hospital stewards and the appointment of hospital stewards.

Acting hospital stewards will be detailed from privates of the Hospital Corps who are recommended by their medical officers as possessing the necessary qualifications. Hospital stewards will be appointed from acting hospital stewards who are recommended by their medical officers and who have served not less than three months in the Hospital Corps and are approved by a board of not less than three medical officers.

Enlistment papers in duplicate, examination forms, and outline figure cards for members of the Hospital Corps will be forwarded to the Surgeon-General's Office, as now required, and monthly reports will be made by the chief surgeon of the corps, or division if acting independently, showing the number of stewards, acting stewards, and privates on duty, the names of men transferred from the line, of those enlisted or reenlisted, discharged, died, detailed acting hospital steward, or appointed hospital steward.

The quota of members of the Hospital Corps for a corps of 25,000 men is—

	Hospital stewards.	Acting hospital stewards.	Privates.
For each regiment of infantry	1	1
For each artillery battalion. three light batteries	3	1
For each regiment of cavalry	1	2
For each corps headquarters	1	2
For each division headquarters	1	1
For each brigade headquarters	1
For each division ambulance company, and for the reserve corps company	7	3	104
For each division field hospital, and for the reserve corps field hospital	6	3	90

The three volunteer hospital stewards mustered in with each regiment are included in this strength.

The corps commander may make such distribution of the members of the Hospital Corps within his command as he considers for the best interests of the service.

By command of Major-General Miles:

H. C. CORBIN, *Adjutant-General.*

GENERAL ORDERS, }
No. 60. }

HEADQUARTERS OF THE ARMY,
ADJUTANT-GENERAL'S OFFICE,
Washington, June 1, 1898.

1. The following-named officers will proceed to the places set after their names for the purpose of organizing the regiments of volunteer infantry to which they have been appointed the colonels:

- Col. Patrick H. Ray, Third U. S. Volunteer Infantry, to Macon, Ga.
 - Col. James S. Pettit, Fourth U. S. Volunteer Infantry, to Washington, D. C.
 - Col. Herbert H. Sargent, Fifth U. S. Volunteer Infantry, to Columbus, Miss.
 - Col. Lawrence D. Tyson, Sixth U. S. Volunteer Infantry, to Knoxville, Tenn.
 - Col. Edward A. Godwin, Seventh U. S. Volunteer Infantry, to Memphis, Tenn.
 - Col. Eli L. Huggins, Eighth U. S. Volunteer Infantry, to Louisville, Ky.
 - Col. Charles J. Crane, Ninth U. S. Volunteer Infantry, to New Orleans, La.
 - Col. Jesse M. Lee, Tenth U. S. Volunteer Infantry, to Raleigh, N. C.
- The travel enjoined is necessary for the public service.

2. The apportionment of territory in which these organizations will be raised will be as follows:

For the Third Regiment, Colonel Ray, the States of Georgia, South Carolina, and Florida; headquarters at Macon, Ga.

For the Fourth Regiment, Colonel Pettit, the States of Maryland, Virginia, West Virginia, and the District of Columbia; the headquarters of this regiment will be designated hereafter.

For the Fifth Regiment, Colonel Sargent, the States of Alabama and Mississippi; headquarters at Columbus, Miss.

For the Sixth Regiment, Colonel Tyson, the States of Kentucky and Tennessee; headquarters, Knoxville, Tenn.

For the Seventh Regiment, Colonel Godwin, the States of Missouri and Arkansas, and so much of Tennessee as lies east of a due north and south line running through the city of Cincinnati, Ohio; headquarters, Memphis, Tenn.

For the Eight Regiment, Colonel Huggins, the State of Kentucky, all of Tennessee not otherwise allotted, and the Ohio Valley; headquarters, Louisville, Ky.

For the Ninth Regiment, Colonel Crane, the State of Louisiana; headquarters, New Orleans, La.

For the Tenth Regiment, Colonel Lee, the States of Virginia and North Carolina; headquarters, Raleigh, N. C.

3. The following officers are hereby detailed as mustering officers for the various regiments above named:

For the Third Regiment, Capt. E. P. Brewer, Seventh Cavalry.

For the Fourth Regiment, Capt. Wm. P. Goodwin, Fourteenth Infantry.

For the Fifth Regiment, First Lieut. Magnus O. Hallis, Fourth Infantry.

For the Sixth Regiment, First Lieut. S. P. Vestal, Seventh Cavalry.

For the Seventh Regiment, Capt. P. E. Trippe, Tenth Cavalry.

For the Eighth Regiment, Second Lieut. J. McA. Palmer, Fifteenth Infantry.

For the Ninth Regiment, First Lieut. F. D. Webster, Twentieth Infantry.

For the Tenth Regiment, First Lieut. William G. Elliot, Twelfth Infantry.

4. Each mustering officer will also act as quartermaster and commissary for the purposes of subsisting the volunteers from the time of enrollment to the time of rendezvous, and for their transportation from the place of enrollment to the place of rendezvous.

Upon the receipt of this order each mustering officer will communicate by telegraph with the colonel of the regiment to which he is assigned, and thereafter will hold himself in readiness to proceed to such points as the colonel may indicate, and at which a body of recruits approximating the size of a company is awaiting muster-in to the United States service.

The surgeon or assistant surgeon of the regiment will also proceed with the mustering officer to the same points; and the colonel or one of his staff officers is authorized to proceed from the regimental headquarters to the place where each company is being organized and to conduct it to the headquarters of the regiment.

As soon as a company has been organized and mustered into service the mustering officer will direct its transportation to the place of rendezvous of the regiment.

For this purpose the mustering officers will provide themselves with the necessary transportation requests and other blanks, and will make timely requisition for such travel rations as may be necessary.

Commanding officers of regiments will so arrange their itineraries as to involve as little travel as possible.

The travel herein directed is necessary for the public service.

By command of Major-General Miles:

H. C. CORBIN, *Adjutant-General.*

GENERAL ORDERS, }
No. 61. }

HEADQUARTERS OF THE ARMY,
ADJUTANT-GENERAL'S OFFICE,
Washington, June 1, 1898.

Under and in pursuance of the President's proclamation of May 25, 1898, calling forth volunteers to the aggregate number of 75,000, and of section 7 of an act of Congress approved April 22, 1898, which provides that no new organizations shall be accepted into the service from any State unless the organizations already in service from such State are as near to their maximum strength as the President may deem necessary, the following general rules for accomplishing the objects of said proclamation are announced by the Secretary of War for the information and guidance of all concerned:

1. Organizations already accepted and mustered into the United States service under the President's proclamation of April 23, 1898, will be expanded: first, by recruiting such companies thereof as have been mustered in to the maximum enlisted strength prescribed in the act of Congress approved April 26, 1898, and published in General Orders, No. 29, April 29, 1898, from this office; second, *except for cavalry*, by the organization of additional companies necessary for the completion of regiments to twelve companies, and battalions to four companies, of the maximum enlisted strength above indicated. The number of recruits required for each organization already in service will be determined by the Adjutant-General of the Army, under whose direction and supervision the recruitment herein ordered will be conducted.

2. The following States and Territories having received under the President's first call an apportionment in excess of their combined quotas under first and second calls, will not be included in this order, viz: Delaware, Idaho, Montana, Nevada, North Dakota, South Dakota, Vermont, Wyoming, District of Columbia, Arizona, New Mexico, Oklahoma, and Indian Territories.

3. With the exceptions indicated in paragraph 2, a recruiting party consisting of one officer and four enlisted men, one of whom should be qualified to perform clerical work, will be detailed from each battalion of a regiment and from each independent battalion already in the service, by the commanding officer thereof. In like manner a recruiting party of one officer and one enlisted man will be detailed from each company now in service and not otherwise provided for herein. Each party will be ordered to proceed to the locality where the organization for which it is to recruit was raised. Instructions for recruiting officers and blank forms will be sent to the Adjutant-General of the State, to whom officers in charge of recruiting parties should

apply for the same, notifying him of the number of men he is to recruit. The names of the officers, their respective organizations and the points to which sent will be reported to the Adjutant-General of the Army, who will give all further orders and instructions that may be necessary. Each recruiting officer thus detailed will also be an acting quartermaster.

4. Arrangements will be made through the chief quartermaster of the department within the geographical limits of which the recruiting is being done for renting, when necessary, under emergency agreements, suitable quarters for temporary recruiting stations and the furnishing of supplies therefor. Arrangements will be made with the chief commissary of the department, as above, for the subsistence of recruiting parties and recruits. Recruits will be sent, under charge of the most reliable one of their number, to their several regiments in small squads without uniform, arms, or equipment. Each commander detailing a recruiting officer under these instructions will promptly mail to the chief commissary and chief quartermaster, respectively, of the department into which the recruiting officer is sent, a copy of the order of detail with the signature of the recruiting officer inscribed upon the same.

5. Additional companies necessary for the completion of regiments and battalions as herein provided for, will be organized and mustered into the United States service under the same rules that govern the organization and muster-in of the troops raised under the President's proclamation of April 23, 1898, and the necessary instructions will be promulgated later.

6. Department, corps, and regimental commanders are intrusted with the prompt and careful execution of this order. The necessary orders for transportation and subsistence will be given by department and corps commanders, the travel enjoined being necessary for the public service.

By command of Major General Miles:

H. C. CORBIN, *Adjutant General.*

[Circular letter.]

WAR DEPARTMENT, ADJUTANT-GENERAL'S OFFICE,
Washington, June 3, 1898.

VOLUNTEER RECRUITING SERVICE.

I. The following instructions are published for the information and guidance of officers of the Volunteer Army detailed under the provisions of General Orders, No. 61, June 1, 1898, from this office, to recruit for their own organizations after muster into the service of the United States, to fill them to the maximum:

QUALIFICATIONS FOR RECRUITS.

Applicants for enlistment must be between the ages of 18 and 45 years, of good character and habits, able-bodied, free from disease, and must be able to speak the English language.

Married men will be enlisted only upon the approval of a regimental commander.

Minors must not be enlisted without the written consent of father, only surviving parent, or legally appointed guardian.

Enlistments will be confined to persons who are citizens of the United States, or who have made legal declaration of their intention to become citizens thereof.

Applicants will be required to satisfy the recruiting officer regarding age and character, and should be prepared to furnish the necessary evidence. They must defray their own expenses to the place of enlistment; their fitness for the military service can be determined only upon examination at a recruiting station.

The term of service is two years.

For infantry and artillery the height should be not less than 5 feet 4 inches, and weight not less than 120 pounds and not more than 190 pounds.

For cavalry the height should not be less than 5 feet 4 inches and not more than 5 feet 10 inches, and weight not to exceed 165 pounds. No minimum weight is prescribed for cavalry, but the chest measures must be satisfactory.

Recruiting officers are, however, authorized in their discretion to accept desirable applicants who are 10 pounds or less overweight or underweight, or who vary not more than a fraction of an inch from the required height or chest measures, if they meet all other requirements. In every such case the variation from the normal standard should be carefully noted on the enlistment paper.

EXAMINATION OF RECRUITS.

At a recruiting station where there is no medical officer of the Army, Regular or Volunteer, available to examine applicants for enlistment, the recruiting officer will immediately telegraph the fact to the Surgeon-General of the Army, stating the number of men required by the organization for which he is recruiting, in order that it may be determined whether or not a contract physician will be provided for the purpose. If no provision be made for the medical examination of applicants before enlistment, the required examination will be made by the recruiting officer himself, guided by Greenleaf's Epitome of Tripler's Manual (4th edition), and recruits who are accepted by him will be enlisted and sworn into service. (A. R. 842.) Recruits thus enlisted will be reexamined by a civilian physician before leaving the recruiting station for regiments, and before any clothing is issued to them. This reexamination will be made as soon as practicable after enlistment, and always before the expiration of the trimonthly period within which the oath is administered. The accounts of physicians for such examinations will be prepared by the recruiting officers in accordance with Army Regulation 1458, on forms supplied by the Surgeon-General.

The physician who makes the reexamination will record the result thereof in an appropriate place on the enlistment form and specify all defects discovered in his examination not reported by the recruiting officer.

If the result of the physician's examination be favorable, the recruit will be considered as finally accepted.

If the opinion of the physician be that the recruit is disqualified for the service, a certificate of disability (A. R. 154), signed by the physician and the recruiting officer, with a duplicate of the enlistment form, will be forwarded by the recruiting officer direct to the Adjutant-General of the Army, with full report of the facts.

ENLISTMENTS.

The enlistment form for volunteers (A. G. O., No. 8, Vols.) will be used. This blank includes a form for the physical examination of recruits. All enlistments will be as privates, and only one enlistment paper will be made in the case of each volunteer soldier, except as provided for in note on blank. Enlistment papers will be transmitted to the Adjutant-General of the Army by the recruiting officer on the 10th, 20th, and last day of each month, with a trimonthly report prepared on Form A. G. O., No. 29. Recruiting officers are required to give *personal* attention to the preparation and forwarding of these reports, as it is of first importance that they be *promptly and correctly* rendered in accordance with the instructions thereon.

Each trimonthly report, with the enlistment papers pertaining thereto, will be mailed to this office in an envelope containing no other matter. No enlistment papers are to accompany the copy of the trimonthly report sent to the regimental or other commander.

An assignment card (A. G. O., No. 9, Vols.) will be prepared for each recruit enlisted, and will be sent to the destination of the recruit, as provided in paragraph 850, Army Regulations, and the instructions on the card.

Great care must be taken in the preparation of all these blanks, and it is specially important that the designation of the regiments for which enlistments are made be correctly indicated thereon.

These instructions are *not* intended to apply when authority is given to raise additional companies for any organization. (Paragraph 5, General Orders, No. 61, of 1898.)

MAXIMUM LIMITS.

For a regiment the maximum of all grades, commissioned and enlisted, must not exceed 1,326 in infantry or 1,255 in cavalry.

For a company the maximum of all grades is 106 in infantry, 100 in cavalry, 173 in field artillery, and 200 in heavy artillery, *provided* that the maximum strength of all grades for regiments as herein given shall in no case be exceeded.

Whenever practicable the choice by an accepted applicant of a particular company of the regiment or other organization for which the recruiting officer is making enlistments should be respected, *provided* there is a vacancy therein.

Recruiting officers will communicate frequently with their commanding officers in order to keep fully advised of the number of recruits required from time to time, and to prevent making enlistments that will carry a regiment, battalion, or any company beyond the authorized maximum.

RECRUITING STATIONS AND QUARTERMASTER'S SUPPLIES.

Emergency agreements may be entered into for renting suitable quarters when required for temporary recruiting stations and the furnishing of supplies therefor.

Certified vouchers for such rent and other actually necessary expenditures pertaining to the Quartermaster's Department should be forwarded for payment to the chief quartermaster of the department within the geographical limits of which the recruiting is being done, to whom the recruiting officers should also apply for necessary transportation requests and for any desired information regarding the use thereof, the route by which recruits should be sent, &c.

SUBSISTENCE OF RECRUITING PARTIES AND RECRUITS.

Subsistence funds for payment of commutation of rations for recruits, or to pay coffee money to them, can be obtained by the recruiting officer from the chief commissary of the department within the geographical limits of which he is recruiting. Circular letter, Adjutant-General's Office, January 3, 1896, publishes instructions regarding the subsistence of recruits while traveling.

Upon the arrival of a recruiting officer at a city or town where he is to establish a recruiting station he will at once make inquiries at the available places in the neighborhood of the station as to the prices at which meals for his party can be obtained and will procure them, of proper quality, by open purchase at the most reasonable rates, until he can advertise for proposals by means of Form No. 28, Subsistence Department. Payment for meals will be made in the manner indicated in the notes on that form. Attention is called to that condition of the contract for meals (Form No. 28, Subsistence Department) which stipulates that lunches shall be furnished when required. These lunches are intended to take the place of travel rations for recruits traveling, where it is not practicable to furnish the travel ration.

The Secretary of the Treasury, under section 3620, Revised Statutes, has authorized subsistence funds to be retained in small amounts in the personal possession of officers intrusted with the disbursement of the same, wherever such officers are stationed in places where there is no Treasurer or assistant treasurer of the United States. For convenience of recruiting officers who receive funds and make payments in small amounts, and of the recruits who receive such payments, it is preferable that payments be made in ready money rather than by checks on distant depositories.

ADDITIONAL INSTRUCTIONS, BLANKS, ETC.

To supplement the instructions contained in this circular letter, each recruiting officer detailed under the provisions of General Orders, No. 61, of 1898, will, in accordance with paragraph 3 of that order, be furnished, through the adjutant-general of the State, with a copy thereof, and of General Orders, No. 29, of 1898, from this office; also with circular letter, Adjutant-General's Office, January 3, 1896, herein referred to, and with necessary blanks pertaining to the recruiting service, and to the Quartermaster's, Subsistence, and Medical Departments.

COMPLETION OF DUTIES.

When the organization for which an officer is recruiting has been filled to the maximum, he will at once report the fact through his immediate commanding officer to the proper department or corps commander, together with the names of the members of his recruiting party, with a view to the issue of the necessary orders.

II. Enlistments *in the field* for a volunteer organization already mustered into the service of the United States, and in which there are vacancies, will be made by the proper mustering officer of the department, corps, division, or district in which the organization is serving. In such cases the enlistment form (A. G. O., No. 8, Vols.) will be used, and will be forwarded by the mustering officer to the Adjutant-General of the Army. An assignment card (A. G. O., No. 9, Vols.) will be prepared in the case of each recruit and sent to the commanding officer of the organization for which he is enlisted.

By order of the Secretary of War:

H. C. CORBIN, *Adjutant-General.*

WAR DEPARTMENT, ADJUTANT-GENERAL'S OFFICE,
Washington, June 6, 1898.

The following information concerning the brigade of volunteer engineers, authorized by act of Congress approved May 11, 1898, is published to meet the numerous inquiries that are being received at the Department:

THE ORGANIZATION.

The brigade of engineers provided for in the above-cited act of Congress will comprise three regiments, to be designated, respectively, the First, Second, and Third Regiments United States Volunteer Engineers.

Each regiment will consist of 1 colonel, 1 lieutenant-colonel, 1 first lieutenant (adjutant), 1 first lieutenant (quartermaster), 1 surgeon, 2 assistant surgeons, 1 chaplain, 1 sergeant-major, 1 quartermaster-sergeant, 1 chief musician, 2 principal musicians, and three battalions.

Each battalion will consist of 1 major, 1 first lieutenant (adjutant), 1 first lieutenant (quartermaster), 1 sergeant-major, 1 quartermaster-sergeant, 1 hospital steward, and four companies.

Each company will consist of 1 captain, 1 first lieutenant, 1 second lieutenant, 8 sergeants, 8 corporals, 2 musicians, 45 first-class privates, and 28 second-class privates.

For each regiment: Total commissioned, 53; total enlisted, 1,106; aggregate, 1,159.

For the purposes of organization the territory of the United States has been subdivided as follows:

For the First Regiment, Col. Eugene Griffin—the New England States, New York, New Jersey, Pennsylvania, Delaware, Maryland, and the District of Columbia. The organization and recruitment of this regiment is well advanced. Headquarters for the regiment, 335 Broadway, New York City. The regiment will rendezvous at Camp Townsend, near Peekskill, N. Y.

For the Second Regiment, Col. Willard Young—the States of Ohio, Indiana, Illinois, Michigan, Wisconsin, Minnesota, Iowa, North Dakota, South Dakota, Nebraska, Kansas, Colorado, Wyoming, Montana, Idaho, Utah, Nevada, California, Oregon, and Washington. The regiment will be recruited as follows:

The first battalion: One company at Springfield, Ohio; two companies at Cincinnati, Ohio; one company at Indianapolis, Ind.

The second battalion: Two companies at Chicago, Ill.; one company at St. Paul, Minn.; one company at Omaha, Nebr.

The third battalion: One company at Denver, Colo.; one company at Salt Lake City, Utah; one company at San Francisco, Cal.; one company at Portland, Oreg.

The regiment will rendezvous at Fort Sheridan, near Chicago, Ill. Correspondence regarding this regiment should be addressed for the present to the Adjutant-General of the Army.

For the Third Regiment, Col. David DuB. Gaillard—the States of Virginia, West Virginia, North Carolina, Kentucky, Tennessee, Missouri, Arkansas, South Carolina, Georgia, Florida, Alabama, Mississippi, Louisiana, and Texas, the Indian Territory, Oklahoma, New Mexico, and Arizona. The regiment will rendezvous at Jefferson Barracks, near St. Louis, Mo. Correspondence regarding this regiment should be addressed for the present to the Adjutant-General of the Army.

The officers will be selected for their skill as military, civil, electrical, mechanical, or topographical engineers. An effort will be made to recruit the enlisted men from every branch of the engineering profession and of mechanical skill. Machinists, steam engineers, blacksmiths, carpenters, plumbers, telegraphers, topographers, draftsmen, photographers, railroad men, riggers, boatmen, and those skilled in the use of explosives are especially desired.

UNIFORM AND EQUIPMENT.

Engineer troops are armed and equipped as infantry. Their uniform conforms to that prescribed for the use of engineer troops of the Regular Army. Each soldier carries the following:

Rifle	1	Gun sling	1
Blanket bag	1	Haversack	1
Blanket-bag shoulder straps (pair) ...	1	Haversack strap	1
Blanket-bag coat straps (pair).....	1	Meat can.....	1
Bayonet scabbard	1	Tin cup	1
Cartridge belt, woven, or 1 cartridge		Knife	1
box, with waist belt and plate	1	Fork	1
Canteen.....	1	Spoon.....	1
Canteen strap	1		

Special instruments, tools, and other paraphernalia essential to the various operations in which these troops are employed are carried in wagons which accompany them.

PAY, ETC.

Sergeants of engineers in time of war receive \$40.80 a month; corporals, \$24; first-class privates, \$20.40; second-class privates, \$15.60; also rations, clothing, bedding, medicines, and medical attendance. The term of service is two years.

REQUIREMENTS FOR ENLISTMENT.

Applicants for enlistment must be between the ages of 18 and 45 years, of good character and habits, able-bodied, free from disease, and must be able to speak the English language.

Married men will be enlisted only upon the approval of a regimental commander.

Minors must not be enlisted without the written consent of father, only surviving parent, or legally appointed guardian.

Original enlistments will be confined to persons who are citizens of the United States, or who have made legal declaration of their intention to become citizens thereof.

Applicants will be required to satisfy the recruiting officer regarding age and character, and should be prepared to furnish the necessary evidence.

The height must not be less than 5 feet 4 inches, and weight not less than 120 pounds and not more than 190 pounds.

Table of physical proportions for height, weight, and chest measurement.

Height.		Weight.	Chest measurement.	
Feet.	Inches.	Pounds.	At expiration (inches).	Mobility (inches).
5 $\frac{1}{2}$	64	128	32	2
5 $\frac{1}{2}$	65	130	32	2
5 $\frac{1}{2}$	66	132	32 $\frac{1}{2}$	2
5 $\frac{1}{2}$	67	134	33	2
5 $\frac{1}{2}$	68	141	33 $\frac{1}{2}$	2 $\frac{1}{2}$
5 $\frac{1}{2}$	69	148	33 $\frac{1}{2}$	2 $\frac{1}{2}$
5 $\frac{1}{2}$	70	156	34	2 $\frac{1}{2}$
5 $\frac{1}{2}$	71	162	34 $\frac{1}{2}$	2 $\frac{1}{2}$
6	72	169	34 $\frac{1}{2}$	3
6 $\frac{1}{2}$	73	176	35 $\frac{1}{2}$	3

It is not necessary that an applicant should conform exactly to the figures indicated in the table of proportions, the variation of a few pounds in weight either way and of a fraction of an inch in chest measures being permissible.

Noncommissioned officers will be selected and appointed in accordance with the Army Regulations. Such of them as show aptitude in the handling of men and can demonstrate in other regards their fitness for it to the satisfaction of an examining board will be entitled to promotion to commissioned rank.

COMMISSIONED OFFICERS.

A board will be instituted for each regiment of engineers, consisting of the colonel and one officer of the Regular Army not connected with the organization, for the purpose of examining such applicants for commissions in the regiment as have been notified by the War Department to present themselves for examination and as have been pronounced by a medical officer of the Army to be free from bodily defects that would disqualify them for the military service. The board will submit their reports to the Adjutant-General of the Army, specifying the grade of commission which each candidate found qualified is deemed fit to hold, and, when necessary, authority to recruit will be given accordingly.

In order to expedite the organization and equipment of each regiment, the regimental quartermaster and adjutant selected may be at once commissioned first lieutenants; but the commissions of the other officers as prescribed by the law will not be issued from the Adjutant-General's Office until the established number of men are ready for muster into service. Authority to recruit will not be given to any person who has not been passed upon by a board. The following rules govern the examination for applicants for commissions:

Applicants will be examined with reference to their mental, moral, and physical fitness to hold a commission and perform the duties of a commissioned officer in an engineer regiment.

Physical fitness will be determined by an examination to be made by a medical officer of the United States Army, and each applicant must present to the board of examiners a certificate from such medical officer that he has been carefully examined and found physically qualified in all respects to perform the duties of an officer of the United States Army.

Moral fitness will be determined by the record of the applicant and by certificates from responsible parties having personal knowledge of the applicant's moral character.

In determining mental fitness the board of examiners will give due weight to the following:

The nature and extent of applicant's engineering education.

The nature and extent of applicant's experience in practical engineering works.

The variety of engineering works on which applicant has been engaged.

The location of such works, whether in the northern or southern parts of the United States, or in foreign countries, particularly in tropical climates.

The time, if any, that applicant has lived in tropical climates, and the general nature of his experience in such climates.

The importance of applicant's position with reference to engineering works, whether chief engineer or assistant, and the number and character of men which have been under his command and direction.

The facility with which applicant can speak foreign languages, if any, particularly Spanish.

The examining board will also give due weight to the following:

The military experience of the applicant, if any.

The ability of the applicant to take proper care of himself and of men committed to his charge under all conditions so far as the same can be judged by the experience and record of the applicant.

The ability of the applicant to command men, so far as can be judged by his experience and record.

The board of examiners is authorized to make such further investigations as in its judgment may be necessary.

It is not intended that the examinations shall be competitive, but the board shall pass upon the qualifications of each applicant and recommend to the Adjutant-General of the Army the rank, if any, which, in its judgment, may properly be conferred upon such applicant.

The examination of officers for the First Regiment is practically completed, and there are few, if any, vacancies in the commissioned list. The officers of the first and second battalions of the Second Regiment will be examined at Chicago, Ill.; the officers of the third battalion at Denver, Colo., Salt Lake City, Utah, San Francisco, Cal., and Portland, Oreg., respectively. The points for examination for officers of the Third Regiment have not as yet been determined upon.

All applications for commissions, or for information concerning them, will be addressed to the Adjutant-General of the Army and be marked "United States Volunteer Engineers." Each applicant will state his age, where born, whether a citizen of the United States, his residence, and educational qualifications. If an applicant for appointment in the engineer brigade, his special technical qualifications must be stated.

H. C. CORBIN, *Adjutant-General.*

GENERAL ORDERS, }
No. 64. }

HEADQUARTERS OF THE ARMY,
ADJUTANT-GENERAL'S OFFICE,
Washington, June 7, 1898.

By direction of the Secretary of War, the following letter of the American National Red Cross Relief Committee is published to the Army for the information of all concerned, and announcement is made that the War Department recognizes, for any appropriate cooperative purposes, the American National Red Cross as the civil central American committee in correspondence with the International Committee for the Relief of the Sick and Wounded in War:

AMERICAN NATIONAL RED CROSS RELIEF COMMITTEE.

SECRETARY'S OFFICE, ROOM 312,
CENTRAL BANK BUILDING, 320 BROADWAY,
New York, May 20, 1898.

SIR: In accordance with the request made by you to the special committee appointed by the American National Red Cross Relief Committee, during its recent visit to you, the undersigned members of said special committee beg leave to submit the following statements for your consideration:

The American National Red Cross Relief Committee of New York, organized with an unlimited number of cooperating and auxiliary bodies throughout the country, for the purpose of providing financial and material support to the work of the American National Red Cross, Miss Clara Barton, president, begs leave to represent to the Government of the United States as follows, viz:

"1. That the American National Red Cross is the duly incorporated committee representing the work of the Red Cross in its civil capacity, and is recognized as

such by the Government of the United States, the governments of other countries, and the international committee at Geneva.

"2. That we are informed that the said American National Red Cross has given formal notice to the Departments of State, War, and Navy and the Surgeon-Generals of the Army and Navy of its readiness to respond to any call for civil aid to supplement the hospital work of the Army and Navy, in accordance with the provisions of the resolutions of the Geneva conference of 1863 and the Geneva convention of 1864, and their amendments.

"3. That in order to guarantee the fullest effectiveness of the aid thus offered by the Civil Red Cross, this committee hereby gives you official notice that it stands ready, together with other cooperating committees, to furnish all necessary money and material to support the work of the said American National Red Cross as hereinbefore outlined."

We beg to request, Mr. President, that you take the necessary action to have the several departments of the Government duly notified of this financial guaranty of the assistance tendered by the American National Red Cross, to the end that the fullest reliance may be placed upon its offer.

Please favor us with a prompt acknowledgment of this letter and information as to your action thereon.

Respectfully,

LEVI P. MORTON,
HENRY C. POTTER, D.D., LL.D.,
WM. T. WARDWELL,
GEO. F. SHRADY, M. D.,
A. MONAE LESSER, M. D.,
Committee.

The PRESIDENT.

By command of Major-General Miles:

H. C. CORBIN, *Adjutant-General.*

CIRCULAR,)
No. 16.)

HEADQUARTERS OF THE ARMY,
ADJUTANT-GENERAL'S OFFICE,
Washington, June 7, 1898.

In order that articles consigned by relatives and friends to soldiers at the front may find prompt delivery, the Secretary of War directs that every facility consistent with the public interest be accorded to the Southern Express Company (office, No. 12 West Twenty-third street, New York) by officers commanding vessels or other means of transportation under the control of the War Department, from Port Tampa, Mobile, New Orleans, or other points of embarkation with a view of expediting the delivery of packages to the soldiers wherever stationed.

It is to be understood that no liability attaches to the Government by reason of loss or delay under this permit, and that no charge is to be made by the express company for transportation furnished by the Government.

By command of Major-General Miles:

H. C. CORBIN, *Adjutant General.*

GENERAL ORDERS,)
No. 67.)

HEADQUARTERS OF THE ARMY,
ADJUTANT-GENERAL'S OFFICE,
Washington, June 10, 1898.

In order that the volunteer forces now being organized may know what equipments it is proper to make requisitions for, the accompanying lists, prepared in the office of the Chief of Ordnance, showing the equipments of an infantry and cavalry soldier, the horse equipments, and the equipments of a light battery of artillery, are published, by direction of the Secretary of War, for the information and guidance of all concerned:

Equipments of an infantry soldier.

- | | |
|---|-------------------|
| 1 blanket bag. | 1 gun sling. |
| 1 blanket-bag shoulder straps (pair). | 1 haversack. |
| 1 blanket-bag coat straps (pair). | 1 haversack strap |
| 1 bayonet scabbard. | 1 meat can. |
| 1 cartridge belt, woven, or 1 cartridge box, with waist belt and plate. | 1 tin cup. |
| 1 canteen. | 1 knife. |
| 1 canteen strap. | 1 fork. |
| | 1 spoon. |

Equipments of a cavalry soldier.

1 carbine sling and swivel.	1 canteen and strap.
1 pistol holster.	1 haversack and strap (for dismounted service).
1 cartridge belt.	1 meat can.
1 cartridge belt (which is fitted for use of saber attachments for carrying the saber, when called for).	1 tin cup.
1 saber knot.	1 knife.
1 pair spurs.	1 fork.
1 pair spur straps.	1 spoon.

Horse equipments.

1 saddle, comprising—	1 curb bridle, comprising—
1 saddletree, leather covered.	1 headstall.
1 quarter strap (self-adjusting).	1 pair reins.
2 safes and rings for quarter straps.	1 curb bit.
2 cincha straps.	1 curb strap.
1 girth (cincha).	1 watering bridle, comprising—
2 stirrup straps.	1 snaffle bit.
2 stirrups, hooded.	1 pair reins.
6 coat straps.	1 link.
1 carbine boot and straps (used only with caliber .45 carbine).	1 halter, comprising—
1 carbine scabbard and straps (2) used (used only with caliber .30 carbine).	1 headstall.
2 saber straps (used only with caliber .45 carbine).	1 halter strap.
1 pair saddlebags.	1 lariat.
1 saddle blanket.	1 lariat strap.
1 surcingle.	1 picket pin.
	1 side line.
	1 nosebag.
	1 horse brush.
	1 currycomb.
	1 stirrup, with socket for guidon (special).

Equipment (exclusive of ammunition) for a six 3.2-inch field battery, with combined battery wagon and forge.

6 3.2-inch B. L. steel guns.	WITH EACH CARRIAGE LIMBER.
6 3.2-inch carriages and limbers.	1 front sight under footboards, left-hand compartment.
6 3.2-inch caissons and limbers.	1 breech sight, bronze, under footboards, left-hand compartment.
1 combined forge and battery wagon.	1 breech-sight pouch under footboards, left-hand compartment.
13 sets artillery harness for two wheel horses.	2 gunner's haversacks, in ammunition chest.
26 sets artillery harness for two lead horses.	1 front-sight cover, in left-hand footboard compartment.
ON EACH CARRIAGE.	1 sperm oiler, rectangular, brass, under footboards, right-hand compartment.
1 pair bow-spring recoil brakes.	1 wheel grease-can under footboards, right-hand compartment.
1 sponge and rammer, jointed, for bore.	1 wheel grease-can knife under footboards, right-hand compartment.
2 short rammers and sponges combined for chamber.	2 watering buckets, canvas, folding, under footboards, left-hand compartment.
1 sponge cover, bore sponge.	1 tool box, under footboards, right-hand compartment, containing—
1 breech strap.	1 screw wrench, 12-inch.
2 sponge covers, chamber sponge.	1 iron nut wrench, 12 inches long.
1 prolonge (section of picket rope).	1 4-inch cold chisel, 8 inches long.
1 combination screw-driver in trail box.	1 8-inch hand bastard file.
1 gunner's gimlet in trail box.	1 hand hammer, 12½-inch handle.
1 gunner's reamer in trail box.	1 small steel punch.
1 priming wire in trail box.	
2 primer pouches in trail box.	
2 lanyards (new pattern) in trail box.	
1 fuse punch in trail box.	
1 vent punch in trail box.	

Equipment (exclusive of ammunition) for a six 3.2-inch field battery, with combined battery wagon and forge—Continued.

1 neck yoke.
1 doubletree.
2 singletrees.
2 paulins, 12 feet by 12 feet, dyed duck.
1 cushion, canvas and hair.
1 padlock for ammunition chest.

ON EACH CAISSON BODY.

1 breech cover.
1 combination tompon and muzzle cover; the latter in the breech cover, which is secured by its straps and buckles to the spare-wheel axle toggle.
1 maneuvering handspike.
2 shovels, long handled.
2 spades, short handled.
2 pickaxes, handled.
2 axes, handled.
2 lanterns, with Cranston attachment.
1 prolonge (section of picket rope).
1 spare pole.
1 spare wheel.
2 paulins, 12 feet by 12 feet, dyed duck.
2 padlocks for ammunition chests.
1 cushion, canvas and hair.

WITH EACH CAISSON LIMBER.

1 wheel grease can.
1 wheel grease-can knife.
2 paulins, 12 feet by 12 feet, dyed duck.
1 neck yoke.
1 doubletree.
2 singletrees.
2 watering buckets, canvas, folding.
1 cushion, canvas and hair.
1 padlock for ammunition chest.

ON BODY OF FORGE AND BATTERY WAGON.

2 water buckets (galvanized sheet iron), inside of wagon body.
1 prolonge (section of picket rope), inside of wagon body.
2 lanterns, with Cranston attachment, inside of wagon body.
1 oil can, sperm (2½ pints), inside of wagon body.
1 oil can, coal (3 gallons), inside of wagon body.
1 grindstone, arbor, crank, and frame (iron), complete, inside of wagon body.
1 lunette prop.
2 jackscrews.
1 hammer, sledge, medium.
1 anvil (100 pounds).
1 vise, forge.
2 padlocks (and keys).

SADDLER'S TOOLS (CHEST).

1 saddler's tool chest, handled, (in chest compartment).
1 knife, round.

1 knife, shoe.
1 draw gauge.
6 awls, stitching, handled (assorted).
1 rivet set (two holes).
1 revolving punch, four tubes, Nos. 4, 5, 6, and 7.
1 claw tool.
1 pair compasses, 6-inch.
1 creaser (wood).
1 cutting nippers, 10-inch.
1 pair shears, 6-inch blade.
1 hammer, riveting.
1 edge tool, No. 2.
1 rule (2-foot), No. 18 (2-fold).
1 oilstone.
1 pliers (large), 6-inch.
1 driving punch, No. 5.
1 stitching horse, complete.
2 small canvas bags for small stores.

CARPENTER'S AND WHEELWRIGHT'S TOOLS (CHEST).

1 carpenter's and wheelwright's tool chest, handled (in chest compartment).
1 brace with twelve bits, assorted.
1 drawing knife, 12-inch.
1 handsaw, 20-inch.
1 rip saw, 26-inch.
1 hand ax, No. 7.
1 hammer, claw.
4 chisels, framing—¾-inch, 1-inch, 1½-inch, and 2-inch.
3 gouges, framing—¾-inch, 1-inch, 1½-inch.
1 screw wrench, 12-inch.
1 plane, jack.
1 plane, smoothing.
1 spokeshave.
1 rule (2-foot), No. 72, 4-fold, Stanley.
10 brad awls, assorted, with (and contained in) handle.
1 square, tryng, 9-inch.
1 awl, scribing.
12 files, saw, assorted—4-inch and 6-inch.
1 rasp, wood, 10-inch.
1 file, wood, 10-inch.
1 oiler, brass.
1 oilstone, 8-inch.
1 gauge.
1 compasses, 10-inch wing.
1 table vise.
1 pincers, small.
1 mallet, wood.
6 auger bits—¾-inch, ¾-inch, ¾-inch, 1-inch, 1½-inch, and 1½-inch.
2 screw-driver bits—¾-inch and ¾-inch.
1 patent auger handle.
3 file handles, iron—4-inch flat, 4-inch round, 5-inch.
1 linen tapeline (Chesterman, Sheffield), 100 feet.
2 small canvas bags for small stores

Supplies, cleaning material, spare parts, etc., in battery wagon body.

SUPPLIES.

[Expendible.]

2 sides leather, bridle (24 pounds).
2 sides leather, harness (40 pounds).
2 pounds beeswax.
3 pounds black wax.
36 buckles, iron, roller—four $\frac{3}{4}$ -inch, four $\frac{1}{2}$ -inch, eighteen $\frac{3}{4}$ -inch, four 1-inch, two $1\frac{1}{4}$ -inch, and four $1\frac{1}{2}$ -inch.
2 papers tacks, copper.
3 papers tacks, iron—one 8-ounce, one 12-ounce, and one 18-ounce.

3 pounds rivets and burrs, copper—one $\frac{1}{4}$ -inch No. 10 belt, one $\frac{3}{4}$ -inch No. 10 belt, and one 1-inch No. 8 oval head.
5 pounds thread, shoe, No. 10.
5 needles, collar.
50 needles, saddler's, assorted.
4 thimbles.
10 pounds nails.
1 gross wood screws.
6 pieces sash cord, braided ($13\frac{1}{2}$ pounds).
3 gallons coal oil.
50 pounds wheel grease.

Material for cleaning and preservation.

[Expendible.]

4 gallons neatsfoot oil (2 cans).
2 $\frac{1}{2}$ pints sperm oil.
20 pounds harness soap.
10 pounds sponge.
4 quires sandpaper.
6 quires emery cloth.
2 pounds rotten stone.
25 pounds tripoli.

SPARE PARTS—GUN.

[Expendible.]

4 carrier latch pins.
8 carrier latch-pin springs.
2 gas-check pads.
4 steel split rings.

SPARE PARTS—CARRIAGE.

[Expendible parts marked.] *

1 bow-spring brake.
2 singletrees.
1 doubletree.
1 neck yoke.
4 pole pads.*
6 linchpins.*
4 linch washers.*
4 ammunition chest bolts and nuts.*
4 turnbuckles for ammunition chests.*

This order will take the place of General Orders, No. 41, current series, which is revoked.

By command of Major-General Miles:

H. C. CORBIN, *Adjutant-General.*

GENERAL ORDERS, }
 } No. 68.

HEADQUARTERS OF THE ARMY,
 ADJUTANT-GENERAL'S OFFICE,
Washington, June 13, 1898.

By direction of the Secretary of War, the following movements are ordered in connection with the organization and recruitment of the brigade of Volunteer Engineers:

FIRST REGIMENT.

1. The headquarters of the First Regiment of United States Volunteer Engineers are provisionally established at New York City (335 Broadway), at which point the colonel, lieutenant-colonel, and majors will take station.

2. Majs. John S. Sewell, Louis Duncan, and James D. Fergerson; Capts. Ira A. Shaler, Eugene Ellicott, Merrit H. Smith, Azel Ames, jr., Arthur Haviland, Charles Parker Breese, and First Lieut. Joseph A. Steinmetz will act as recruiting officers for the regiment, under instructions of the regimental commander.

3. Recruiting offices will be established at Boston, Mass.; New York City, N. Y.; Philadelphia, Pa.; Baltimore, Md.; Norfolk, Va.; and the following assignment of recruiting officers is made:

To the Boston office: Maj. John S. Sewell and Capt. Azel Ames, jr.

To the New York office: Maj. James D. Fergerson and Capt. Ira A. Shaler.

To the Philadelphia office: Capt. Eugene Ellicott and First Lieut. Joseph A. Steinmetz.

To the Baltimore office: Maj. Louis Duncan and Capt. Arthur Haviland.

To the Norfolk office: Capt. Charles Parker Breese.

Recruits for this regiment will be examined by the surgeons attached to the United States recruiting offices at the respective points above named, or by a surgeon of the regiment, under the instructions governing the medical examinations of recruits.

4. The rendezvous for the regiment is established at Camp Townsend, near Peekskill, N. Y., the governor of the State of New York having assented to its use.

5. Recruits who have passed a medical examination will be forwarded in detachments to Camp Townsend, at which point they will be mustered into the service of the United States as rapidly as companies and battalions are organized.

6. Maj. James B. Burbank, Fifth Artillery, is hereby detailed as mustering officer for the regiment; he will also act as quartermaster and commissary, for the purpose of subsisting the recruits from the time of their enrollment to the time of rendezvous, and for their transportation from the place of enrollment to the place of rendezvous. Upon receipt of this order, Major Burbank will communicate by telegraph with the colonel of the regiment, and thereafter will hold himself in readiness to proceed to Peekskill at such time as companies and battalions may be ready for muster in.

The travel enjoined is necessary for the public service.

7. The Subsistence Department will contract for the subsistence of the men of this regiment at Camp Townsend, at a price not to exceed 40 cents per day per man, until the muster in of the regiment has been completed, after which it will be regularly supplied with rations in kind.

SECOND REGIMENT.

1. The headquarters of the Second Regiment United States Volunteer Engineers are provisionally established at Chicago, Ill. (1637 Indiana avenue), at which point the colonel, lieutenant-colonel, Major Savage, and Major Pinckard will take station.

2. Recruiting offices will be established at Springfield, Ohio; Cincinnati, Ohio; Indianapolis, Ind.; Chicago, Ill.; St. Paul, Minn.; Omaha, Nebr.; Denver, Colo.; Salt Lake City, Utah; San Francisco, Cal.; and Portland, Oreg., to which recruiting officers or agents will be assigned by the regimental commander.

3. The rendezvous for the first and second battalions of the regiment is established at Fort Sheridan, near Chicago, Ill.; for the third battalion at the Presidio of San Francisco, Cal.

4. Maj. Richard H. Savage will proceed from Chicago, Ill., to Springfield, Ohio; Cincinnati, Ohio; Indianapolis, Ind.; and Fort Sheridan, Ill. Maj. Edward L. Pinckard from Chicago, Ill., to St. Paul, Minn.; Omaha, Nebr.; and Fort Sheridan, Ill. Maj. William C. Langfitt from San Francisco, Cal., to Portland, Oreg.; Salt Lake City, Utah; Denver, Colo., and return to San Francisco. Capt. Robert P. Johnston from Key West, Fla., to Salt Lake City, Utah, and thence to San Francisco, Cal., all on duty connected with the recruitment of the regiment under instructions from the regimental commander.

Lieut. Col. Edward Burr will proceed to Fort Sheridan, Ill., and report to the regimental commander.

First Lieut. Charles W. Parker, quartermaster, will proceed from Washington, D. C., to Fort Sheridan, Ill., and report to his regimental commander for duty.

5. Capt. C. M. Rockefeller, Ninth Infantry, is hereby detailed as mustering officer for the companies recruited at Springfield, Ohio; Cincinnati, Ohio, and Indianapolis, Ind., which will form the first battalion; First Lieut. C. C. Ballou, Twelfth Infantry, for the companies recruited at Chicago, Ill.; St. Paul, Minn., and Omaha, Nebr., which will form the second battalion; First Lieut. John M. Barber, Seventh Infantry, for the company at Denver, Colo.; First Lieut. W. R. Dashiell, Twenty-fourth Infantry, for the company at Salt Lake City, Utah; First Lieut. D. J. Rumbough, Third Artillery, for the company at San Francisco, Cal., and Second Lieut. Kenneth Morton, Third Artillery, for the company at Portland, Oreg., which four last-named companies will form the third battalion; they will also act as quartermaster and commissary for the purpose of subsisting the recruits from the time of their enrollment to

the time of muster in, and for their transportation from the place of enrollment to the place of rendezvous. Upon receipt of this order the mustering officers above named will communicate by telegraph with the colonel of the regiment, and thereafter will hold themselves in readiness to proceed to such points as the colonel may indicate, and at which a body of recruits, approximating the size of a company, is awaiting muster-in to the United States service. A surgeon or an assistant surgeon of the regiment will also proceed with the mustering officers to the said points.

6. As soon as a company has been organized and mustered into service the mustering officer will direct its transportation to the place of rendezvous of the battalion of which it is to be a part. For this purpose the mustering officers will provide themselves with the necessary transportation requests and other blanks and will make timely requisition for such travel rations as may be necessary. Commanding officers of regiments will so arrange their itinerary as to involve as little travel as possible.

The travel enjoined is necessary for the public service.

By command of Major-General Miles:

H. C. CORBIN, *Adjutant-General*.

GENERAL ORDERS, }
No. 70. }

HEADQUARTERS OF THE ARMY,
ADJUTANT-GENERAL'S OFFICE,
Washington, June 16, 1898.

II. By direction of the Secretary of War, the following paragraph is added to the Regulations, viz:

1349a. So far as relates to disbursements at the Philippine Islands and other points, including Alaska, beyond the boundary of the United States proper, and for the convenience of the paymaster in obtaining ready money, as well as for the accommodation of both officers and men at such distant places, a check may be drawn for a portion of the pay due the soldier (or officer), in which case it will be drawn in favor of the soldier (or officer), and the object or purpose will be stated as "part pay for month of ———;" if for any sum which the soldier (or officer) may desire in exchange for money after he has been paid, the check will be drawn by the paymaster in favor of himself and indorsed by him payable to the order of the soldier (or officer), and the object or purpose will be stated as "to obtain cash to make payments at a distance from a depository."

By command of Major-General Miles:

H. C. CORBIN, *Adjutant-General*.

[Circular letter.]

WAR DEPARTMENT, ADJUTANT-GENERAL'S OFFICE,
Washington, D. C., June 19, 1898.

SUPPLEMENTARY INSTRUCTIONS TO MUSTERING OFFICER.

The following instructions, supplementary to the "Instructions to mustering officers" of April 22, 1898, are published for the guidance of mustering officers and for the information of all concerned.

1. In all matters pertaining to the muster-in of volunteer organizations, the officers and men, when mustered into the service of the United States, are subject to the orders of the mustering officer, who is executing the orders of the Secretary of War.

2. The enlistment (enrollment) of all men will *hereafter* be made on the blank form (A. G. O. No. 8, Vols.) "Description, physical record, and enlistment," which will be supplied by the Adjutant-General of the Army to the governors of States for the use of duly authorized persons in organizing companies of volunteers for the service of the United States. The "Description" on the blank will be filled in by the recruiting or enrolling officer, and the "Physical record," after a careful medical examination has been made of the man, by the authorized examining surgeon *before the organization leaves the place of enlistment*, as the United States will not assume any expense for subsistence or transportation to the State or regimental rendezvous unless this requirement is strictly complied with.

The blank form will also be used for the description and physical record of all officers.

3. No minor will be enlisted without the written consent of parents, or a *legally* appointed guardian, and the certificate on the blank form (A. G. O. No. 8, Vols.) "Description physical record and enlistment" must be properly filled in and signed.

4. When there is no medical officer of the Army (regular or volunteer) available to examine the men, the mustering officer will employ the services of a physician of well-established capacity and character to make the required medical examination of each officer and man presented for enlistment at a rate of compensation not exceeding 40 cents for each man examined, and he will prepare the accounts for such examinations in accordance with paragraph 1458, Army Regulations, on forms supplied by the Surgeon-General.

The medical officer will examine the men *stripped* in the presence of the mustering officer.

5. The muster-in of organizations will, as a rule, take place at the State or regimental rendezvous designated by the governor of the State, but when the number of companies called for from a State is less than a battalion the mustering officer will muster-in the companies at the places of their organization, provided that the companies are at least of the minimum strength authorized by law, or by regulations or special directions of the War Department. The officers of a company present for duty will not be mustered into service until the company organization is completed and they will then be mustered with it.

6. The enlistment papers of the officers and men accepted into service will be forwarded by the mustering officer with a copy of the muster-in roll to the Adjutant-General of the Army.

7. The company muster-in rolls will be used for the field staff and band, which latter, if organized, will be taken from the strength of the regiment, as provided for by paragraph 245, Army Regulations. The officers' muster-in roll will be used for the muster of individual officers.

8. The "Description, physical record, and enlistment" blanks of the officers and enlisted men of each company, etc., will be arranged in the order in which their names are to appear on the muster-in rolls. The description, etc., of each officer and enlisted man will be transcribed to the roll from the enlistment paper. The columns under the head of "Enrolled" should not be filled in on the muster roll in the cases of officers, their entry into service being governed by date of muster-in and not by date of enrollment. The examining surgeon will comply with the note on muster-in rolls relative to noting in the column for remarks on roll of all defects discovered in the medical examination, not sufficient to reject, but which might be aggravated by the soldier's duties.

9. In addition to the officers who may be mustered in during the organization of a regiment, as provided for in paragraph 7 of the Mustering Regulations, the sergeant-major, quartermaster-sergeant, and one hospital steward may be mustered in on the same roll, to aid in recruiting the regiment and in other necessary business.

10. The services of civilian physicians engaged on boards for the examination of medical officers, as provided for in paragraph 9 of the Mustering Regulations, cease upon the completion of their duties on such boards, and medical officers who have passed the required examinations will alone assist the medical officer of the United States Army in the physical examination of men of their own and other organizations.

11. Mustering officers will instruct the officers of the commands mustered into the service by them as to the manner in which requisitions are made upon the supply departments of the Army, and invite special attention to the provisions of the Army Regulations bearing on the subject.

12. A careful reading of, and compliance with, the notes and instructions printed on the enlistment blank and muster-in roll is enjoined on all concerned.

By order of the Secretary of War:

H. C. CORBIN, *Adjutant-General.*

GENERAL ORDERS, }
No. 75. }

HEADQUARTERS OF THE ARMY,
ADJUTANT-GENERAL'S OFFICE,
Washington, June 22, 1898.

By direction of the Secretary of War, the following is published for the information and guidance of officers of the Volunteer Army of the United States in accounting for ordnance and ordnance stores which may in any manner come into their possession, and their careful attention is invited thereto:

All officers of the Army to whom ordnance property is issued, or who may otherwise come into possession of such property, are required to make quarterly returns thereof to the Chief of Ordnance, United States Army, Washington, D. C., on the following dates, each year, namely:

March 31, June 30, September 30, and December 31.

Should an officer resign or be relieved from command, and transfer his responsibility before any of these dates, he will, in such case, render a closing return showing the transaction for part of the quarter, embracing the period from his last return to the date of said transfer. The receipt of the officer succeeding him in command for the property on hand will be a voucher to said return.

Property returns should exhibit in detail the transactions that take place during the period for which they are rendered. All stores invoiced to or received by an officer should be entered on the debit side of the return, according to the date of the invoice or other voucher, which should be numbered 1, 2, 3, etc.

Where stores are received without invoices they are taken up on the return per statement or certificate of the accounting officer as to how they came into his possession. Stores captured from the enemy, picked up on the march, or found in camp, are accounted for in the same manner.

Every entry on the face of the return should have a corresponding voucher, whether it be an invoice, certificate, or statement authenticating the transaction.

All stores disposed of, whether issued, condemned, lost in action, expended, or charged against enlisted men on muster and pay rolls, should, in like manner, be entered on the credit side of the return, vouched for and dropped accordingly.

Before charging an enlisted man with the money value of stores lost or damaged, there should be clear proof of carelessness or neglect on his part. Should the soldier admit the justice of the charge when signing the rolls it will, however, be deemed sufficient warrant for making it, without further proof or inquiry. In all cases where charges are made, a statement thereof should be sent with the return from which the stores are dropped, enumerating the stores charged, giving the names of the enlisted men, amounts charged, date of the rolls, with remarks opposite each name stating how the stores were disposed of, whether lost through neglect, damaged, or otherwise.

Stores lost in action should be accounted for by the certificate of the responsible officer, setting forth the date and place of the engagement and the attendant circumstances, and the affidavit of one or more enlisted men cognizant of the facts, to the effect that the loss was unavoidable, having been caused by an attack of the enemy in superior force, which could not be resisted, or like event. In such cases the details of the engagement are given, including the number of killed, wounded, etc.

Stores abandoned for want of transportation must be accounted for by the certificate of the responsible officer as to the facts, supported by the order of the officer directing such action, as also by the certificate of the quartermaster, whose duty it was to furnish transportation, that it was impossible for him to do so. Such transactions are only allowed upon conclusive proof that the loss sustained was wholly unavoidable.

When stores become unserviceable or unfit for use, they should be submitted for the action of an inspector and disposed of as directed, a copy of the inventory and inspection report being sent with the property return as a voucher. Surplus serviceable stores can, however, be turned over to the nearest ordnance officer upon order of the department or other commander.

Stores expended, such as ammunition and material used in repairs or completion of arms and accouterments, are dropped from the return on abstract of expenditures signed by the responsible officers.

Where the vouchers exceed the number of lines on the debit or credit side of the return an abstract should be made, embracing thereon all the transactions and the aggregate of the stores taken up on the return or dropped therefrom accordingly.

To illustrate the method of preparing a quarterly return, a sample copy is appended hereto, showing the transactions likely to occur in a company or other organization. The principle can be applied to any kind of return, and will, if adhered to, enable officers to promptly render their returns, thus avoiding delay in the final settlement of their accounts.

Failure to make returns as herein stated will subject officers to stoppage from their pay of the money value of the property issued to them by the United States. All such delinquencies will be promptly reported, in order that the United States may be reimbursed for said property.

By command of Major-General Miles:

H. C. CORBIN, *Adjutant-General.*

Quarterly return of ordnance and ordnance stores received, issued, and remaining on hand in Company A, First Regiment of Alabama Volunteers, for the quarter ended June 30, 1898.

Date.	Number of voucher.	Second quarter, 1898.	Class VI. Small arms, rifles, revolv- ers, etc.		Class VII.—Equipments.														Class VIII. —Ammu- nition.

I certify that the foregoing return exhibits a correct state of the ordnance and ordnance stores pertaining to Company A, First Alabama Volunteers, in my charge, during the quarter ended June 30, 1898.

Captain Commanding Company A, First Alabama Volunteers.

(STATION:) TAMPA, FLA., June 30, 1898.

GENERAL ORDERS, }
No. 76. }

HEADQUARTERS OF THE ARMY,
ADJUTANT-GENERAL'S OFFICE,
Washington, June 22, 1898.

I. By direction of the Secretary of War, the following allowance of horses for mounts, wheel transportation, tentage, etc., for the Medical Department of the Army in the field is authorized:

Horses or mounts.

	H. S.	A. H. S.	Privates.
To each regiment of infantry	1	1
To each artillery battalion (3 light batteries)	3	1
To each cavalry regiment	1	2
To each corps headquarters	1	2
To each division headquarters	1	1
To each brigade headquarters	1	1
To each division ambulance company	7	3	12
To each corps reserve ambulance company	7	3	12
To each division field hospital	2	2	6
To each corps reserve hospital	2	2	6

WHEEL TRANSPORTATION.

One ambulance to 400 men of the effective force. One 4-horse wagon to 600 men of the effective force. One 4-horse wagon to each brigade.

TENTAGE.

For each ambulance company: Seventeen common tents for privates, 2 common tents for noncommissioned officers.

For each division field hospital: Fifteen common tents for privates, 2 common tents for noncommissioned officers, 1 common tent for supplies, hospital tents on a basis of 6 patients (beds) to each tent.

Hand litters, with slings, to be furnished by the Quartermaster's Department: One for each company, 2 for each ambulance.

Requisitions for the necessary articles of camp and garrison equipage, tools, etc., will be based on the official allowances for companies of infantry.

Requisitions for the before-mentioned supplies will be sent in separately for divisions, with statement whether or not the division organization is complete.

Horses and wheel transportation will be furnished by the Quartermaster's Department, and horse equipments by the Ordnance Department.

II. Commanding generals of army corps are directed to detail, upon the application of chief surgeons of corps, two line officers not above the grade of first lieutenant for duty as acting assistant quartermasters with the medical service of each division.

By command of Major-General Miles:

H. C. CORBIN, Adjutant-General.

GENERAL ORDERS, }
No. 82. }

HEADQUARTERS OF THE ARMY,
ADJUTANT-GENERAL'S OFFICE,
Washington, June 27, 1898.

I. By direction of the Secretary of War, the attention of commanding generals of army corps in the field is directed to the fact that the act of Congress approved June 2, 1898 (General Orders, No. 62, June 3, 1898, from this office), fixes the number of hospital stewards, Hospital Corps, United States Army, at 200, and that owing to the number of hospital stewards now on duty outside of the limits of the army corps in the field, 10 only will be available for duty with each army corps, which number under the law can not be exceeded.

It is important that it should be fully understood that the hospital stewards mustered in with each volunteer regiment can be detached from their regiments and assigned to duty at the discretion of the commanding generals of army corps.

II. By direction of the Secretary of War, the following is published to the Army for the information and guidance of all concerned:

During the existing war the commanding officers of engineer companies, who are serving with their companies, away from the headquarters of the battalion of regular engineers, are authorized to appoint sergeants, corporals, and first-class privates of their companies, and, when necessary, to reduce such enlisted men to the lower

grades. This authority, however, will not affect the status of enlisted men who are not serving with these companies.

Noncommissioned officers of permanent independent volunteer batteries or companies will be appointed by the commanding officers thereof and will be furnished with a certificate of rank signed by the battery or company commander. When these organizations are independent only temporarily, the commanding officer will make temporary appointments of noncommissioned officers and the permanent appointments will be made in the regular way when they are formed into regiments.

III. By direction of the Secretary of War, men who are sick in the division or brigade hospitals of their command, at date of muster, will be mustered on the muster rolls and the pay rolls of the organization to which they belong as "present," with the remark "sick in division or brigade hospital." If the organization to which they belong be detached from the corps, division, or brigade, they will be mustered on detachment rolls (Form No. 2), a separate roll being prepared for each regiment. (See Note 1 on the rolls and A. R. 785, the provisions of which must be strictly observed.)

By command of Major-General Miles:

H. C. CORBIN, *Adjutant-General.*

GENERAL ORDERS, }
No. 84. }

HEADQUARTERS OF THE ARMY,
ADJUTANT-GENERAL'S OFFICE,
Washington, June 29, 1898.

1. With the approval of the Secretary of War, an expenditure of not to exceed ten rounds of ammunition per month for each officer and enlisted man is hereby authorized. In the training of volunteer troops great attention will be given to company, battalion, regimental, and brigade drill and exercises, especially to such formations and movements as will render the men rapidly efficient for attack and defense, marching in line of battle, by the flank, changes of front, plying and deploying, and picket and outpost duty. Especial instructions will be given officers and men in connection with the formation and use of advance and rear guards, as well as in the necessary precautions to be taken to guard against surprises and ambushes, and the use of flankers and flanking detachments and columns for bodies of troops operating in the presence of the enemy. Officers and men will also be instructed in the General Rules for Fire Discipline, commencing at paragraph 534, Infantry Drill Regulations.

2. It should be borne in mind that the object of all military instruction and drill is to teach officers and enlisted men, individually and as organizations, as quickly as possible, the best methods of defeating the enemy with the least sacrifice of the lives of our men. In order to insure this result, the effective use of firearms in battle is necessary, and the rapid and thorough instruction of men in the use of their arms should in every possible way be expedited.

3. The instruction of volunteer troops and recruits which has been previously ordered by corps, division, and brigade commanders will include aiming, position drill, and target practice. Regimental schools of instruction for officers, under the personal direction of regimental commanders, and schools of instruction for noncommissioned officers and intelligent privates, directly under the supervision of company commanders, will be held not less than twice a week. Special inspections will be made by competent officers to determine the number of men in all organizations who have not had practice with their rifles, and such men as have not had this practice will be so instructed without delay. Blank ammunition should be procured for preliminary firing, but where this can not be obtained, actual practice with ball cartridges will be carried out at once, if it can be done with perfect safety to everybody in and out of the Army. Frequent inspections will be made to insure the carrying out of these instructions, the results of such inspections to be duly reported; and when for any reason other than campaigning these instructions have not been fully carried out, a special report will be made giving the reason therefor, which report will be transmitted by corps commanders to these headquarters. The attention of inspectors-general is directed to the carrying out of these instructions.

4. The Ordnance Department is not prepared to furnish to so large an army as the present one all the necessary material for target practice, such as frames, markers, etc. It is thought, however, that these can be improvised, while the Ordnance Department can furnish, on requisition, paper targets that are ordinarily used for this purpose. At permanent camps where an officer can be detailed in charge of rifle practice, it will be practicable to furnish all the frames and other material required, although this can not be done generally, and it will be the exception and not the rule.

By command of Major-General Miles:

H. C. CORBIN, *Adjutant-General.*

GENERAL ORDERS. }

No. 85. }

HEADQUARTERS OF THE ARMY,
ADJUTANT-GENERAL'S OFFICE,
Washington, July 1, 1898.

By direction of the Secretary of War, the following movements are ordered in connection with the organization and recruitment of the brigade of volunteer engineers:

FIRST REGIMENT.

The headquarters of the First Regiment United States Volunteer Engineers are removed from New York City to Camp Townsend, near Peekskill, N. Y., to which point the colonel and all officers, not otherwise detached, will repair without delay. The travel enjoined is necessary for the public service.

THIRD REGIMENT.

The headquarters of the Third Regiment, United States Volunteer Engineers, are temporarily established at No. 2728 Pennsylvania avenue, Washington, D. C., at which point the colonel, the majors, the regimental quartermaster, and the regimental adjutant will take temporary station.

Recruiting offices will be established at Richmond, Va.; Charlotte, N. C.; Savannah, Ga.; Mobile, Ala.; New Orleans, La.; Austin, Tex.; Albuquerque, N. Mex.; Nashville, Tenn.; Louisville, Ky.; St. Louis, Mo., and Little Rock, Ark., to which points recruiting officers will be assigned by the regimental commander. Recruits for the regiment will be examined by the surgeons attached to United States recruiting offices, if there are any at any of the points above named, or by the surgeon or an assistant surgeon of the regiment or by a local physician, under the provisions of General Orders, No. 71, June 17, 1898, from this office.

The rendezvous for the regiment is established at Jefferson Barracks, Mo.

Lient. Col. Eugene J. Spencer will proceed from St. Louis, Mo., to Louisville, Ky., and return; Maj. Edgar Jadwin from Washington, D. C., to Little Rock, Ark., Austin, Tex., Albuquerque, N. Mex., and Jefferson Barracks, Mo.; Maj. Henry C. Davis from Washington, D. C., to Mobile, Ala., New Orleans, La., Nashville, Tenn., and Jefferson Barracks, Mo.; and Maj. Willoughby Walke from Washington, D. C., to Richmond, Va., Charlotte, N. C., Savannah, Ga., and Jefferson Barracks, Mo.; all on duty in connection with the recruitment of the regiment under instructions from the regimental commander.

Recruits who have passed medical examination will be forwarded in detachments to Jefferson Barracks, Mo., at which point they will be mustered into the United States service as rapidly as companies are organized.

The recruiting officers above named will also act as quartermasters and commissaries, for the purpose of subsisting the recruits from the time of their enrollment to the time of rendezvous and for their transportation from the place of enrollment to the place of rendezvous.

First Lieut. Ralph Harrison, Second Cavalry, is hereby detailed as mustering officer for the regiment.

The travel enjoined is necessary for the public service.

By command of Major-General Miles.

H. C. CORBIN, *Adjutant General.*

GENERAL ORDERS, }

No. 87. }

HEADQUARTERS OF THE ARMY,
ADJUTANT-GENERAL'S OFFICE,
Washington, July 2, 1898.

I. The Army is engaged in active service under climatic conditions which it has not before experienced.

In order that it may perform its most difficult and laborious duties with the least practicable loss from sickness, the utmost care consistent with prompt and efficient service must be exercised by all, especially by officers.

The history of other armies has demonstrated that in a hot climate abstinence from the use of intoxicating drink is essential to continued health and efficiency.

Commanding officers of all grades and officers of the medical staff will carefully note the effect of the use of such light beverages—wines and beer—as are permitted to be sold at the post and camp exchanges, and the commanders of all independent commands are enjoined to restrict, or to entirely prohibit, the sale of such beverages if the welfare of the troops or the interests of the service require such action.

In this most important hour of the nation's history it is due the Government from all those in its service that they should not only render the most earnest efforts for its honor and welfare, but that their full physical and intellectual force should be given to their public duties, uncontaminated by any indulgences that shall dim, stultify, weaken, or impair their faculties and strength in any particular.

Officers of every grade, by example as well as by authority, will contribute to the enforcement of the order.

II. With a view to avoid extreme suffering among wounded horses or mules on the field of battle, it is hereby ordered that a veterinary surgeon, or some other person detailed by the commanding officer, will accompany troops in an engagement, whose duty it will be to put an end to the agonies of all horses or mules that in his judgment are suffering to a degree requiring such action on his part.

By command of Major-General Miles:

H. C. CORBIN, *Adjutant-General.*

GENERAL ORDERS, }
No. 89. }

HEADQUARTERS OF THE ARMY,
ADJUTANT-GENERAL'S OFFICE,
Washington, July 6, 1898.

The following letter from the Postmaster-General regarding the establishment of a more complete system for the military mail service is published for the information and guidance of all concerned, and the suggestions contained therein are approved by the Secretary of War:

OFFICE OF THE POSTMASTER-GENERAL,
Washington, D. C., June 25, 1898.

SIR: With the movement of troops and the establishment of camps or places of rendezvous in the existing war the Post-Office Department made such immediate arrangements for the postal service in connection therewith as the exigencies required and permitted.

As soon as practicable after the opening of hostilities Congress was asked by this Department to pass an act making such special provision and conferring such authority as the emergency demanded, and Congress accordingly passed a bill entitled "An act to authorize the establishment of post-offices at military posts or camps," a copy of which I have the honor to inclose herewith.

Pursuant to this act, I beg to invite your cooperation in the establishment of a more complete system for the military mail service, and suggest the following general plan:

1. The Postmaster-General shall establish a post-office or branch post-office at every military post or camp which has been, or may be, created during the existing war.

2. Such post-office or branch post-office shall be under the immediate charge and direction of an official of the postal service detailed for that purpose by the Postmaster-General, and who shall be designated as "Postal superintendent in charge."

3. The Secretary of War shall provide for the designation of an officer of the Regular or Volunteer Army attached to the general headquarters of the camp, who shall represent the military organization in its relations to the postal service, and whose duty it shall be to keep the postal superintendent in charge advised of the movement of troops to and from the camp.

4. The regimental mail service shall be in charge of the adjutants of regiments, who shall be held responsible for the collection and distribution of the mail within the several companies. Such detail of noncommissioned officers and privates shall be made as may be necessary for this purpose. Such persons, before entering upon the discharge of their duties, shall take the oath prescribed for persons employed in the postal service, and shall serve without additional salary, pay, or compensation other than that attaching to their rank and position in the Army.

5. The Post-Office Department will arrange to separate incoming army mail by headquarters, by regiments, and, so far as possible, by companies, and deliver such mail, properly sacked or pouched, at such point as shall be most convenient for its transfer to the military detail, where, under the direction of the War Department, it shall be received by the Quartermaster's Department, and through that department delivered to the respective general and regimental headquarters.

6. The Quartermaster's Department shall also collect from the general and regimental headquarters outgoing mail, to be in turn delivered to the employees of the Post-Office Department at the point of departure.

7. The Post-Office Department will detail for each camp an expert money-order clerk, who will give requisite bonds and be fully supplied from time to time with

postage stamps, stamped envelopes, postal cards, and other supplies and blanks of whatever description. Applications for money orders within the regiments could be made out, and, with the money accompanying, could be grouped and sent by a properly authorized person to the money-order clerk at headquarters, who would issue regular money orders therefor and return them through the same channel.

8. For the more complete efficiency of this system, the Postmaster-General will, whenever necessary, designate a post-office inspector, or an officer or employee of the railway-mail service, to be associated with the postal superintendent in charge at any camp, to aid in the installation or operation of the military-mail service.

9. Whenever any military expedition shall be made, the Postmaster-General will detail a sufficient force of trained employees of the postal service to accompany it, and organize the same system of military-mail service at any camp that may be established.

Under the system thus outlined the Post-Office Department would keep the supervision and management of the mails; the Quartermaster's Department would undertake their transportation within the camp to and from the point of departure and arrival, and the adjutants would be responsible for the regimental and company collection and distribution.

If this plan meets your approval, I beg to ask that you will issue the necessary orders for its full and effective operation so far as it depends on the War Department and the military organization.

Very respectfully,

CHAS. EMORY SMITH, *Postmaster-General*.

The SECRETARY OF WAR.

By command of Major-General Miles:

H. C. CORBIN, *Adjutant-General*.

GENERAL ORDERS, }

No. 93. }

WAR DEPARTMENT,
ADJUTANT-GENERAL'S OFFICE,
Washington, July 12, 1898.

The following instructions, governing the equipment of volunteer troops called into service under the President's proclamation of April 23, 1898, in addition to those contained in General Orders, No. 33, Headquarters of the Army, Adjutant-General's Office, May 5, 1898, are published for the information and government of all concerned:

As soon as practicable after the receipt of this order, provided it has not already been done, the commanding officer of each volunteer regiment, battalion, or other separate organization, shall convene a board of officers of his command to make inventories of all property received from the governor of the State or Territory to which his command was credited, and to make report as follows, viz:

1. To prepare an itemized list of all the United States property received from the governor, determine its condition and value, and fix the price (average) at which each article of clothing should be charged to enlisted men.

2. To make itemized lists of all articles of State property received from the governor for use of the organization, and to determine and report its money value at the time the property was received from the State, including clothing issued to enlisted men.

Quartermaster's property and ordnance property should be borne on separate inventories, and the reports of the several boards, after approval by the respective commanding officers, be forwarded direct to the chief of the bureaus to which the property pertains.

By order of the Secretary of War:

H. C. CORBIN, *Adjutant-General*.

GENERAL ORDERS, }

No. 94. }

WAR DEPARTMENT,
ADJUTANT-GENERAL'S OFFICE,
Washington, July 12, 1898.

I. The following act of Congress is published for the information and guidance of all concerned:

AN ACT directing the enlistment of cooks in the Regular and Volunteer armies of the United States.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Secretary of War be, and he is hereby, authorized and directed to cause to be enlisted in each company, battery, and troop in the Regular

and Volunteer armies of the United States, as a part of the authorized enlisted strength thereof, under rules to be prescribed by him, a competent person as cook, who shall take rank as and be allowed the pay of a corporal of the arm of the service to which he belongs, and whose duties in connection with the preparation and serving of the food of the enlisted men of the company, battery, or troop, and with the supervision and instruction of enlisted men hereby authorized to be detailed to assist him, shall be prescribed in the regulations for the government of the Army.

Approved, July 7, 1898.

II. The following instructions are published to govern the enlistment of army cooks, under the provisions of the act of Congress approved July 7, 1898:

1. A candidate for enlistment as cook will be first subjected to the required medical examination, and when found qualified for enlistment, both as regards his physical condition and his general character, the recruiting officer will examine him thoroughly as to his knowledge of methods and his skill in caring for, preparing, and serving food, particularly as to the amount of experience he has had in cooking for large bodies of men. The candidate will then be required to give a practical exhibition of his ability to cook, and for this purpose articles of the ration, in suitable amounts, will be issued to the recruiting officer by the nearest commissary upon requisitions signed by the recruiting officer. No candidate will be enlisted as a cook unless the recruiting officer be fully satisfied that he is competent to perform the duties required of him; and in the case of every person thus enlisted his enlistment paper will be plainly indorsed, "Enlisted as a cook." Men thus enlisted will be accounted for as cooks in the tables on the second and third folds of the trimonthly reports of the recruiting service.

2. The commanding officer of a regiment or other organization, in either the Regular or the Volunteer Army, is authorized to cause the enlistment of one competent cook for each company, troop, or battery of his command. Such enlistments will be made, whenever practicable, by the recruiting (or mustering) officer authorized by existing orders and instructions to recruit for the command. Men thus enlisted will be included in the authorized maximum enlisted strength of their companies, troops, or batteries.

3. General-service recruiting officers of the Regular Army, in addition to making enlistments of cooks for their own regiments upon the request of the commanding officers thereof, will, whenever practicable, enlist as cooks, for general assignment, men possessing the requisite qualifications and report them to the Adjutant-General of the Army for assignment to companies, troops, or batteries needing their services.

4. Mustering officers who are authorized to make enlistments *in the field* for volunteer organizations already mustered into the service of the United States (Section II, Circular Letter, Adjutant-General's Office, June 3, 1898), may make enlistments of competent cooks to fill actual vacancies in such organizations, with the approval of the department, corps, division, or district commander; and they will be guided in making such enlistments by the instructions prescribed in this order to govern recruiting officers.

5. The commanding general of a department or corps may, when found necessary, authorize officers detailed from his command to recruit for one volunteer organization serving therein, to make enlistments of cooks to fill actual vacancies in other volunteer organizations of his command. Department and corps commanders may, at the request of commanding officers concerned, transfer cooks from one organization to another within their respective commands, for the purpose of preventing a surplus in one organization and of filling vacancies in another.

6. An enlisted man already in service and desiring to serve as a cook may be appointed and rated as such upon his own application, if in the opinion of his immediate commanding officer, as the result of a practical test, he is sufficiently proficient. Such appointments will be made in the same manner as those of company noncommissioned officers.

7. Only *one* cook is authorized by law for each company, troop or battery, and every care must be exercised by commanding officers, through communication with their recruiting officers and with department or corps headquarters, to prevent exceeding this allowance. Should there be an excess of cooks, from any cause, in an organization the fact will be at once reported to the department or corps commander, with a view to the transfer of the surplus cooks to other organizations in which there may be vacancies therefor.

8. Cooks will be duly accounted for *as such* on all muster rolls and returns. The number required by an organization beyond the power of its own officers to supply will be reported to the proper department or corps commander, who will report such vacancies as can not be filled under his orders to the Adjutant-General of the Army.

9. The commanding officer of each company, troop, or battery will supervise the cooking and messing of his men; will see that at least two copies of the Manual for

Army Cooks are provided for his command, and that suitable men in sufficient numbers are regularly detailed as assistants to the cook and are fully instructed by the latter in managing, cooking, and serving the ration in the field; also that necessary utensils in serviceable condition are always on hand, together with the field-mess furniture for each man.

10. Each cook will be required to attend such drills and exercises as will qualify him for the performance of the duty of a soldier under arms when necessity requires.

By order of the Secretary of War:

H. C. CORBIN, *Adjutant-General*.

GENERAL ORDERS, }

No. 100. }

WAR DEPARTMENT,
ADJUTANT-GENERAL'S OFFICE,
Washington, July 16, 1898.

The following is published to the Army for the information and guidance of all concerned:

Information having reached the War Department that notwithstanding the medical examination prior to muster in, men have been enlisted in the Volunteer Army who should have been rejected at that examination as unfit for military service, the attention of chief surgeons is directed to this subject as one of great importance. Systematic inquiry with a view to eliminating such men should be made in the various regiments and other commands by the medical officers on duty with them. A board of medical officers should be appointed in each division to carefully examine and make recommendation in each of the cases submitted by individual or regimental medical officers. In every case where discharge from service is recommended it should be seen that the certificates of disability embody a statement to the effect that the cause of the disqualification for the military service existed prior to the enlistment of the man, if such is found to be the fact. Department and corps commanders are authorized to order discharges on certificates of disability, such orders to be carried out by the regimental, independent battalion, battery, or detachment commanders, as the case may be. Such provisions of paragraph 140 of the Regulations as are inconsistent with the foregoing are suspended during the war.

In the examination of certificates of disability for discharge, it is enjoined upon the chief surgeons and others accountable to observe that there is no conflict between the reports of company commanders, medical and other officers thereon as to whether disability was incurred in line of duty or not in line of duty. If any discrepancies exist in this particular, every possible means will be employed to harmonize the reports before finally forwarding the papers to the Adjutant-General of the Army.

By order of the Secretary of War:

H. C. CORBIN, *Adjutant-General*.

GENERAL ORDERS, }

No. 110. }

WAR DEPARTMENT,
ADJUTANT-GENERAL'S OFFICE,
Washington, August 1, 1898.

In order to introduce uniformity into the work of rationing the enlisted men now organized into brigades, divisions, and corps, the following instructions are promulgated for the guidance of all persons concerned:

1. The chief commissary of an army corps, under the direction of the corps commander, will have general supervisory direction and control over the division and brigade commissaries of the corps. The division commissaries will have supervision over the brigade commissaries of their respective divisions.

2. Ration returns (Form No. 53, Subsistence Department) will be submitted by commanding officers of companies, troops, batteries, and other organizations with the morning report on the 10th, 20th, and last day of each month, when practicable; that of the 20th to include the remaining days of the calendar month, the others ten days each. In making up such returns due attention must be given by commanding officers to the duty of adding or deducting rations on account of men joining or leaving since the date when rations were last drawn for the command.

3. Ration returns of the company commanders and others of a regiment will, after each has been approved by the regimental commander, be consolidated by the regimental adjutant upon a regimental ration return (Form No. 66, herewith), which, after approval by the regimental commander, will be forwarded with the ration

returns on which founded to the brigade commissary of the command, who will consolidate the regimental ration returns of each brigade on a separate brigade ration return (Form No. 67, herewith). When approved by the brigade commander, the brigade ration returns only will be forwarded for the information and supervision of the chief commissary of the army corps, who will refer them to the depot commissary for invoice and transfer of the rations in bulk to the respective brigade commissaries (Form No. 68, herewith). In order to prevent accumulation of surplus ration articles in the hands of brigade commissaries arising from savings and other causes, the final ration return of the brigade each month (or any brigade ration return, if occasion requires), will give a list of such articles on hand as should be deducted by the depot commissary from the quantities called for by the brigade ration return.

4. Should a brigade be separated from the division of which it is a part, the brigade ration return, approved by the brigade commander, will be forwarded direct by the brigade commissary to the depot commissary for issue. Should a division be separated from its corps, the brigade ration returns, after approval by the brigade commanders, will be referred by the division commissary to the depot commissary for invoice and transfer of the rations in bulk to the brigade commissaries (Form No. 68).

5. Brigade commissaries, on receipt of the stores furnished from depot on the brigade ration returns, will issue rations, in accordance with the ration returns of the separate organizations forwarded by the regimental adjutants and retained in their possession, with such frequency as to the respective organizations as the brigade commander may direct.

6. Separate regiments, companies, detachments, hospitals, and other organizations not brigaded will draw their rations from the depot commissary on proper ration returns.

7. The ration for issue to troops of the Cuban army and to Cuban destitutes will consist of the following articles:

8 ounces bacon.	
12 ounces flour, or 16 ounces corn meal.	
6 pounds coffee (green),	} to 100 rations.
10 pounds sugar,	
2 quarts vinegar,	
4 pounds salt,	
4 ounces pepper,	
4 pounds soap,	

8. Separate abstracts of issues (Form No. 40, Subsistence Department) will be made of issues to troops of the Cuban army, to Cuban destitutes, and to prisoners of war.

9. Compliance with the requirements of printed notes 6 and 8 on the abstract of issues (Form No. 40, Subsistence Department) and with the following requirements of Army Regulations is hereby suspended during the period of the existing war:

(a) The requirement of that part of Army Regulations 1262 directing the indorsement upon travel orders of enlisted men the time to which they were last rationed and directing the turning over of the orders so indorsed to the commissary from whom rations are next drawn for file with his abstract of issues or receipt roll of commutation paid.

(b) The requirement of that part of Army Regulations 1262 directing that a ration certificate of troops detached (Form No. 41) shall be furnished to detachments of enlisted men and civil employees leaving a post or command and the filing of such certificate with his abstract of issues by the commissary from whom rations are next drawn.

(c) The requirement of that part of Army Regulations 1275 directing that the retained copy of the travel orders of enlisted men paid commutation in advance shall be indorsed and delivered to the commissary from whom rations are next drawn for file with his abstract of issues.

By order of the Secretary of War:

GENERAL ORDERS,)
No. 114.)

WAR DEPARTMENT,
ADJUTANT-GENERAL'S OFFICE,
Washington, August 9, 1898.

I. Sick and wounded soldiers sent to United States general or field hospitals will when able to travel be granted by the surgeons in charge one month's furlough and transportation to their homes. There will be noted on the furlough: By the surgeon, the post or camp nearest to the home of the soldier; by the quartermaster, the issue of transportation; by the commissary, the days for which commutation of rations while traveling is paid. Weekly reports will be made by the surgeons to the Adjutant-General of the Army of furloughs so granted, giving names, rank, regiments, and places to which transportation has been issued; also post-office address. Soldiers granted furloughs in accordance with the foregoing will be instructed by the surgeons that on the expiration of their furloughs, if fit for duty, they must report at the nearest Army post, camp, or hospital for the purpose of being either sent to their regiments, or as provided for in Paragraph II. Those not fit for duty will be required to forward their furloughs, five days before expiration, to the Adjutant-General of the Army, accompanied by the certificate of a reputable physician showing clearly their physical condition and the probable time required for their recovery. The Quartermaster's Department will furnish the necessary transportation to the homes of the furloughed soldiers and the Subsistence Department commutation of rations at the rate of \$1.50 per day for the necessary number of days' travel. Sleeping-car accommodations when the travel is by rail and staterooms when the travel is by boat (other than Government transport) will be furnished under Army Regulation 1109.

Neither the cost of transportation nor commutation of rations while traveling will be charged against the soldier. This order will not apply to soldiers on ordinary furloughs.

II. The following instructions to provide for the disposition of enlisted men, patients in the United States general or field hospitals, *who have made complete recovery and are able to do full duty*, are published for the information and guidance of all concerned:

Soldiers, both regulars and volunteers, whose regiments are in the United States, will be sent by the surgeons in charge of hospitals to join their proper regiments.

Soldiers belonging to regiments of the Regular Army which are not in the United States will be sent by the surgeons in charge of hospitals to report for duty with recruit detachments of their respective regiments, except artillery soldiers of the Regular Army belonging to batteries which have left the United States, who will be sent to the headquarters of their respective regiments.

Those belonging to volunteer organizations which are not in the United States will be sent by the surgeons in charge of hospitals to the nearest military post or camp.

The names of all men sent from general or field hospitals under these instructions, their companies and regiments, and the places to which they are ordered, will be promptly reported to this office by the surgeons in charge of hospitals, who will be furnished by this office with weekly printed statements of the stations of United States troops, regulars and volunteers, which statements will also show the location of the detachments of recruits belonging to regiments of the Regular Army that are not in the United States.

The necessary transportation under this order will be furnished by the Quartermaster's Department, and the Subsistence Department will pay commutation of rations at the rate of \$1.50 per day for the necessary number of days' travel. These provisions will not apply to soldiers on ordinary furloughs.

III. If the soldier has been paid or drawn clothing while in a hospital it will be noted on his descriptive list, if he has one, and if not, his company commander, or the officer to whom he may be ordered to report, will be furnished this information by letter.

By order of the Secretary of War:

H. C. CORBIN, *Adjutant-General.*

GENERAL ORDERS, }
No. 116. }

WAR DEPARTMENT,
ADJUTANT-GENERAL'S OFFICE,
Washington, August 10, 1898.

The following is published to the Army for the information and guidance of all concerned:

Medical officers in charge of general hospitals, hospital trains, hospital transports, and the hospital at the camp at Pablo Beach, Fla., and at the hospital at the camp at Montauk Point, N. Y., will be allowed to expend from the appropriation "Subsistence of the Army," for the diet of the enlisted men undergoing medical treatment under their charge, at the rate of not exceeding 60 cents per man per day for the period each is undergoing treatment. The allowance so made will constitute a special fund in the hands of the medical officer in charge, from which will be purchased the entire diet of the enlisted men while undergoing medical treatment. These purchases will be restricted to articles of food, solid and liquid, the quantities and varieties of which will be determined by the medical officer in charge.

Chief commissaries of departments will transfer to medical officers in charge such subsistence funds as may be estimated for by the latter for carrying out the objects of this order.

There will be rendered monthly to the Commissary-General of Subsistence, by the medical officers concerned, regular accounts current supported by vouchers showing the application of these funds, and regular returns of subsistence stores accounting for the articles of food purchased and issued. There will be submitted with each monthly return a tabular statement showing the number of patients present during the month, as shown by the hospital records, and the money value of the articles issued to and consumed by them. The statement will be so arranged as to show the actual cost of subsistence per man per day for the month.

Transfers of subsistence funds from one hospital, train, or transport to another without authority of the Commissary-General of Subsistence, and the purchase from subsistence funds of articles other than food intended for diet of the sick, are prohibited.

This order will go into effect at once, and all surplus funds in the hands of medical officers in charge, arising from the commutation of rations heretofore allowed to

enlisted men undergoing treatment under their charge, will be taken up on their accounts current for the month of August, and all articles purchased from such commutation remaining on hand unconsumed on receipt hereof will be taken up on their returns of subsistence stores for that month.

By order of the Secretary of War:

H. C. CORBIN, *Adjutant-General.*

GENERAL ORDERS, }
No. 117. }

WAR DEPARTMENT,
ADJUTANT-GENERAL'S OFFICE,
Washington, August 10, 1898.

In order to prevent as far as possible the diseases incident to encampments of large bodies of men, namely, typhoid and malarial fevers, diarrhea, and dysentery, and the further spread thereof where these diseases have already gained more or less headway, all officers, from the commanding general to company commanders, will exercise the utmost vigilance to enforce proper sanitary conditions in camp and strict cleanliness of the person.

The speedy destruction or removal with safety of all decaying substances, present and future, and the rendering innoxious the feculent matter of the camp must be accomplished.

The Quartermaster's Department will furnish lumber for floors to all tents. The general commanding camp will at once provide ample hospital facilities by erecting barracks where there is a shortage of hospital tents.

No effort will be spared to carry this order into effect to the fullest extent, and to this end those concerned will not rest content with the issuance of orders upon the subject, but they or their representatives, duly impressed with this grave responsibility, will immediately see to the commencement, continuance, superintendence, and practical accomplishment, day by day, of the instructions imposed upon the command.

The attention of all concerned is called to Army Regulations concerning interior economy, police, and discipline of companies, to Circular No. 1, Surgeon-General's Office, April 25, 1898, to "Marches" and "Camping" in the authorized Drill Regulations, to "Soldier's Handbook," and the remarks therein compiled. From these easily accessible data, supplemented by his own practical experience and that of others, the commanding general of each camp will at once prepare and put into immediate execution a simple code of rules, of the daily practical accomplishment of which he will assure himself, rendering daily reports to the Adjutant-General of the Army.

Copies of the rules promulgated will be sent at the earliest moment to the Adjutant-General of the Army.

By order of the Secretary of War:

H. C. CORBIN, *Adjutant-General.*

CIRCULAR, }
No. 31. }

WAR DEPARTMENT,
ADJUTANT-GENERAL'S OFFICE,
Washington, August 12, 1898.

Owing to the number of incorrect and incomplete final statements daily presented to paymasters for settlement, it is apparent that the obligations of officers issuing such statements are not fully understood, and the result is great inconvenience to discharged soldiers who are obliged to return to their late commanding officers to have necessary corrections made and liability of paymasters to overpay when the account of the soldier is not fully and properly stated.

In order that there may be uniformity in the issue of final statements, the following instructions, compiled from the Army Regulations, will be strictly observed.

"It should be borne in mind that overpayments caused by erroneous final statements will be charged against the officer who signed the final statements."

NOTIFICATION OF DISCHARGE.

(Par. 150, A. R.)

The officer who prepares the final statement of a soldier will, at least one day before the discharge takes effect, send by mail to the paymaster to whom the soldier may wish to apply for payment a notification in his own handwriting, in form as follows:

"Major——, Paymaster, U. S. Army,
" *Washington.*

"SIR: I have the honor to advise you that Private —— will be discharged the service of the United States on ——, 1898, by reason of ——." (Here state the reason.)

"The soldier was last paid to ———, 1898, and has pay due him from that date to date of discharge.

There is due him for clothing not drawn in kind, \$ ———," or "He is indebted to the United States for clothing overdrawn, \$———. He is indebted to the United States for C. & G. E., \$———. For court-martial forfeiture, \$———.

"The soldier is (or is not, as the case may be) entitled to traveling allowances.

"His signature appears below.

"(Soldier's signature:)

"Very respectfully,

"Com'g Co.——— Regt.——— Vols."

SOLDIERS ARE DISCHARGED FOR THE FOLLOWING REASONS.

(Par. 140, A. R. and G. O., No. 100, A. G. O., 1898.)

1. By order of the President or the Secretary of War.
 2. By sentence of a general court-martial.
 3. On surgeon's certificate of disability by direction of the commander of a territorial department or army in the field. Department and corps commanders are authorized to order discharge on certificates of disability, such orders to be carried out by the regimental, independent battalion, battery, or detachment commander, as the case may be, and the final statements should show the authority for discharge and whether or not the disability was caused by the soldier's own misconduct. The requirements of G. O., No. 100, A. G. O., 1898, should be carefully observed.
 4. In compliance with an order of one of the United States courts, or a justice or judge thereof, or on a writ of habeas corpus.
 5. By expiration of term of service.
- Under the head of "Remarks" the notation, "Service honest and faithful," or "Service not honest and faithful," as the case may be, must appear.

TRAVEL PAY IS FORFEITED.

1. By dishonorable discharge, per sentence of court-martial.
 2. When soldier is discharged as a minor, or for other cause involving fraud on his part in the enlistment.
 3. When, at date of discharge, the soldier is in the hands of civil authorities and undergoing imprisonment.
 4. When discharged before expiration of term of enlistment through fault of his.
 5. When discharged by order of the Secretary of War, or by corps or department commander, for disability caused by his own misconduct.
 6. When discharged by way of favor, as, "to enable him to accept a commission."
- If for any of the above causes the soldier is not entitled to traveling allowances, the notation, "not entitled to traveling allowances," must appear, and the authority for the same must be stated.

CLOTHING ACCOUNT.

Settlement must be made by the company commander, and the balance "due the United States," or "due the soldier," must be stated.

In cases where clothing has been issued by the State authorities the following remark will be made on the final statements: "In the settlement for clothing is included the sum of \$———, the total value of articles issued him by the State." In cases where no clothing was issued by the State a remark to that effect will be made.

By order of the Secretary of War:

H. C. CORBIN, *Adjutant-General.*

GENERAL ORDERS, }
No. 121. }

WAR DEPARTMENT,
ADJUTANT-GENERAL'S OFFICE,
Washington, August 18, 1898.

I. In addition to the instructions published in General Orders, No. 144, August 9, 1898, from this office, regarding furloughs to sick and wounded soldiers, division commanders, when separated from the corps to which they belong, are authorized to grant furloughs to enlisted men, upon the recommendation of the division surgeon, and to order transportation to their homes of the men so furloughed.

By order of the Secretary of War:

H. C. CORBIN, *Adjutant-General.*

GENERAL ORDERS, }
No. 124. }

WAR DEPARTMENT,
ADJUTANT-GENERAL'S OFFICE,
Washington, August 20, 1898.

I. The following instructions for the muster out of the service of United States Volunteers are published for the information and guidance of all concerned:

1. Only officers of the Regular Army will be detailed by the War Department to muster out troops, and in all matters pertaining to their duties as mustering officers the officers and men of organizations to be mustered out will be guided by the instructions of these officers, given in pursuance of authority conferred by the Secretary of War.

2. The mustering officer, proceeding according to a well-considered plan, suited to the situation, will make full use, under the supervision of the company or other commander, of the men of each company or other organization possessing clerical ability, so that the transfer of property, preparation of physical-record blanks, correction and completion of organization records, preparation and comparison of property returns, statements of charges, and muster-out rolls may be accomplished with the least possible delay, each individual engaged in the work of comparison being required to initial the paper compared, in order that the responsibility for errors in comparison may be fixed.

3. To avoid expense to the Government and hardships and annoyances to individuals concerned, by unavoidable delays that will occur in the final payment of officers and enlisted men absent from their commands on muster out, commanding officers will make every effort to effect the return of all absentees and detachments prior to muster out of the organization, and if for any reason an officer or an enlisted man absent is unable to join his command, a full report of the facts will be made to the Adjutant-General of the Army for further orders.

4. The mustering officer, from the daily reports of his staff assistants, and his own notes, will telegraph to the Adjutant-General of the Army, in brief, daily progress in the preparation of returns, vouchers, muster-out rolls, transfer and disposition of property, physical examination of troops, muster out, payment, and departure from the camp or station, with designation of the organization, and statement of the number of officers and men separately.

5. Officers who at any time were responsible for public property of any description must obtain certificates of nonindebtedness before their final payment can be made. Commanding officers will therefor forward at once to the Paymaster-General a complete list of *all* the officers of the organization to be mustered out, and to the Quartermaster-General, Commissary-General of Subsistence, Surgeon-General, Chief of Engineers, Chief of Ordnance, and Chief Signal Officer, a list of those officers who are, or at any time have been, responsible for public property. Chiefs of the supply departments mentioned will cause immediate examination of returns to be made and transmit the result thereof to the Paymaster-General.

6. Officers who have not at any time been responsible for public property will be required to furnish the mustering officer with their affidavits to that effect, certified to by the commanding officer of the regiment, independent battalion, or company. The affidavits of such officers will be transmitted with the muster-out rolls to the paymaster designated to make the payment to the organization.

7. All officers will be held to a strict accountability for the discipline of their commands and the preservation of public property. Mustering officers are empowered to prefer charges against officers who neglect in any manner to take the proper measures to insure the Government against loss of property or to keep their commands together and under proper discipline.

8. Officers of the staff departments of the Regular Army will be detailed, when practicable, to receive public property, supervise the preparation of all returns and papers relating thereto, and for the performance of this duty will receive special instructions from the chiefs of the supply departments of the Army.

9. The supply departments of the Army will continue to furnish organizations with needful supplies until date of final payment and discharge.

10. The mustering officers, upon arrival at the camp or station of the organization to be mustered out, will make a careful examination of the regimental and company records and cause any omissions found to be supplied in order to complete the records.

11. Five muster-out rolls will be prepared under the supervision of the mustering officer, by the proper commanding officers, with the greatest care to avoid any injustice being done to the Government or to persons who at any time were members of the organization, special attention being given to the requirements of the last paragraph of Circular No. 31, current series, from this office, being careful to note that settlement of clothing may involve different fiscal years, and all concerned in their preparation will initial the same and carefully read the "Instructions for the preparation of muster-out rolls," printed on the back of the rolls.

12. All persons borne on the muster-in and on all other muster rolls, and all who have joined or belonged to the organization at any time since its muster in, must be

accounted for on the muster-out roll, which is required to be a complete record of all the officers and men who ever belonged to the organization.

13. After the muster-out rolls have been prepared they will be carefully examined by a board of officers, to be appointed by the commanding officer, which will be furnished with the retained copy of the muster-in roll, with copies of all the muster rolls of the organization and other necessary data. Under the supervision of the mustering officer the board will compare rolls and data with the muster-out rolls, to insure their absolute correctness in all respects.

14. Discharge certificates will be prepared for every officer and man present and absent, except absent officers and men held in service by proper authority and deserters. These will be signed by the commanding officer for the field, staff, and band, by company commanders for their companies, and all will be countersigned by the mustering officer at place of departure, who will forward them by registered mail to the mustering officer at the State rendezvous for delivery to the paymaster, who will stamp and sign them as required by paragraph 1383, Army Regulations. The certificates will then be delivered to the regimental and company commanders.

15. The discharge from the United States Volunteer service in the case of all absentees (except special cases otherwise provided for or such as may be held in service by proper authority) will take effect on the date of muster out of the organization.

16. In all cases of absentees, where the officer at the time of executing the certificates of discharge is not aware of the date of muster out of the organization, he will set forth in writing thereon that the same take effect as of the date of the muster out of the United States service of the company or other immediate organization upon the muster roll of which the individual's name appears.

17. In the case of enlisted men absent, who on account of sickness are unable to join their commands, the discharge certificates, with carefully prepared descriptive lists of account of pay and clothing, giving the address of the soldier, will be given to the mustering officer for transmission with the muster-out rolls to the Adjutant-General of the Army, and the soldier will be officially notified to apply by letter to the Paymaster-General of the Army for final payment. In cases of soldiers absent on detached service who are held in service by proper authority, descriptive lists, if not already furnished, will be sent to the officers under whom they are serving, and when such men are ordered to be mustered out (on detachment muster-out rolls) the proper officers will prepare and sign the discharge certificates after the medical examination has been had, as provided for in Paragraph II of this order.

18. Officers absent from any cause will be furnished discharge certificates (unless specially held to service) and will be notified to apply to the Paymaster-General for certificates of nonindebtedness and settlement of their accounts.

19. In the cases of enlisted men absent sick and of officers absent on muster out of organizations, the required examination will be made under special instructions to be issued by the Adjutant-General of the Army.

20. As a rule, the muster out of organizations and their final payment will take place at the State or regimental rendezvous, except when otherwise ordered by the War Department. The preparation and completion of the muster-out rolls, returns, and papers, and the inspection and transfer of public property to the officers of the supply departments of the Army, except as hereinafter provided, will take place before the organization is ordered to its State. The only property that will be allowed to be retained until muster out, unless otherwise ordered by the mustering officer, is the rifles, cartridge belts, cups, canteens, meat cans, knives, forks, and spoons, necessary *medical supplies* and tent equipage, the colors, and the regimental and company records.

21. The supply departments concerned will arrange through the chief commissary and chief quartermaster of the department within which the State rendezvous is located for meals, camp ground, shelter, transportation, and quartermasters' supplies for the time of the encampment of the organization at the State or regimental rendezvous.

22. As soon as the muster-out rolls have been fully and satisfactorily completed, the mustering officer at the place of departure will fill in the date of the muster out *as of a date ten days later* (the probable time necessarily required to transfer the organization to its State rendezvous, the making of the physical examination of officers and men, etc.), and forward at once by registered mail two copies to the paymaster designated to make the final payment, and the remaining three copies of the rolls to the mustering officer at the State rendezvous.

23. The duties with which mustering officers and officers of the supply departments of the Army are charged by this order will be so systematically performed that the organization can proceed to its State rendezvous without delay (*for which timely transportation and subsistence will be provided*) freed from all property accountability, except that mentioned in paragraph 20; with all rolls, returns, and papers

completed to date in order to avoid unnecessary delay when it reaches its home station in carrying out the following instructions:

II. As soon after the arrival of the organization at its State rendezvous as possible the physical examination of all officers and men will be made, before muster out and payment.

PHYSICAL EXAMINATION OF OFFICERS AND MEN.

1. To facilitate the settlement of pension claims that may be made on account of disability incurred in the United States service and to protect the rights of persons who may be entitled to the benefits of the pension laws, as well as to guard the interests of the Government, it is ordered that a thorough physical examination be made of all officers and enlisted men of volunteers, except general officers and officers of the general staff, immediately prior to their muster out of service or discharge. For this purpose a blank form will be supplied by the Adjutant-General of the Army.

2. When an organization is about to be mustered out of the service, each officer and enlisted man will be required by his company or other commanding officer to answer the questions on the blank form "Declaration of person to be mustered out," which, when completed, will be signed by him and duly witnessed by said officer. This officer will then make the required certificate which follows the declaration, based upon the official records of the organization and on his personal knowledge of the facts in the case.

3. When the physical examination papers of the officers and men of a company or other organization are so far completed, they will be given to the mustering officer, who will cause the physical examination to be made and said papers to be completed by a medical officer of the Regular Army, whenever the services of such an officer are available, and when not, then by a medical officer of volunteers *not belonging to the organization of which the officers and men are members*.

4. The mustering officer will report to the Adjutant-General of the Army any person under examination who claims to have a disability of which the medical officer can find no evidence, or claims to have a disability incurred in line of duty, whereas the medical officer is of the opinion that the disability was not so incurred, such person will not be discharged until after he shall have been examined by a board of three medical officers, to be convened by the Adjutant-General of the Army, which will make a full report of the case in accordance with the terms of this order. If the medical officers fail to agree with regard to the case, a separate minority report will be made by the dissenting officer.

5. Upon completion of the medical examination, the papers in the case will be turned over to the mustering officer, who will forward them with the muster-out rolls to the Adjutant-General of the Army.

6. The physical examination having been completed, the regimental and company records and blanks and the colors will be packed and marked, showing the organization to which they pertain, and forwarded to the Adjutant-General of the Army the day before the muster out and payment takes place. On the same day, or earlier, as may be deemed advisable by the mustering officer, the ordnance and other public property in possession of the organization will be turned over to the proper officers of the supply departments, to be disposed of in accordance with the special instructions received by them, and all returns finally completed and rendered, and all supplementary charges entered on the muster-out rolls.

III. On arrival of the paymaster at the State rendezvous, the mustering officer will deliver to him the discharge certificates for the purpose indicated in section 14 of this order, and on the day of payment the organization will be paraded and the mustering officer will cause the names of all officers and enlisted men present and absent to be called out, requiring those present to answer and step briskly five paces in front of the line. As soon as the muster of a company has been completed, the mustering officer will direct it to be marched to the pay table for payment and discharge, handing a copy of the muster-out roll to the company commander. On completion of the payment of the organization, the mustering officer will send one copy of the muster-out roll to the adjutant-general of the State and the remaining copy to the Adjutant-General of the Army.

Mustering officers will make daily notes of the progress of the work accomplished and require staff assistants to do likewise, keeping careful and convenient records of all correspondence, properly indexed, and upon completion of the duty cause said staff assistants to render, through him, for transmittal with his own to the Adjutant-General of the Army, full reports of the work accomplished, with recommendations as to the solution of the problem involved in the muster out of service of troops of the United States Volunteer Army.

IV. Upon an honorable muster out and discharge from the service of the United States, all volunteer soldiers, desiring to do so, are hereby authorized to retain their

arms and accouterments upon the value thereof being charged to them on the muster-out rolls at the following rates:

Springfield breech-loading rifle or carbine, caliber .45.....	\$10.00
Colt's revolver, caliber .38.....	10.00
Colt's revolver, caliber .45.....	10.00
Saber.....	3.60
Blanket bags with straps complete.....	1.15
Bayonet scabbard for rifle.....	.50
Cartridge belt (single row of loops).....	.75
Cartridge belt (double row of loops).....	1.00
Canteen with strap.....	.43
Gun sling.....	.24
Haversack and strap.....	.72
Waist belt and plate.....	.30
Meat can.....	.14
Tin cup.....	.08
Knife.....	.04
Fork.....	.03
Spoon.....	.01
Revolver holster.....	.50
Cartridge box.....	.50

By order of the Secretary of War:

H. C. CORBIN, *Adjutant-General.*

GENERAL ORDERS, }
No. 126. }

WAR DEPARTMENT,
ADJUTANT-GENERAL'S OFFICE,
Washington, August 25, 1898.

I. Commanders of independent brigades and other small independent commands are authorized to grant leaves of absence and furloughs to not more than 5 per cent of their force, under the provisions of paragraphs 44 and 106 of the Regulations.

II. The demand for Hospital Corps privates for the care of the sick in various commands being greater than can be supplied by transfer and enlistment, corps commanders and commanders of camps not under the jurisdiction of corps commanders are authorized and directed to detail a sufficient number of enlisted men to meet the emergency, the number of men and the length of detail to be determined by the chief surgeon.

III. The following instructions are published for the information and guidance of all concerned:

All officers and enlisted men absent from their organizations on leave, furlough, or from any other cause will at once report by letter to their respective company or regimental commanders the date, cause, period, and authority of absence. In case the whereabouts of the company or regiment is not known to the absentee, the report can be forwarded under cover to the Adjutant-General of the Army.

Surgeons in charge of hospitals and all post commanders will, at the end of each month, send to the proper company or regimental commander the name of each officer and enlisted man in the hospital or at the post other than those belonging thereto, giving the cause of detention, date of arrival, departure, return to duty, or death, or any other information that may be pertinent to the case.

By order of the Secretary of War:

H. C. CORBIN, *Adjutant-General.*

GENERAL ORDERS, }
No. 130. }

WAR DEPARTMENT,
ADJUTANT GENERAL'S OFFICE,
Washington, August 29, 1898.

The following additional instructions amendatory of those contained in General Orders, No. 124, August 20, 1898, from this office, are published for the information and guidance of all concerned:

1. Except the officers and men required by paragraph 5 for the necessary guard details, etc., leaves of absence for sixty days and furloughs for the same period will be granted all officers and enlisted men of organizations which have served beyond the limits of the United States, and thirty days to officers and men of organizations which have not served beyond the limits of the United States when such organizations are ordered to be mustered out of service.

2. Such leaves of absence and furloughs will be granted by the commanding officers after organizations have arrived at State rendezvous, all to take effect on

one date for thirty days or sixty days, as the case may be, and all officers and men must without fail report at the rendezvous on the *thirtieth* or *sixtieth day thereafter*. Any officer or man failing to so report will be considered and reported as a deserter unless prevented from doing so by sickness, which must be satisfactorily explained by the certificate of a reputable physician and the fact noted on the rolls.

3. Before organizations are granted furloughs the preparation for muster out, as required by General Orders, No. 124, August 20, 1898, from this office, will, in view of the foregoing, be carried out only so far as relates to the inspection and correction of records; inspection and transfer of such public property as may no longer be required; the preparation and comparison of property returns; the steps necessary to secure certificates of nonindebtedness, and for the return of all absentees, etc.

4. When possible all returns and papers relating to the muster out of organizations will be prepared during the period of furlough.

5. Each commanding officer, prior to the departure of his officers and men, will make arrangements necessary to verify and protect all public property pertaining to his command during the period of absence and place the same under proper guard detailed from his command for the purpose. He will notify the Adjutant-General of the Army of his arrival at rendezvous, and at the earliest possible moment the date on which leaves and furloughs expire.

6. In preparing muster-out rolls the number of days while on furlough will be stated under the heading on the roll, "Subsistence, number of days," and the paymaster in the "Pay account" on the roll will change the heading "For horses and equipments" to "Commutation for furlough rations," and credit each man at the rate of 25 cents per day for the number of days due and pay the same. The amount so paid for commutation of rations by the Pay Department will be refunded from the appropriation made for the Subsistence Department.

7. Mustering officers are empowered to administer oaths in all matters pertaining to the muster out of volunteers.

8. As soon as practicable the usual monthly pay rolls will be made out for the month preceding departure on furlough and sent to the chief paymaster of the military department in which the organization's rendezvous is situated. Upon these rolls alone can the officers and enlisted men be paid prior to departure on leave or furlough.

By order of the Secretary of War:

H. C. CORBIN, *Adjutant-General*.

CIRCULAR }
No. 34. }

WAR DEPARTMENT,
ADJUTANT-GENERAL'S OFFICE,
Washington, August 29, 1898.

The following decision has been made and is published to the Army for the information of all concerned:

"*Transportation*.—Sick and wounded soldiers granted furloughs under the provisions of General Orders, No. 114, August 9, 1898, from this office, are entitled to transportation from their homes upon return to duty, whether application therefor be made by them in person or by letter."—(Order Sec. War, Aug. 27, 1898, 115661, A. G. O.)

By order of the Secretary of War:

H. C. CORBIN, *Adjutant-General*.

GENERAL ORDERS, }
No. 134. }

WAR DEPARTMENT,
ADJUTANT-GENERAL'S OFFICE,
Washington, September 2, 1898.

The following is published to the Army for the information and guidance of all concerned:

1. Furloughs granted to enlisted men under the provisions of General Orders, No. 130, War Department, Adjutant-General's Office, August 29, 1898, will not be given on the usual blank forms for furloughs, but will be given orally by commanding officers. If given in the regular form, however, before the receipt of this order, the fact will be noted on the muster-out roll, and paymasters will require their surrender before making final payment, and will enter the fact of payment upon them and file them with the pay roll on which payment is made.

2. It having been reported to the War Department that many convalescent soldiers who have received furloughs and started for their homes have been taken ill on the way, to avoid further occurrences of this kind it is suggested in the strongest possible terms that all soldiers traveling homeward on furloughs will exercise their best

judgment in caring for themselves, especially those who have been ill in hospitals with fevers. Their appetites are very keen, and, unless they deny themselves everything except the necessary food of the simplest character, are in great danger of a relapse. This instruction is sent out hoping that it may catch the eye of those men en route, and also for the instruction of surgeons at hospitals. It is ordered that no man shall receive a furlough whom the surgeon in charge believes to be unable to travel alone, and that no furloughed soldier shall leave hospital without receiving full instructions as to his diet while en route to his home from his surgeon.

By order of the Secretary of War:

H. C. CORBIN, *Adjutant-General.*

GENERAL ORDERS, }
No. 135. }

WAR DEPARTMENT,
ADJUTANT-GENERAL'S OFFICE,
Washington, September 3, 1898.

I. The commanding officers of military departments, army corps, and detached commands will, as soon as practicable, forward to the Adjutant-General of the Army the names of such officers of the Army, regular and volunteer, as may be considered entitled to the brevet commissions "for distinguished conduct and public service in the presence of the enemy," under section 1209, Revised Statutes. These lists will be forwarded through the military channel, and will show in each case the name, rank, regiment, or corps of the officer, and the date and place of the action in which he is reported as having distinguished himself, and also a description of the specific act of gallantry.

II. The following rules will govern the award of medals of honor under the resolution of Congress approved July 12, 1862, and under the act approved March 3, 1863, for such officers and enlisted men of the Army, regular and volunteer, as may "have most distinguished themselves in action."

(a) Medals of honor will not be awarded to officers or enlisted men except for distinguished bravery or conspicuous gallantry which shall have been manifested in action by conduct that distinguishes a soldier above his comrades, and that involves risk of life or the performance of more than ordinarily hazardous duty. Recommendations for the award will be governed by this interpretation of extraordinary merit.

(b) Recommendations should be made only by the officer in command at the time of the "action," or by an officer having personal cognizance of the specific act for which the medal is granted. The recommendation must be accompanied by a detailed recital of the circumstances, and by certificates of officers, or affidavits of enlisted men who were eyewitnesses of the act. The testimony must, when practicable, embrace that of at least two eyewitnesses, and must describe specifically the act or acts by which the person in whose behalf the recommendation is made "most distinguished" himself, and the facts in the case must be further attested by the official reports of the action, record of events, muster rolls and returns, and descriptive lists.

By order of the Secretary of War:

H. C. CORBIN, *Adjutant-General.*

GENERAL ORDERS, }
No. 136. }

WAR DEPARTMENT,
ADJUTANT-GENERAL'S OFFICE,
Washington, September 3, 1898.

The following is published to the Army for the information and guidance of all concerned:

The provisions of General Orders, No. 116, War Department, Adjutant-General's Office, August 10, 1898, are hereby extended to include all field and post hospitals.

In this connection it is to be understood that General Orders, No. 116, does not do away with the hospital fund, but applies to patients who, in the opinion of the surgeon, are too sick to use the ration. For patients that can use the ration and for the Hospital Corps savings can be made as heretofore. Nor does the order take away the privilege of using funds and supplies furnished by aid societies, the using of which is left to the discretion of the surgeon, as is also the question whether or not there should be separate tables, kitchens, etc., having in mind the fact that the subsistence fund is to be used for those patients who need special articles of diet. General Orders, No. 116, is further intended to place in the hands of the surgeon a fund from which necessary articles of diet for patients too sick to use the ration can be purchased, without waiting for the formation of a hospital fund, and at the same time to prevent a large hospital fund accruing from those too sick to use the ration.

To sum up, the allowance of subsistence funds is intended to furnish the surgeon with the necessary funds for the purchase of such articles of the diet as in his discretion he may find necessary. It is not intended for those well enough to use the ration, nor is it intended to furnish the Hospital Corps with delicacies and special articles of the ration which could not be purchased from their own savings.

By order of the Secretary of War:

H. C. CORBIN, *Adjutant-General.*

GENERAL ORDERS, }
No. 139. }

WAR DEPARTMENT,
ADJUTANT-GENERAL'S OFFICE,
Washington, September 7, 1898.

I. The following is published to the Army for the information and guidance of all concerned:

It is ordered that a quartermaster be stationed at each general hospital for the purpose of giving transportation to soldiers who are sent home on sick furlough, and in every instance when the officer in charge of the hospital issues a furlough he should state on the furlough that under General Orders, No. 114, August 9, 1898, this office, the soldier so furloughed is entitled to transportation, and, if in the judgment of the surgeon the soldier should be furnished with sleeping-car accommodations, that fact will be stated, and when it so appears on the furlough the quartermaster must not only issue transportation but sleeping-car accommodations as well.

II. General Orders, No. 130, August 29, 1898, from this office, is so far amended as to place commissioned officers who belong to organizations furloughed for sixty days on waiting orders for the convenience of the Government for that period, instead of granting them leaves of absence.

WAR DEPARTMENT,
ADJUTANT-GENERAL'S OFFICE,
Washington, September 8, 1898.

The following is published to the Army for the information and guidance of all concerned:

* * * * *

II. All enlisted men who, between April 21, 1898, and such time as a treaty of peace is concluded between the United States and Spain, were assembled in camps or rendezvous in the United States, or into separate bodies, such as regiments, brigades, divisions, or corps, for the purpose of carrying on military operations and bringing to a conclusion the war with Spain, and all who embarked on transports for campaigns against the enemy in Cuba, Porto Rico, and the islands of the Pacific, or on the high seas, or elsewhere, are entitled to wear the "service-in-war" chevron prescribed in the Regulations and Decisions pertaining to the uniform of the Army of the United States, approved May 11, 1897.

The foregoing will not apply to enlisted men who were performing service in garrisons on the Western frontier which is requisite in time of peace, and in nowise considered a part of the Army assembled to carry on the war with Spain.

By order of the Secretary of War:

H. C. CORBIN, *Adjutant-General.*

HEADQUARTERS OF THE ARMY,
ADJUTANT-GENERAL'S OFFICE,
Washington, September 12, 1898.

By direction of the Secretary of War, paragraph 162 of the Regulations is amended to read as follows:

162. The remains of deceased soldiers will be inclosed in coffins and transported by the Quartermaster's Department to the nearest military post or national cemetery, or, if so desired by their relatives, to their homes, for burial, unless the commanding officer deem burial at place of death to be proper, when a full report of the facts and reasons will be made to the Adjutant-General of the Army. The expense of transporting the remains is payable from the appropriation for Army transportation,

or from funds specially appropriated for that purpose. The cost of expense of burial other than the cost of transportation will be limited to \$35 for each enlisted man.

By command of Major-General Miles:

H. C. CORBIN, *Adjutant-General.*

CIRCULAR }
No. 36. }

HEADQUARTERS OF THE ARMY,
ADJUTANT-GENERAL'S OFFICE,
Washington, September 14, 1898.

By direction of the Assistant Secretary of War the following instructions to paymasters for the payment of troops mustered out of the service is published for the information and guidance of all concerned:

Paymasters engaged in paying mustered-out men will endeavor to make such payments as complete as possible, both with regard to settling all arrears of whatever nature due the soldier and paying every one appearing on the rolls as entitled to pay; at the same time exercising the greatest care to avoid overpayments, as such can not, in all probability, be recovered, and the loss will fall upon the paymaster.

They will keep the rolls open as long as possible so as to include all men not present at the general payment, but who appear afterwards, either in person or by attorney, before the rolls are finally closed.

CREDITS ON THE ROLLS.

Items of credit to the soldiers likely to appear on the rolls are—

Pay from date of last payment, to include the date of muster out.

Arrears of pay due from date of enrollment to date of muster into the service, in which case certificate should be required that the men have not been paid for the same time by the State.

Clothing.—Under this head balances only should be stated: "Due the United States," or "Due the soldier."

A statement that the soldier has drawn, since his enlistment, clothing to the value of ——— dollars will not be accepted; that is to say, the statement of the balance due the United States or due the soldier must not be left for the paymaster to determine.

Travel allowances.—Officers will be entitled to one day's pay for every 20 miles of travel from place of muster out to place of enrollment. Enlisted men will be entitled to the same and to subsistence at the rate of 30 cents per day for every 20 miles traveled as above. Fractions of a day less than one-half (10 miles) will not be considered.

For a distance equal to half a day a full day's pay will be allowed.

CERTIFICATES OF NONINDEBTEDNESS.

Officers, before receiving final payment, must satisfy the paymaster that they are not indebted to the United States on any account whatever. Officers who have at any time been responsible for public property must obtain certificates of nonindebt-

edness from the Quartermaster-General, Commissary-General, Surgeon-General, Chief of Ordnance of the Army, and Chief Signal Officer, and from the chief of the division of bookkeeping and warrants, Secretary's Office, Treasury Department, and all officers must obtain such certificates from the Paymaster-General of the Army.

By command of Major-General Miles:

H. C. CORBIN, *Adjutant-General*.

GENERAL ORDERS, }
No. 145. }

HEADQUARTERS OF THE ARMY,
ADJUTANT-GENERAL'S OFFICE,
Washington, September 16, 1898.

By direction of the Acting Secretary of War, the following is published to the Army for the information and guidance of all concerned:

The quartermaster stationed at a general hospital under paragraph 1, General Orders, No. 139, September 7, 1898, War Department, Adjutant-General's Office, for the purpose of giving transportation to soldiers sent home on sick furlough, will act as commissary of subsistence for paying commutation of rations to such soldiers under General Orders, No. 114, August 9, 1898, War Department, Adjutant-General's Office, and will obtain subsistence funds for the purpose by requisition on the chief commissary of the department in which the hospital is situated. For the purpose of making payments of commutation of rations in convenient form to those entitled, quartermasters on duty as above at general hospitals are authorized to keep subsistence funds at their own risk in their personal possession to an amount not exceeding \$3,000 at any one time; and the Quartermaster's Department is authorized to furnish transportation from time to time from the public depository to the hospital for such amounts of subsistence funds in currency as the quartermaster on duty as acting commissary thereat may call for.

By command of Major-General Miles:

H. C. CORBIN, *Adjutant-General*.

GENERAL ORDERS, }
No. 148. }

HEADQUARTERS OF THE ARMY,
ADJUTANT-GENERAL'S OFFICE,
Washington, September 19, 1898.

By direction of the Acting Secretary of War, the following is published to the Army for the information and guidance of all concerned:

I. In view of the fact that under General Orders, No. 114, August 9, 1898, from this office, granting \$1.50 a day to sick soldiers while traveling to their homes on furlough, the commissary paying this commutation was required to note on the furlough "the days for which commutation of rations while traveling is paid" by him, and by the concluding part of Paragraph I of the same order the \$1.50 per day thus paid was not to be repaid to the United States by the soldier, it is ordered that when any of the days at \$1.50 per day are shown by the notation on the furlough to have been days covered by the period of the furlough, the officer paying furlough commutation under clause 1 of paragraph 1272 of the Regulations will refuse to allow 25 cents per day for those same days when computing the amount due the soldier on reporting at the expiration of the furlough.

II. Claims of soldiers alleging failure on their part to receive, at initial points of journeys, the commutation of rations at \$1.50 per day while traveling to their homes on furloughs granted under General Orders, No. 114, August 9, 1898, from this office, will be forwarded to the Commissary-General of Subsistence, accompanied (a) by the furlough, or (b) by a statement of the name of the disbursing officer who took up the furlough and paid commutation of rations thereon at 25 cents per day. Claims thus presented will be transmitted by the Commissary-General of Subsistence to the Auditor for the War Department, with a statement of the names of the disbursing commissaries in the neighborhood of the initial points of the journeys, in order that examination may be made by the Auditor of the accounts of those commissaries, and the accuracy of the claim of failure to receive the commutation verified before settlement by him. Claims for such commutation alleging loss of furlough will not be entertained.

III. Commanding officers of organizations ordered to be mustered out of the service are authorized to extend the leaves of absence and furloughs granted officers and men prior to the receipt of orders for muster out, to cover the period for which leaves and furloughs are granted under the provisions of General Orders, No. 130, August 29, 1898, from this office.

By command of Major-General Miles:

H. C. CORBIN, *Adjutant-General*.

GENERAL ORDERS,)
No. 149. }

HEADQUARTERS OF THE ARMY,
ADJUTANT-GENERAL'S OFFICE,
Washington, September 20, 1898.

By direction of the Secretary of War the following instructions in the matter of pay of commissioned officers and enlisted men of volunteer organizations in the service of the United States are published for the information and guidance of all concerned:

Battalion adjutants and battalion sergeants-major, as extra officers and noncommissioned officers, are not authorized by law and can not be paid as such, except in cases where they held those positions in and were in service with State or Territorial militia organizations, whose members enlisted in the Volunteer Army in a body and were duly appointed to corresponding positions in the volunteer organizations composed of members of militia organizations so enlisting.

Should a vacancy occur in any of these offices after the muster in of the organization an appointment to fill such vacancy (which is prohibited by General Orders, No. 98, War Department, Adjutant-General's Office, July 15, 1898) will not, if made, entitle the appointee to pay as battalion adjutant or sergeant-major, and he will be entitled to pay only as hereinafter provided for in cases where details are made to those positions.

In all cases where extra officers, as adjutants and extra sergeants-major for battalions, are not authorized, lieutenants detailed as battalion adjutants can receive no more than mounted pay of their grade, their regimental commanders certifying that their duties require them to be mounted, and battalion sergeants-major, who may be detailed from sergeants of companies, will not be entitled to any pay other than the pay of their grade as company sergeants.

In cases where extra officers, as adjutants and sergeants-major for battalions, are authorized by law, the adjutants will be entitled to the pay of regimental adjutant and the sergeants-major to the pay of regimental sergeant-major; but should any such adjutants or any regimental quartermasters or assistant surgeons hold the rank of captain under State laws they can receive no more than the pay provided by the United States laws for the offices held by them respectively—that is to say, the salary attached to the office of adjutant or quartermaster is \$1,800 per annum and the salary attached to the office of assistant surgeon of less than five years' service is \$1,600 per annum.

The Acting Comptroller of the Treasury has decided that the salary attaches to the *office* and not to the *rank* of the incumbents of these offices.

By act of Congress approved July 7, 1898, the pay of chaplains of volunteers is fixed at that of a captain mounted, and they will be so paid from and after the date of the act.

By act of Congress also approved July 7, 1898, it is provided that all officers and enlisted men of volunteers shall be paid from the day on which they had their names enrolled for service in the Volunteer Army of the United States and joined for duty therein, after having been called for by the Governor on the authority of the President. Officers and enlisted men of volunteers who have not been paid for the period between date of enrollment and date of muster into the service of the United States may be paid the same upon the next pay rolls of their commands, upon proper muster for the same, great care being exercised to correctly state the date of enrollment and date from which pay was paid by the United States.

By command of Major-General Miles:

H. C. CORBIN, *Adjutant-General.*

GENERAL ORDERS,)
No. 150. }

HEADQUARTERS OF THE ARMY,
ADJUTANT-GENERAL'S OFFICE,
Washington, September 21, 1898.

I. By direction of the Secretary of War, when volunteer soldiers whose regiments have been ordered to be or have been mustered out of the service report at military posts or stations from furlough or other absence from their commands, except desertion, the commanding officers thereof will notify the Adjutant-General of the Army, giving all possible information obtainable from the men covering the period of absence, to what date, and where last paid, etc. Descriptive lists of such men will be furnished from this office, on receipt of which commanding officers will cause the men to be examined by a medical officer on the prescribed blank form provided for the purpose, as required in General Orders, No. 124, August 20, 1898, from this office. The declaration on the physical examination blank required of the person to be discharged will be completed before the medical examination is made, but the certificate of the company commander thereon will not be executed.

Commanding officers will act as mustering officers in such cases unless there is a mustering officer present, and will have four detachment muster-out rolls prepared

for men belonging to the same regiment with the necessary discharge certificates, which latter will be delivered to the men with directions to proceed, if practicable, to the nearest paymaster for final payment, to whom two copies of the muster-out roll will be sent by *registered mail*, with the notification required by paragraph 150 of the Army Regulations.

If the station of the nearest paymaster is at a distance from the place of muster out, the discharge certificates will be sent with the rolls, and the paymaster will make payment by check through the commanding officer. Quarters and subsistence will be furnished the men until final payment is made.

The third copy of the muster-out rolls, with the descriptive lists, will be forwarded to the Adjutant-General of the Army, and the fourth copy to the adjutant-general of the State to which the organization belongs. Men of different regiments will not be mustered out on the same rolls.

II. By direction of the Acting Secretary of War, soldiers of volunteer organizations ordered to be mustered out of the service who are undergoing sentences of confinement imposed by courts-martial, *but not dishonorably discharged*, will be paroled during the period for which the organization is on furlough, and the unexecuted parts of their sentences will stand as remitted on the date of the muster out of their companies, with which they will be discharged.

By command of Major-General Miles:

H. C. CORBIN, *Adjutant-General*.

GENERAL ORDERS, }
No. 151. }

HEADQUARTERS OF THE ARMY,
ADJUTANT-GENERAL'S OFFICE,
Washington, September 22, 1898.

I. By direction of the Acting Secretary of War, at least two medical officers shall always be left on duty with each volunteer regiment, including the surgeon with the rank of major, and all regiments will be allowed four hospital tents and field furniture to equip them for a regimental hospital for each regiment.

II. By direction of the Acting Secretary of War, paragraphs 85 and 886 of the Regulations are amended to read as follows:

85. The remains of officers killed in action, or who die when on duty in the field or at military posts, or when traveling under orders, will be inclosed in coffins, and unless claimed by relatives or friends will be transported by the Quartermaster's Department to the nearest military post or national cemetery, or, if so desired by their relatives, to their homes for burial. The expense of transporting the remains is payable from the appropriation for Army transportation, or from funds specially appropriated for that purpose; other expenses of burial are limited to \$75. If buried at the place of death, the fact will be reported to the Adjutant-General of the Army.

By command of Major-General Miles:

H. C. CORBIN, *Adjutant-General*.

GENERAL ORDERS, }
No. 155. }

HEADQUARTERS OF THE ARMY,
ADJUTANT-GENERAL'S OFFICE,
Washington, September 27, 1898.

II. By direction of the Acting Secretary of War, Paragraph II, General Orders, No. 139, War Department, Adjutant-General's Office, September 7, 1898, is amended to read as follows:

General Orders, No. 130, August 29, 1898, from this office, is so far amended as to direct commissioned officers who belong to organizations furloughed for sixty days to await orders for their own convenience for that period instead of granting them leaves of absence.

By command of Major-General Miles:

H. C. CORBIN, *Adjutant-General*.

GENERAL ORDERS, }
No. 156. }

HEADQUARTERS OF THE ARMY,
ADJUTANT-GENERAL'S OFFICE,
Washington, September 28, 1898.

I. The following order of the Acting Secretary of War is published for the information and guidance of all concerned:

Hereafter whenever any enlisted man of a volunteer regiment is promoted to be a

commissioned officer, he will be discharged as an enlisted man by the commanding officer of the regiment as of the date next preceding that of his muster in under his commission as an officer, and the date of such discharge reported by telegraph to the Adjutant-General of the Army.

II. Any soldier on furlough from New Orleans, La., or who may pass through that city for any purpose, should not be allowed to visit any camp or garrison until he has been detained under quarantine long enough to preclude any possibility of infection, owing to the fact that yellow fever is prevalent in that city and in four counties of the State of Mississippi.

By command of Major-General Miles:

H. C. CORBIN, *Adjutant-General.*

GENERAL ORDERS, }
No. 164. }

HEADQUARTERS OF THE ARMY,
ADJUTANT-GENERAL'S OFFICE,
Washington, October 11, 1898.

I. By direction of the Secretary of War, chief mustering officers will make timely application to the Surgeon-General of the Army for the detail of medical officers of the Regular Army or of the Volunteer staff to make the physical examinations of officers and men required by General Orders, No. 124, August 20, 1898, from this office, and, to further expedite the examinations, will also detail under the provisions of said order medical officers of any one or more organizations of the same State for the examination of the officers and men of another regiment.

II. By direction of the Secretary of War, section 4 of Paragraph II of General Orders, No. 124, August 20, 1898, from this office, is so amended that when it is impracticable to secure a board of three medical officers to examine persons claiming disability incurred in the line of duty which, in the opinion of the medical officer, was not so incurred, mustering officers are authorized to convene boards composed of one or two medical officers, other than those who made the original examination, and when the convening of such a board is not possible they will themselves make the examination required and report the facts in the case to this office.

III. By direction of the Secretary of War, mustering officers will require medical officers of regiments ordered to be mustered out to render at once to the Surgeon-General of the Army such monthly reports of *sick and wounded* as they may have failed to forward, for any cause, at the time such reports were due. They will also require that *all* retained medical records, including registers of patients, be forwarded to that officer, to whom medical officers will apply for certificates that these reports and records have been filed in his office.

IV. By direction of the Secretary of War, section 14 of General Orders, No. 124, August 20, 1898, from this office, is so far amended as to require regimental commanders to sign the discharge certificates of *all* the officers of their commands and the mustering officers to sign the discharge certificates of regimental commanders.

V. By direction of the Secretary of War, mustering officers are hereby designated to act as inspectors of property submitted to them for condemnation for which officers of organizations ordered to be mustered out of the service are responsible, and they are authorized to order, "by direction of the Secretary of War," final disposition to be made of condemned property, except that mentioned in paragraphs 888 and 1463 of the Regulations.

VI. By direction of the Secretary of War, in view of Circular No. 31, August 12, 1898, from this office, and paragraph 141 of the Regulations, it is ordered that at each military post or camp a competent officer will be charged with the duty of seeing that all final statements are in proper form, as required by orders and regulations, before they pass to the soldier, and that proper notifications have been sent to the paymasters.

By command of Major-General Miles:

H. C. CORBIN, *Adjutant-General.*

GENERAL ORDERS, }
No. 168. }

HEADQUARTERS OF THE ARMY,
ADJUTANT-GENERAL'S OFFICE,
Washington, October 15, 1898.

By direction of the Secretary of War, disbursing officers of the Subsistence Department are prohibited from paying commutation of rations at 25 cents per day on those furloughs (granted previous to orders for muster out), the periods of which cover days embraced in the thirty or sixty day periods of furloughs authorized by General

Orders, No. 130, August 29, 1898, and Paragraph III, General Orders, No. 148, September 19, 1898, from this office.

The commutation of rations due on all such previously granted furloughs will be paid by paymasters upon final discharge or muster out upon presentation of the furloughs by those to whom granted, care being taken not to allow double payments for the days (between the dates of such furloughs and the dates of discharge or muster out) which are covered by both furloughs; but paymasters will make no payments of commutation of rations on account of such previously granted furloughs unless the furloughs themselves are produced. When payment is made, note thereof will be indelibly stamped by the paymaster on the furlough paper and the same filed with the muster-out roll or final statement. Amounts so paid will be refunded by the Subsistence Department on settlement of paymasters' accounts.

Furloughs of the above character not presented to paymasters for payment as above provided for, but which may be presented to them or to subsistence officers after muster out of companies to which the men belonged, will be forwarded to the Commissary-General of Subsistence for settlement and payment.

By command of Major-General Miles:

H. C. CORBIN, *Adjutant-General.*

GENERAL ORDERS, }
No. 169. }

HEADQUARTERS OF THE ARMY,
ADJUTANT-GENERAL'S OFFICE,
Washington, October 17, 1898.

I. By direction of the Secretary of War, General Orders, No. 124, August 20, 1898, and General Orders, No. 150, September 21, 1898, from this office, are so far amended as to require that officers and enlisted men held in service for physical examination after the organizations to which they belonged have been mustered out of service shall be discharged after such examination has been completed as of the date of their muster out on detachment muster-out rolls, unless otherwise ordered.

By command of Major-General Miles:

H. C. CORBIN, *Adjutant-General.*

REPORT OF THE INSPECTOR-GENERAL.

REPORT

OF THE

INSPECTOR-GENERAL OF THE ARMY.

WAR DEPARTMENT, INSPECTOR-GENERAL'S OFFICE,
Washington, D. C., November 1, 1898.

SIR: I have the honor to submit the following report of the operations of this Department during the past year:

Since the rendition of the last annual report the changes in the military establishment preceding, or concurrent with, the campaign against Spain have crowded each other in rapid succession, affecting every branch of the Army and caused unusual activity and interest everywhere. In the Inspector-General's Department, the abolition of the inspection districts and the assignment of inspectors-general and acting inspectors-general to the headquarters of the several geographical military departments, as reorganized; the addition of three inspectors-general to the permanent commissioned force of the Department; the appointment of an inspector-general of volunteers for each army corps and for each division of the forces mobilized for the national defense, and the promotion of four inspectors-general to a higher rank in the Volunteer Army, and their selection to command troops in the field, are among the more important recent events.

The efforts of this department were directed to performing its particularly important functions with the rapidly growing armies called forth by the Government, and at the same time continue all its office duties connected with the War Department. The Inspector-General himself left his office to perform his inspecting duties in the field, with a party organized for the purpose, and proceeding under definite verbal instructions, the field duties being regarded, under the circumstances, as more important than remaining in his office. He continued these duties in this country and Cuba, where he remained until after the surrender of Santiago. It was not until after his return from Cuba that he took a command of troops. Another officer of this department performed the duties of inspector-general of the cavalry division during the entire campaign against Santiago, and a third was in command of one of the infantry divisions. Indeed, every division commander in front of Santiago de Cuba on July 1 had at some time served as inspector-general.

It was quite expected that the vast amount of work connected with the mobilization of a volunteer army of over 200,000 men and their preparation for active service should absorb the undivided attention of every department in the military establishment, and that the inspections usually made in the spring of the year should have to be deferred or omitted altogether. The energy of the commissioned personnel of this department was necessarily deflected from peace to war measures, and the part taken by them in the active operations against Spain speaks well for the department; and the duties assigned them, whether at home or in the field or in the face of the enemy, have been performed with promptness, ability, and success: and were far from being limited to inspection duties alone, but embraced quite a heterogeneous assortment.

The reports of inspection of the military establishment prior to the opening of the war, including garrisoned and ungarrisoned posts, supply depots, armories and arsenals, recruiting stations, and of the accounts of disbursing officers and of national cemeteries, made during the year, have been brought in great measure to the attention of the proper authorities, and indicate that the Army has maintained a high standard of efficiency and discipline, and stood ready to enter the campaign as the call came and fulfill many duties besides its own, and far beyond the previous specialty of the individual officers. The conduct of the Army, individually or in regiments, in groups, in batteries, brigades, divisions, and corps, has brought honor and success to American arms.

But perhaps nothing has been made clearer by experience than our need of periodical military maneuvers and experimental mobilization in times of peace to guard against unnecessary suffering and delays in times of war. The progress of civilized nations in the care and organization of their expanded armies in the first stages of war, guard their soldiers against much hardship, sickness, and loss. Lavish expenditure and untiring energy and kindest attention and sympathy as substitutes for accomplished skill may be successful, but, after all, are makeshifts.

The indomitable energy, the perpetual military prevision, the care and painstaking that was demonstrated from the White House down to the loading wharf through every branch and desk of the War Department to the final exit of an organized command of every arm and corps for service upon foreign soil deserve recognition.

The tableau at the last, when the General Commanding the Army, the General commanding the expedition, the Inspector-General of the Army, the chief quartermaster, engineer, and commissary, and others of the headquarters and subordinate staffs were assembled on the Port Tampa wharf, while far from the most memorable, may be referred to in passing as an illustrative scene and group indicating the interest and insistence with which "getting aboard" was watched, especially of such commands as the "Rough Riders" or brigades of regulars. Every time, even to the finish, that the recognized leaders of this expedition were met, whether in preparation, in campaign, or under the enemy's concentrated fire, it came with the consciousness of strength and assured success. And the soldierly accomplishments and conduct of the military and naval attachés of the friendly nations accredited to that expedition deserve the clearest recognition in every respect.

My connection with it, as far as my own sentiments were concerned, was in the soldierly desire to share to the utmost the dangers and hardships of my comrades, and be with them in their battles, and bear my share in our country's cause, as it might be assigned by my superiors. Such part as was allotted to me and mine in this Spanish war is now finished. How severe it has proved, and the strain and trial imposed, may be well known in many American households.

DISBURSEMENTS.

Owing to a change of system and the declaration of war with Spain in April, and the consequent breaking up of garrisons and transfer of officers to other fields of duty, the inspector's corps especially, being almost entirely ordered to command or to duty at the front, the customary third inspection of the accounts of most of the staff officers was not had; and to this fact is partially due the decrease, as compared with the previous year, of the total amount inspected for the fiscal year ending June 30, 1898. The accounts inspected according to the requirements of law for that fiscal year may be summarized as follows, though

it must be carefully held in mind that only a moiety of this year's disbursements are covered by inspections so far:

Balances taken up	\$5, 665, 491. 89
Receipts from Treasury	\$40, 774, 383. 63
Receipts from other sources	2, 007, 409. 23
	<u>42, 781, 792. 86</u>
Transfers from other officers	14, 121, 428. 57
	<u>62, 568, 713. 32</u>
Total to be accounted for	
Disbursements.....	\$44, 527, 604. 42
Deposited to credit Treasurer United States	1, 064, 289. 70
	<u>45, 591, 894. 12</u>
Transferred to other officers.....	11, 517, 367. 52
	<u>57, 109, 261. 64</u>
	<u>5, 459, 451. 68</u>
Balance	
Balance distributed as follows:	
United States Treasury	4, 289, 661. 61
United States depositories	1, 155, 123. 53
Cash on hand.....	14, 666. 54

Of the \$14,666.54 reported as cash on hand, the sum of \$3,247.33 in State bonds was held by the president of the National Home for Disabled Volunteer Soldiers, and the sum of \$1,369.55 was reported as having been stolen from the safe of a post quartermaster, and the sum of \$38.47 was held by the treasurer of the United States Soldiers' Home; leaving only the sum of \$10,001.19 cash in the hands of disbursing officers of the Army at the close of the fiscal year, as against \$14,604.16 for the preceding year. This is 0.00002+ of the entire year's disbursements by them. The extreme and average in the hands of any Army disbursing officers were, respectively, \$1,953.92 and \$23.92; and in national bank depositories, respectively, \$49,856.86 and \$176.76, including post commissaries and quartermasters; and the highest amount at date of last inspection to the credit of any disbursing officer of the Army was \$267,035.14, and of the Soldiers' Homes, \$744,338.58.

The disbursements inspected for the past four fiscal years may be designated in groups, as follows:

	1895.	1896.	1897.	1898.
Army disbursements	\$28, 632, 335. 86	\$26, 594, 408. 37	\$29, 873, 506. 27	\$22, 283, 505. 40
River and harbor disbursements.....	21, 455, 330. 44	18, 275, 977. 87	14, 357, 562. 56	15, 479, 935. 46
Other civil disbursements	7, 473, 534. 38	6, 359, 617. 86	5, 345, 969. 08	6, 764, 163. 56
Total	<u>57, 561, 200. 68</u>	<u>51, 230, 004. 10</u>	<u>49, 577, 037. 91</u>	<u>44, 527, 604. 42</u>

The statement above shows a decrease of \$5,049,433.49 from the amount inspected during the preceding fiscal year, which is accounted for by the following statement:

Decreased disbursements:	
Adjutant-General's Department	\$333. 32
Quartermaster-General's Department.....	2, 444, 400. 62
Subsistence Department	439, 889. 23
Ordnance Department	231, 680. 13
Pay Department.....	4, 149, 752. 62
Medical Department	465, 604. 05
	<u>7, 731, 659. 97</u>
Increased disbursements:	
Engineer's Department	\$1, 122, 372. 90
Recruiting officers	5, 146. 10
National Homes for Disabled Volunteer Soldiers....	1, 428, 230. 98
Miscellaneous.....	126, 476. 50
	<u>2, 682, 226. 48</u>
Net decrease.....	<u>5, 049, 433. 49</u>

During the past eight fiscal years the relation between the total amount involved and the disbursements, transfers, deposits in the Treasury, and balances on hand, appear as follows:

	1891.	1892.	1893.	1894.	1895.	1896.	1897.	1898.
Disbursements	0. 669	0. 703	0. 727	0. 760	0. 756	0. 710	0. 706	0. 712
Transfers between officers 214	. 212	. 191	. 163	. 158	. 207	. 197	. 184
Redeposited in Treasury 014	. 027	. 025	. 015	. 018	. 013	. 018	. 017
Balances on hand 103	. 058	. 057	. 062	. 068	. 070	. 079	. 087

In 1891 the Treasury Department called attention to the large balances held by disbursing officers, and measures were at once taken to minimize the amounts so held to the actual needs of the service, with a result that for the two succeeding years the ratio was reduced 44 per cent. Since that date, however, there has been a gradual increase until for the year just closed an increase of over 50 per cent is shown over the ratio of 1892. The small percentage of amounts redeposited in the Treasury would seem to indicate that due economy was exercised in remitting funds to the disbursing officers, while a slightly larger per cent than last year's of the amount remitted was disbursed.

The average monthly disbursements of accounts inspected of officers of the Army for the year was \$3,146,953.40, and their final balances represented 173 per cent of this average as against 118 in 1897, 114 in 1896, 103 in 1895, and 89 in 1894.

The following table shows the variations in these percentages in the principal disbursing departments during eight fiscal years, to wit:

Department.	1891.	1892.	1893.	1894.	1895.	1896.	1897.	1898.
Engineer	293	104	82	75	83	116	133	160
Ordnance	191	124	105	115	139	113	130	86
Quartermaster	130	53	120	135	179	170	161	256
Subsistence	102	99	39	73	119	89	109	133
Medical	82	102	186	83	131	205	71	313
Pay	57	48	90	66	83	77	101	108
Total	191	99	94	88	107	125	118	173

The proportion of balances kept in personal possession by officers of the Army was about 0.0021, as against 0.0026 for the preceding year.

This table also shows a marked reduction for several years immediately succeeding the year 1891 in all except the Medical Department, and for the years 1892, 1893, and 1894 the average reduction per year (from the average for 1891) was more than 90 per cent. But since 1894 the yearly average has increased until the general average for the past year shows an increase of 85 per cent over that for 1894. Only one Department (the Ordnance) shows a reduction (29 per cent), and the other departments show the following large increases, viz: Medical, 230 per cent; Quartermaster's, 121 per cent; Engineer, 85 per cent, and the Pay Department, 42 per cent. At the Soldiers' Home, Washington, D. C., the final balances represented 46 per cent of the average monthly disbursements in 1884, 192 per cent in 1895, 102 per cent in 1896, and 112 per cent for the year just closed.

The total number of inspections made during the fiscal year 1898, including statements made under Army Regulations 877, verified by the inspector, was as follows:

Accounts.	1895.		1896.		1897.		1898.	
	Offi- cers.	Inspec- tions.	Offi- cers.	Inspec- tions.	Offi- cers.	Inspec- tions.	Offi- cers.	Inspec- tions.
General staff officers	235	588	211	546	216	558	205	362
Post staff officers	205	536	178	292	176	352	186	305
Other line officers	10	12	22	83	18	23	28	85
Soldiers' Homes	8	10	10	10	10	10	11	11
Disbursing clerk, War Department.	1	1
Total	459	1, 145	421	881	420	943	430	713
Average for each staff officer	2. 5	2. 1	2. 5	1. 7
Average for each post officer	2. 6	1. 6	2. 0	1. 6

Of the 713 inspections, involving \$62,568,713.32, it appears from the following tabulation that 526 inspections (including 171 accounts of post officers), involving \$58,494,245.01, were made by officers of this department, and 6 inspections (post officers only), involving \$18,024.41, were made by other officers, to wit:

Department.	Inspected.		
	Officers.	Inspec- tions.	Amount in- volved.

NATIONAL HOME FOR DISABLED VOLUNTEER SOLDIERS.

The inspection of this great and growing establishment made during the fiscal year 1898 was begun on July 31, 1897, and closed in November of the same year, covering a period of about four months, and the examination was thorough and searching. The report of the inspection was submitted to the Secretary of War on January 27, 1898, and on January 31 it was transmitted by him to Congress, where it was printed as House Document No. 278, second session Fifty-fifth Congress.

Paragraph 866 of the Army Regulations, which heretofore required that this inspection be made by the Inspector-General of the Army in person, was amended during the year by General Orders, No. 56, Headquarters of the Army, May 27, 1898, so that now the annual inspection of this institution may be made by some other officer of his department.

It was noted in the inspection that the officers of the Homes generally had performed their duties with enthusiastic zeal, strict economy, and commendable efficiency; and there was a general lack of deterioration everywhere.

During the fiscal year ending June 30, 1898, the population of the Home, as shown by the trimonthly reports from the Branches, ranged from 17,720 on June 30, 1898, to 19,270 on February 20, 1898; and the average population for the entire year was 18,570, a net gain over the preceding year of 392. The gain would have been much greater if there had been anywhere to put, or the means on hand for the legally authorized outdoor relief of, the many worthy and needy applicants who were turned away for want of room to accommodate them.

The appropriations for the Home for all purposes for the fiscal year amounted to \$2,871,135, of which, however, \$450,000 was for the new branch now under construction at Danville, Ill., leaving \$2,421,135 for the ordinary service of the seven established branches. The similar appropriations for the preceding fiscal year were \$2,489,973.16. Of the appropriation for the fiscal year 1898 the sum of \$81,464 was for special construction at the several branches, leaving \$2,339,671 for the maintenance of the members. The average cost of maintenance for the year per capita was \$125.99 as against \$121.15 for the preceding year, an increase of \$4.84.

The variations of annual cost of maintenance per capita since 1894 are shown by the following table, viz:

Year.	Popula- tion.	Expense per capita.
1894.....	15,601	\$141.41
1895.....	16,480	128.78
1896.....	17,451	126.06
1897.....	18,178	121.15
1898.....	18,570	125.99

The accounts have been received with great promptness during the year, and there has been for some years a steady decrease in the number of defects and irregularities noted in the examination of the vouchers, while the character of the exceptions noted remains about the same as for preceding years.

The character of the beneficial changes adopted from year to year are generally along the line of complete recognition of this institution, and its expenditures and officers, as entitled to the benefit and supervision given under the laws of the United States. That the individual

comfort and rights of the members were never more carefully regarded, though the per capita expenses have continued to be held within the strictest bounds, entitles the institution and its careful supervision to constant commendation. The responsibility for the expenditure of these millions is fairly recognized and enforced. The distinguished ability of the board of managers is well supplemented by the faithful and efficient services of the local officers, so commendable results are certainly now, as they may have always been, assured; and the institution stands unique among the nations of the world in extent and generosity, and is admirably supplemented by many State institutions, which are under its careful supervision for much of their disbursements.

The following is a summary of the receipts and disbursements for the fiscal year ending June 30, 1898:

STATEMENT A.—Receipts and disbursements, National Home for Disabled Volunteer Soldiers, during the fiscal year 1898.

	Fiscal year—				Total.
	1895.	1896.	1897.	1898.	
<i>General fund.</i>					
Balance on hand June 30, 1897...	\$138. 20	\$19, 211. 79	\$206, 171. 12	\$225, 521. 11
Received from Treasury	8, 422. 09	\$2, 439, 514. 00	2, 447, 936. 09
Posthumous fund, act Aug. 18, 1894	43, 623. 05	43, 623. 05
Sales, etc	2, 259. 42	63, 513. 13	65, 772. 55
Transfers and disallowances	134. 48	528. 69	781. 46	1, 444. 63
Total	138. 20	19, 346. 27	217, 381. 32	2, 547, 431. 64	2, 784, 297. 43
Accounted for as follows:					
Disbursements	60, 288. 10	2, 298, 698. 27	2, 358, 986. 37
Deposited in Treasury as surplus.	138. 20	19, 346. 27	142, 043. 20	161, 527. 67
Transfers and allowances	291. 87	475. 17	767. 04
Total	138. 20	19, 346. 27	202, 623. 17	2, 299, 173. 44	2, 521, 281. 08
Balance on hand June 30, 1898...	14, 758. 15	248, 258. 20	264, 016. 35
Total	138. 20	19, 346. 27	217, 381. 32	2, 547, 431. 64	2, 785, 297. 43
<i>State-aid funds.</i>					
Balance on hand June 30, 1897...	11, 786. 22	11, 786. 22
Received from Treasury	213, 750. 00	700, 000. 00	913, 750. 00
Total	225, 536. 22	700, 000. 00	925, 536. 22
Accounted for as follows:					
Total disbursements	225, 536. 22	658, 570. 58	884, 106. 80
Balance on hand June 30, 1898...	41, 429. 42	41, 429. 42
Total	225, 536. 22	700, 000. 00	925, 536. 22

The appropriation accounts for the various fiscal years may be summarized as follows:

STATEMENT B.—Appropriations.

Appropriations.	Certi- fied claims.	1895.	1896.	1897.	1898.	Total.
Balance in Treasury July 1, 1897			\$204, 406. 37	\$20, 360. 79		\$224, 767. 16
Amount of appropriations.....	\$176. 59			6, 494. 41	^a \$2, 671, 010. 00	2, 677, 681. 00

Total	176. 59	138. 20	223, 752. 64	168, 898. 40	2, 671, 010. 00	3, 063, 975. 83

^a Including Danville branch.
^b Surplus warrant received at Inspector-General's Office July 15, 1898.

During the past fiscal year there was received from the effects of deceased members (posthumous fund) the sum of \$13,623.05, and disbursed on the same account the sum of \$30,153.12, leaving a balance of \$13,469.93 to be carried to the appropriation for "current expenses" at the Branch Homes, as follows:

Branch.	Amount received.	Amount disbursed.	Balance to current ex- penses.
Central.....	\$17, 493. 45	\$15, 063. 04	\$2, 430. 41
Northwestern.....	7, 035. 78	4, 821. 98	2, 713. 80
Southern.....	5, 153. 54	4, 390. 51	763. 03
Eastern.....	2, 651. 12	2, 650. 89	. 73
Western.....	6, 215. 29	1, 587. 05	4, 628. 24
Pacific.....	2, 709. 75	1, 165. 55	1, 544. 20
Marion.....	2, 364. 12	974. 60	1, 389. 52
Total.....	43, 623. 05	30, 153. 12	13, 469. 93

The transfer of posthumous funds to the appropriation for current expenses since this was required to be done by the act of August 18, 1894, has been as follows, by fiscal years:

Year.	Received.	Disbursed on posthumous account.	Balance to current ex- penses.	Covered into Treasury.
1894.....	^a \$152, 232. 63		^b \$123, 058. 74	\$29, 173. 89
1895.....	46, 954. 98	\$22, 143. 56	24, 811. 42	24, 811. 42
1896.....	43, 674. 74	22, 841. 63	20, 833. 11	20, 833. 11
1897.....	49, 451. 15	25, 466. 47	23, 984. 68	23, 984. 68
1898.....	43, 623. 05	30, 153. 12	13, 469. 93	13, 469. 93
Total	335, 936. 55	100, 604. 88	206, 157. 88	112, 273. 03

^a \$29,173.89 of this was covered into the Treasury. ^b 1895.

The following is a brief statement of the appropriations, the net disbursements, and unexpended balances relating to the several fiscal years involved:

	1893 and certified claims.	1894.	1895.	1896.

a Exclusive of \$123,058.74 appropriated from posthumous fund.

b Including \$450,000 for construction at Danville Branch.

c Exclusive of fiscal year 1899.

SOLDIERS' HOME.

The inspection of the Soldiers' Home required by the law of March 3, 1883, to be made by the Inspector-General in person once annually, was made for the year 1897 in November of that year, and included a Home year, ending September 30, 1897. It is believed that the public interest would be subserved by making the Home year correspond with the fiscal year of the Government, which ends annually on June 30. The report was submitted December 19, 1897, and the inspection of the Home, its records, accounts, management, discipline, and sanitary condition was thorough.

During the year ending September 30, 1897, the average number of officers and members present was 728, with an average of 402 absent, making an average membership of 1,139, an increase of 17 over the preceding year. The greatest number present was 752, on February 25, and the lowest was 671, on June 15, and the total cared for was 1,501, against 1,535 for the preceding year. Those reported absent, 402, were mostly on outdoor relief.

The age of the members present on October 15, 1897, ranged from 24 to 87, and averaged 55.7 years; and their length of military service ran from two months to thirty-one years, and averaged 15.3 years.

The behavior of the men during the year seems to have been good, though the infractions of rules and regulations had been somewhat in excess of the record for the previous year, and the buildings and grounds, to which many desirable improvements have been made, were generally in good condition and police.

The condition of the permanent fund is shown by the following tabulation, to wit:

Balance on hand September 30, 1896.....	\$2, 711, 124. 52
Credit settlements.....	134, 256. 23
Total.....	2, 845, 380. 75
Withdrawn for current expenses	107, 782. 80
Balance due September 30, 1897	2, 737, 597. 95

Property and stores of all kinds were in excellent condition, and evidently received careful attention. There were no complaints concerning the cooking or the quantity or quality of the food, and the dining hall and kitchen were in good order. Neatness and comfort seemed to prevail in the dormitories as a general thing. The supply of water is satisfactory both as to quality and quantity. The hospital was in excellent condition, and the hygienic conditions were well maintained, and the sick list and death rate have decreased.

MILITARY COLLEGES.

The annual inspection of the military departments of civil institutions of learning having an officer of the Army detailed thereat as professor of military science and tactics, which under existing orders should be made near the close of the college year, was necessarily omitted this year on account of the active operations against Spain, and the military professors as well as inspectors were assigned to other important posts, where their services were more urgently needed. The exigencies of the service demanded this temporary interruption in the military work carried on at these hundred or more institutions, and it is believed that this condition has generally been recognized and accepted in the proper spirit.

When peaceful pursuits are resumed it will doubtless be remembered that there are now some 15,000 young men annually receiving theoretical and practical military instruction at these institutions under carefully selected army officers, and nearly as many more are yearly exercised in military drills at public and private high schools under special instructors. The objects of this instruction are well understood, and it would therefore be interesting to learn the practical results of the military work accomplished at these institutions in connection with the recent struggle against Spain. They may never be fully known; and inquiry on this subject elicited only partial information; but the statistics given are suggestive and seem rather below than above actual conditions. The presidents of 46 colleges, whose military departments numbered about 7,100 students before hostilities began, reported that 29 of their military students and 59 alumni had been commissioned in the Regular Army, and 157 students and 296 alumni in the Volunteer Army—a total of 541 officers, or enough for about 12 regiments; and that 1,084 students and ex-students had joined the forces as noncommissioned officers or privates.

If these statistics may be accepted as a fair average, it is safe to assume that the regular and volunteer armies secured from the young gentlemen annually instructed in military science and tactics under Regular Army officers at these colleges enough trained officers for 24 regiments; and doubtless had the call for volunteers been more extensive or not so strictly limited to national guardsmen, many more would have joined the ranks, and joined in a body where they could preserve their identity, cohesion, and esprit de corps.

The following extracts from reports of presidents of colleges are submitted as illustrating the patriotic sentiments and readiness of these young men to serve their country:

Iowa State Normal School, Cedar Falls, Iowa.—We have reports from forty or more whom we know were in the service in some of the regiments; some from Illinois, from Wisconsin, Minnesota, the Dakotas, Kansas, etc. * * * The governor of Iowa would not accept organizations from schools, thinking it better that the school-trained men should be distributed among the different companies from the State; this decision however, deterred many of our cadets from enlisting. We could have raised one full company or more in the school at any time while men were needed.

St. Thomas Hall, Holly Springs, Miss.—The military spirit in the institution was simply splendid—all that could be desired. The instruction received here made Lieut. W. G. Poindexter, Company F, Second Mississippi Volunteers, practically the instructor and drillmaster for a large part of his regiment. The military instruction as been of very great advantage.

Ohio State University, Columbus, Ohio.—Our men enlisted so quickly and were sent to camp so soon that it has been impossible to secure exact statistics. In Battery H, out of 105 men some 35 were either students or ex-students. It was estimated that in the Fourth Ohio there were nearly 200 students and ex-students of this university.

De La Salle Institute, New York City.—Students from various sections of the country attended De La Salle, with regard to whom no information could be obtained. These, no doubt, took as active a part in the war with Spain as those in New York and vicinity. The limited number of volunteers prevented many former students of De La Salle Institute from enlisting in the Army. Had the demand been greater and the opportunity offered, several capable of filling commissions, by reason of their military training at this institution, would have gladly volunteered. I feel that the late war has been no test of the advantages to be derived from military instruction at educational institutions.

Cornell University, Ithaca, N. Y.—Colonel Schuyler, of the Two Hundred and Third New York Volunteers, was our commandant at the outbreak of the war. His estimate of the Cornellians in the war is 300, of whom 50 are actually in his regiment. It is certain not only that Cornellians went in all volunteer regiments from this State, but that they went in others, for instance, there were 3 Cornellians in the First Utah Light Battery. There were Cornellians in Colonel Roosevelt's regiment, and there are Cornellians in the Astor battery. * * * Many of our technological

graduates seemed attracted to the engineering service of the Navy, 15 of them being assigned to ships and some 25 others passing the examinations and being on the waiting list. Others who were already in the Revenue-Cutter Service were transferred to naval duty, 1 on the *McCulloch* sharing in Admiral Dewey's victory, others being assigned to blockade duty. * * * Aside from the naval engineer service, some 22 Cornellians joined the First New York Volunteer Engineers. * * * I think it altogether safe to say that 75 per cent of the Cornell soldiers in this war were either commissioned or noncommissioned officers.

St. John's College, Annapolis, Md.—There may be many names of alumni omitted for the reason that I report only those which have come under my immediate knowledge. I believe that the military instruction at colleges has been shown to be fraught with excellent results, and the presence of such trained men in volunteer regiments, whether as officers or privates, has proved a great means of establishing cohesion and discipline in bodies of men hastily assembled together.

University of South Dakota, Vermilion, S. Dak.—Not only is military instruction a most important precautionary measure for the country, but it has a most valuable effect on the physical, social, and moral character of the student body itself.

State Agricultural College, Fort Collins, Colo.—I feel disposed warmly to commend that heading in the annual report of the military department of the college under which is given the names of three cadets of the graduating class who have shown the most proficiency in the military work. Following this, the recent action of the War Department in giving some thus selected for complimentary mention a chance to show fitness for a commission in the Regular Army can not but be productive of good result. Now that a permanent increase in our national military force is almost an assured fact, would it not be well to make the selection of a few college cadets, of approved scholarship and proficiency in the military exercises, for suitable positions in the Regular Army a settled policy? Such recognition of deserving cadets, with the desire to follow the life of a soldier, would give impetus almost beyond measure to interest in every phase of college military instruction. I can not but think that the army organization would be rendered more efficient by such an infusion of young, virile force. There are some of our people who profess to see in the increase of our standing army a menace to personal rights and free institutions. This feeling will be materially weakened if people see important posts in that army filled by their sons and their neighbor's sons who have been educated in their home institutions of learning. The Government provides for the military training, more or less effective, of a large student body. If war comes, and there is no opening in army ranks for these trained and scholarly young men, save in the lines of raw recruits, they may reasonably question the purpose of such prolonged and costly military training. There ought to be a ready place in our war forces for any well-organized body of college cadets seeking active service, and there ought to be no unnecessary obstacles placed in the way of their enlistment.

Some recognition seems due these young men, who devote a large part of their college life to military work, and many of whom have become competent to assume the functions of a subaltern in the Army. The statistics presented indicate that the military instruction at these colleges has not been without substantial results and deserves still further encouragement. If the selection of some of the best military students for commissions in the Army were made part of our policy regarding army appointments, as recommended by me in previous annual reports and greatly desired by college presidents, the efficiency of the college military organizations would be very largely increased, and such a measure would be of benefit to the students, the colleges, and the Government.

DEPOTS.

Owing to the increased demands upon the time of the officers of this department during the year the usual routine of inspections was interfered with to some extent. Those of the army depots which were visited—generally during the first half of the fiscal year and antedating the breaking out of hostilities with Spain—were found to be in very good condition and the affairs well administered.

Storehouses are generally reported dry, well ventilated, and safe for the storage of supplies. The usual precautions are taken to protect buildings and property from fire and theft. A saving in salaries to employees of about

Quartermaster's Department.

\$5,500 per annum has been reported at San Francisco, Cal. The number of employees is generally reported barely sufficient for the proper transaction of business.

Subsistence Department. Some subsistence stores, consisting generally of canned tomatoes, were reported to the purchasing officer at Kansas City, Mo., for reclamation on account of defect or damage through the fault of the seller. As far as practicable, purchasing commissaries inspect all stores purchased. Storehouses are generally reported good and sufficient, and the stores properly classified and neatly arranged. The additional depots, authorized by Special Orders No. 171 c. s., have not yet been inspected.

THE ARMY AND NAVY GENERAL HOSPITAL.

This institution was inspected March 19, 1898, by Lieut. Col. P. D. Vroom, inspector-general middle district. Officers and enlisted men of the military and naval service of the United States, officers of the Revenue-Cutter Service and of the Marine-Hospital Service, and honorably discharged soldiers and sailors of the Regular and Volunteer Army and Navy of the United States are given treatment at this hospital for such diseases as are benefited by the waters of the Hot Springs of Arkansas. The principal diseases of those under treatment at date of inspection are reported as chronic articular and muscular rheumatism, and nervous diseases. The inspector calls attention to the regulation of May 5, 1897, extending the benefits of the hospital to honorably discharged soldiers and sailors of the Regular and Volunteer Army and Navy of the United States, and thinks that it will not be long before the capacity of the hospital will be taxed to its utmost, and that the construction of an additional ward would seem to be advisable.

ARSENALS AND ARMORIES.

A portion of the single barrack at the Indianapolis Arsenal is used as a hospital. A separate hospital building is reported as badly needed, and has been estimated for annually for the past seven years.

The following extracts from reports of annual inspections of arsenals and armories, made by Col. R. P. Hughes, inspector-general North Atlantic district, may be of interest:

NEW YORK ARSENAL, NEW YORK.

Obsolete guns. A goodly number of the old, obsolete guns that were encumbering the grounds when I made my last previous visit have been gotten rid of by presenting them to the associations of veterans of the war of the rebellion, etc. I regret to say that purchasers do not press for the obsolete small arms and ammunition that were then and are still in some of the storehouses. Of course, if the arsenal is ever hard pressed for space, this obsolete material can be discharged in a very short time, but it might be prudent to break up the most unpromising of it before the necessity arises.

SPRINGFIELD ARMORY, MASSACHUSETTS.

Improved machinery. The growth of improvements in the machinery of the armory still continues, and, in walking through the shops, the vacancies in the lines of machines resulting from an improved combination and contrivances on neighboring machines are quite noticeable.

Quality of material. Another noticeable step in advance seems to lie in demanding a better quality of material and more nearly approximating the size and shape into which it is to be molded in the factory. These changes seem to have permitted the output of the establishment to go on increasing without any appreciable increase in the expenditures for labor, which is

the capital item in the disbursements of the armory. That the steel manufacturers are able to produce the quality of metal now called for is quite conclusively shown from the fact that they consent, in their agreement, that any material that is found unsuitable in manufacturing may be returned and any expense incurred by the United States in the process of manufacture that led up to the rejection of any metal because of its unfitness shall be charged against them.

The consequence of these improved conditions is that the daily output of the armory has been about doubled since I went over the shops nearly two years ago, and the increase of the pay roll does not even approximate the same ratio.

WATERTOWN ARSENAL, MASSACHUSETTS.

Growth. The establishment has continued its growth as a manufactory of gun carriages in a very satisfactory way since my last visit to it, two years ago. The work has been improved by the introduction of new machine tools, and the organization of the tools to suit the demands of the progress of the work in hand has reduced the handling of materials very greatly. Measures have also been taken to secure easier shipment of great masses of material by constructing a dock on the banks of the Charles River within the arsenal limits.

The relations of these great institutions to the battlefield have become intensely interesting by the practical test of war. Perhaps never again will civilized nationalities display such heterogeneous examples of modern and obsolete cannon and small arms in such a circumscribed area of battle as was done in front of Santiago de Cuba. And doubtless it received the closest attention from those who were there.

INSPECTION SERVICE.

Almost simultaneously with the changes in the geographical departments, which were effected March 11, 1898, under General Orders, No. 7, from the Headquarters of the Army, the question of returning to the departmental system of inspections arose, and the amendments of paragraphs 857 to 860 of the Army Regulations, promulgated in General Orders, No. 11, Headquarters of the Army, March 23, 1898, and the assignment of inspectors-general and acting inspectors-general by Special Orders, No. 89, Headquarters of the Army, April 16, 1898, to the various military departments, practically abolished the inspection districts, which had been in successful operation since April 30, 1895.

The return to the departmental system of inspections necessitated primarily the detail of three additional officers as acting inspectors-general in order to assign one inspector to the headquarters of each department, and there was an increase in the permanent force of the Inspector-General's Department under the act of July 7, 1898. But whether the inspection service is conducted in time of peace under the district or departmental system seems immaterial so far as mobilization and organization of regular and volunteer forces in time of war are concerned, as was illustrated during the war with Spain. A general dissociation between department commanders and their former departments as well as troops took place, and four inspectors-general were given command of troops in the field, with increased rank, namely, General Hughes, who has won commendation at Manila; General Sanger, commanding a division in the First Corps; Maj. Gen. H. W. Lawton, whose conduct and command at Santiago are well known, and Maj. Gen. J. C. Breckinridge, who, after his return from the expedition to Cuba, was assigned to command the separate army at Chickamauga, composed of the Second and Third divisions of the First Corps and the First and Second divisions of the Third Corps and independent brigades of cavalry and artillery.

This sort of readjustment of army officials and service for the purpose of actual hostilities was felt throughout the whole fighting force. The number of line officers promoted or detailed to perform staff duties appears almost phenomenal.

The report of July 25, concerning the expedition to Santiago de Cuba, which has already been given to the public press, appears in Appendix B to the report to the Major-General Commanding the Army for some permanent record, together with some notes as to prior inspection duty and subsequent commands.

The assignment of inspectors-general and acting inspectors-general to the various military departments required a reassignment of the inspections not under the supervision of department commanders; and under General Orders, No. 109, Adjutant-General's Office, July 30, 1898, the Inspector-General of the Army is charged with the duty of keeping the inspectors-general of the military geographical departments informed, through the department commanders, of the inspections under paragraphs 868, 870, and 871 of the Army Regulations, and such other inspections which the Secretary of War desires shall be made by them. This has been done as far as practicable, except in the case of military departments of civil institutions of learning, owing to the temporary withdrawal, under the exigencies of the campaign, of the officers of the Army detailed thereat. Appendix A exhibits the inspections so far assigned to department inspectors under the orders referred to.

Whatever the assignment of the individual officers of the corps of inspectors, or the system of inspections, is it not demonstrated during this war that a sustained and expert central supervision and repository is essential to direct, represent, and give coherence to the persistent efforts and thorough work of the inspectors, and insure the beneficial results and intelligent and uniform methods which their high character and ability warrant, if a successful continuation of the inspection service is to be secured, no matter whether the War Department and General Commanding the Army have the direct control or share it with the Department commanders?

If it is agreed upon all sides that the Inspector-General's Department is a bureau of the War Department, with powers, duties, and processes in many respects identical with every other bureau; and its subordinates become the eye and ear of higher authority to insure uniformity, efficiency, and regularity, and record and report how all, even to the latest soldier, perform their duties and secure and receive their rights, this, of course, can only be efficiently accomplished under a wise system and concentration, and perfect and uniform supervision of expert authority, exactly as is essential with the Engineer or Medical Departments; otherwise minor and controllable errors must be expected to grow into public scandals, when public opinion demands the remedy of matters which apparently can attract no attention save through the public press.

The only place where such matters can soonest attract attention and be remedied in their incipency is immediately where they arise, whether in the trenches and cooking place of the private soldier, or the desk or tent of the officer; and the branch of our service best trained, and with established traditions to quietly effect the necessary remedies and establish efficiency in every sphere of military activity, is the Inspector-General's Department, as long as the current and direction for information and effort is intimately maintained with the central bureau. The difficulties and importance of maintaining this connection was

fully recognized by this department, as may be indicated by the following telegram:

PORT TAMPA, FLA., *June 12, 1898.*

Gen. J. P. SANGER,

Acting Inspector-General, War Department, Washington, D. C.:

The discomfort, especially of the inexperienced enlisted men, seems enhanced by the unsystematic and unsupervised methods, or lack of inspections of volunteers by capable inspectors hitherto prevailing. Even the preliminary inspection of transports by officers of this department, recognized in General Sackett's Aide Memoire, does not seem to take place, and with results easily anticipated. Please send me a summary of the several inspection duties of both the corps and division inspectors-general (perhaps best if prepared in the form of an order); that may bring some good form out of present chaos.

BRECKINRIDGE,

Major-General Volunteers, Inspector-General.

But the requisite, full, and timely reports have not been received here from anything like a moiety of the inspecting officers. Is it believed they are not needed, even if addressed to another department? It seems that these reports, if actually started, would surely reach this office, where they belong. Some duties habitually pertaining to officers of this Department have been assigned to outsiders, and vice versa, though it is well in every sense that it should be inspectors who inspect—such inspectors-general as are named with the advice and consent of the Senate. There were no volunteer brigade inspectors authorized by law, so the number was inadequate, and there was no inspector-general at the headquarters of the great camp at Chickamauga, when it was inspected in May and June, under orders from Headquarters of the Army of May 17, 1898. Some of the best of the line officers of our Army and accomplished soldiers from former wars or the National Guard were made subordinate inspectors-general of volunteers, and how well they did whatever was permitted or assigned to them goes without saying, whether in isolation or with united effect and effort; and the instruction and benefit the volunteers received from them could only be properly appreciated in the day of battle and well-won victory. That, with a fair field and encouragement, they were capable of still more is only another proof of their superior quality, which it is hoped will some day be properly recognized, as that of some of their predecessors have been recognized before to-day for conduct in camp and battle.

NECESSITY OF INCREASING THE INSPECTOR-GENERAL'S DEPARTMENT.

No department of the military establishment comes in more intimate touch with every phase of army life, affecting the discipline, condition, and efficiency of the troops, than the Inspector-General's Department; and none more severely feels the inadequacy of its commissioned force. The act of July 7, 1898, increased the personnel of the Inspector-General's Department by 1 colonel, 1 lieutenant-colonel, and 1 major, with the proviso that no vacancies shall be filled until the department shall have been reduced to its original strength, which was 7 officers, including the chief. The increase, therefore, is very temporary and inadequate, and the department is liable at any moment to suffer a reduction in force. The number of regular inspectors now in the department, if all were available for inspection duty, would be barely sufficient for the eight military departments within the United States. And certain other inspections, such as disbursements, which possibly may be accepted as aiding the prevailing regularity in the public service,

must, of course, be adequately provided for. But other military departments have been established in the recently acquired territory which require the services of inspectors-general, as well as demand a largely increased army. The need, therefore, of permanently increasing the Inspection Department is apparent; and it is urgently recommended that the number of subordinate inspectors-general be permanently and adequately increased. If the Army is doubled or quadrupled the proportion in which the Department should be strengthened or increased, will doubtless be fairly recognized and is specially important during a transition period.

Inspection work, to have the most beneficial effect, must be thorough; and to do it thoroughly the force must be increased with the increase of the Army and the increase of territory.

INSPECTION OF UNSERVICEABLE PROPERTY.

The laws and regulations existing prior to the beginning of the fiscal year required that all property presented for condemnation should be inspected by officers of this Department, or acting inspectors-general, or some officer especially designated for each inspection entirely disconnected with the supply department or any association with the property. This old-established system worked most economically and satisfactorily, and it avoided the necessity of an officer destroying or selling the public property of the department to which he belonged or property committed to his or its care for public purposes without a careful examination by a disinterested outsider.

With the cessation of hostilities and the mustering out of volunteer troops there is apt to remain much unserviceable property requiring the condemnatory action of an inspector, which emphasizes the importance of confiding such duty to careful officers of ripe experience and good judgment in this line of duty; but the effort may become more insidious and persistent to be freed from such an absolutely reliable and economical system as this long-established one, under which the accountable bureau requests such public property should be eliminated from the public service, and then the Inspection Bureau carefully scrutinizes it, and nothing is done as in a close corporation.

In ordinary times of peace the original value of property presented for condemnation in the course of a year is considerable. During the past year it approximated \$1,706,000, of which over \$790,000 worth was recommended retained in service. Eighty-three per cent of these inspections were made by officers connected with this department. As the economy of this branch of the service depends in a large measure upon the action of the inspector, it is apparent that he should be thoroughly experienced in the work; and perhaps none can do this duty more satisfactorily than those who have made a specialty of the subject and have been regularly named for this duty under the law and confirmed therein by the Senate under its constitutional function. The distinction between the publicity and system for accepting private property and destroying public property should not be obscured. The law of March 3, 1825, which has continued in force ever since that date, wisely restricts these inspections to inspectors-general, or such other officers as the Secretary of War may appoint for that purpose, and is explicitly supplemented by paragraph 878 of the Army Regulations, which requires that the officers designated for these inspections shall not in any way be connected with the staff department, corps, post, or particular organization to which the property to be inspected pertains. This is the

fundamental principle for good administration in these matters, and the intention of the law concerning the inspection of money and property can be best shown by quoting it in full, as follows:

AN ACT to authorize the sale of unserviceable ordnance, arms, and military stores.

That the President of the United States be, and he is hereby, authorized to cause to be sold any ordnance, arms, ammunition, or other military stores, or subsistence or medical supplies, which, upon proper inspection or survey, shall appear to be damaged or otherwise unsuitable for the public service, whenever, in his opinion, the sale of such unserviceable stores will be advantageous to the public service.

SEC. 2. That the inspection or survey of the unserviceable stores shall be made by an inspector-general, or such other officer or officers as the Secretary of War may appoint for that purpose; and the sales shall be made under such rules and regulations as may be prescribed by the Secretary of War. (Approved, March 3, 1825.)

AN ACT to provide for the inspection of the disbursements of appropriations made by officers of the Army.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That it shall be the duty of the Secretary of War to cause frequent inquiries to be made as to the necessity, economy, and propriety of all disbursements made by disbursing officers of the Army, and as to their strict conformity to the law appropriating the money; also to ascertain whether the disbursing officers of the Army comply with the law in keeping their accounts and making their deposits; such inquiries to be made by officers of the inspection department of the Army, or others detailed for that purpose: *Provided*, That no officer so detailed shall be in any way connected with the department or corps making the disbursement.

SEC. 2. That the reports of such inspections shall be made out and forwarded to Congress with the annual report of the Secretary of War. (Approved April 20, 1874.)

How intimately expenditures and property are related, and the importance of similarly organized scrutiny, if economy and good order are to be effectively assured, seems self-evident. Wherever inspections have been hampered, even to these very times, the results can perhaps be foreseen and illustrated. However plausible the reasons given, are they sufficient to demand that inspections and the Inspector-General's Department should not be encouraged nor be allowed to do their perfect work?

Respectfully submitted.

J. C. BRECKINRIDGE,
Inspector-General.

The SECRETARY OF WAR.

APPENDIX A.

Statement showing inspections not under control of department commanders assigned department inspectors-general under the provisions of General Orders, No. 109, Adjutant-General's Office, July 30, 1898, exclusive of military departments of colleges, most of which, under the exigencies of the campaign, temporarily lost the services of the army officer detailed thereat.

REPORT OF THE JUDGE-ADVOCATE-GENERAL.

REPORT

OF THE

JUDGE-ADVOCATE-GENERAL, U. S. A.

WAR DEPARTMENT,
JUDGE-ADVOCATE-GENERAL'S OFFICE,
Washington, D. C., October 3, 1898.

Hon. RUSSELL A. ALGER,
Secretary of War.

SIR: I have the honor to submit the annual report of the Judge-Advocate-General's Department for the twelve months ending August 31, 1898.

Commissioned officers tried by general court-martial:	
Regulars	3
Volunteers	12
Enlisted men tried by general court-martial:	
Regulars (convicted, 1,148; acquitted, 94).....	1, 242
Volunteers (convicted, 497; acquitted, 126).....	623
Total trials by general court-martial	1, 880
Trials by general court-martial in Regular Army:	
Twelve months ending August 31, 1897	1, 384
Twelve months ending August 31, 1898	1, 245
Decrease	139
Decrease in number of trials by general court-martial in the Regular Army as compared with previous twelve months:	
Twelve months ending August 31, 1893	28
Twelve months ending August 31, 1894	9
Twelve months ending August 31, 1895	461
Twelve months ending August 31, 1896	242
Twelve months ending August 31, 1897	102
Twelve months ending August 31, 1898	139

Of the 94 trials in the Regular Army noted as "acquitted," 61 were acquittals upon the merits and the other 33 were cases in which the sentences were disapproved on account of some fatal irregularity.

The following table shows, approximately, the number of convictions in the Regular Army of different offences by general court-martial during the twelve months ending August 31, 1898:

Seventeenth article of war:	
Losing clothing.....	5
Losing Government property.....	12
Selling clothing	10
Spoiling horse, arms, accoutrements, etc	2
Twentieth article of war:	
Disrespect to commanding officer.....	12

Twenty-first article of war:	
Assaulting superior officer	1
Disobeying superior officer	70
Twenty-fourth article of war:	
Disobeying noncommissioned officer quelling f ray	2
Thirty-second article of war:	
Absence without leave	245
Thirty-third article of war:	
Failure to attend drill, roll call, etc	96
Thirty-sixth article of war:	
Hiring another to do his duty	1
Thirty-eighth article of war:	
Drunkenness on duty	102
Thirty-ninth article of war:	
Quitting post	31
Sleeping on post	24
Fortieth article of war:	
Quitting guard	31
Forty-seventh article of war:	
Desertion	176
Fifty-eighth article of war:	
Manslaughter	1
Murder	1
Presenting, or causing to be presented, false and fraudulent claims against the United States	1
Robbery	1
Sixtieth article of war:	
Larceny	9
Selling Government property	3
Sixty-first article of war:	
Duplication of pay vouchers	1
Other offences charged as "conduct unbecoming an officer and a gentle- man"	2
Sixty-second article of war:	
Absence without leave, not chargeable under the thirty-second article of war	43
Abusing public animal	16
Affray	2
Aiding and abetting larceny	1
Aiding and abetting the passing of stolen goods	1
Allowing prisoner to escape	12
Assault	13
Assault and battery	38
Assault with dangerous or deadly weapon	28
Assault with intent to kill	17
Attempt at arson	2
Attempt to create a disability in order to obtain discharge	1
Attempt to desert the service	1
Attempt to suborn a witness	1
Breach of arrest	33
Breaking parole	1
Burglary	3
Carrying concealed weapons	2
Committing a nuisance	9
Destroying public property	2
Disobedience of standing orders or regulations	24
Disobeying commissioned officer	31
Disobeying noncommissioned officer	110
Disobeying sentinel	8
Disorderly conduct	39
Disposing of clothing	3
Disrespect to noncommissioned officer	28
Disrespect to sentinel	4
Disrespect to superior officer	20
Drunkenness	64
Drunk and disorderly	54
Drunkenness, etc., causing arrest, etc., by civil authorities	5
Embezzlement	7
Failure to pay debts	1
False accusation	1
False statement or report	39
Fighting	8

Sixty-second article of war—Continued.

Forgery	3
Fraudulent enlistment	69
Inciting disobedience and mutiny	5
Indecent exposure of person	4
Insubordinate conduct toward commissioned officer	18
Insubordinate conduct toward noncommissioned officer	76
Larceny	81
Malicious destruction of private property	2
Malingering	1
Neglect of duty	66
Out of quarters after taps	1
Permitting prisoner to obtain intoxicating liquor	6
Receiving and disposing of stolen property	6
Resisting arrest	20
Selling, losing, or wasting Government property	20
Sentinel permitting prisoner to obtain liquor	2
Threatening noncommissioned officer	13
Threatening superior officer	5
Transfer by officer of pay accounts before due	2
Trespass	1
Using profane and indecent language	4
Disorder, etc., charged as "conduct to the prejudice of good order and military discipline" (not included under previous heads)	23

During the period covered by this report there were 450 enlisted men of the Regular Army discharged pursuant to sentence of general court-martial, 123 of these discharges being for minor offences on proof of five or more previous convictions.

The following table shows, approximately, the number of convictions in the Volunteer Army of different offences by general court-martial up to and including August 31, 1898:

Seventeenth article of war:	
Losing clothing	2
Selling clothing	1
Twentieth article of war:	
Disrespect to commanding officer	12
Twenty-first article of war:	
Assaulting superior officer	7
Attempting to strike superior officer	8
Disobeying superior officer	98
Twenty-second article of war:	
Mutinous conduct	1
Twenty-fourth article of war:	
Disobeying commissioned officer quelling a fray	1
Disobeying noncommissioned officer quelling a fray	3
Thirty-first article of war:	
Lying out of quarters	2
Thirty-second article of war:	
Absence without leave	97
Thirty-third article of war:	
Failure to attend drill, roll call, etc	2
Thirty-eighth article of war:	
Drunkenness on duty	34
Thirty-ninth article of war:	
Quitting post	8
Sleeping on post	97
Fortieth article of war:	
Quitting guard	11
Forty-seventh article of war:	
Desertion	18
Fifty-fifth article of war:	
Disorderly in quarters	1
Fifty-eighth article of war:	
Assault and battery with intent to kill	1
Burglary	1
Larceny	9
Manslaughter	1
Murder	1

Sixtieth article of war:	
Larceny	2
Selling Government property	1
Sixty-first article of war:	
Offences charged as "conduct unbecoming an officer and a gentleman"	3
Sixty-second article of war:	
Absence without leave, not chargeable under the thirty-second article of war	11
Allowing prisoner to escape	3
Assault	10
Assault and battery	9
Assault upon sentry	2
Assault with dangerous or deadly weapon	7
Assault with intent to kill	1
Breach of arrest	4
Disobedience of standing orders or regulations	2
Disobeying commissioned officer	18
Disobeying noncommissioned officer	34
Disobeying sentinel	3
Disorderly conduct	10
Disposing of clothing	1
Disrespect to noncommissioned officer	6
Disrespect to sentinel	5
Disrespect to superior officer	5
Drunkenness	11
Drunk and disorderly	41
Drunkenness, etc., causing arrest, etc., by civil authorities	2
Embezzlement	3
Escaping from guardhouse	2
False statement or report	2
Fighting	3
Forgery	2
Indecent exposure of person	1
Insubordinate conduct toward commissioned officer	24
Insubordinate conduct toward noncommissioned officer	33
Larceny	14
Neglect of duty	4
Resisting arrest	6
Robbery	1
Threatening noncommissioned officer	2
Threatening superior officer	5
Disorder, etc., charged as "conduct to the prejudice of good order and military discipline" (not included under previous heads)	66

The number of men of the Volunteer Army discharged pursuant to sentence of general court-martial up to August 31, 1898, inclusive, is 90.

The following table shows the convictions of desertion, classified according to the limit of punishment prescribed in the order of the President, published in General Orders No. 16, Headquarters of the Army, 1898:

	Regulars.	Volun- teers.	Limit of confine- ment.
Surrendered:			<i>Months.</i>
After an absence of not more than 30 days	9	1	12
After an absence of more than 30 days	48	18
Apprehended:			
In service not more than 6 months at time of desertion	87	17	18
In service more than 6 months	82	30
Total number of desertions	176	18
Average limit of confinement (months)	23.28+	17.67—

In connection with this table it is to be observed that the limits of punishment are prescribed for "time of peace" only.

Convictions of desertion in Regular Army for twelve months ending—

August 31, 1894.....	518
August 31, 1895.....	255
August 31, 1896.....	256
August 31, 1897.....	244
August 31, 1898.....	176

At the last session of Congress an act was passed amending the act establishing the summary court, making it applicable in time of war as well as in time of peace, and abolishing the field officer's court. By this act the commanding officer of each garrison, post, or other place, regiment or corps, detached battalion or company, or other detachment in the Army, is given power to appoint a summary court for his command, or, in his discretion, for each battalion thereof, reserving, however, to superior authority the power to appoint the court when by such authority deemed desirable. When but one commissioned officer is present with a command he himself sits as the summary court. The garrison and regimental courts-martial are superseded by the summary court, except in the cases of noncommissioned officers who object to trial by summary court. With this exception—and the cases arising under it will be few—the courts for the trial of military offences now are the general court-martial and the summary court; and we are no longer obliged, as was recently the case, on the breaking out of war, to change from one system to another—that is, from the summary court to the field officer's court—nor to change back again to the summary court at the end of war, as would have been necessary had the present legislation not been enacted. The summary court is now the regular permanent inferior court-martial, both in time of peace and of war. It is believed that the present act will meet every possible requirement.

There has also been issued a new Executive order, fixing the limits of punishment (General Orders, No. 16, Adjutant-General's Office, 1898), in which certain important amendments of the order previously in force have been made.

These two measures have been adopted in order to remove defects in the system of administration of military justice which the experience of the Army had pointed out. The system is now on a good footing, with one exception. This exception is the lack of power on the part of courts-martial to compel civilian witnesses to testify. There have heretofore been failures of justice on this account, and during the present year a general court-martial sitting for the trial of an important case has been shut off from material evidence by the refusal of civilian witnesses to answer legal questions. It is to be hoped that Congress will afford some relief—if not by giving general courts-martial the power to punish for contempt, at least in such other form as may be deemed best. I shall at the proper time invite attention to this matter separately.

The following publications, prepared in this office, have been issued since my last annual report: Two editions of the Manual for Courts-Martial and of Procedure under Military Law; Remarks on the Army Regulations and Executive Regulations in General; The Use of the Army in Aid of the Civil Power; The Justification of Martial Law (a reprint from the North American Review); Military Reservations, National Military Parks, and National Cemeteries, Title and Jurisdiction.

The last-named work, prepared by Mr. James B. McCrellis, contains a summary of the title deeds of all the military reservations, etc., and the acts ceding jurisdiction over the same—information which, it is believed, will be found very useful to have in this form. In the

appendix to this work is a collection of authorities on questions relating to "Eminent domain," "Jurisdiction," "Taxation," and "Title."

A revision of the Digest of the Opinions of the Judge-Advocate General has also been begun, the work having been intrusted to Capt. Charles McGlure, Eighteenth Infantry, but this officer having, at his own request, been relieved, in order to enable him to join his regiment during the present war, it has been temporarily discontinued. The work is important, and I hope that it may soon be resumed.

The number of officers in the Judge-Advocate-General's Department has been insufficient to meet the demands made upon it, even with the small army we have had. With an army enlarged as it seems likely that ours will be, the increase of the Judge-Advocate-General's Department will be necessary. It now consists of only eight officers. With an army of 100,000 men, or even 75,000 men, double that number would be required. I shall, in due time, also invite attention to this matter separately.

The reports of the judge-advocates of departments have not been appended to this report for the reason that but few of them have been received, and that they are necessarily incomplete, owing to the fact that most of the troops have been in the field during a portion of the year covered by this report.

G. N. LIEBER,
Judge-Advocate-General.

**REPORT OF THE QUARTERMASTER-GENERAL
OF THE ARMY.**

REPORT

OF

THE QUARTERMASTER-GENERAL.

QUARTERMASTER-GENERAL'S OFFICE,
Washington, October 31, 1898.

SIR: I have the honor to submit the annual report of the operations of the Quartermaster's Department for the fiscal year ended June 30, 1898. This report will also show briefly the operations of this Department from July 1, 1898, to the close of hostilities with Spain:

FINANCIAL STATEMENT.

By acts of Congress approved March 2 and June 4, 1897, there was appropriated for the regular service of the Quartermaster's Department for the fiscal year ended June 30, 1898, the sum of	\$7, 711, 367. 75
During the fiscal year there was deposited to the credit of appropriations, 1897-98, amounts received from sales to officers, etc., the sum of	477, 890. 37
Making a total of	8, 189, 258. 12
Of this amount there was remitted to disbursing officers. \$7, 839, 858. 06	
There was paid out on account of settlements made at Treasury of claims and accounts	9, 245. 35
	7, 849, 103. 41
Leaving a balance available for payment of outstanding obligations incurred, or fulfillment of contracts properly entered into within the fiscal year, of.....	340, 154. 71
By act approved May 4, 1898, there was appropriated for deficiencies January 1, 1899, for regular supplies, incidental expenses, cavalry and artillery horses, barracks and quarters, transportation, and clothing, camp and garrison equipage	19, 550, 000. 00
There was placed to the credit of this appropriation from sales to officers, etc	950. 86
	19, 550, 950. 86
Of this amount there was remitted to disbursing officers.....	11, 012, 554. 18
Leaving a balance available until January 1, 1899.....	8, 538, 396. 68
On the 1st of July, 1897, there was on hand from regular appropriations for the service of the Quartermaster's Department pertaining to the fiscal year ended June 30, 1897	1, 837, 845. 26
And from appropriations pertaining to previous fiscal years the sum of.	883, 746. 43
Making a total balance on hand from all appropriations July 1, 1897	2, 721, 591. 69
For specific purposes there was appropriated during the fiscal year ended June 30, 1898	400, 187. 15
During the year there was deposited and transferred to credit of appropriations other than those of 1897-98, shown above, the sum of.	212, 715. 71
Making a total of.....	3, 334, 494. 55

Of said amount there was remitted to disbursing officers the sum of	\$906, 208. 58	
There was paid out on account of Treasury settlements and transferred the sum of	587, 231. 82	
There was carried to surplus fund the sum of	859, 153. 66	
		<hr/> \$2, 352, 594. 06
Leaving a balance of.....		<hr/> 981, 900. 49

Of the \$200,000 appropriated by act approved December 18, 1897, for relief of people in the mining region of Alaska, there has been drawn by this office the sum of \$72,000.

Of the \$50,000,000 appropriated by act of March 9, 1898, for national defense, the sum of \$1,500,526.95 was allotted to this Department to June 30, 1898, of which the sum of \$1,497,397.67 has been remitted to officers and transferred, leaving a balance on hand on June 30, 1898, of \$3,129.28. Since the close of the fiscal year, June 30, 1898, an additional sum of \$2,295,000 was allotted to this Department from this appropriation; the sum of \$919,106.97 was received by credit deposits; and from the total on hand the sum of \$915,084.35 was remitted to disbursing officers, leaving a balance on hand September 8, 1898, of \$2,302,151.92.

Under act approved July 7, 1898 (deficiency), Congress appropriated for the service of this Department, under the various heads of appropriations, the sum of \$103,200,000.

From July 1 to August 15, 1898, the sum of \$20,825,212.35 was remitted to disbursing officers by this Department from the appropriations made therefor under the various headings.

DUTIES OF THE QUARTERMASTER'S DEPARTMENT.

Under existing laws the Quartermaster's Department, under the direction of the Secretary of War, provides the Army with military stores and supplies requisite for its use, such as clothing and equipage, tents, band instruments, tableware and mess furniture, equipments for post bakeries, fuel, forage, stationery, lumber, straw for bedding for men and animals, all materials for camp and for shelter for troops and stores, furniture for barracks, such as bunks, benches, chairs, tables, lockers, heating and cooking stoves for use in public barracks and quarters, tools for mechanics and laborers in the Quartermaster's Department, furniture, text-books, papers, and equipment for post schools, reading matter for post libraries, wagons, ambulances, carts, saddles, harness, water supply, sewerage, plumbing, illuminating supplies, and heating for all military posts and buildings.

The Department is also charged with the duty of transporting, by land and water, troops, munitions of war, equipments, and all articles of military supplies from the place of purchase to the several armies, garrisons, posts, and recruiting places.

Under act of Congress amending section 1661, Revised Statutes, for arming and equipping the militia, this Department supplies quartermaster stores, clothing, and equipage to the militia of the several States and Territories, and transports the same to said States and Territories. It also furnishes transportation for ordnance and ordnance stores issued by the United States to the militia of the several States and Territories. It also transports the property for other Executive Departments on requisitions, payments therefor being made by the respective Depart-

ments to the carriers upon accounts forwarded through the Quartermaster-General's Office for that purpose.

This Department prepares the necessary plans and constructs all buildings at military posts, such as barracks, quarters, storehouses, hospitals, etc., builds wharves, constructs and repairs roads for military purposes, builds all necessary military bridges, provides, by hire or purchase, grounds for military encampments and buildings; contracts for all horses for cavalry, artillery, and for the Indian scouts, and for such infantry and members of the Hospital Corps in the field campaigns as may be required to be mounted; pays for all incidental expenses of the military service which are not provided by other corps.

The care and maintenance of national cemeteries is an additional duty of this Department. It also provides suitable headstones to mark the graves of all soldiers, sailors, or marines who served during the late war, including those who have been buried in private cemeteries and other burial places.

Section 1139, Revised Statutes, makes it the duty of the Quartermaster-General, under the direction of the Secretary of War, to prescribe and enforce a system of accountability for all quartermaster's supplies furnished the Army, its officers, seamen, and marines.

For eight months of the last fiscal year the business of this Department was conducted under the usual and ordinary conditions incident to a country at peace with all the world. It was only after Congress provided, by act approved March 9, 1898, \$50,000,000 for "the national defense" that any steps could be taken by this Department in the way of preparation for war should it come.

CLOTHING AND EQUIPAGE SUPPLIES.

The matter of clothing and equipage for the Army was one of the most important subjects that engaged the attention of this Department during the closing three months of the last fiscal year.

On April 1, 1898, this Department was amply provided with all necessary clothing and equipage supplies for the then existing small Army of 25,000 men, but on the 23d of that month, when the first call for volunteers was made, the problem of clothing and equipping an army of 125,000 men presented itself. Four days later, on April 26, Congress increased the Regular Army to 61,184 men, and a month later, on May 25, the second call for 75,000 volunteers was issued. To this was added 10 regiments of immunes, 3 regiments of cavalry, 3 regiments of engineers, and 1 of the Signal Corps, making a grand total of about 275,000 soldiers called into active service in a few weeks.

To properly clothe and equip this large number of soldiers for active and immediate operations in the field was a problem of vast proportions. This Department set upon this task without a moment's delay, every known expedient was at once resorted to with a view to obtaining the necessary quartermaster supplies. Many difficulties were in the way. Contracts were promptly entered into for all the articles of clothing and camp equipage for which there would be an early demand, great care being taken to prevent the supply of articles of inferior quality. The kerseys and flannels of standard quality used for making army blouses and trousers were not to be had in the market, and it was necessary to have them manufactured. In the meantime the Department, as far as possible, endeavored to procure articles conforming as nearly as practicable to existing standards, but had to resort, at

first, to some extent to the purchase of dark-blue trousers so that the men might be quickly supplied.

The prompt supply of the large number of tents required by the increased force was a problem of difficult solution and called for extraordinary endeavors.

At the beginning of the war there was but little cotton duck to be found in this country entirely suitable for military purposes, the supply having been depleted by the large demands for tentage for the Klondike region and the extensive purchases by the Navy Department. Energetic efforts were promptly made in every locality, East and West, wherever it was found possible to obtain the material and labor skilled to manufacture tents. Through the courtesy of the Post-Office Department the force of the mail bag repair shop was placed at the disposal of this Department, which was of great assistance.

With all the perplexing difficulties confronting the Department in the matter of clothing and equipage supplies, it is remarked that in the short period of three and one-half months an army of 275,000 men was equipped with such supplies, and it is further remarked that the army in Cuba, consisting of 16,000 men, leaving their tentage behind, arrived at their camp at Montauk Point, New York, and found a complete new outfit of tents and clothing ready there for them.

The detailed statements accompanying the report of the officer on duty in this office specially charged with this branch of the work, will show the various places at which the purchases and contracts for clothing and equipage were made, and that it was the endeavor of this Department to reach every principal locality that could contribute towards meeting the requirements of the service, taking into consideration the quality and kind of supplies required.

The following are the principal articles that were manufactured at the Philadelphia, Washington, Jeffersonville, St. Louis, and San Francisco depots, and for the purpose of comparison the data is given in two different periods, viz, from July 1, 1897, to April 30, 1898, covering ten months prior to the commencement of the war, and from May 1, 1898, to August 15, 1898, the three and one-half months embracing the period of hostilities.

Articles.	July 1, 1897, to Apr. 30, 1898, 10 months peace period.	May 1, 1898, to Aug. 15, 1898, 3½ months war period.
Dress coats, all kinds.....	1, 946	624
Overcoats, kersey, made and unmade.....	6, 741	18, 694

A comparison of the figures given in the above statements will afford some idea as to what this Department has accomplished in the short period of three and a half months in the matter of clothing and equipage alone.

In this connection it is proper to state that many of the States which contributed toward filling the quota of volunteers of the first call held their men in camps before they were mustered into the United States service, and when turned over to the General Government they were in many cases without proper clothing; this was especially the case in regard to underclothing and shoes.

Congress provided for this branch of the service, for the last fiscal year, the sum of \$1,050,000, and a further sum of \$10,000,000 by act approved May 4, 1898. To this was added the sum of \$189,248.37 for reimbursements on account of issues to the militia, and the sum of \$95,125.61 for collections by the Pay Department, etc., making a total of \$11,334,373.98. Of this amount, the sum of \$5,530,612.06 was paid out during the fiscal year, leaving a balance on hand on June 30, 1898, of \$5,803,761.92; to this should be added the sum of \$26,000,000 appropriated by act approved July 7, 1898, making the total amount available \$31,803,761.92. Of this amount, the sum of \$7,229,997.07 was required on August 15 last to pay all expenditures on account of clothing and equipage by this Department up to that date.

The issues to the militia of the several States and Territories during the past fiscal year amounted to the sum of \$189,870.72, which includes \$474.02 from appropriation "Regular supplies" and \$284.85 from "Army transportation."

The sum of \$8,234 was expended during the fiscal year from the appropriations of the Quartermaster's Department for the maintenance of the Indian prisoners of war held captive at Fort Sill, Okla. These prisoners consist of 298 Apache Indians—68 men, 105 women, 70 boys, and 55 girls.

SHOES.

The subject of improving the army shoe has been under consideration for some years. A shoe made of lighter calfskin, upon lasts conforming more closely to the anatomy of the human foot, was adopted last January. This shoe is of excellent quality and make, hand sewed. Shoes now procured under contracts made within the past few

months conform to the new pattern, but the soles are sewed on by the most approved welt machine. The advisability of substituting the latter mode of fastening the soles is under consideration.

The shoes procured at the outbreak of hostilities, and which were found to be essential for the immediate equipment of the organizations then being rapidly mustered into service, did not conform altogether to the newly adopted army shoe. The urgency of the situation made it necessary to procure a large number of shoes at once, and as the newly adopted army shoe could not be procured in sufficient quantity, it was found absolutely necessary to purchase such shoes as could be had in the market, conforming approximately to the standard army shoe in pattern and quality. As a rule these shoes were found good and serviceable.

CLOTHING OF LIGHTER TEXTURE FOR SOUTHERN AND TROPICAL COUNTRIES.

To meet calls from the army in the South for garments made of cotton fabric this Department procured a supply made from both twilled and plain duck. These were issued to troops in Cuba, Porto Rico, and as far as practicable to various organizations in camps in this country.

BAND INSTRUMENTS.

Some difficulty was experienced in supplying instruments to the many new military bands of the increased Army. As far as possible they were procured of the best domestic production obtainable. It was impracticable to furnish all the regiments before the cessation of hostilities.

GRATUITOUS ISSUES.

By direction of the Secretary of War the clothing of part of the troops returning from Cuba was ordered to be destroyed to prevent contagion, and the issue to each of the men, free of charge, of another suit in lieu of the one destroyed was authorized. Similar issue was also made to the men in hospitals whose clothing was destroyed for the same reason.

MEANS OF TRANSPORTATION.

The following statement shows the number and cost of public animals, wagons, and harness purchased from July 1, 1897, to March 31, 1898, covering the nine months period to the commencement of the war, and from April 1, to August 31, 1898, covering the war period:

* Includes 1,500 little horses for Cuban service.

first, to some extent to the purchase of dark-blue trousers so that the men might be quickly supplied.

The prompt supply of the large number of tents required by the increased force was a problem of difficult solution and called for extraordinary endeavors.

At the beginning of the war there was but little cotton duck to be found in this country entirely suitable for military purposes, the supply having been depleted by the large demands for tentage for the Klondike region and the extensive purchases by the Navy Department. Energetic efforts were promptly made in every locality, East and West, wherever it was found possible to obtain the material and labor skilled to manufacture tents. Through the courtesy of the Post-Office Department the force of the mail bag repair shop was placed at the disposal of this Department, which was of great assistance.

With all the perplexing difficulties confronting the Department in the matter of clothing and equipage supplies, it is remarked that in the short period of three and one-half months an army of 275,000 men was equipped with such supplies, and it is further remarked that the army in Cuba, consisting of 16,000 men, leaving their tentage behind, arrived at their camp at Montauk Point, New York, and found a complete new outfit of tents and clothing ready there for them.

The detailed statements accompanying the report of the officer on duty in this office specially charged with this branch of the work, will show the various places at which the purchases and contracts for clothing and equipage were made, and that it was the endeavor of this Department to reach every principal locality that could contribute towards meeting the requirements of the service, taking into consideration the quality and kind of supplies required.

In this connection it is proper to state that many of the States which contributed toward filling the quota of volunteers of the first call held their men in camps before they were mustered into the United States service, and when turned over to the General Government they were in many cases without proper clothing; this was especially the case in regard to underclothing and shoes.

Congress provided for this branch of the service, for the last fiscal year, the sum of \$1,050,000, and a further sum of \$10,000,000 by act approved May 4, 1898. To this was added the sum of \$189,248.37 for reimbursements on account of issues to the militia, and the sum of \$95,125.61 for collections by the Pay Department, etc., making a total of \$11,334,373.98. Of this amount, the sum of \$5,530,612.06 was paid out during the fiscal year, leaving a balance on hand on June 30, 1898, of \$5,803,761.92; to this should be added the sum of \$26,000,000 appropriated by act approved July 7, 1898, making the total amount available \$31,803,761.92. Of this amount, the sum of \$7,229,997.07 was required on August 15 last to pay all expenditures on account of clothing and equipage by this Department up to that date.

The issues to the militia of the several States and Territories during the past fiscal year amounted to the sum of \$189,870.72, which includes \$474.02 from appropriation "Regular supplies" and \$284.85 from "Army transportation."

The sum of \$8,234 was expended during the fiscal year from the appropriations of the Quartermaster's Department for the maintenance of the Indian prisoners of war held captive at Fort Sill, Okla. These prisoners consist of 298 Apache Indians—68 men, 105 women, 70 boys, and 55 girls.

SHOES.

The subject of improving the army shoe has been under consideration for some years. A shoe made of lighter calfskin, upon lasts conforming more closely to the anatomy of the human foot, was adopted last January. This shoe is of excellent quality and make, hand sewed. The shoes now procured under contracts made within the past few

months conform to the new pattern, but the soles are sewed on by the most approved welt machine. The advisability of substituting the latter mode of fastening the soles is under consideration.

The shoes procured at the outbreak of hostilities, and which were found to be essential for the immediate equipment of the organizations then being rapidly mustered into service, did not conform altogether to the newly adopted army shoe. The urgency of the situation made it necessary to procure a large number of shoes at once, and as the newly adopted army shoe could not be procured in sufficient quantity, it was found absolutely necessary to purchase such shoes as could be had in the market, conforming approximately to the standard army shoe in pattern and quality. As a rule these shoes were found good and serviceable.

CLOTHING OF LIGHTER TEXTURE FOR SOUTHERN AND TROPICAL COUNTRIES.

To meet calls from the army in the South for garments made of cotton fabric this Department procured a supply made from both twilled and plain duck. These were issued to troops in Cuba, Porto Rico, and as far as practicable to various organizations in camps in this country.

BAND INSTRUMENTS.

Some difficulty was experienced in supplying instruments to the many new military bands of the increased Army. As far as possible they were procured of the best domestic production obtainable. It was impracticable to furnish all the regiments before the cessation of hostilities.

GRATUITOUS ISSUES.

By direction of the Secretary of War the clothing of part of the troops returning from Cuba was ordered to be destroyed to prevent contagion, and the issue to each of the men, free of charge, of another suit in lieu of the one destroyed was authorized. Similar issue was also made to the men in hospitals whose clothing was destroyed for the same reason.

MEANS OF TRANSPORTATION.

The following statement shows the number and cost of public animals, wagons, and harness purchased from July 1, 1897, to March 31, 1898, covering the nine months period to the commencement of the war, and from April 1, to August 31, 1898, covering the war period:

PUBLIC ANIMALS.

	Peace period, from July 1, 1897, to March 31, 1898 (nine months).			War period, from Apr. 1, 1898, to Aug. 31, 1898 (five months).		
	No.	Total cost.	Average cost.	No.	Total cost.	Average cost.
Cavalry horses	668	\$84, 274. 50	\$126. 15	10, 743	\$1, 078, 813. 82	\$100. 42

Total	12	3,239.00		5,179	478,111.10	
Harness, sets, single	30	900.00	30.00	28,012	358,449.18	

From April 1, 1898, to August 31, 1898, there were purchased 5,130 field ranges, at a cost of \$106,742; 150 bread ovens, costing \$20,540; 5,434 field desks, at a cost of \$38,471.80; and 4,580 paulins, at a cost of \$87,644.20.

Coal for use of transport vessels was contracted for as follows:

	Tons.
Tampa, Fla	3,306
Fernandina, Fla.....	5,547
Santiago, Cuba	3,978
Ponce, Porto Rico	6,422
Port Tampa, Fla	19,225
Manila, Philippine Islands.....	16,000
Honolulu	28,600
Total	83,078

DIVISION OF TRANSPORTATION.

Under the order of the honorable the Secretary of War, dated July 18, 1898, the duties of this division consist mainly of rail and water transportation.

During the fiscal year ended June 30, 1898, transportation was furnished for 709,617 persons, 60,632 animals, and 1,529,585 tons of materials.

RAIL TRANSPORTATION.

[Since April 1, 1898.]

The orders for the movement of the regular troops to Chickamauga, New Orleans, Mobile, and Tampa were sent out by the Adjutant-General of the Army about the middle of April, 1898, and were addressed to the several department commanders. They designated the point of destination and the time at which the movement was desired to take place.

The chief quartermasters of the respective departments were immediately charged by the Quartermaster-General with all the necessary transportation arrangements. The troops were put in motion as fast as arrangements with the railroad companies could be perfected, and were rapidly assembled at the points designated by the War Department. In no case was any delay reported to this office, nor is any known to have occurred. These troops were moved with the most satisfactory dispatch and an entire absence of accident.

Upon the receipt by the Quartermaster-General from the War Department of a list showing the assignment of the volunteer forces to the several national encampments of mobilization, the proper officers of

the Quartermaster's Department throughout the country were directed, in anticipation of the required movement, to examine the list supplied by the War Department and familiarize themselves with every detail of the subject; to consult the proper railroad officials interested in the transportation of these troops, and determine in advance as far as practicable all preliminaries that could be settled before the actual movement of the troops occurred, such as determining routes of travel, rates, etc., for each movement, so that when the troops should actually move no possible delay should occur, and they might be moved with comfort and celerity.

The officers of the Department acted in all these matters with commendable zeal and energy, and in many cases agreed upon flat rates to govern all such shipments, which were most advantageous to the Government as a matter of economy.

On May 13 the Adjutant-General sent to the Quartermaster-General his first orders for the movement of volunteers—a separate order for each organization—designating the point of destination. Instructions were immediately wired, in all cases of even date with the order of the Adjutant General, to the quartermasters most convenient to move the troops. At the same time the commander of the organization was wired as to the officer charged with the movement, and the chief quartermaster at the national encampment was also informed by telegraph that the shipping officer would wire him the date of departure and probable time of arrival of each organization. Under these instructions the volunteer troops have gone to destination with promptness and remarkable freedom from accident or delay en route.

A statement has been prepared in this office showing, as far as possible, the shipments of the various volunteer organizations, with all detailed information as to number of officers and men, dates of movements, cost of the service, passenger and freight, with the rates at which each movement has been made. This report is voluminous, and the conclusions or summary, from the information obtained to date, only can be stated in the present report. Moreover, it must remain for some time yet incomplete until the accounts for all these services are rendered by the many railroads of the country, critically examined and paid. It will, when completed, present in tabular form a correct and detailed statement of all railroad transportation connected with the movements of troops of the Regular and Volunteer Army during the war with Spain.

From April 1, 1898, to the breaking up of Camp Wikoff the aggregate movement of troops by rail amounted to 17,863 officers and 435,569 men.

Low rates were secured by the Quartermaster's Department in making these movements, generally not exceeding 1½ cents per mile for passengers, and in many cases much less, and about one-half the prevailing tariff rates for freight in excess of 150 pounds per man carried free.

A special outfit was provided under orders of the Secretary of War, to be used by the Surgeon-General as a hospital train. This train was made up of 10 tourist sleepers, 2 kitchen and dining cars, and a combined passenger and baggage car. It was furnished by the Medical Department, placed in charge of its trained nurses, and kept exclusively for the purpose of carrying sick and wounded to points designated by the proper medical officers.

Under circulars of the Treasury Department, No. 187, November 11, 1897, and No. 83 of May 17, 1898, the Union Pacific and Kansas Pacific railroads, having been sold, ceased to be bond-aided railroads from November 1, 1897, and March 31, 1898, respectively.

WATER TRANSPORTATION.

The sum of \$90,757.34 was expended during the fiscal year to maintain, including repairs, the 11 vessels owned by this Department, which is exclusive of the transports chartered and purchased for the prosecution of the war with Spain.

Anticipating the possible needs of the Quartermaster's Department for ocean transportation for the movement of troops and supplies to Cuba, early action was taken by this office communicating with the various American steamship companies conducting the ocean traffic on the Atlantic and Gulf coasts, to ascertain what vessels were available for charter for that purpose, and an experienced officer of the Department was sent to New York City to consult with the companies and to inspect and report upon the suitability of the vessels offered for charter. Similar measures were taken at all other points on the Atlantic and Gulf coasts where vessels were offered for charter. Whenever practicable an officer of the Navy was detailed by that Department to assist in the inspection.

These precautionary measures enabled this Department to select those vessels best adapted for the service for which they were specially required.

From the declaration of war to June 30, 1898, this Department chartered for service on the Atlantic and Gulf waters 43 vessels, with a total tonnage of 104,201, and a carrying capacity of 1,287 officers, 22,335 men with their arms, ammunition, equipment, medical and subsistence supplies, and 6,746 animals. There were also chartered 4 water boats, with a total capacity of 820,000 gallons, 3 lighters, 2 tugs, and 1 barge; also 2 barges purchased.

In addition to the above there were chartered—for the Signal Service of the Army, the steamship *Adria*, used as a cable boat; the steamship *Fanita* for the Secret Service, and the steamer *Gretchen* for inspection purposes.

The operations of the Navy in the harbor at Manila required that provision be made for the transportation of troops and supplies to the Philippines.

Some difficulty was experienced in securing transport ships on the Pacific coast, not because the steamship companies were unwilling to charter their vessels to the Government, but from the fact that their ships were engaged in their regular traffic across the Pacific, and were not available until their arrival at their home ports on the Pacific coast.

In order that sufficient means of transportation might be secured, it became necessary to ask Congress to grant American registry to some available ships which were under foreign registry.

Fourteen ships were chartered to June 30, 1898, on the Pacific coast, having a total tonnage of 41,152 and carrying capacity of 629 officers and 13,059 men, with their complete outfit of camp and garrison equipment, arms, ammunition, medical and subsistence stores for a voyage of over 7,000 miles.

The combined fleets on the Atlantic and Pacific coasts at the close of the fiscal year consisted of 69 vessels of various classes, with a total tonnage of 145,353 tons and carrying capacity of over 37,000 men.

To convert the vessels composing this fleet from their ordinary uses as freight vessels into safe and commodious transport ships required considerable alteration. Sleeping accommodations for the men and stalls for the animals had to be constructed; largely increased water capacity had to be provided by the construction of extra tanks and the supply of barrels and casks, and provision made for pure-air ventila-

tion. For this last-mentioned purpose many of the vessels were supplied with electric plants for running fans and for lighting the ship.

Special care was given to the fitting out of the transports on the Pacific coast to provide the troops with comfort, cleanliness, protection to health, and the proper means for cooking during the long voyage to Manila. For these purposes galley facilities, lavatories, and closets were constructed in all these vessels.

The total expenditures for fitting up these vessels (as far as reported), to June 30, 1898, amounted to \$186,632.68, which includes the sum of \$7,694.30 for fitting up the steamship *City of Peking*, which was chartered by the Navy Department and turned over to the War Department for transportation of the Army.

Under the terms of the charters this Department furnished all coal for running these vessels, and the water required for boilers and drinking purposes. The supply of coal for this purpose has been purchased as far as possible by contract at lowest obtainable rates for delivery to the various ports where needed to supply these ships.

The sum expended for supply of water amounted to \$21,000. The payments for services of the vessels under charter to June 30, 1898, were as follows:

On Atlantic coast and Gulf waters	\$1, 007, 952. 50
On Pacific coast	319, 764. 17
Total	1, 327, 716. 67

To provide for the transportation of the sick and wounded, this Department purchased from the Maine Steamship Company the steamship *John Englis* for the sum of \$450,000. This ship was fitted up at considerable expense as a hospital ship, and every appliance provided for the care, comfort, and treatment of the sick and wounded. The interior of the ship was remodeled and provided with an electric plant for lighting and purifying. Sterilizing and laundry plants and two steam launches were also provided. The expenditures for refitting amounted to \$136,851.11. This hospital ship was renamed *Relief*, and is under the control of the Medical Department of the Army, with an officer of that Department detailed to command the vessel.

Since the close of the fiscal year the steamship *Missouri*, used by the Medical Department of the Army as a hospital transport, has been fitted up for that purpose by the Quartermaster's Department at an expenditure of \$85,854.

Since the 1st of July, 1898, there have been chartered on the Atlantic coast four vessels, viz: Steamship *Wanderer*, steamship *La Grande Duchesse*, steamship *Tarpon*, and steamship *Ute*. These vessels were made auxiliary to the fleet of transports for transportation of troops and supplies to Cuba and Porto Rico, and increased the tonnage to 111,099 tons and the carrying capacity to over 25,000 men.

To meet the needs for light-draft vessels for towing and lighterage at Santiago, two fine ocean tugs were chartered early in July, 1898, the *Underwriter* and the *Gladisfen*. There were also chartered for service in the movement of troops and supplies at Montauk, after the return of General Shafter's army from Cuba, one large steamship for the transportation of sick and wounded, and five small steamers, three barges, and two flatboats. These vessels, since the abandonment of Camp Wikoff as a camp, have been dispensed with.

On the Pacific coast four additional vessels were chartered for the transportation of troops and supplies to Manila, viz: *City of Rio de Janeiro*, *Pennsylvania*, *St. Paul*, and *Tacoma*.

There were also purchased for the service of the Army on the Pacific Ocean two large, commodious steamships, the *Scandia* and the *Arizona*, which have been fitted up, the former as a hospital ship and the latter for the transportation of troops and supplies to the newly acquired islands of the Pacific Ocean. These vessels have a tonnage of 4,243 and 5,000 tons, respectively, and with the four chartered since July 1, 1898, increased the total tonnage of the fleet operating on the Pacific Ocean to 61,287 and the carrying capacity to over 20,000 men.

The chartered ships, steamship *Australia*, steamship *City of Sidney*, and the steamship *Colon*, which formed the first expedition of the Army to Manila, have returned to San Francisco and their charters have been canceled.

The carrying capacity of the chartered steamships employed in connection with General Shafter's army for the invasion of Cuba was not found adequate to promptly transport the number of troops, in addition to that army, required for Cuba and Porto Rico, and it therefore became necessary to increase the number of transport vessels with larger carrying capacity for men and animals with bilge keels to prevent rolling, and thus make the ships more comfortable for stock.

Congress being averse to admitting foreign ships to American registry, the Secretary of War decided to direct the purchase of vessels and have them fitted up to meet the needs of the Army for the safe and comfortable transportation of men and animals and the transportation of army supplies. Fourteen large steamships were purchased and fitted up for carrying men, animals, freight, etc. The following is a list of these vessels:

Name of vessel.	Tonnage.	Cost.	Class.	Carrying capacity.		
				Officers.	Men.	Animals.
Panama, No. 1	2,085	\$41,000	Freighter	10	400	
Port Victor, No. 2	2,792	175,000	do	25	1,100	
Rita, No. 3	2,194	125,000	do	15	700	
Mohawk, No. 20	5,658	660,000	Combination	80	1,000	1,000
Mobile, No. 21	5,780	660,000	do	80	1,000	1,000
Massachusetts, No. 22	5,673	660,000	do	80	1,000	1,000
Manitoba, No. 23	5,673	660,000	do	80	1,000	1,000
Minnewaska, No. 24	5,790	660,000	do	100	1,200	1,000
Mississippi, No. 25	3,733	350,000	do	40	800	800
Michigan, No. 26	3,722	350,000	do	40	800	800
Rumanian, No. 27	4,126	240,000	do	45	1,100	50
Obdam, No. 30	3,650	250,000	Troop ship	50	1,300	100
Berlin, No. 31	5,841	400,000	do	75	2,000	
Chester, No. 32	4,770	200,000	do			
Total	61,298	5,431,000		720	12,700	6,750

Eight of these vessels were provided with refrigerators for the transportation of fresh meat, 7 of them having a capacity of 1,000 tons each. Two, the *Panama* and the *Rita*, were captured by the Navy and were purchased by this Department after having been condemned as prizes by the proper courts and offered for sale.

All of these were merchant vessels and were temporarily fitted up as army transports to meet the urgent demands of the service, for which purpose an expenditure of \$178,018.37 was made.

It is the intention to overhaul all of these 14 vessels and refit them for the army-transport service. Two of them, the *Mohawk* and the *Mobile*, are now in course of refitting. Specifications for refitting the others are in preparation and the work will be commenced as soon as they can be spared from the service upon which they are now engaged.

When the vessels are fitted up in the manner designed the Department will possess a fleet of the finest transport vessels afloat and be thoroughly equipped to meet every demand upon it for ocean transportation.

TRANSPORTATION OF ARMY TO CUBA.

The fleet of transport ships which was concentrated at Port Tampa, Fla., in June last for the transportation of the army of General Shafter to Cuba, consisting of 38 vessels, including 2 water boats, 3 steam lighters, 1 collier, and 1 tug, had been fitted out for a voyage to the vicinity of Havana, distant about 400 miles; 2 decked barges were also provided by the Engineer Department. One of the steam lighters, the tug, and a decked barge failed to reach Cuba.

Upon embarkation of the troops it was found that the vessels would not safely and comfortably carry more than about 16,000 men with their 2,295 animals, equipments, ammunition, subsistence, and medical supplies on a voyage of 1,000 miles.

This entire fleet arrived without serious mishap at Daiquiri. Upon disembarkation of the army difficulty was encountered by reason of the lack of sufficient means for lightering the transports which could not approach the small dock at Daiquiri, and this office was advised of the needs of the command. Active efforts were immediately made by this office to supply the needed lighterage. Two decked barges in tow of the U. S. S. *Fern* were dispatched at once from Key West, Fla., which arrived safely, but were wrecked the day after their arrival. A sea-going tug, the *Nimrod*, chartered in Mobile, with three barges in tow, the *Ora*, *Ben*, and *Touart*, the former chartered, the last two purchased by the Department, was dispatched with orders to proceed direct to Santiago; and the chartered seagoing tug *Underwriter*, with two decked barges belonging to the Engineer Department of the Army, was dispatched to Santiago from New Orleans. These tugs lost all their barges and only one of the tugs succeeded in reaching Cuba. Under instructions from this office the steam lighter *Bessie* was dispatched from Tampa to Santiago, but, her boilers springing a leak, she returned to Tampa for repairs.

These unsuccessful efforts to relieve the situation of the army in Cuba led the Department to enter into contract with the firm of D. Van Aken & Co., of New York City, to fit out an expedition with a large force of mechanics of various trades, and laborers, with machinery, such as pile drivers, implements for construction of docks and railways, with the necessary materials—iron and lumber—for building docks, lighters, repairing railroads and engines. The company was furnished the steamship *Panama* and two fine ocean tugs, the *Gladisfen*, which was chartered, and the *Gypsum King*, which was purchased. This outfit proceeded to Santiago and thence to Ponce, Porto Rico, where their services have been of great value in the operation of the army in that harbor.

To provide lighterage for the transport ships this Department purchased the tugs *Gypsum King*, *Britannia*, and *Sarah*, the barges *E. L. Bartley*, *Willie*, *Annie*, *Mocha*, *Helen*, and the lighter *L. E. Rhinehardt*, costing \$241,800. These vessels, with the exception of the tug *Britannia*, which has been in service in New York Harbor and at Montauk Point, have been sent to Ponce, Porto Rico, where they are usefully employed.

The total expenditure for the purchase of all vessels of all classes has been as follows:

14 vessels on Atlantic coast.....	\$5, 431, 000
2 vessels on Pacific coast.....	800, 000
Tugs, barges, and lighters.....	245, 300
Total	<u>\$6, 476, 300</u>

Upon the cessation of hostilities in Cuba it became necessary, on account of sickness prevailing among the troops, to return General Shafter's army. The sick and wounded who were able to make the voyage were first considered in the matter of return, and these were brought to this country and placed in hospitals in the various coast cities. Montauk Point, Long Island, having been selected as a reception camp for the returning army, preparations were made for the safe and speedy landing of the troops as they arrived, and for the supplies required by them. For this purpose there were chartered eight small vessels and two flat boats, besides the steamship *Shinnecock*, 1,205 tons burden, which was employed to afford easy and comfortable transportation for the sick troops to other points where they might be sent for treatment. Upon breaking up of camp at Montauk these vessels were dispensed with.

INVASION OF PORTO RICO.

The reinforcements sent to General Shafter's army in Cuba, consisting of General Garretson's brigade, which sailed from Charleston, S. C.; a force of artillery from Tampa, Fla., and one regiment, the Eighth Ohio Volunteers, from New York City, arrived at Santiago just previous to the surrender of the Spanish army in that province, and their services were not needed. The Eighth Ohio Volunteers, being on the U. S. S. *Yale*, were disembarked, and the remainder of the command sailed to Ponce, Porto Rico, where it was disembarked. Other troops were dispatched to Ponce, viz:

General Ernst's brigade from Charleston, General Hains's brigade, General Schwan's brigade, General Grant's command, and eight batteries of artillery from Newport News, and Colonel Griffin's engineer regiment from New York, a total movement of about 16,000 men and 3,367 animals, with their artillery, equipments, and supplies, and a large quantity of ammunition and many army wagons.

Of these troops there have been returned to New York 5,581 men and 256 convalescents to Fort Monroe.

CANCELLATION OF CHARTERS.

As the chartered transport ships have arrived from Cuba and Porto Rico with returning troops orders were given for many of the vessels, upon the disembarkation of the troops, to proceed to their home ports for discharge from the service. A total of fifty-two vessels of the various classes have been discharged and returned to their owners, and others will be discontinued as rapidly as the interests of the service will permit.

EXPEDITIONS TO THE PHILIPPINE ISLANDS.

Seventeen of the large steamships on the Pacific and one large sailing vessel were chartered by the Department for the transportation of troops and supplies to the Philippine Islands, and two steamships have been purchased for this service.

The first expedition sailed from San Francisco, Cal., on May 25, under command of General Anderson, with 2,491 officers and men upon three steamships—*City of Sidney, Australia,* and *City of Peking.*

The second expedition, under command of General Greene, with 3,586 officers and men, sailed on June 15 on the steamships *China, Colon,* and *Zealandia.*

The third expedition, under command of General Merritt, with the command of General McArthur, consisting of 4,847 officers and men, sailed on June 25, 27, 28, and 29 on the steamships *Senator, Morgan City, City of Para, Indiana, Ohio, Valencia,* and *Newport.*

The fourth expedition, under command of General Otis, with 1,682 officers and men, sailed July 15 on the steamships *Peru* and *City of Puebla,* followed on July 19 by the steamship *Pennsylvania,* with 1,348 officers and men.

The last expeditions, under command of Gen. H. G. Otis, sailed on July 23 and 29 on the steamships *City of Rio de Janeiro* and *St. Paul,* with 1,735 officers and men.

These vessels have all arrived at Manila without mishap, and reports received show that the health and comfort of the men were maintained during the long voyage of over 7,000 miles.

The sailing ship *Tacoma,* with 30 enlisted men, 19 civilian teamsters, 210 horses and mules, 44 wagons and ambulances, and six months' supply of subsistence and forage, sailed from San Francisco on August 6. On August 21 the steamship *Arizona,* with 490 officers and men and 4 Red Cross nurses on board, sailed from San Francisco, and on August 29 the steamship *Scandia* sailed with troops for Honolulu and 173 officers and men for Manila.

The entire movements show that transportation was furnished from San Francisco to Manila for 16,405 persons, with their equipments and supplies.

TROOPS FOR HONOLULU.

Upon the acquisition of the Hawaiian Islands the First Regiment New York Volunteer Infantry was ordered to Honolulu for garrison duty. A contract was made for the transportation, at a per capita rate, of three companies of that regiment by a merchant vessel, 11 officers and 313 men, who sailed from San Francisco on August 18. The remainder of the regiment, 10 officers and 293 men, sailed for Honolulu on August 27 on the steamship *Scandia,* a vessel owned by the Quartermaster's Department, showing a total of 629 persons transported to Honolulu.

The total movements by transport ships up to September 15 have been as follows:

	Men.
To Cuba	28, 195
To Porto Rico.....	17, 460
To Manila	16, 405
To Honolulu.....	629
Returned from Cuba	21, 686
Returned from Porto Rico.....	5, 541
Civilian employees transported.....	2, 920
Total	92, 863

TRANSPORTATION OF SPANISH PRISONERS OF WAR.

Under the terms of capitulation for the surrender of Santiago de Cuba to the American Army, it was agreed that transportation should be fur-

nished by the United States Government for the Spanish prisoners of war to Spain and to provide subsistence to them while en route.

The Quartermaster's Department was directed to provide for carrying out the terms of this agreement. In response to public advertisements, proposals for the transportation from Santiago de Cuba to Cadiz, or to such other port of Spain as might be designated, for 1,000 commissioned officers and 24,000 enlisted men, and for their subsistence en route, were received and opened on July 20, 1898. Ten proposals were received, which were carefully considered, and the one submitted by an American citizen on behalf of the Spanish Trans-Atlantic Company was accepted, and contract entered into with that company for the transportation of all the prisoners of war, the commissioned officers to be provided with first-class cabin accommodations on the ships and the enlisted men with third-class or steerage passage, with suitable galley accommodations, conforming to the United States requirements as to space and ventilation for enlisted men, and to provide subsistence while en route equal to the garrison ration of the United States Army. The rates to be paid under the terms of the contract were for each commissioned officer \$55 per capita and for each enlisted man \$20 per capita, the men to be delivered on the ships by the United States.

The only other bid from responsible parties, and who represented steamship companies having facilities to carry out the contract, was the combined bid of the Anchor Line, Cunard Steamship Company, Limited; Hamburg-American Packet Company, Robert M. Sloman & Co., Frederick Leyland & Co., Limited; North German Lloyd Steamship Company, Royal Mail Steam Packet Company, Thomas Wilson Sons and Company, Limited; and Wilson & Furness Leyland Line, Limited, which bid was for officers \$110 and enlisted men \$55 per capita, steamers to be dispatched from Santiago de Cuba within forty-eight hours of their reported arrival or demurrage to be paid at the rate of 60 cents per capita per day, passenger capacity. If passengers are on board during such delay 40 cents additional per capita per day. Same demurrage rates to be paid if steamer be detained at place of debarkation by quarantine or other cause. "Will endeavor to have vessels at Santiago de Cuba between July 30 and August 10, 1898, but desire, if necessary, an extension of time to include the entire month of August."

As will be observed, this bid had demurrage conditions which would have amounted to a large sum in addition to the per capita, amounting for the actual number transported to \$1,312,915, whereas the contract entered into had no demurrage conditions, and the actual sum paid was \$513,860.

Mr. Solon F. Massey, agent Quartermaster's Department, was designated to superintend the embarkation under the general supervision of the chief quartermaster, Department of Santiago, and to report the number of officers and men which were put on board the vessels. The Government decided to include in the transportation the wives and children of the officers, and the priests and Sisters of Charity who had been in service in the hospitals and with the Spanish army.

The report of Mr. Massey states that the embarkation began on August 9, 1898, and was completed on September 17, 1898, and that 22,864 persons were embarked.

Mr. Massey states in his report that with the exception of the delay of eleven days in getting the Spanish prisoners from Baracoa and Sagua de Tanamo to Guantanamo, where the transport ships awaited them, the embarkation was expeditiously and satisfactorily accomplished; that he

inspected the ships and found all of them well arranged for the service they were engaged to perform and well equipped for the comfort of the men, and with ample quantities of food for the subsistence of the passengers for fifteen days and varied in quality; that three of the vessels were fitted out as hospital ships, viz, *Alicante*, *Cheribon*, and *San Ignacio*, which were well equipped for that service, with surgeons and assistants and modern appliances for the care and comfort of the sick. The cost for this service, as above stated, amounted to \$513,860.

WEEKLY STEAMSHIP LINE FROM NEW YORK TO CUBA AND PORTO RICO.

The permanent occupation of the islands of Cuba and Porto Rico by the Army has rendered necessary the transportation of large quantities of army supplies to those islands, and also the mails for troops. It was therefore determined to establish a regular weekly line of steamships to sail from New York to points in Porto Rico and Cuba and return to New York, for the transportation of supplies and mails for the Army, and also such officers, enlisted men, employees, and other persons who are entitled, by competent orders, to be furnished transportation by the Quartermaster's Department between those points. This line was opened Wednesday, August 31, 1898, on which date the steamship *Seneca* left New York with the Porto Rican Commission on board, sailing direct to San Juan, Porto Rico, where the commission disembarked and the vessel proceeded thence to Ponce, Porto Rico, and thence to Santiago de Cuba, at which places, after delivery of supplies and mails, she returned direct to New York with passengers and mails.

Since the sailing of the *Seneca* from New York a steamship has sailed from that port every Wednesday for Ponce, Santiago, and return, and it is anticipated that the fine transport ships now owned by the Department will be found amply sufficient to maintain this regular service and perform such other ocean transport service as is required for the maintenance of the armies serving in Porto Rico and Cuba.

TRANSPORTATION OF RELIEF SUPPLIES.

Large quantities of supplies have been transported by the Quartermaster's Department to Cuba for the relief of the people on that island, upon the request of the officers of the Red Cross Society, National Relief Association, and other kindred associations and individuals interested in the work of relief of the suffering Cubans.

Since the occupation of Santiago by the Army a large quantity of supplies belonging to the Red Cross Society and not needed at Santiago has been loaded on the chartered steamship *Clinton* and transported to Havana. The steamship *Comal* has been turned over to the Subsistence Department of the Army, and is engaged in the transportation of relief supplies to Havana and Matanzas.

ASSIGNMENT OF OFFICERS TO DUTY ON QUARTERMASTER'S TRANSPORTS.

The transport service of this Department for the transportation of troops and supplies by sea assumed large proportions soon after actual hostilities began. It became necessary and important, in order that this service be made effective, to assign an officer of the Army on the transports which were purchased by the Government. The officers so assigned, to a large extent, were volunteer quartermasters, who in the performance of their duty acted for both the Quartermaster's and Subsistence departments.

BARRACKS AND QUARTERS.

Congress, by act approved March 2, 1897, appropriated the sum of \$750,000 under head of "Barracks and quarters," and in the deficiency act of May 4, 1898, an additional sum of \$300,000, making a total of \$1,050,000 available for construction.

The sum of \$763,275.61 was expended during the last fiscal year in the construction and repairs of barracks, officers' quarters, storehouses, for camping grounds, and for rent.

The sum of \$74,816.84 was expended during the fiscal year for construction and repair of hospitals at military posts, which includes a post hospital at Fort Hamilton, N. Y., costing \$16,522; one at Fort Hancock, N. J., costing \$18,810.50; and an addition to hospital at Fort Wayne, Mich., costing \$12,357.

MILITARY POSTS.

In the act of Congress making appropriations for sundry civil expenses of the Government for the fiscal year ending June 30, 1898, there was provided "for the construction of buildings at and the enlargement of such military posts as in the judgment of the Secretary of War may be necessary, the sum of \$420,000, of which not less than \$50,000 shall be expended at the military post at Spokane, Wash. And the Secretary of War may, in his discretion, use not to exceed \$20,000 of said sum to purchase the former post trader's buildings at Fort Assiniboine, in Montana."

Twenty thousand dollars has been, in accordance with this law, expended for purchase of buildings at Fort Assinniboine, leaving \$400,000 available for construction. This sum has been apportioned as follows:

Fort Ethan Allen, Vt	\$69, 933. 60
Fort Point, Tex	35, 410. 00
Fort Hamilton, N. Y	125. 00
Fort Hancock, N. J	3, 823. 00
Fort Harrison, Mont.....	30, 000. 00
Jefferson Barracks, Mo.....	92, 528. 34
Fort Myer, Va	95. 00
Plattsburg Barracks, N. Y.....	94. 60
Plum Island, New York	43, 338. 96
New post near Seattle, Wash.....	50, 000. 00
New post near Spokane, Wash.....	55, 532. 00
Fort Wayne, Mich	100. 00
Willels Point, N. Y	17, 098. 40
Balance June 30, 1898	1, 921. 10
Total	400, 000. 00

FORT ETHAN ALLEN, VT.

There has been constructed at this post one double barrack, three double sets officers' quarters, all of brick, with plumbing, heating, and gas piping for same; also two cavalry stables and plumbing for same.

NEW POST NEAR SEATTLE, WASH.

There are being constructed at this post one double barrack, one double set captains' quarters, one double set lieutenants' quarters, one quartermaster and subsistence storehouse, and two double sets non-commissioned staff officers' quarters, all of wood, with plumbing and gas piping for same; also one bachelor officers' quarters of brick, and necessary plumbing, heating, and gas piping.

JEFFERSON BARRACKS, MO.

There has been contracted for and completed at this post one set of commanding officers' quarters, five double sets of officer's quarters, and three double barracks, all brick, including plumbing, heating, and gas piping for same.

NEW POST AT FORT POINT, TEX.

At this post there has been contracted for, to accommodate one battery of artillery, two double sets of officers' quarters, one double set noncommissioned staff officers' quarters, one barrack, one administration building, one guardhouse, one quartermaster and subsistence storehouse, one stable and wagon shed, and one shop, all of wood.

FORT HARRISON, MONT.

This post is being enlarged by the addition of one set commanding officer's quarters, one set noncommissioned staff officers' quarters, and one band barrack, all of brick, with necessary plumbing, heating, and gas piping.

NEW POST AT PLUM ISLAND, N. Y.

Buildings are being constructed at this post for the accommodation of a battery of artillery. These buildings consist of two double sets of officers' quarters, one double set noncommissioned staff officers' quarters, one barrack, one administration building, guardhouse, quartermaster and subsistence storehouse, stable, and shop, all of wood.

MILITARY POST AT SPOKANE, WASH.

This post is being completed for two companies by the erection of an administration building, quartermaster's stable, quartermaster and subsistence storehouse, guardhouse, hospital, hospital stewards' quarters, magazine, and shop, all of brick. Plumbing, heating, and gas piping provided in such of the buildings as required. Also a wood coal shed.

WILLETS POINT, N. Y.

There is being built at Willets Point, N. Y., one three-company mess hall and kitchen, with heating and plumbing, costing \$18,724.36.

WATER SUPPLY, SEWERAGE, ETC.

From the appropriation for army transportation the sum of \$298,175.60 was expended during the fiscal year for water supply, sewerage, plumbing, and drainage; \$73,417.28 for roads, walks, grading, bridges, etc.; \$15,572.92 for wharves.

From the appropriation for regular supplies, the sum of \$103,956.18 was expended for lighting, heating, and cooking apparatus.

CAMPS FOR THE TROOPS.

During the war, camps were established for military purposes at Tampa, Fla.; Mobile, Ala.; Camp George H. Thomas, Ga.; Camp Alger, Va.; Camp Poland, Knoxville, Tenn.; Jacksonville, Fla.; Miami, Fla.; Fernandina, Fla.; Camp Wikoff, N. Y.; Camp Hamilton, near Lexington, Ky.; Camp George G. Meade, Pa.; Camp Wheeler, Huntsville, Ala.;

and Camp Shipp, Anniston, Ala. All necessary temporary storehouses, hospitals, and other buildings were erected or hired, and tents floored. Water facilities were arranged for either by driven wells, pumping plants, or by connecting camps with city water mains. To insure a supply of good water many of the camps were furnished with a number of approved portable filters, and one with boilers for boiling water.

During the latter part of April, 1898, five buildings were rented at Key West, Fla., for a general hospital. An office and storeroom were also rented and temporary buildings constructed for kitchen, dining room, closets, etc., and a water-supply system, including distilling plant, installed for the hospital and post at Key West Barracks, Fla., at an approximate cost of \$20,682.25.

Many of the buildings at Fort McPherson, Ga., Fort Myer, Va., and Fort Thomas, Ky., were used as general hospitals.

On July 3, 1898, instructions were given for the erection of tents and temporary buildings on the Fort Monroe (Va.) reservation, for a general hospital to accommodate 500 patients and 100 attendants. The work was completed July 23, 1898, at a cost, exclusive of tents, of \$5,016.12.

On July 20, 1898, the Secretary of War authorized the establishment, near Fort Monroe, Va., of a pavilion hospital of 1,000 beds. A tract of land on the line of an electric railway, about 2 miles from the post, was leased, at \$500 per annum, and on this site the following buildings and improvements are in course of completion, the cost to September 30, 1898, being reported as follows:

Main buildings	\$40,500
Covered way	4,000
Plumbing and water and sewer system	17,293
Electric-lighting system	1,592
Laundry machinery	2,370
Side tracks, etc	1,287
Roads	610
Quarters for female nurses and medical officers	14,700
Plumbing same	3,039
Electric lighting same	235
Garbage cremator	1,456
Miscellaneous	3,164
Total	90,276

The sum of \$20,000 was authorized for a distilling plant at the Philippine Islands, including machinery for taking water from a tower to a higher level and providing larger camps with water from one or more sources of supply.

RESERVATIONS.

Under act approved July 8, 1886, forty-five lots, comprising part of old Fort Brady, Mich., have been sold at public and private sale, and the sum of \$39,100 realized therefrom. Nineteen lots still remain unsold.

The sum of \$7,398 has been realized from the sale of lots comprising old Fort Bliss, Tex. The act of August 9, 1894, provided that so much of the receipts from the sale of this reservation, not to exceed \$4,000, are appropriated for the construction of a military road between the city of El Paso and new Fort Bliss, Tex., and accordingly a contract was made for said road, at a cost of \$3,976.77.

Under act approved March 2, 1895, the citizens of Seattle, Wash., have finally tendered an acceptable site to the War Department for the establishment of a military post thereon, which included certain tide lands and right of way for wharf convenience. The title has been reported upon favorably by the Department of Justice.

Some 1,100 acres of land have been secured under the acts of Congress approved June 11, 1896, and July 7, 1898, for target range for use of troops stationed at Jefferson Barracks, Mo.

FIELD FILTERS.

The question of providing good water for the troops by the means of a field filter was made the subject of early and careful consideration. On the recommendation of the Surgeon-General of the Army, the Secretary of War authorized the purchase of 3,000 filters of special pattern, of the Berkefeld-Maignen and Pasteur-Chamberland manufacture, at a cost of \$69,100. These filters were distributed to the various military camps.

NATIONAL CEMETERIES.

There are 83 national cemeteries and 75 superintendents. The interments therein to June 30, 1898, were 337,296.

Ten thousand white marble headstones were provided during the fiscal year to mark the graves of known Union soldiers, sailors, and marines in national, post, city, and village cemeteries.

The roadway authorized by act of Congress approved June 8, 1896, from north side of Cache River Bridge, in Pulaski County, Ill., to connect with the graveled road running from Mound City, Ill., to the Illinois Central Railroad, in said county, has been completed, at a total cost of \$14,995.87.

Under the act of Congress approved June 4, 1897, the work of construction of extension of Phelps Boulevard, the Government road from Springfield, Mo., to the national cemetery near that city, was completed, at a total cost of \$2,230.60.

The sum of \$5,159.66 was expended during the fiscal year for repair of roadways which have been constructed by special authority of Congress.

Under a special appropriation of \$15,000 made by Congress by act approved January 28, 1898, contract was made for rebuilding the lodge and outbuildings, providing the necessary water supply and drainage, reconstructing the inclosing wall, providing gates, etc., at Fort Smith (Ark.) National Cemetery. The work is now in progress.

At Cavehill (Ky.) National Cemetery an addition of 2,366 square feet of ground adjoining the cemetery grounds was donated to the United States by the Cavehill Company, of Louisville, Ky., for the purpose of erecting therein a permanent rostrum. This addition was accepted by the Department, and the rostrum completed on May 19, 1898.

During the year all necessary improvements and repairs have been made at the various national cemeteries and the grounds kept in good condition.

GRAVES AT SANTIAGO.

On August 6, 1898, the President ordered that the graves of our soldiers at Santiago should be permanently marked, stating that the present marking will last but a short time, and before its effacement suitable and permanent markers should be put up.

On August 10, 1898, upon receipt of the above order from the Secretary of War, the chief quartermaster at Santiago, Cuba, was instructed by cablegram to take immediate steps to erect temporary markers and prevent effacement of any markers erected at soldiers' graves at Santiago.

On August 23, 1898, Mr. D. H. Rhodes, a capable and reliable employee of this Department, was sent to Santiago, Cuba, by this office, with directions to report to Maj. Gen. H. W. Lawton, commanding that department, for the specific duty of erecting suitable markers at the graves of our soldiers at Santiago and vicinity. He was especially instructed to ascertain the exact location of our dead, securing, if possible, the names, ranks, companies, regiments, and dates of death of all soldiers buried there, also names and dates of death of employees and other American citizens who had been interred there since the army landed in Cuba, making a complete record thereof, and take prompt measures for the erection of wooden markers at said graves until permanent ones could be supplied. Mr. Rhodes was further directed to make such examination of this subject as to be able to report and identify the burial place of every United States soldier and American citizen buried at Santiago and vicinity, and at the same time prepare a complete record of every case showing exact location of each burial site, in order that the identification of the place of burial of all our soldiers and citizens can hereafter be ascertained with accuracy. Mr. Rhodes reported his arrival at Santiago on August 31, 1898, and upon completion of this important work will submit full and detailed report to this office.

Under the act of Congress approved July 8, 1898, the sum of \$200,000 was appropriated to enable the Secretary of War, in his discretion, to cause to be transported to their homes the remains of officers and soldiers who die at military camps, or who are killed in action or who die in the field at places outside of the limits of the United States.

No definite plans have yet been formulated by the Department in regard to the removal of the remains to the United States, but the subject is under consideration.

ORGANIZATION.

Soon after the declaration of war it became apparent that the very large volume of business in the office of the Quartermaster-General and in the Quartermaster's Department at large could not be efficiently performed without a rearrangement in the assignment of the various departments of duty.

Congress on July 7, 1898, passed an act "to increase the efficiency of the Quartermaster's Department of the Army," which authorized the Secretary of War to make such distribution of the duties and labors of the Quartermaster's Department, as well as the assignment of its officers to important and special lines of duty, as might be deemed for the best interests of the service.

Under the provisions of the above-mentioned law this Department has been enabled to largely increase its efficiency by a proper distribution of the work, and a more advantageous assignment of its officers.

CHICKAMAUGA PARK, GEORGIA.

Col. J. G. C. Lee, assistant quartermaster-general, U. S. A., an able, experienced, and efficient officer, was chief quartermaster at Chickamauga Park, Georgia, where he assumed duty on April 19, 1898, and arranged for the reception and care of the large body of troops camped at that place. He continued on this duty until the camp was broken up. The duties and responsibilities devolving upon him were very exacting.

While there he arranged for the transportation of 70,734 officers and men, 8,366 horses, 6,673 mules, and 1,490 carloads of freight, and also attended to the reception and distribution of a vast amount of quartermaster, subsistence, and medical supplies. There were also purchased under his direction 1,839 horses and 2,880 mules.

NEW ORLEANS, LA.

Col. J. W. Scully, assistant quartermaster-general, U. S. A., stationed at New Orleans, La., also an experienced officer of this Department, performed important service at that station in selecting camps for the troops in that vicinity, inspecting transports with a view to charter, loading and unloading transports, fitting them out, besides the numerous other duties pertaining to the Quartermaster's Department at that station.

MOBILE, ALA.

Lieut. Col. J. W. Pullman was the officer of this Department on duty at Mobile, Ala., where he arrived on April 18, 1898. He performed the duties required of him pertaining to the supplying of the Fourth Army Corps while in that vicinity, besides giving careful attention to the fitting out of a number of Government vessels at that port.

CHICAGO, ILL.

Lieut. Col. F. B. Jones, chief quartermaster, U. S. Volunteers, was acting chief quartermaster, Department of the Lakes, Chicago, Ill., which duty he assumed on April 19, 1898. During the war Chicago was one of the principal points for the purchase of clothing and equipage, means of transportation, and various other articles of quartermaster supplies.

ARTILLERY SIEGE TRAIN.

Capt. Thomas Swobe, assistant quartermaster, U. S. Volunteers, was on duty as quartermaster with the artillery siege train at Tampa, Fla., from June 20 to August 21, 1898. This train consisted of 116 army and 55 escort wagons, 4 ambulances, 950 mules, and 12 horses belonging to the Quartermaster's Department, and 740 artillery horses.

NEW YORK DEPOT.

This depot is in charge of Col. A. S. Kimball, deputy quartermaster-general, U. S. A., who is assisted in the performance of the important duties pertaining to this station by Maj. J. W. Summerhayes, quartermaster, U. S. Volunteers (captain and assistant quartermaster, U. S. A.), who has charge of inspection of vessels and fitting out transports; Capt. I. W. Littell, assistant quartermaster, U. S. A., who has charge of the supply distribution and manufacture of clothing and camp and garrison equipage; Capt. Wirt Robinson, assistant quartermaster, U. S. Volunteers (first lieutenant, Fourth Artillery) has charge of transportation matters.

From April 1, 1898, to September 1, 1898, transportation was provided from this depot for 1,629 officers and 33,902 enlisted men.

Colonel Kimball's report shows that at the beginning of the war, in order to supply the immediate needs of the troops, large quantities of clothing material had to be purchased, and that in two weeks' time

100,000 blouses and trousers were manufactured and ready for delivery. The business at this depot was vastly increased during the war, but all demands were promptly and efficiently met by the officers on duty thereat.

ST. LOUIS DEPOT.

This depot is under the charge of Col. G. C. Smith, deputy quartermaster general, U. S. A., assisted by Maj. Charles A. Booth, quartermaster, U. S. A. All the business of this depot, including the manufactures and issues, was transacted promptly and efficiently.

In addition to the other expenditures 1,718 horses and 16,472 mules were purchased under the direction of Colonel Smith, who was assisted in this work by Maj. Thomas Cruse, quartermaster, U. S. Volunteers.

PHILADELPHIA DEPOT.

Col. J. V. Furey, deputy quartermaster-general, U. S. A., is in charge of this important depot of supply. He was assisted in his work by Lieut. Col. F. H. Hathaway, Maj. C. A. H. McCauley, and Capt. G. S. Bingham, of the Quartermaster's Department, U. S. A.

When war was declared this depot had ample supplies on hand to meet the requirements of the Regular Army, but the increase of troops on a war footing required extraordinary service to supply a force ten times greater than the established force on a peace footing. From the commencement of hostilities to the present date the officers and employees on duty at this depot have been engaged day and night to receive, issue, and ship supplies to the troops. Every department of work at this large depot was taxed to its utmost. The cutting department, where the garments are cut and prepared, has been largely increased, to the extent that the output is beyond 3,000 garments daily. Most of these articles are given out to sewing women, who numbered some 1,100 before the war, and now range in numbers between 4,000 and 5,000.

Tentage for troops exacted all the resources of the depot, so much so that it was found imperative to secure their manufacture elsewhere. Difficulty was experienced at first in securing the making of shelter tents. This, however, was overcome and deliveries in large quantities were daily supplied.

The transportation of troops and supplies, so far as came within the jurisdiction of this depot, was promptly met and well provided for.

JEFFERSONVILLE DEPOT.

This depot was under the charge of Col. Charles W. Williams, deputy quartermaster-general, U. S. A., assisted by Lieut. Col. Charles R. Barnett, quartermaster, U. S. Volunteers (major and quartermaster, U. S. A.).

Upon the breaking out of the war ample stores were on hand at this depot to meet all the requirements of the Regular Army in time of peace. The demands of the greatly increased military forces, however, made it absolutely necessary that large purchases of supplies be immediately made and the promptest possible delivery secured. Every resource of this depot was greatly taxed to meet the increased demands. It at once became necessary to enlarge all the departments of work upon a broader scale in order that the increased volume of business could be promptly handled.

An examination of the report of purchases, manufactures, and issues made at this depot from April 21 to August 15, 1898, shows a very large increase over the amount of work usually handled there, which required the most exacting service of the officers and employees. During the brief period of the war the shipments from this depot amounted to 6,409,298 pounds. The total number of articles shipped was 3,900,071.

SAN FRANCISCO DEPOT.

This depot is under the charge of Lieut. Col. Oscar F. Long, of this department. Under his careful attention all the troops concentrated at San Francisco and vicinity, from all parts of the Union, were promptly equipped and furnished with all needful quartermaster supplies. The fitting up of all the Government transports for use of the expeditionary forces to the Philippine Islands was promptly attended to by the officer in charge of this depot. The purchases and issues made at this depot from the beginning of the war to the close of hostilities were very large.

Lieutenant-Colonel Long states:

The organization of the depot previous to the present emergency provided for the supply of 3,000 men, ample time for preparation in securing the same having been allowed in times of peace; suddenly, without warning, the call for troops, their mobilization, and transportation to this point in large numbers necessitated energetic action to meet the demand, the supply for which was unprecedented and the calls for which were urgent, requiring immediate action.

Regiments, battalions, and detachments arrived from twenty States and Territories of the Union, some even without shoes and wearing bandanas in lieu of hats—without tentage, with nothing for comfort, and even without the few necessities which suffice for the simple needs of the soldier.

The field of supply of this depot was rapidly enlarged and, now that the emergency has passed, a consideration of the records shows that we have supplied with clothing and equipage, perfectly, properly, and completely, in accordance with law, orders and regulations, in filling approved requisitions, 31,198 troops—regulars and volunteers—destined for Cuba, Manila, Honolulu, and Alaska.

This depot has prepared for service and dispatched for Manila 21 transports chartered by the Government, a distance of 7,259 miles—one of the longest transport services recorded in military history—all of the troops being transported safely, without the loss of a life, for which the Quartermaster's Department can be held responsible.

The transports were provided with every modern convenience which intelligent foresight or thought could secure for the welfare and comfort of the troops, and the arrangements were carried out under the supervision and inspection and with the assistance of expert seamen and, in many instances, of naval officers. The sanitary arrangements and air space were indicated by Army medical officers, and the number of troops transported was the subject for orders of the commanding officers of the expeditionary forces. No mistake in this regard was made here attributable in the slightest degree to the Quartermaster's Department.

WASHINGTON DEPOT.

Maj. T. E. True, of this Department, is the officer in charge of this depot. Soon after the declaration of war the work increased so rapidly that it was found necessary to procure enlarged quarters for the proper transaction of the public business; accordingly, on July 25, 1898, his office was removed to the building on the southwest corner of Seventeenth and F streets (known as General Grant's old headquarters).

The work at this depot was augmented very largely during hostilities, and to properly dispatch the large volume of business required the most exacting services on the part of the officer in charge and his corps of employees. During the brief period of the war the shipments from this depot amounted to 28,940,406 pounds.

QUARTERMASTER'S DEPOT, BOSTON, MASS.

This depot is in charge of Maj. John McE. Hyde, (captain and assistant quartermaster, U. S. A.), who rendered zealous service.

The work at this depot during the war increased fourfold, and includes the purchase of considerable quantities of clothing, and large office and storage accommodations became necessary in order to meet the requirements of the service.

TAMPA DEPOT.

On April 16, 1898, Maj. J. W. Pope, quartermaster, U. S. A., was assigned to duty at Tampa, Fla., and had charge of the affairs of the Quartermaster's Department there until May 18, 1898, when he was transferred to San Francisco, Cal., for duty at Manila. Col. C. F. Humphrey, deputy quartermaster-general, U. S. A., arrived at Tampa, Fla., May 1, 1898, and on the 18th of that month assumed general supervision of the quartermaster's depot at that place, and of ocean transportation at Port Tampa, and on the same date Capt. J. B. Bellinger, assistant quartermaster, U. S. A., relieved Major Pope of his depot duties.

The very rapid concentration of troops there, as also of large quantities of supplies, made it extremely difficult at first to receive and assort the supplies and equip the troops.

The railroad situation was very unsatisfactory on account of a congestion of cars, due to the large quantity of supplies of all the Departments thrown in at that point in a short space of time, and it required several weeks to entirely relieve the situation.

In a period of four months this depot handled over 13,239 carloads of freight, all of which were either loaded or unloaded by employees of the depot. Besides the handling in this short space of time this large number of freight cars and their contents, must be considered the great number of cars handled by the depot in a much less time while transporting some 66,000 troops, with their baggage and over 15,000 animals.

Some 1,500 pack animals were received and issued at this depot.

Repair shops were established and wheelwrights, blacksmiths, and saddlers were kept continually at work repairing wagons and harness. This expedited the business very much and resulted in much saving to the Government.

Storehouses were secured as rapidly as needed and filled with supplies, the issuing being expedited as much as possible. Issues were made daily, Sundays included, from 7 a. m. until 7 p. m., and late into the night work would be carried on in order to prepare for the issues of the next day. No technicalities were permitted to cause delay in issuing the supplies to the troops.

A résumé of the work done by the Quartermaster's Department at Tampa in the short space of four months is as follows:

Army corps equipped	2
Freight cars handled (loaded or unloaded)	13, 239
Officers and men transported	66, 478
Horses and mules transported	15, 309
Horses and mules received	11, 389
Horses and mules issued	9, 919
Wagons "set up"	604
Teams "broken out" (six mules)	141
Teams "broken out" (four mules)	520
Pack trains equipped	21
Wagons and ambulances repaired	699
Transports fitted out	33
Transports cleared	78

DUNN LORING, VA.

Lient. Col. M. C. Martin, quartermaster, U. S. Volunteers, in addition to his other duties was placed in charge of the temporary depot at Dunn Loring, Va., from which the troops encamped at Camp Alger were supplied with all necessary quartermaster stores. He was assisted in his duties by Capt. James R. Hosmer, assistant quartermaster, U. S. Volunteers.

In connection with this depot there was also established a sub-depot at St. Asaph, Va., under the direct charge of Capt. E. H. Parsons, assistant quartermaster, U. S. Volunteers. The site selected for this sub-depot consisted of an unused race track near Alexandria, Va., containing about 40 acres. It is used as a corral and transportation depot where mules and horses are cared for and wagons and other means of transportation stored, repaired, and shipped. Since the declaration of war 6,000 mules and 614 horses were handled at this sub-depot, and 1,075 wagons were received, repaired, and issued.

TAMPA, FLA., AND SANTIAGO DE CUBA.

Col. C. F. Humphrey (now brigadier-general, U. S. Volunteers), chief quartermaster, arrived at Tampa, Fla., May 1, 1898, and the following day, at the request of General Shafter, took charge of the quartermaster's department at that place, so far as pertained to the fitting out of the expedition to Cuba. The same day he was placed in charge of the quartermaster's department at Tampa by telegraphic order from the honorable the Secretary of War.

Colonel Humphrey accompanied General Shafter's expedition to Santiago and attended to the unloading of the transports at the latter place. His work at both Tampa and Santiago was of the most important and laborious character, and was efficiently administered. He remained at Santiago until August 28, after the last troops of the expedition ordered north had embarked. With his report he submits a number of interesting and valuable statements in reference to the vessels belonging to or used by General Shafter's expedition to Cuba; also of the foreign vessels used to transport the Spanish prisoners of war to Spain. These statements are on file in this office.

Colonel Humphrey reports that transports began to arrive at Port Tampa early in May, and as fast as reported were fully coaled and watered and policed, and later fitted with bunks and stalls for the comfort of men and animals. The loading of the transports began at once, and was carried on speedily and systematically. This was, at best, difficult, owing to the limited wharf facilities. The place affords, in all particulars, most insufficient facilities for fitting out the many ships and embarking so large a force. The loading of all classes of stores was completed at 11 a. m. of June 6, and by 9 p. m., June 8, the troops were all on board and the expedition was fully embarked. The departure, however, was delayed until June 14, by reason of a report made by the naval authorities that the Spanish war vessels were seen in Nicholas Channel. The transports when sailing were in good order, but not in so prime condition as when the troops and animals were embarked.

The expedition arrived off the coast of Cuba, in the vicinity of Santiago, June 20, and debarkation began on the 22d at Daiquiri, some 17 miles east of Santiago. The debarkation of the infantry and cavalry from transports was completed by the night of the 23d. The

light artillery and battalion of heavy artillery were debarked two or three days later; and the troops of General Kent's division on the *City of Washington*, *Saratoga*, and *Santiago*, at this time lying some miles off the mouth of the harbor at Santiago, were debarked at Siboney by the 27th of the month. As soon as the debarkation of the troops was well under way the landing of the pack trains and pack equipage was begun and continued during the night and the following day until all the men, animals, and equipage were ashore. Then the draft mules, harness, teamsters, etc., were landed, followed by the landing of the rations, small arms, ammunition, light artillery and cavalry horses, harness, horse equipment, artillery carriages, artillery ammunition, and men. The landing of wagon transportation was then begun and pushed to the limit.

Many of the troops, however, debarked themselves in boats belonging to their ships during the two days and subsequent to 6 p. m. both days, at which hour the Navy hauled off and returned to their ships. "I can safely say that the men could in all cases have debarked themselves, as we had 153 boats capable of carrying ashore 2,500 men and equipments at one time." Besides the expedition's small boats, it had the steam lighter *Laura*, capable of easily carrying half a regiment at a time, and in which work it was employed during the two days of debarkation. This vessel was by far the most expeditious and comfortable means employed; and, furthermore, had it been necessary the *Cumberland* and *Manteo*, both light-draft steamers, would have been utilized for this service. The debarkation of troops was not at all difficult when compared with the work incident to the landing of animals, and especially in landing of war material and supplies belonging to the expedition.

Five small boats were wrecked in landing or endeavoring to land troops. Two of these were boats belonging to and manned by the Navy.

The landing of the animals was difficult and tedious, owing to the high surf and rough sea. It was not possible to land them at the wharf, even if time had permitted. They were therefore run overboard with halters and ropes on and led ashore by men in small boats. Often the animals would take a different course away from the boats, preventing rowing or steering, and causing confusion and the temporary loss of the animals. In all cases where animals got loose from a boat, and often when they had passed through the surf to firm footing where men were ready to receive them, they would turn back and swim out to sea, and in some instances the animals were drowned.

Had it not been for the failure of the steam-lighter *Bessie* to join, the desertion of the tugboat *Captain Sam*, and the loss of a decked-over lighter, the expedition would have been fairly well supplied for debarking the troops, lightering supplies, etc., of the expedition, and more satisfactory and expeditious results would have been accomplished.

The road leading from Daiquiri to Siboney and thence to Santiago was scarcely more than a trail, though it had been in use by the natives for centuries. That part between Siboney and Santiago was particularly bad, as it passed over a range of high ground and through depressions, ravines, water courses, and small rivers. There were no bridges. The road required a great deal of work to make it of any use. Being exceedingly narrow, turn-outs had to be made at intervals to provide for the passing of teams and pack trains. With the use of the road when wet it became impassable in many sections, and new road was cut through brush and timber where possible. The time given to the

improvement of the road by the United States engineers was very considerable, resulting in the material improvement of the old road by corduroying with brush, filling depressions, removing boulders, bridging streams, cutting through woods, and roughly making new road in part. With all this work done upon it, however, it was at no time in really good order, and a part of the time, as stated, was all but impassable, thus rendering it most difficult to meet the demands from the front. The moving of pack and wagon trains leaving Siboney and the front had to be timed, and with all care possible temporary blockades occurred, especially when the sick and wounded were being brought to the rear. Difficulties were also experienced in supplying the troops and animals at the front, owing to the lack of experienced teamsters. The pack-train teams were manned at first by civilians, but they rapidly fell sick, and their places had to be filled by soldiers, not always skillful in this work.

All the transports were taken into Santiago Harbor July 18, and by August 1 fifteen of them had been unloaded and sent North.

On August 4 orders were received to ship the expedition North, which was done with great dispatch, and it should be stated here that all these vessels were inspected and reported in good condition for the service required by Dr. Ives, chief surgeon First Division, Fifth Army Corps. It should be understood that many of the vessels had to be coaled, still many more watered, and nearly all required ice.

The work done by the Department throughout the campaign (beginning at Tampa) was enormous. There was no rest by day and none often by night, and, while much did not run as well and smoothly as it would have done at a later period, the expedition fulfilled its mission exceedingly well. The tabulated statements show in part what was accomplished, but no statement of the kind, however elaborate, could adequately show the actual work performed.

Colonel Humphrey states further that he did not leave Santiago until the last troops for duty of the expedition ordered North had embarked. All the sick had preceded him, except some 400 which the chief surgeon desired to remain behind.

Capt. Charles J. Goff, assistant quartermaster, U. S. Volunteers, was sent to Cuba on the steamer *St. Paul*, with a large supply of clothing and other quartermaster supplies, to report to General Shafter to establish a quartermaster's depot at such place as he might designate. The *St. Paul* sailed from New York on July 6, 1898, and arrived off Siboney, Cuba, July 10, 1898. The vessel was not discharged then, but the supplies were transferred July 15 to 17 at Guantanamo Bay to the small steamship *Comal*, which was held there until after the surrender, when she was anchored in the stream at Santiago de Cuba July 21, and in a few days thereafter issue of supplies to the troops commenced.

Lient. Col. J. W. Jacobs, chief quartermaster, U. S. Volunteers (major and quartermaster, U. S. A.), relieved Colonel Humphrey, and was assigned as chief quartermaster, Department of Santiago, Cuba. Lieutenant-Colonel Jacobs served in that capacity until October 11, 1898, when by reason of sickness he returned to the United States. This left the transaction of the business pertaining to the quartermaster's department at that place in the hands of Maj. John T. Knight, depot quartermaster, and of Capt. Alfred M. Palmer, assistant quartermaster, U. S. A., who are assisted by Captains Scott, Barker, and Gonzales, volunteer quartermasters.

DEPOT AT PONCE, PORTO RICO.

Lient. Col. J. W. Pullman, quartermaster, U. S. A., sailed from Tampa, Fla., on the steamer *Rita* on August 15, 1898, for Ponce, Porto Rico, with a full supply of quartermaster stores, employees, etc., for the purpose of establishing a quartermaster's depot at that place, from which to issue all necessary supplies required by the troops operating there. He arrived at Ponce on August 22, 1898, and established a temporary depot at that place.

The construction of a landing pier there, extending from the shore out into the harbor a distance sufficient to reach a depth of 6 feet, was directed by General Miles and probably has been completed by this time. The water in this harbor deepens very slowly from the shore out, and ships drawing from 12 to 20 feet have to anchor from one-half to three-quarters of a mile from shore.

Lieutenant-Colonel Pullman reports that there are no docks in Porto Rico suitable for docking ships, and at St. Thomas, the nearest point, there are dry-dock facilities, but the charges are very exorbitant.

DEPOT AT HONOLULU.

Lieut. Col. George Ruhlen, quartermaster, U. S. Volunteers (captain and assistant quartermaster, U. S. A.), is the officer of this Department who has been assigned to duty as depot quartermaster at Honolulu, where he arrived on August 28, 1898.

Lieutenant-Colonel Ruhlen reports that he has secured the necessary office rooms and storehouses for use of department headquarters and depot, and also about 15 acres of ground for a corral. He has organized and placed in service the Government mules and wagon transportation.

Arrangements have been made under which the Oahu Railway and Land Company, whose line is in operation from Honolulu to Waialula, a distance of 56 miles, will accept the regular Quartermaster's Department transportation requests for passenger service and Government bills of lading for freight service over their lines at their regular passenger and freight tariffs.

A building has been secured and ground surrounding it for general hospital. The building has been remodeled and enlarged, so that it now affords accommodations for 100 patients.

Upon the recommendation of the medical officers, galvanized iron boilers for boiling all the drinking water used by the troops were provided.

Lumber for flooring all the tents in both camps has been furnished, and the work is nearly completed. Temporary sheds for sheltering stores at the camp and at the quartermaster's corral have also been erected.

Arrangements have been made with local undertakers for the interment of the remains of deceased soldiers who died under treatment at the general hospital here. Up to this date 9 have been buried. They are all interred in a space specially set aside for the purpose in a local cemetery. Arrangements are being made to set up at the graves temporary wooden headboards, and a plat of the cemetery will be made for record.

The only resources of the country for building material are stone and sand. The stone is a very hard and brittle volcanic rock or lava, resembling in color blue limestone and in texture a very hard, gritty limestone.

Everything else requisite for construction work, except stone and sand, will have to be imported from the Pacific coast. The lime used is brought from California, but the cement is imported Portland, brought usually as ballast in sailing vessels direct from Europe. No bricks are made, those in use having been brought in ships as ballast from the Pacific coast. A limited quantity of lumber is kept on hand in local yards, but the whole supply in Honolulu to-day does not probably exceed 1,000,000 feet of all kinds. The price for which it is sold is not unreasonably high.

All the water heretofore used by the troops in camp and at the quartermaster's corral is that furnished by the city water-supply plant. The source of supply is artesian wells, found everywhere on this island; the water-bearing sand or gravel stratum being encountered at a depth of from 200 to 300 feet below sea level, and the water usually flows to the height of 32 feet above sea level when confined in tubes. Almost the entire irrigation system of the Island of Oahu is supplied with water from these artesian wells. The water obtained from these wells appears to be pure and free from any objectionable taste.

MANILA, PHILIPPINE ISLANDS.

Lieut. Col. J. W. Pope, chief quartermaster, U. S. Volunteers (major and quartermaster, U. S. A.), is the chief quartermaster at this station.

Owing to length of time required for mail communication no detailed report of operations of the Quartermaster's Department in the Philippine Islands has as yet been received.

OCCUPATION OF CUBA BY UNITED STATES FORCES.

Officers of this Department have been ordered to duty at Havana, Matanzas, Nuevitas, Gibara, Cienfuegos, and Manzanillo, Cuba, with a view to making every preparation possible for the United States troops previous to their arrival at the places named.

POST QUARTERMASTER-SERGEANTS.

The number of post quartermaster-sergeants in service at the beginning of the war being inadequate, Congress, by act approved July 8, 1898, provided for the appointment of 25 additional sergeants, and as rapidly as capable and suitable sergeants could be selected, appointments were made, so that there are now 99 of these sergeants in the service, who have been assigned to duty where their services are most urgently needed. The 6 remaining vacancies will be filled at an early date.

CONCLUSION.

In concluding this report, I desire to state that this office, during the war, has constantly kept in view the fact that the all-important duty devolving upon this Department was to provide for and promptly furnish the Army with all needful quartermaster supplies. For months the most energetic efforts have been made to the accomplishment of this purpose. Practically everything needed for the largely increased Army had to be purchased or manufactured and then transported to the numerous camps.

At the commencement of hostilities the regular establishment of this Department did not afford enough officers of experience to meet all the requirements of the extraordinary situation with which the Department was so suddenly confronted. Important problems had to be considered and solved, large business transactions had to be quickly concluded in order that the troops could be promptly equipped and hurried into the field, but notwithstanding all the difficulties it is believed that the Army has been well provided for. In this connection it should be remembered that within the few months of hostilities the military operations extended to such distant points as Santiago, Porto Rico, Honolulu, and the Philippines, where all needful quartermaster supplies for the Army have been promptly forwarded.

I feel deeply indebted to the officers of this Department for their valuable assistance in the accomplishment of the heavy task placed upon this branch of the public service. To them were committed most important trusts. Many of these officers have had responsible stations, great business responsibilities, and the most exacting executive duties. They deserve the highest credit for service efficiently performed, because upon the faithful and capable performance of the duties of a quartermaster the success of an army largely depends. The services of the officers who are on duty at the great depot and other important points where supplies are purchased and distributed are no less essential to success and involve no less labor and responsibility than those of the officers who accompany troops to the field.

I also gladly bear testimony to the zeal, fidelity, and intelligence with which many of the volunteer officers of this Department performed the important duties committed to them.

It is not only a matter of duty on my part, but also one of great pleasure, to here record my sincere appreciation of the able and efficient service of the officers associated with me in this office. They justly deserve the highest possible commendation for their intelligent and loyal discharge of the responsible and laborious duties imposed upon them. Day and night have they been at their posts of duty, rendering invaluable assistance, and only with their constant and untiring helpfulness has this office been able to promptly dispose of the immense volume of work coming daily to this office for consideration and action.

EMPLOYEES.

I do not forget the clerks and other employees serving in this office and throughout the Department at large. Without their assistance the work of this Department could not have been accomplished during the war emergency. Many of the permanent and experienced employees rendered most valuable and efficient service, some often working from twelve to fifteen hours a day, including Sundays and holidays. In a number of cases, by reason of their efficiency and experience, employees at Department headquarters were required to leave their homes and families to go to the field, and thereby were put to considerable expense without receiving additional compensation. These employees devoted all their energies to the interest of the public service. I strongly recommend that some action be taken by Congress to recompense all regular employees of this Department who performed this extraordinary service at a time when such service was of the greatest importance to the Government. A 20 per cent increase of their pay for one year would not be more than they justly deserve.

MEMORIAL BRIDGE.

I renew the recommendations of my predecessors that an appropriation be made by Congress for the construction of a bridge over the Potomac River between the Naval Observatory grounds and the Arlington Reservation, which will furnish a short and direct route to the cemetery and park and afford rapid communication between the capital and the large military post at Fort Myer, Va. This is an important matter, and it is hoped it may receive the consideration of Congress at its coming session.

Respectfully,

M. I. LUDINGTON,

Quartermaster-General, United States Army.

Hon. R. A. ALGER,

Secretary of War

APPENDIX.

WAR DEPARTMENT,
QUARTERMASTER-GENERAL'S OFFICE,
Washington, D. C., September 15, 1898.

GENERAL: I have the honor to submit my report of operations of the business coming under my charge in your office for the fiscal year ended June 30, 1898, subjects treated in the following order: Finance, money accounts, returns of quartermaster supplies, mail and record, and national cemeteries.

FINANCE.

In this branch are considered all matters relating to the procurement and distribution of funds; the compilation and preparation for Congress of the annual estimates of appropriations required for the service of the Quartermaster's Department, and for the Quartermaster-General's Office; the examination of estimates of funds received from disbursing officers; the action upon settlements made at the Treasury of claims and accounts pertaining to the Quartermaster's Department, etc.

Attention is respectfully invited to the accompanying statements, showing in detail the balance on hand at the commencement of the fiscal year; the amounts credited from appropriations, sales, etc.; the remittances to officers; amounts paid out on account of settlements; the amounts carried to the surplus fund, etc.

Herewith is also submitted a statement showing remittances from appropriations for this Department from the close of the fiscal year 1898 to September 1, 1898, aggregating in amount \$20,825,212.35.

Financial statement for fiscal year ending June 30, 1898.

[From the balance books in which all debits and credits are recorded.]

Appropriations.	Balance in Treasury undrawn July 1, 1897.	Appropriated.		Placed to credit of appropriations during the year, being the proceeds of sales to officers, etc.	Placed to credit of appropriations by Treasury transfer warrants.	Total to be accounted for.	Remitted to disbursing officers.	Requisitions issued on settlements made at Treasury of claims and accounts.	Amounts charged against appropriations by Treasury transfer warrants.	Amounts carried to surplus fund, act June 20, 1874.	Balance in Treasury undrawn June 30, 1898, and available for outstanding obligations.	Total accounted for.

Sewerage system, Fortress Monroe, Va	6,754.75
Improvement of Yellowstone National Park	5,000.00
Total	53,857.19
Grand total from July 1 to Aug. 15, 1898	20,783,167.68	42,044.69
Aggregate	20,825,212.35	

MONEY ACCOUNTS.

The assignment of work under this head consists of the administrative examination of the money accounts of officers serving in the Quartermaster's Department before their transmission to the Auditor for the War Department.

The following is a statement showing the number of accounts received, examined, and forwarded to the Auditor during the fiscal year ending June 30, 1898:

Received during the year ending June 30, 1898.....	2,583
Forwarded to the Auditor for the War Department during the year ending June 30, 1898.....	2,534

RETURNS OF QUARTERMASTER'S SUPPLIES.

Under this head the work consists of the examination of quarterly returns of quartermaster's supplies for the use of the Army; of property for use and protection of Yellowstone Park, and for Apache prisoners of war; of annual returns of contingent-fund property, and of supplies for use of the militia of the several States and Territories and of the District of Columbia.

This branch also takes preliminary action on reports of boards of survey, and inspection reports from quartermaster's depots and independent posts and stations.

The following statement shows the number of returns examined and letters written during the fiscal year ended June 30, 1898, viz:

Returns of quartermaster's supplies for use of the Army.....	1,063
Annual returns of supplies for use of militia	46
Miscellaneous returns above mentioned.....	8
Letters written pertaining to examination and settlements	2,274

The number of clerks employed during the year has averaged about 16.

MAIL AND RECORD DIVISION.

The following communications were received and letters and indorsements mailed—

Original cases	10,316
Received back	52,071
Letters and indorsements mailed	59,200

MISCELLANEOUS CLAIMS AND ACCOUNTS.

There remained on hand at the beginning of the fiscal year awaiting action—

67 miscellaneous claims, amounting to.....	\$13,868.20
14 accounts, amounting to.....	5,328.63

There were received during the year—

200 miscellaneous claims, amounting to.....	63,436.87
246 accounts, amounting to	12,165.90

Total, 527 claims and accounts, amounting to.....	94,797.60
---	-----------

Final action was taken on these, as follows:

18 claims were referred to other Departments	\$6, 272. 34
123 claims were sent to Treasury Department for settlement	26, 959. 12
99 claims were rejected	30, 354. 98
Reduction on claims referred.....	7, 226. 73
208 accounts were approved for payment of.....	13, 286. 90
Reduction on accounts approved	95. 00
5 accounts were referred to other Departments	1, 914. 23
11 accounts were rejected, amounting to.....	292. 94
<hr/>	
Total upon which final action was taken: 240 claims and 224 ac- counts, amounting to	86, 402. 24

On July 1, 1898, there were on hand awaiting action—

27 claims, amounting to.....	\$6, 491. 90
36 accounts, amounting to.....	1, 903. 46
<hr/>	
Total, 63 claims and accounts	8, 395. 36

CLAIMS UNDER ACT OF JULY 4, 1864.

There remained in this office on July 1, 1898, not finally acted upon, 96 claims presented under the act of July 4, 1864, amounting to \$119,299.57; the papers of one of this class of claims, amounting to \$1,368.80, having been transmitted to the Court of Claims during the year. Action upon these claims has been suspended awaiting additional evidence.

The papers pertaining to 3 claims, amounting to \$440.20, which had previously been investigated and disallowed by the Quartermaster-General, were, during the year, transmitted to the Committee on War Claims, House of Representatives; and the papers pertaining to 38 of such claims, amounting to \$32,815.84, were transmitted to the Court of Claims, or to the Department of Justice, for use as evidence in such cases as had been appealed to the Court of Claims under provisions of the law of March 3, 1883, known as the Bowman Act.

NEWSPAPERS AND PERIODICALS.

During the fiscal year newspapers and periodicals have been supplied for the enlisted men of the Army at 97 military-post libraries at a cost of \$3,295.64. These posts were garrisoned by 388 companies or detachments.

PRINTING AND BINDING.

During the fiscal year 666 requisitions were made on the Public Printer for printing and binding. The cost for the work, so far as bills have been received, is \$29,921.16, which sum does not include the cost of work done in the War Department branch printing office.

NATIONAL CEMETERIES.

The national cemeteries are classed as follows:

First class	25
Second class	20
Third class	16
Fourth class.....	22
<hr/>	
Total	83

The interments therein to June 30, 1898, are:

Known	186,409
Unknown	150,887
Total	337,296

There are 75 superintendents, the total number authorized. Changes during the year: Appointed, 4; discharged, 2; resigned, 1; died, 1. Two assistant superintendents are serving on probation preparatory to appointment as superintendents when vacancies occur.

Removal of remains of soldiers buried in inappropriate places to permanent post or national cemeteries were as follows:

From—	To national or post cemeteries.	Num-ber.
Peola, Wash	Fort Walla Walla, post cemetery	1
Wilsons Creek, Missouri	Springfield, Mo., National Cemetery	1
Fort Concho, Tex	San Antonio, Tex., National Cemetery	17
San Antonio, Tex	do	3
Pringle, S. Dak	Custer Battlefield, Montana National Cemetery	1
Sharpsburg, Md	Antietam, Md., National Cemetery	1
Hurley, Tenn	Shiloh, Tenn., National Cemetery	1
Total removed	25

Headstones.—Ten thousand white marble headstones were provided to mark the graves of known Union soldiers, sailors, and marines in national, post, city, and village cemeteries.

Indigent soldiers.—Under the acts of Congress (sundry civil) making appropriations for “Expenses of burying in the Arlington National Cemetery, or in the cemeteries of the District of Columbia, indigent ex-Union soldiers, sailors, and marines of the late civil war who died in the District of Columbia,” claims for the burial of 41 such persons have been paid, at a total cost of \$1,585.50.

Roadways.—The roadway authorized by Congress June 8, 1896, from the north side of Cache River Bridge, in Pulaski County, Ill., to connect with the graveled road running from Mound City, Ill., to the Illinois Central Railroad in said county, was completed at a total cost of \$14,995.87. Length of road, 4,960 feet. During the year this road was seriously damaged by high water, and is now being repaired.

Under the act of Congress (sundry civil) approved June 4, 1897, appropriating the sum of \$2,700 “For the construction and completion of an extension of Phelps boulevard, the Government road from Springfield, Mo., to the national cemetery near that city,” the work has been completed at a total cost of \$2,230.60. Length of extension, 834 feet.

Under the acts of Congress (sundry civil) making appropriations for “Repairing roadways to national cemeteries which have been constructed by special authority of Congress,” repairs have been made to the roadways leading to the national cemeteries at Alexandria, Va.; Antietam, Md.; Corinth, Miss.; Culpeper, Va.; Fayetteville, Ark.; Florence, S. C.; Fredericksburg, Va.; Marietta, Ga.; Mound City, Ill.; Natchez, Miss.; Newbern, N. C.; Port Hudson, La.; Richmond, Va.; Staunton, Va., and Vicksburg, Miss. Amount expended, \$5,159.66.

Memorial Day (May 30) was observed at the several national cemeteries by appropriate services, conducted by the Grand Army of the Republic and similar organizations, assisted by school children and citizens.

Improvements and repairs of national cemeteries.—At the Andersonville, Ga., National Cemetery the lodge was repaired and drainage provided for protection of the foundation.

At the Antietam, Md., National Cemetery necessary repairs were made to the lodge, an addition of two rooms made to the stone outbuilding, and a new wooden flagstaff 100 feet in length erected.

At the Arlington, Va., National Cemetery 3,770 linear feet of blue-stone wall on the west and south lines of the cemetery, contracted for during the previous fiscal year, and 1,314 linear feet of red sandstone wall on the eastern side of the cemetery, contracted for during the present fiscal year, to inclose the new addition authorized January 11, 1897, have been completed. Necessary repairs were made to the mansion, outbuildings, drainage, water supply, and granolithic pavements, and the grounds kept in excellent condition. A contract was made for a set of ornamental wrought-iron drive and walk gates with stone posts, to be placed at the western (Fort Myer) entrance to the cemetery. The work is now in progress. Contracts have also been made for repointing the inclosing wall on the western side of the cemetery, and for the connecting roadway in the new addition.

At the Baton Rouge, La., National Cemetery the plan for underdraining the lodge, adopted during the previous fiscal year, having been proved satisfactory, the building was thoroughly repaired and the grounds kept in good order.

At the Beaufort, S. C., National Cemetery necessary repairs were made to the lodge and outbuilding, the gates at the principal entrance to the cemetery repaired, and the stone posts reset.

At the Brownsville, Tex., National Cemetery the lodge was repaired and painted, and a shed for fuel constructed.

At the Camp Butler, Ill., National Cemetery necessary repairs were made to the lodge, the inclosing wall repaired and repointed, the flagstaff painted, and the grounds kept in good order.

At the Cave Hill, Ky., National Cemetery an addition of 2,366 square feet of ground adjoining the national cemetery grounds was donated to the United States by the Cave Hill Cemetery Company, Louisville, Ky., for the purpose of erecting thereon a permanent rostrum. This addition was accepted by the Department, and the rostrum, completed May 19, 1898, was dedicated with appropriate ceremonies May 30. Necessary repairs were made to the lodge and outbuilding, and the grounds properly cared for.

At the Chattanooga, Tenn., National Cemetery necessary repairs were made to the lodge and buildings, 1,700 linear feet of the inclosing wall repointed, the driveway resurfaced with gravel, and the water supply increased by connection with the city main.

At the Corinth, Miss., National Cemetery the lodge and inclosing wall were repaired and a contract awarded for the construction of an addition to the outbuilding. The work is now in progress.

At the Cypress Hills, N. Y., National Cemetery the lodge and outbuildings were repaired and the drainage improved by connection with the city sewerage.

At the Fredericksburg, Va., National Cemetery necessary repairs were made to the buildings and grounds and the water supply increased by connection with the city main.

At the Finns Point, N. J., National Cemetery repairs were made to the lodge, inclosing wall, and approach road, and a frame stable erected.

At the Fort Gibson, Ind. T., National Cemetery repairs were made to the lodge, cistern house, and inclosing wall, and a stone outbuilding erected to replace a frame structure destroyed by fire May 28, 1897.

At the Fort Leavenworth, Kans., National Cemetery necessary repairs were made, the grounds kept in good order, and the trellis roof of the rostrum renewed.

At the Fort Smith, Ark., National Cemetery, on the night of January 11, 1898, the cemetery was visited by a tornado, which totally destroyed the lodge and outbuilding, damaged the rostrum and iron flagstaff, and in part destroyed the brick inclosing wall, uprooted trees, and overturned and damaged a number of headstones and monuments, the total destruction being estimated at about \$17,000. Under a special appropriation (\$15,000) approved January 28, 1898, contracts were made for rebuilding the lodge and outbuilding and providing the necessary water supply and drainage therefor, repairing and in part reconstructing the inclosing wall, and providing a set of ornamental wrought-iron drive and walk gates for the principal entrance, repairing the rostrum and flagstaff, and repairing and resetting the broken monuments. The rostrum and flagstaff have been repaired, and the remainder of the work is in progress. Amount expended to June 30, 1898, \$748.15.

At the Jefferson Barracks, Mo., National Cemetery the lodge was repaired and painted and the grounds properly cared for, an iron gate provided for an entrance on the western side of the cemetery, and a frame privy erected for public use. An additional water supply was also provided by connection with the 4-inch water pipe supplying the military post of Jefferson Barracks.

At the Jefferson City, Mo., National Cemetery necessary repairs were made and the sidewalk in front of the cemetery graded and paved.

At the Knoxville, Tenn., National Cemetery necessary repairs were made, the trellis roof of rostrum renewed, the water supply increased by connection with the city service, and the grounds properly cared for. A contract was made for construction of a brick outbuilding to replace an old frame structure. The building was completed since the close of the fiscal year.

At the Little Rock, Ark., National Cemetery the lodge was thoroughly repaired, a new sidewalk constructed, and the inclosing wall repaired and repointed.

At the Mobile, Ala., National Cemetery necessary repairs were made, and the old brick wall separating the National from Magnolia Cemetery on the north, west, and east sides removed.

At the Natchez, Miss., National Cemetery necessary repairs were made to the office and outbuilding, and a wooden flagstaff 75 feet in length, contracted for during the previous fiscal year, erected. A contract was made for a brick addition of two rooms to the superintendent's lodge, which was completed since the close of the fiscal year.

At the Newbern, N. C., National Cemetery necessary repairs were made, and a new wooden flagstaff 75 feet in length erected. An addition of two rooms to the superintendent's lodge was authorized, and the work is in progress.

At the Philadelphia, Pa., National Cemetery repairs were made to the mansion, the avenues macadamized, and the grounds kept in good order. The water supply was increased by connection with the city service, the old windmill removed, and the well filled up and the ground graded.

At the Richmond, Va., National Cemetery necessary repairs were made and the grounds kept in good order. A contract was made for a brick addition of two rooms to the superintendent's lodge. The work is in progress.

At the Rock Island, Ill., National Cemetery the iron fence inclosing the cemetery was repaired and painted, the walks improved, and the grounds put in order.

At the San Francisco, Cal., National Cemetery necessary repairs

were made and the grounds and walks kept in good order. Memorial Day was observed by the Regular Army and Navy Union, George H. Thomas Post, G. A. R., and the troops at the Presidio.

At the Santa Fe, N. Mex., National Cemetery the coping of the stone inclosing wall was repointed, and an additional supply of water obtained for irrigating purposes from the Santa Fe Water and Improvement Company.

At the Staunton, Va., National Cemetery a contract was awarded for construction of an additional story, containing three rooms, to the superintendent's lodge. The work is now in progress, to be completed at an early date.

At the Soldiers' Home, District of Columbia National Cemetery, repairs were made to the lodge and outbuilding, 850 linear feet of the stone inclosing wall repaired, and additional drainage provided for a new burial section.

At the Winchester, Va., National Cemetery repairs were made to the lodge and outbuilding, 175 linear feet of the north inclosing wall rebuilt, and a brick privy erected for public use.

At all other national cemeteries necessary repairs were made and the grounds properly cared for.

A statement showing the expenditures on account of the several national cemeteries is submitted herewith, marked A.

Respectfully submitted.

JAS. M. MOORE,

Assistant Quartermaster-General, United States Army.

The QUARTERMASTER-GENERAL OF THE ARMY.

A.—Disbursements of appropriations for national cemeteries for the fiscal year ended June 30, 1898.

The balance of the appropriation (\$100,000) is placed to the credit of officers of the Quartermaster's Department, and is required for the payment of outstanding indebtedness.

WAR DEPARTMENT,
QUARTERMASTER-GENERAL'S OFFICE,
Washington, D. C., September 28, 1898.

GENERAL: I have the honor to submit herewith the following report of the operations of the transportation division of this office during the fiscal year ended June 30, 1898.

Up to June last this division had charge of the supply of all means of transportation for the Army, together with cavalry and artillery horses, wagons, ambulances and vehicles, draft and pack animals, and all the articles necessary to the proper equipment of the same. Owing to the emergency of the war with Spain greatly increasing the demand for all these articles, the duties of this branch were divided by the Quartermaster-General in June, and the supply of means of transportation put under the supervision of Col. C. P. Miller, whose report will cover the operations for the entire fiscal year.

The present report of the transportation division will, therefore, be confined to rail and water transportation and telegraph and telephone matters, which also pertain to the duties of the officer in charge of this division.

The following statement shows that during the fiscal year ended June 30, 1898, transportation was furnished for 709,617 persons, 60,632 animals, and 1,529,585 tons of material:

	Railroad.	Water.	Wagon.	Stage.	Government vessels.	Total.

SUMMER ENCAMPMENT AND RIFLE COMPETITION.

From reports received it is shown that there was expended during the fiscal year 1898, in the transportation of troops in connection with summer encampments, practice marches, field maneuvers, and instructions, the sum of \$26,399.54; also for the transportation of enlisted men, to engage in rifle competition and target practice, the sum of \$10,526.80.

Where expended.	Summer camps.	Rifle competition.
Department of California.....	\$8,563.62	\$71.24
Department of the Colorado.....	2,072.35	2,581.30
Department of the Columbia.....	97.35
Department of Dakota.....	4,313.29	1,205.14

Total.....	26,399.54	10,526.80

ACCOUNTS AND CLAIMS FOR TRANSPORTATION.

The records show that 4,729 accounts and claims for transportation, amounting to \$227,765.87, have been received, examined, and transmitted for settlement during the fiscal year ended June 30, 1898, exclusive of the extraordinary movement of troops incidental to the war with Spain.

Of these, 633 accounts, amounting to \$55,242.37, were chargeable to appropriations of the War Department for the several fiscal years in which the service was rendered; 2,403 accounts of other Departments, amounting to \$38,128.33, exclusive of bond-aided service and telegraph accounts.

Bond-aided Pacific railroad companies.

SALE OF THE UNION AND KANSAS PACIFIC RAILROAD.

The main line of the Union Pacific Railroad Company ceased to be a bond-aided road November 1, 1897, under following Treasury Circular, No. 187 of 1897, and the Kansas Division ceased to be bond-aided March 31, 1898, under following Treasury Circular, No. 83 of 1898:

[Treasury Circular No. 187.]

TREASURY DEPARTMENT, OFFICE OF THE SECRETARY,
Washington, November 11, 1897.

By the terms of an agreement recently entered into between the Secretary of the Treasury and the Union Pacific organization committee for the settlement and payment in full to November 1, 1897, of the indebtedness of the Union Pacific Railway Company to the United States, all claims for services rendered by said company to the United States remaining unsettled or unpaid on November 1, 1897, and all claims for like services thereafter rendered, are required to be paid to the company in cash.

In order, therefore, to facilitate the adjustment of matters involved in such settlement and to carry into full effect the terms of said agreement, it is hereby ordered that all pending claims for transportation services heretofore rendered by said company to the United States, and all claims for like services hereafter rendered, shall be settled by the accounting officers in favor of said company without reference to bond and interest account or to the requirements of the sinking fund created by the act of May 7, 1878.

The provisions of Department Circular No. 45, of March 9, 1895, are hereby modified accordingly.

L. J. GAGE, *Secretary.*

[Treasury Circular No. 83.]

TREASURY DEPARTMENT, OFFICE OF THE SECRETARY,
Washington, May 17, 1898.

Department Circular No. 67 of 1898 is hereby amended to read as follows:
"The Kansas Pacific Railroad having been sold under a recent decree of the United States circuit court for the district of Nebraska, and the principal of its bonded indebtedness to the United States, amounting to \$6,303,000, having been paid into the Treasury under the terms of the sale, it is hereby ordered that one-half of the amount of compensation for services rendered to the United States by the Kansas Pacific Railroad Company over the bond-aided portion of its line prior to and including March 31, 1898, the date of the delivery of the road to its present owners, shall be withheld and covered into the Treasury as a reimbursement to the United States for interest paid on the bonded indebtedness of the company. Compensation for like services rendered after the date referred to shall be paid to the company in cash, without reference to its interest account with the United States."

The provisions of Department Circular No. 45, of March 9, 1895, are hereby modified accordingly.

L. J. GAGE, *Secretary.*

TELEGRAPH ACCOUNTS.

The accounts for telegraphic service examined by this office and transmitted for settlement were 291, amounting to \$4,889.99.

VESSELS OWNED BY QUARTERMASTER'S DEPARTMENT.

This Department has kept in service, at points named, where constant use is required, 11 steamboats, which it owns. The cost of maintaining these, including repairs, during the fiscal year 1898, was \$90,757.34. This statement is exclusive of transports purchased for prosecution of the war with Spain.

The General Rufus Ingalls was transferred to Corps of Engineers, July 29, 1897. (88255 Q. M. G. O.)
The General D. H. Rucker transferred to Board on Regulating Seacoast-Artillery Fire, New York, Oct. 1, 1897.
\$2,300 was paid for a substitute boat while Resolute was under repairs, in addition to above cost.
\$294 was paid for a substitute boat while the Monroe was under repairs, in addition to above cost.
\$910 was paid for temporary hire of substitute for General McDowell, not included in the foregoing.

WATER TRANSPORTATION.

In anticipation of the possible needs of the Quartermaster's Department for ocean transportation for the movement of troops and supplies to Cuba, action was early taken by this office to be prepared for such an emergency, and correspondence was entered into with the various American steamship companies conducting the ocean traffic on the Atlantic and Gulf coasts to ascertain what vessels were available for charter for that purpose.

The responses received from the steamship companies were prompt, and indicated a desire upon their part to afford every means at their

command to aid the Government to provide suitable transportation of the Army and its supplies by sea.

An experienced officer of the Department was sent to New York to consult with the companies whose headquarters were in that city and to inspect and report upon the suitability of the vessels offered for charter. Similar measures were taken at all other points on the Atlantic and Gulf coasts where vessels were offered for charter, and in many instances, where practicable, the inspection was aided by an officer of the Navy detailed by the Navy Department for the purpose.

These reports enabled this office to select those vessels most desirable and best adapted for the transport service of the Army.

The following is a list of the companies with whom charters were entered into prior to July 1, 1898, for services of vessels, showing names of vessels, their tonnage, rate of charter per day, and their carrying capacity:

Owner.	Name of vessels.	Ton- nage.	Rate of charter per day	Carrying capacity.			Remarks.

In addition to the above-mentioned vessels, there were chartered from the Western Union Telegraph Company, for the Signal Service of the Army, the steamship *Adria*, at \$200 per day, used as a cable boat; from Capt. James McKay the steamship *Fanita*, at \$150 per day, for the secret service of the Army, and from John E. Reyburn the steamer *Gretchen*, at \$200 per month, for inspection purposes.

The operations in the harbor of Manila by the Navy rendered it necessary that provision be made for the transportation of troops and supplies to the Philippine Islands.

Some difficulty was met with in securing available transport ships on the Pacific coast, not because of the unwillingness of the steamship companies to charter their vessels, but from the fact that, their ships being engaged in traffic across the Pacific Ocean and as far south as Panama and the transaction of their business being undisturbed by the war, their vessels were not idle and could be secured only upon their arrival at their home ports on the Pacific coast.

In order to secure sufficient means of transportation, it became necessary to ask Congress to grant American registry to some of the ships available for charter, but were under foreign registry.

The following is a statement of the steamship companies from whom vessels were chartered on the Pacific coast, names of the vessels, their tonnage, rate of charter, and carrying capacity:

Owner.	Name of vessels.	Tonnage.	Rate of charter.	Carrying capacity.	
				Officers.	Men

Total		41,152		629	13,059

This statement shows the employment on the Atlantic and Gulf waters at the close of the fiscal year of 43 transport vessels, having an aggregate tonnage of 104,201 tons, with a carrying capacity of 23,622 men, with their arms, ammunition, equipments, subsistence, and medical supplies, and 6,746 animals; 4 water boats, with a carrying capacity of 820,000 gallons, 3 steam lighters, 2 ocean tugs, and 3 deck barges.

On the Pacific coast, 14 transport ships, having an aggregate tonnage of 41,152 tons, with a carrying capacity of 13,688 men, with their complete outfit of camp and garrison equipage, arms, ammunition, medical supplies, and subsistence for a voyage of over 7,000 miles.

The combined fleets consisted of 69 vessels of all classes, with a total tonnage of 145,353 tons, and affording the means for movement of an army of over 37,000 men by sea.

To convert the vessels composing these fleets from their ordinary uses as freight vessels into safe and commodious transport ships extensive alterations were necessary. There had to be constructed sleeping accommodations for the men, stalls for the animals, a largely increased water capacity by construction of extra tanks and the supply of a large number of barrels and casks, and provisions made for pure-air ventilation. For this last-mentioned purpose many of the vessels were supplied with electric plants for running fans and for lighting the ship.

Much care and attention were given to the fitting out of the transports on the Pacific coast, to provide the troops with comfort, cleanliness, protection to health, and the proper means for cooking during the long voyage to Manila. For these purposes increased galley facilities, lavatories, and water-closets were constructed in all these vessels.

The reports received in this office from officers under whose supervision the ships have been fitted up show the following amounts expended for this purpose to the close of the fiscal year, viz:

For fitting up ships of the Atlantic and Gulf fleets	\$98, 364. 67
For the Pacific fleet (which includes the sum of \$7,694.30 for fitting up of the steamship <i>City of Peking</i> , which was chartered by the Navy Department and turned over to this department for transportation of the Army)	88, 268. 01
Total	186, 632. 68

Under the terms of the charter parties for services of transport vessels the Government has furnished all coal for running the vessels and the water required for boilers and drinking purpose.

The supply of coal for this purpose has been purchased, so far as possible, by contract at the lowest obtainable rates for delivery to the various ports where needed to supply the ships, and full report of the contract prices and quantities purchased will be found in the report of the branch of the office which is charged with the contract and purchase of coal.

The total cost for the supply of water is about \$21,000.

The payments for services of the vessels under charter to the close of the fiscal year have been as follows:

On the Atlantic and Gulf waters	\$1, 007. 952. 50
On the Pacific coast	319, 764. 17
Total	1, 327, 716. 67

HOSPITAL SHIPS.

To provide for the care and transportation of sick and wounded, the Quartermaster's Department purchased from the Maine Steamship Company, of Portland, Me., the steamship *John Englis*, for the sum of \$450,000. This ship has been fitted up as a hospital ship, with every appliance for the care, comfort, and treatment of sick and wounded.

For this purpose the interior of the ship was remodeled, and provided with electric plant for lighting and purifying, sterilizing and laundry plants, and also two steam launches. The expenditures for refitting of the ship, as shown by the accounts received in this office, amount to \$136,851.11.

The ship was renamed *Relief*, and is under the control of the medical department of the Army, an officer of that department being detailed to command the vessel.

Since the close of the fiscal year the steamship *Missouri*, used by the medical department of the Army as a hospital transport, has been fitted up for that purpose by the Quartermaster's department at an expenditure of \$85,854.

CHAS. BIRD,
Colonel and Quartermaster, United States Volunteers.

OPERATIONS SINCE THE CLOSE OF THE FISCAL YEAR 1897-98.

ORGANIZATION OF THE DIVISION OF TRANSPORTATION.

General Orders, No. 122, dated Adjutant-General's Office, August 18, 1898, publishes the following orders of the Secretary of War:

WAR DEPARTMENT, *Washington, July 18, 1898.*

A division of transportation is hereby created in the Quartermaster's Department, which shall be charged with the supervision and control of all rail and water transportation.

Col. Frank F. Hecker, U. S. Volunteers, is hereby detailed as chief of this division, and Col. Charles Bird, U. S. Volunteers, as deputy chief.

Their report upon the work of this division will be made direct to the Quartermaster-General.

R. A. ALGER, *Secretary of War.*

Owing to the increased volume of business due to active operations of the Army, it was found necessary to divide the work of the division of transportation into two branches, one to conduct the business pertaining to railroad transportation, and the other to have exclusive charge of the ocean transport service.

Since the beginning of the present fiscal year there have been chartered on the Atlantic coast the following-named vessels, viz: From the New Orleans, Belize Royal Mail Steamship Company, the S. S. *Wanderer*, of 531 tons burden, at \$220 per day; from the Plant Investment Company, the S. S. *La Grande Duchesse*, of 5,018 tons burden, at \$1,200 per day, and S. S. *Tarpon*, of 450 tons burden, at \$250 per day; and from H. P. Kirkham, the steamer *Uto*, of 899 tons burden, at \$165 per day.

These vessels were made auxiliary to the fleet of transports for transportation of troops and supplies to Cuba and Porto Rico, and increased the total tonnage of the troopships of the Atlantic fleet to 111,099 tons, and increasing the carrying capacity to over 25,000 men.

To meet the need for light-draft vessels for towing and lighterage at Santiago, Cuba, two fine ocean tugs were chartered early in July, the *Underwriter*, at \$160 per day, and the *Gladisfen*, at \$90 per day, and sent to that place.

There have also been chartered, for service in the movement of troops and supplies at Montauk Point since the return of General Shafter's army from Cuba, one large steamship, at \$1,000 per day, for the transportation of sick and wounded, and five small steamers, three barges, and two flatboats, at a total cost of \$510 per day. As that place is abandoned as a camp, the services of these vessels are being dispensed with as rapidly as possible.

On the Pacific coast four additional vessels were chartered for the transportation of troops and supplies to Manila, viz: From the Pacific Mail Steamship Company, *City of Rio de Janeiro*, of 3,548 tons burden, at \$1,000 per day; from the Empire Transportation Company, steamship *Pennsylvania*, 3,166 tons burden, at \$25,000 per month; from the Alaska Commercial Company, steamship *St. Paul*, 2,440 tons burden, at \$1,000 per day, and from the Alaska Packers' Association, the sailing ship *Tacoma*, of 1,738 tons burden, at \$200 per day.

There were also purchased, for the service of the Army on the Pacific Ocean, two large and commodious steamships, the *Scandia* and the *Arizona*, which have been fitted up, the former as a hospital ship and the latter for the transportation of troops and supplies to the newly acquired islands of the Pacific Ocean. The prices paid for these vessels were, for the *Scandia* \$200,000 and for the *Arizona* \$600,000. These vessels have a tonnage, the former of 4,243 tons, the latter of 5,000 tons, and, with the four vessels chartered after the close of the fiscal year, increase the total tonnage of the fleet operating on the Pacific Ocean to 61,287, and the carrying capacity to over 20,000 men.

Three of the transport ships which formed the first expedition of the army to Manila have returned to San Francisco, and their charters have been canceled, viz: The steamship *Australia*, on August 29, 1898; the steamship *City of Sidney*, on August 30, 1898, and the steamship *Colon*, on September 7, 1898.

The charter of the steamship *City of Peking* has also been canceled by the Navy Department.

PURCHASE OF SHIPS ON THE ATLANTIC.

Upon loading the vessels at Port Tampa with General Shafter's army for the invasion of Cuba, it was found that the fleet which had been fitted up for the transportation of an army of 25,000 men or more, with their animals, equipment, and supplies, would not with safety carry more than about 16,000 men, and it therefore became necessary to increase the number of transport vessels, with larger carrying capacity for men and animals, and with bilge keels to prevent rolling, to make the ships more comfortable for stock.

Congress being averse to admitting foreign ships to American registry, the Secretary of War decided to authorize the purchase of vessels and have them fitted up to meet the needs of the Army for the safe and comfortable transportation of men and animals and the transportation of army supplies.

Fourteen large steamships have been purchased and fitted up into three classes, viz: First, freighters, for carrying coal, freight, etc.; second, combination ships, for carrying men and animals, with artillery,

wagons, stores, forage, harness, etc., and third, troopships, for carrying troops with regimental horses and their equipment and subsistence.

The following is a list of the vessels purchased, showing their tonnage, cost, class, and carrying capacity:

Name of vessel.	Tonnage.	Cost.	Class.	Carrying capacity.		
				Officers.	Men.	Animals.
Panama, No. 1	3,085	\$41,000	Freighter	10	400
Port Victor, No. 2	3,732	175,000	do	25	400
Rita, No. 3	2,194	125,000	do	15	700
Mohawk, No. 20	5,658	660,000	Combination	80	1,000	1,000
Mobile, No. 21	5,780	660,000	do	80	1,000	1,000
Massachusetts, No. 22	5,673	660,000	do	80	1,000	1,000
Manitoba, No. 23	5,673	660,000	do	80	1,000	1,000
Minnewaska, No. 24	5,796	660,000	do	100	1,200	1,000
Mississippi, No. 25	3,732	350,000	do	40	800	800
Michigan, No. 26	3,722	350,000	do	40	800	800
Rumanian, No. 27	4,126	240,000	do	45	1,100	60
Obdam, No. 28	3,658	250,000	Troopship	50	1,300	100
Berlin, No. 31	5,641	400,000	do	75	2,000
Chester No. 32	4,770	200,000	do
Total	61,298	5,431,000	720	12,700	8,750

Eight of these vessels are provided with refrigerators for the transportation of fresh meat, seven of them having a capacity of 1,000 tons each.

Two of them, the *Panama* and the *Rita*, were captured by the Navy and were purchased by the Quartermaster's Department after having been condemned as prizes by the proper courts and offered for sale.

All of these were merchant vessels and were temporarily fitted up by this Department as army transports to meet the urgent demands of the service for additional transports, for which purpose an expenditure was made of \$178,018.37.

All of these vessels are to be thoroughly overhauled and refitted for the army transport service, and two of them, the steamships *Mobile* and *Mohawk*, are now in course of being thus refitted. Specifications for refitting the others are being prepared, and the work upon them will be commenced as soon as they can be spared from the service upon which they are now engaged.

When these vessels are fitted up in the manner designed, it is believed that the Department will possess a fleet of the finest transport vessels afloat, and be thoroughly equipped to meet every demand upon it for ocean transportation.

TRANSPORTATION OF ARMY TO CUBA.

The fleet of transport ships which was concentrated at Port Tampa, Fla., in June last, for the transportation of the army of General Shafter to Cuba, consisting of 38 vessels, including 2 water boats, 3 steam lighters, 1 collier, and 1 tug, had been fitted out for the transportation of 20,000 to 25,000 men for a voyage to the vicinity of Havana, also 2 decked barges provided by the Engineer Department.

Upon embarkation of the troops it was found that the vessels would not safely and comfortably carry more than about 16,000 men, with their animals, equipments, ammunition, and subsistence and medical supplies, on a voyage of 1,000 miles. For some reason one of the steam lighters, the tug, and a decked barge did not reach Cuba with the fleet.

The entire fleet arrived without serious mishap at Daiquiri. Upon disembarkation of the army, difficulty was encountered by reason of the lack of sufficient means for lightering the vessels, which could not enter the harbor of Daiquiri, and this office was advised of the needs of the command.

Active efforts were immediately made by this office to supply the needed lighterage. Two decked barges in tow of the U. S. S. *Fern* were dispatched at once from Key West, which arrived safely, but were wrecked the day after their arrival. A seagoing tug, the *Nimrod*, chartered in Mobile, with three barges in tow, the *Ora*, *Ben*, and *Touart*, the former chartered, the last two purchased by the Department, were dispatched with orders to proceed direct to Santiago; and the chartered seagoing tug *Underwriter*, with two decked barges belonging to the Engineer Department of the Army, were dispatched to Santiago from New Orleans. These tugs lost all their barges, and only one of the tugs succeeded in reaching Cuba. Under instructions from this office the steam lighter *Bessie* was dispatched from Tampa to Santiago, but, her boilers springing a leak, she returned to Tampa for repairs.

These unsuccessful efforts to relieve the situation of the army in Cuba led the Department to enter into contract with the firm of D. Van Aken & Co., of New York City, to fit out an expedition with a large force of mechanics of various trades, and laborers, with machinery such as pile drivers, implements for construction of docks and railways, with the necessary materials, iron, and lumber, for building docks, lighters, repairing railroads and engines.

The company were furnished the steamship *Panama* and two fine ocean tugs, the *Gladisfen*, chartered at \$90 per day, and the *Gypsum King*, which was purchased for the service. This outfit proceeded to Santiago, thence to Ponce, Porto Rico, where their services have been of great value in the operation of the Army in that harbor.

The following is a list of vessels purchased by this Department to provide lighterage for the transport ships, showing their class and cost, respectively:

Name.	Class.	Cost.
Gypsum King	Tug	\$150,000
Britannia	do	40,000
Sarah	do	6,300
E. L. Bartley	Barge	5,000
Willie	do	5,000
Annie	do	10,000
Mocha	do	10,000
Helen	do	10,000
L. E. Rinehardt	Lighter. .	5,500
Total cost.....	241,800

These vessels, with the exception of the tug *Britannia*, which has been in service in New York Harbor and at Montauk Point, have been sent to Ponce, Porto Rico, and are usefully employed.

The total expenditure for the purchase of vessels of all classes has been as follows:

For 14 vessels on the Atlantic coast	\$5,431,000
For 2 vessels on the Pacific coast	800,000
For tugs, lighters, and barges.....	245,300
Total expenditures.....	6,476,300

Upon the cessation of hostilities in Cuba it became necessary, on account of sickness prevailing among the troops, to return General Shafter's army and to replace them by the five immune regiments, the Fifth United States Infantry, and the Twenty-third Kansas Volunteers.

The sick and wounded who were able to make the voyage were first considered in the matter of return, and these were brought to this country and placed in hospitals in the various coast cities. Montauk Point, Long Island, 117 miles from New York, was selected as a reception camp for the returning army, and preparations were made for the safe and speedy landing of the troops as they arrived and for the supplies required for them. For this purpose there were employed under charter several small vessels, of which the following is a list, showing their tonnage and rate of charter per day:

Name of vessel.	Tonnage.	Rate per day.
Propeller Alfred W. Booth.....	118	\$75
Propeller James A. Lawrence.....	88	75
Propeller Lewis Pulver.....	71	50
Steamer Vigilant.....	150	100
Steam lighter Columbia.....	175	60.
Barge Carey.....		40
Barge Vanderbilt.....		40
Barge Arthur.....		40
Two flatboats, each.....		15

The steamship *Shinnecock*, 1,205 tons burden, was also chartered at \$1,000 per day to afford easy and comfortable transportation for the sick troops to other points where they might be sent for treatment.

The camp at Montauk Point having been broken up, the services of these vessels have been ordered to be dispensed with.

INVASION OF PORTO RICO.

The reinforcements sent to General Shafter's army in Cuba, consisting of General Garretson's brigade, which sailed from Charleston, S. O., a force of artillery from Tampa, Fla., and one regiment—the Eighth Ohio Volunteers—from New York City, arrived at Santiago just previous to the surrender of the Spanish army in that province, and their services were not needed. The Eighth Ohio Volunteers, being on the U. S. S. *Yale*, were disembarked, and the remainder of the command sailed to Ponce, Porto Rico, where it was disembarked. Other troops were dispatched to Ponce, viz:

General Ernst's brigade from Charleston, General Haines's brigade, General Schwan's brigade, General Grant's command, and eight batteries of artillery from Newport News, and Colonel Griffin's engineer regiment from New York—a total movement of about 16,000 men and 3,367 animals, with their artillery, equipment, and supplies, and a large quantity of ammunition and many army wagons.

Of these troops there have been returned to New York 5,581 men and 256 convalescents to Fort Monroe.

CANCELLATION OF CHARTERS.

As the chartered transport ships have arrived from Cuba and Porto Rico with their loads of returning troops, orders have been given from this office that as soon as the troops were disembarked the vessels proceed to their home ports for discharge from the service, unless there

has been necessity for their return for more troops or other urgent need existing for their further service. Under these orders there have been discharged and returned to their owners the following-named vessels, viz:

Name of vessel	Date canceled.	Name of vessel.	Date canceled.
	1898.		1898.
S. S. Louisiana	Aug. 12	S. S. Florida	Sept. 9
S. S. Lampasas	Aug. 13	S. S. Breakwater	Sept. 10
S. S. Gate City	Aug. 13	S. S. Wanderer	Sept. 10
S. S. Iroquois	Aug. 18	S. S. Clinton	Sept. 11
S. S. Cherokee	Aug. 22	S. S. Guano	Sept. 11
S. S. Matsewan	Aug. 24	S. S. Allegheny	Sept. 12
S. S. Miami	Aug. 24	S. S. Berkshire	Sept. 12
S. S. City of Macon	Aug. 26	S. S. Catania	Sept. 13
S. S. Rio Grande	Aug. 26	S. S. City of Washington	Sept. 15
S. S. Leona	Aug. 29	S. S. Nucora	Sept. 16
S. S. Morgan	Aug. 31	S. S. Alamo	Sept. 23
S. S. Arkadia	Sept. 2	S. S. Concho	Sept. 23
S. S. Comanche	Sept. 2	S. S. Specialist	Sept. 23
S. S. La Grande Duchesse	Sept. 2	S. S. Unionist	Sept. 23
S. S. Uto	Sept. 2	S. S. Tarpon	Oct. 2
S. S. Whitney	Sept. 2	S. S. Knickerbocker (not reported)	
S. S. Aransas	Sept. 3	S. S. Mantoo (not reported)	
S. S. D. H. Miller	Sept. 3	S. S. Orizaba (not reported)	
S. S. Santiago	Sept. 3	S. S. Saratoga (not reported)	
S. S. Hudson	Sept. 5	S. S. Seneca (not reported)	
S. S. San Marcos	Sept. 5	S. S. Yucatan (not reported)	

The following-named vessels, whose services were no longer required, have also been discharged from the service of the Army and their charters canceled, viz:

Steamship Adria.	Water boat Maverick.
Steamship Fanita.	Water barge, S. O., of New York, No. 77.
Steam lighter Laura.	Tug Captain Sam.
Steam lighter Bessie.	Tug Nimrod.
Water boat Kanawha.	Tug Underwriter.

Other vessels are under orders for discharge, and the number employed is being reduced as rapidly as the needs of the service will permit.

EXPEDITIONS TO PHILIPPINE ISLANDS.

Seventeen of the large steamships on the Pacific and one large sailing vessel were chartered by the Department for the transportation of troops and supplies to the Philippine Islands, and two steamships have been purchased for this service.

The first expedition sailed from San Francisco on May 25, under command of General Anderson, with 2,491 officers and men, upon three steamships, *City of Sydney*, *Australia*, and *City of Peking*.

The second expedition, under command of General Greene, with 3,586 officers and men, sailed June 15 on the steamships *China*, *Colon*, and *Zealandia*.

The third expedition, under command of General Merritt, with the command of General MacArthur, consisting of 4,847 officers and men, sailed on June 25, 27, 28, and 29 on the steamships *Senator*, *Morgan City*, *City of Para*, *Indiana*, *Ohio*, *Valencia*, and *Newport*.

The fourth expedition, under command of General Otis, with 1,682 officers and men, sailed July 15 on the steamships *Peru* and *City of Puebla*, followed on July 19 by the steamship *Pennsylvania*, with 1,348 officers and men.

The last expeditions, under command of Gen. H. G. Otis, sailed on July 23 and 29 on the steamships *City of Rio de Janeiro* and *St. Paul*, with 1,735 officers and men.

These vessels have all arrived at Manila without mishap, and reports received show that the health and comfort of the men were maintained during the long voyage of over 7,000 miles.

The sailing ship *Tacoma*, with 30 enlisted men, 19 civilian teamsters, 210 horses and mules, 44 wagons and ambulances, and six months' supply of subsistence and forage, sailed from San Francisco on August 6. On August 21 the steamship *Arizona*, with 490 officers and men and 4 Red Cross nurses on board, sailed from San Francisco, and on August 27 the steamship *Scandia* sailed with troops for Honolulu and 173 officers and men for Manila.

The entire movements show that transportation was furnished from San Francisco to Manila for 16,405 persons, with their equipments and supplies.

TROOPS SENT TO HONOLULU.

Upon the acquisition of the Hawaiian Islands the First Regiment New York Volunteer Infantry was ordered to Honolulu for garrison duty. A contract was made for the transportation, at a per capita rate, of three companies of that regiment by a merchant vessel—11 officers and 313 men—who sailed from San Francisco on August 18. The remainder of the regiment, 10 officers and 293 men, sailed for Honolulu on August 27 on the steamship *Scandia*, a vessel owned by the Quartermaster's Department, showing a total of 629 persons transported to Honolulu.

MOVEMENTS BY WATER.

The total movements by transport ships have been as follows:

	Men.
To Cuba:	
From Tampa, Fla., General Shafter's army, about	16, 000
From Newport News, Va., General Duffield's command	3, 500
From Tampa, Fla., First District of Columbia Volunteers	850
From New York City, Eighth Ohio Volunteers	1, 200
From New Orleans, La., 2 regiments U. S. Volunteers (immunes)	2, 000
From Savannah, Ga., 2 regiments U. S. Volunteers (immunes)	2, 067
From New York City—	
Eighth Illinois Volunteers (colored)	1, 000
Twenty-third Kansas Volunteers (colored)	878
From Tampa, Fla., Fifth United States Infantry	700
Total	28, 195
To Porto Rico:	
From Charleston, S. C.—	
General Garretson's brigade, by way of Santiago, with General Miles	2, 400
General Ernst's command	3, 200
From Tampa, Fla.—	
General Schwan's brigade, with Lieutenant-Colonel Black's engineer companies	2, 500
Artillery and recruits	700
From Newport News, Va.—	
General Haines's brigade	4, 427
General Grant's command	1, 273
6 batteries artillery	1, 041
6 troops cavalry	719
From New York City, engineer regiment and civilian employees	1, 200
Total	17, 460
Returned from Cuba:	
Convalescents to various cities on the Atlantic coast	2, 258
Troops to Montauk Point, New York	19, 428
Total	21, 686

	Men.
Returned from Porto Rico to New York	5,541
Clerks, messengers, mechanics, teamsters, packers, and laborers transported to Cuba and Porto Rico, about	2,150
Returned from those islands	770
Total	2,920

RECAPITULATION.

Persons transported—	
To Cuba.....	28,195
To Porto Rico.....	17,460
To Manila	16,405
To Honolulu.....	629
From Cuba	21,686
From Porto Rico.....	5,541
Civilian employees transported	2,920
Total persons transported by sea.....	92,836

TRANSPORTATION OF SPANISH PRISONERS OF WAR TO SPAIN.

Under the terms of capitulation for the surrender of Santiago de Cuba to the American Army, it was agreed that transportation should be furnished by the United States Government for the Spanish prisoners of war to Spain, and to provide subsistence to them while en route.

The Quartermaster's Department was directed to provide for carrying out the terms of this agreement. In response to public advertisements, proposals for the transportation from Santiago de Cuba to Cadiz, or to such other port of Spain as might be designated, for 1,000 commissioned officers and 24,000 enlisted men, and for their subsistence en route, were received and opened on July 20, 1898. Ten proposals were received, which were carefully digested and considered, and the one submitted by an American citizen on behalf of the Spanish Trans-Atlantic Company was accepted and contract entered into with that company for the transportation of all the prisoners of war, the commissioned officers to be provided with first-class cabin accommodations on the ships, and the enlisted men with third-class or steerage passage, with suitable galley accommodations conforming to the United States requirements as to space and ventilation for enlisted men, and to provide subsistence while en route equal to the garrison ration of the United States Army. The rates paid under the terms of the contract are for each commissioned officer \$55 per capita, and for each enlisted man \$20 per capita, the men to be delivered on the ships by the United States.

The only other bid from responsible parties, and who represented steamship companies having sufficient facilities to carry out the contract, was the combined bid of the Anchor Line, Cunard Steamship Company, Limited, Hamburg American Packet Company, Robert M. Sloman & Co., Frederick Leyland & Co., Limited, North German Lloyd Steamship Company, Royal Mail Steam Packet Company, Thomas Wilson Sons & Co., Limited, and Wilson & Furness Leyland Line, Limited, which bid was for officers \$110 and enlisted men \$55 per capita, steamers to be dispatched from Santiago de Cuba within forty-eight hours of their reported arrival, or demurrage to be paid at rate of 60 cents per capita per day, passenger capacity. If passengers are on board during such delay, 40 cents additional per capita per day. Same demurrage rates to be paid if steamer be detained at place of debarkation by quarantine or other cause. Will endeavor to have vessels at Santiago de Cuba between July 30 and August 10, 1898, but

desire, if necessary, an extension of time to include the entire month of August.

As will be observed, this bid had demurrage conditions which would have amounted to a large sum in addition to the per capita, amounting for the actual number transported to \$1,312,915, whereas the contract entered into had no demurrage conditions and the actual sum paid was \$513,860.

Mr. Solon F. Massey, agent Quartermaster's Department, was designated to superintend the embarkation and to report the number of officers and men which were put on board the vessels. The Government decided to include in the transportation the wives and children of the officers, and the priests and sisters of charity who had been in service in the hospitals and with the Spanish army.

The report of Mr. Massey, which has just been received in this office, shows that the embarkation began on August 9, 1898, and was completed on September 17, 1898, and that 22,864 persons were embarked.

The following is a statement showing the dates of embarkation, names of vessels, and number of officers, enlisted men, and others who took passage:

Date of embarkation.	Name of vessel.	Officers.	Enlisted men.	Women and children over 5 years of age.	Priests and Sisters of Charity.	Total.
August 9	Alicante	88	1,069	8	11	1,124
August 14	Isla de Luzon	137	2,086	40	4	2,237
August 16	Covadonga	109	2,148	79	2,386
August 19	Villaverde	52	565	34	651
Do	Isla de Panay	99	1,599	28	5	1,729
August 22	P de Sistruestegui	128	2,359	68	2,555
August 25	Montevideo	136	2,108	122	2	2,368
August 27	Cheribon	18	905	37	960
August 28	Colon	100	1,318	59	1,476
August 30	do	22	725	6	754
September 1	Leon XIII	113	2,209	108	2,430
September 3	San Ignacio	59	1,408	20	12	1,499
September 6	Leonora	15	1,118	1,133
September 12	Ciudad de Cadiz	53	19	14	86
September 17	San Augustin	65	900	45	910
Do	San Francisco	18	588	11	617
Total	1,163	20,074	679	48	22,864

The report of Mr. Massey states that, with the exception of the delay of eleven days in getting the Spanish prisoners from Baracoa and Sagua de Tanamo to Guantanamo, where the transport ships awaited them, the embarkation was expeditiously and satisfactorily accomplished; that he inspected the ships and found all of them well arranged for the services they were engaged to perform, and well equipped for the comfort of the men and with ample quantities of food for the subsistence of the passengers for fifteen days, and varied in quality. That three of the vessels were fitted out as hospital ships, viz: *Alicante*, *Cheribon*, and *San Ignacio*, which were well equipped for that service, with surgeons and assistants, and modern appliances for the care and comfort of the sick.

The Department is assured from the report of Mr. Massey that the difficult problem of transportation of the Spanish prisoners of war has been economically and satisfactorily solved.

ESTABLISHMENT OF A LINE OF STEAMSHIPS TO CUBA AND PORTO RICO.

The permanent occupation of the islands of Cuba and Porto Rico by the army has rendered necessary the transportation of large quantities

of Army supplies to those islands, and also the mails for the troops. It was therefore determined to establish a regular weekly line of steamships to sail from New York to points in Porto Rico and Cuba and return to New York, for the transportation of supplies and mails for the Army, and also such officers, enlisted men, employees, and other persons who are entitled by competent orders to be furnished transportation by the Quartermaster's Department between those points. This line was opened Wednesday, August 31, 1898, on which date the steamship *Seneca* left New York with the Porto Rican Commission on board, sailing direct to San Juan, Porto Rico, where the commission disembarked and the vessel proceeded thence to Ponce, Porto Rico, and thence to Santiago de Cuba, at which places, after delivery of supplies and mails, she returned direct to New York with passengers and mails.

Since the sailing of the *Seneca* from New York a steamship has sailed from that port every Wednesday for Ponce, Santiago and return, and it is anticipated that the fine transport ships now owned by the Department will be found amply sufficient to maintain this regular service and perform such other ocean transport service as is required for the maintenance of the armies serving in Porto Rico and Cuba.

TRANSPORTATION OF RELIEF SUPPLIES.

Large quantities of supplies have been transported by the Quartermaster's Department to Cuba for the relief of the people on that island upon the request of the officers of the Red Cross Society, National Relief Association, and other kindred associations and individuals interested in the work of relief of the suffering Cubans.

Since the occupation of Santiago by the army, at the request of Miss Clara Barton, of the Red Cross Society, a large quantity of supplies belonging to that society and not needed in Santiago have been loaded on the chartered steamship *Clinton* and transported to Havana. The steamship *Comal* has been turned over to the Subsistence Department of the Army and is engaged in the transportation of relief supplies, one cargo having been delivered to Havana, and the vessel being now on her way to Matanzas with another load for that port.

In concluding this report it is proper that acknowledgment be made of the valuable assistance rendered to this division of your office by the officers of the Quartermaster's Department stationed in New York, Philadelphia, Tampa, Key West, New Orleans, Mobile, Charleston, Fort Monroe, and Newport News on the Atlantic and Gulf coasts, and at San Francisco and Seattle on the Pacific coast, at all of which places there has been great activity in the successful conduct of the ocean transport fleets, in fitting up the ships and providing the necessary supplies for running them. The acknowledgment and thanks of the Department are also due to the officers of the Navy who have rendered valuable counsel and assistance in the inspection and preparation of the ships for the service of the Army.

Respectfully submitted.

FRANK J. HECKER,
Colonel and Quartermaster, U. S. Volunteers,
Chief of Transportation Division.

CHAS. BIRD,
Colonel and Quartermaster, U. S. Volunteers,
Deputy Chief of Transportation Division.

The QUARTERMASTER-GENERAL OF THE ARMY.

The following special report on railroad transportation, covering movements of troops since the inauguration of the war with Spain to the transfer of troops from Camp Wikoff at Montauk Point in September and first week of October, is respectfully submitted:

MOVEMENT OF THE REGULAR ARMY.

The orders for the movement of the regular troops to Chickamauga, New Orleans, Mobile, and Tampa were sent out by the Adjutant-General of the Army about the middle of April, 1898, and were addressed to the several department commanders. They designated the point of destination and the time at which the movement was desired to take place.

The chief quartermasters of the respective departments were immediately charged by the Quartermaster-General with all the necessary transportation arrangements. The troops were put in motion as fast as arrangements with the railroad companies could be perfected, and were rapidly assembled at the points designated by the War Department. In no case was any delay ever reported to this office, nor is any known to have occurred. These troops were moved with the most satisfactory dispatch, and an entire absence of accident.

MOVEMENT OF THE VOLUNTEER FORCES.

Upon the receipt by the Quartermaster-General from the War Department of a list showing the assignment of the volunteer forces to the several national encampments of mobilization, the proper officers of the Quartermaster's Department throughout the country were disected, in anticipation of the required movement, to examine the list supplied by the War Department and familiarize themselves with every detail of the subject; to consult the proper railroad officials interested in the transportation of these troops, and determine in advance, as far as practicable, all preliminaries that could be settled before the actual movement of the troops occurred, such as determining routes of travel, rates, etc., for each movement, so that when the troops should actually move no possible delay should occur, and they might be moved with comfort and celerity.

The officers of the Department acted in all these matters with commendable zeal and energy, and in many cases agreed upon flat rates to govern all such shipments which were most advantageous to the Government as a matter of economy.

On May 13 the Adjutant-General sent to the Quartermaster-General his first orders for the movements of volunteers—a separate order for each organization—designating the point of destination. Instructions were immediately wired, in all cases of even date with the order of the Adjutant-General, to the quartermasters most convenient to move the troops. At the same time the commander of the organization was wired as to the officer charged with the movement, and the chief quartermaster at the national encampment was also informed by telegraph that the shipping officer would wire him the date of departure and probable time of arrival of each organization. Under these instructions the volunteer troops have gone to destination with promptness and remarkable freedom from accident or delay en route.

Statement has been prepared in this office showing, as far as possible, the shipments of the various volunteer organizations, with all detailed information as to number of officers and men, dates of movements, cost of the service, passenger and freight, with the rates at which each movement has been made. This report is voluminous, and

the conclusions or summary, from information obtained to date, only can be stated in the present report. Moreover, it must remain for some time yet incomplete, until the accounts for all these services are rendered by the many railroads of the country, critically examined, and paid. It will, when completed, present in tabular form a correct and detailed statement of all railroad transportation connected with the movements of troops of the Regular and Volunteer Army during the war with Spain.

From April 1, 1898, to the breaking up of Camp Wikoff, the aggregate movement of troops by rail amounted to 17,863 officers and 435,569

men.

The following movements have been made since April 1, 1898, and reported in full to this office:

Departments, depots, and camps.	Officers.	Men.	Total.
Chief quartermaster:			
Department of the Lakes.....	2,299	52,201	54,500
Department of the East.....	722	14,182	14,904
Department of the Columbia.....	294	6,299	6,593
Department of the Colorado.....	286	8,844	9,130
Department of the Gulf.....	602	13,615	14,217
Department of Dakota.....	487	10,374	10,861
Department of the Missouri.....	646	12,751	13,397
Department of California.....	348	1,624	1,972
Depot quartermaster:			
New York City.....	3,106	74,266	77,372
St. Louis, Mo.....	689	13,488	14,177
Washington, D. C.....	1,672	49,848	51,520
Philadelphia, Pa.....	124	3,608	3,732
Chief quartermaster:			
Anniston, Ala.....	50	1,379	1,429
Huntsville, Ala.....	242	6,838	7,080
Mobile, Ala.....	406	8,624	9,030
Jacksonville, Fla.....	428	11,095	11,523
Tampa, Fla.....	1,303	39,121	40,424
Miami, Fla.....	274	7,327	7,601
Chickamauga, Ga.....	2,785	68,095	70,880
Knoxville, Tenn.....	171	5,434	5,605
Lexington, Ky.....	266	7,307	7,573
San Antonio, Tex.....	46	1,255	1,301
New Orleans, La.....	352	10,281	10,633
Camp Meade, Pa.....	406	10,599	11,005
Total.....	17,863	435,569	453,432

Extremely low rates have been secured by the Quartermaster's Department in making these movements, generally not exceeding 1½ cents per mile for passengers, and in many cases much less, and about one-half the prevailing tariff rates for freight in excess of 150 pounds per man carried free.

A special outfit has been provided under orders of the Secretary of War, to be used by the Surgeon-General as a hospital train. This train was made up of ten tourist sleepers, two kitchen and dining cars, and a combined passenger and baggage car. It was furnished by the Medical Department, placed in charge of its trained nurses, and kept exclusively for the purpose of carrying sick and wounded to points designated by the proper medical officers.

Respectfully submitted.

FRANK J. HECKER,
Colonel and Quartermaster, U. S. Volunteers,
Chief of Transportation Division.

CHAS. BIRD,
Colonel and Quartermaster, U. S. Volunteers,
Deputy Chief of Transportation Division.

QUARTERMASTER-GENERAL'S OFFICE, October 14, 1898.

WAR DEPARTMENT,
QUARTERMASTER-GENERAL'S OFFICE,
Washington, D. C., September 1, 1898.

GENERAL: I have the honor to submit the annual report of the clothing supply branch of this office for the fiscal year ending June 30, 1898.

The principal work of this branch, to which I was assigned for duty on the 15th of May last, consists of the purchase, manufacture, and issue of all the clothing and equipage supplies required by the Army.

MANUFACTURES AND PURCHASES.

The strength of the Army prior to the war with Spain consisted of about 25,500 men, and under the annual appropriations made by Congress it was only with the strictest economy that it was possible to procure the necessary clothing and equipage supplies to which the Army was entitled under existing orders and regulations.

The accompanying Statement A shows in detail the quantities of the principal articles of clothing and equipage and clothing materials on hand at the general depots of the Quartermaster's Department on the 30th of April last, consisting, among other articles, of the following:

Wool blankets	61, 368	Trousers:	
Blouses	28, 192	Foot	pairs.. 21, 000
Forage caps	26, 670	Mounted	do... 18, 074
Canvas fatigue coats	12, 976	Cotton undershirts	122, 965
Canvas fatigue trousers.. pairs..	11, 866	Woolen undershirts	75, 134
Canton flannel drawers....do...	61, 092	Common tents	1, 503
Campaign hats	32, 367	Conical wall tents	605
Leggings	pairs.. 51, 354	Hospital tents	291
Overcoats	9, 374	Shelter tent halves	12, 692
Rubber ponchos	4, 775	Wall tents	511
Dark-blue flannel shirts	30, 764	Blouse flannel	yards.. 169, 615
Barrack shoes	pairs.. 39, 644	Canton flannel	do... 103, 669
Shoes	do... 33, 939	Cotton duck for tents	do... 290, 196
Cotton stockings	do... 321, 064	Sky-blue kersey, 22 ounces..do...	112, 782
Woolen stockings	do... 94, 330	Shirting flannel	do... 73, 758

This was the condition of affairs on the 30th of April last.

On the 22d of April the Department found itself suddenly confronted with the problem of clothing and equipping an army of 125,000 volunteers, to which Congress, on the 26th of April, added an increase to the regular establishment aggregating 61,184 men, exclusive of about 1,500 men pertaining to miscellaneous detachments. On the 25th of May last 75,000 additional volunteers were called into service, making a grand total of 262,684, instead of 25,000 men, to which should be further added 10 regiments of immunes, 3 regiments of engineers, and 1 of the Signal Corps, and 3 regiments of volunteer cavalry.

Recourse was at once had to every known expedient to obtain supplies, but great difficulties had to be overcome. As an instance, in the matter of uniform trousers, the wool had to be dyed out of which to manufacture the cloth from which to make the garments. It was upon the recommendation of this office that the Secretary of War authorized the purchase of dark-blue trousers, which aided materially in equipping the men. The Department was subjected to criticism on this account, but the men were clothed; otherwise they would not have been.

Contracts had to be entered into for all the different articles of clothing and equipage, for which there would likely be an early demand, and the extent of the latter could not even be properly anticipated.

Great care and vigilance had to be exercised to prevent the supply of articles of inferior quality, and it is believed that the Department has been successful in preventing deliveries of goods that could reasonably be objected to. The aim has been to obtain articles conforming as nearly as practicable to existing standards and specifications.

One of the greatest difficulties encountered and successfully met was the extraordinarily large demands for tents. Besides providing for the regulation allowances to which the troops were entitled, and for ordinary hospital purposes, the sickness to which our Army in active campaign as well as in camp was subjected created demands beyond all expectation. It should be borne in mind that at the commencement of the war there was scarcely any cotton duck to be found in this country suitable for military purposes, the supply having become depleted by the large demand for tentage from persons leaving the States for the Klondike region and the unprecedented purchases by the Navy Department.

The manufacture of tents was prosecuted in every locality West and East, wherever it was found possible to obtain the materials and labor skilled to manufacture them. Even recourse was had to the assistance kindly tendered this Department by the Second Assistant Postmaster-General, who placed the force of the mail-bag repair shop at its disposal. By this timely aid alone 3,771 common tents were manufactured from the materials which were furnished by this Department for that purpose.

Notwithstanding all the difficulties, in the short period of about four months nearly 300,000 men have been fully equipped and the equipment maintained. A portion of the Army has been transported to and supplied in the Philippines; another portion in Porto Rico, and an army of 20,000 cared for in Cuba under the most difficult and trying conditions. The army in Cuba, leaving everything behind, arrived at Montauk Point and found a complete new outfit of tents and clothing ready there for them.

The accompanying Statement B shows in detail the quantities of the principal articles of clothing and equipage and materials purchased or contracted for during the last fiscal year, and the various places at which they were procured—this for the purpose of showing the endeavors of the Department to reach every locality that could contribute toward meeting the requirements of the service, taking into consideration the quality and kind of supplies needed. For a better understanding, this statement has been divided into two periods, viz, from July 1, 1897, to April 30, 1898, covering the period prior to the commencement of the war with Spain, and from May 1 to the close of the fiscal year; also from July 1 to August 15, 1898—this for the purpose of showing the purchases and manufactures of the principal articles on account of said war.

There were manufactured at the Philadelphia, Jeffersonville, St. Louis, and San Francisco depots, during the periods specified in this statement, the following principal articles, viz:

Articles.	Depot.									
	Philadelphia, Pa.			Jeffersonville, Ind.			San Francisco, Cal.			St. Louis.
	July 1, 1897, to Apr. 30, 1898.	May 1 to June 30, 1898.	July 1 to Aug. 15, 1898.	July 1, 1897, to Apr. 30, 1898.	May 1 to June 30, 1898.	July 1 to Aug. 15, 1898.	July 1, 1897, to Apr. 30, 1898.	May 1 to June 30, 1898.	July 1 to Aug. 15, 1898.	May 1 to June 30, 1898.
Dress coats, all kinds	1, 739	624	207
Overcoats, kersey, made and unmade	6, 372	18, 243	369	450	1
Blouses, made and unmade ..	7, 319	40, 419	2, 466	8, 680	49, 074	15, 703	1, 256	5, 474	3, 407
Coats, canvas fatigue	8, 876	8, 048	2, 972	8, 846	1, 715	2, 525	921	4, 946	8, 414
Trousers:										
Kersey, foot, made and unmade	22, 999	47, 200	15, 284	3, 239	10, 692	732	10, 651

Wall	589	285	383
Shelter	6, 351	179, 499	18, 003
Common	862	935	217

Purchases and contracts for clothing and equipage were made at the following depots and points, viz: Philadelphia, Pa.; Jeffersonville, Ind.; St. Louis, Mo.; San Francisco, Cal.; New York; Chicago, Ill.; Boston, Mass.; Baltimore, Md.; New Orleans, La.; Cincinnati, Ohio; Detroit, Mich.; St. Paul, Minn.; and Washington, D. C., and the following are the principal articles that were purchased or contracted for. Except in instances where the necessities of the service required purchases in open market, competition was in all cases invited.

Articles.	July 1. 1897, to Apr. 30, 1898.	May 1 to June 30, 1898.	July 1 to Aug. 15, 1898.
Blankets, wool	22, 000	299, 187	247, 151

Kersey, sky-blue, 22-ounce	104, 244	159, 045	35, 936

The accompanying Statement D shows the articles of clothing and equipage that were sent just prior to, as well as during, the period of actual hostilities, and subsequent thereto, to the various distributing depots and camps, and a careful perusal will show the work that has been accomplished in so comparatively short a period. In this connection it is proper to state that many of the States which contributed toward filling the quota of volunteers of the first call held their men in camps before they were mustered into the United States service,

and when turned over to the General Government they were in many cases without proper clothing; especially was this the case in regard to underclothing and shoes.

It was from this source that the principal complaints regarding the insufficiency of the clothing supplies arose; nor is it strange that people unfamiliar with the state of affairs existing at the time of the outbreak of hostilities can not appreciate the difficulties that had to be overcome; and the above figures show conclusively what has been accomplished in the matter of supplying the Army with the clothing and equipage necessary for its efficiency and comfort. In 1861, after a much longer lapse of time, many regiments went to the front without uniforms. Even tentage had to be imported from Europe, and the records of the Department show that as late as December, 1861, nine months after the commencement of the war, men were insufficiently clad to perform their duties at the very capital of the nation.

No great difficulties were met in equipping the troops enlisted under the second call, as, by a better cooperation between State officers and the War Department, supplies were delivered at points of muster in advance.

RECEIPTS AND EXPENDITURES.

The annual appropriation for clothing and equipage for the fiscal year ending June 30, 1898	\$1, 050, 000. 00
The appropriation to supply deficiencies for support of the Army, under act of Congress, approved May 4, 1898	10, 000, 000. 00
To which were credited during the last fiscal year the following amounts:	
Reimbursements on account of issues to the militia of the States and Territories.....	189, 248. 37
Collections by Pay Department on account of clothing drawn by the enlisted men in excess of their allowance, from purchases of discharges by enlisted men under section 4, act of Congress of June 16, 1890; also from sales to officers, to the militia, and surveying expeditions authorized by law.....	95, 125. 61
Total	11, 334, 373. 98
The remittances to officers of the Quartermaster's Department at the general depots and elsewhere for the purchase and manufacture of clothing and equipage and other expenditures chargeable to—	
Annual appropriation.....	\$1, 321, 435. 91
Deficiency appropriation.....	4, 208, 513. 87
Requisitions issued on settlements made at Treasury of accounts and claims	464. 68
The amount refunded to the appropriation for arming and equipping the militia on account of clothing and equipage supplies returned to the Quartermaster's Department	197. 60
	<u>5, 530, 612. 06</u>
Leaving a balance of.....	5, 803, 761. 92
available in the Treasury of the United States on the 30th of June, 1898.	
To this amount should be added the sum of.....	26, 000, 000. 00
appropriated by Congress July 7, 1898, and not yet drawn upon, making the total amount available for the purchase of clothing and equipage	31, 803, 761. 92

Of this amount, \$7,229,997.07 were required on the 15th of August last to pay for all expenditures on account of clothing and equipage incurred by this Department up to said date.

The regular appropriation by Congress for clothing and equipage for the fiscal year ending June 30, 1899, is \$975,000, which as yet has not been drawn upon.

REMITTANCES.

The following are the amounts that were remitted to officers during the last fiscal year from the annual and deficiency appropriations:

Depot at Philadelphia, Pa.....	\$2, 669, 383. 20
Depot at Jeffersonville, Ind.....	97, 703. 30
Depot at San Francisco, Cal.....	672, 294. 64
Depot at St. Louis, Mo.....	98, 323. 44
Depot at Washington, D. C.....	2, 658. 75
Depot at New York.....	1, 209, 923. 55
Depot at Baltimore, Md.....	122, 119. 50
Chief Quartermaster, Department of the East.....	140, 139. 78
Chief Quartermaster, Department of California.....	100, 570. 00
Chief Quartermaster, Department of the Lakes.....	339, 849. 48
Other departments, depots, and posts.....	76, 984. 14
Total.....	5, 529, 949. 78

COLLECTIONS BY PAY DEPARTMENT.

There were placed to the credit of the appropriation for clothing and equipage for the fiscal year 1897-98, from collections by the Pay Department, the following amounts, viz:

On account of clothing drawn by enlisted men in excess of their clothing-money allowance.....	\$38, 509. 80
On account of purchases of discharges by enlisted men under section 4 of the act of Congress approved June 16, 1890, and which, under the decision of the Secretary of War, are placed to the credit of the appropriation for clothing and equipage.....	4, 625. 00
Total.....	43, 134. 80

ISSUES TO THE MILITIA.

The following are the issues of clothing, equipage, and other stores that were made to the governors of the several States and Territories, for use of the militia, under the provisions of the act of Congress of July 1, 1897, for which the respective appropriations of the Quartermaster's Department have been reimbursed from the appropriation for arming and equipping the militia, viz:

States and Territories.	Clothing and equipage.	Regular supplies.	Army transportation.
Alabama.....	\$3, 658. 78
Arizona.....	953. 72
Arkansas.....	10, 536. 67
California.....	466. 50	\$292. 50
Colorado.....	339. 98
Connecticut.....	7, 148. 43

Deduct credit placed to allotment of State of Maine	187.60
Total.....	189,111.85	474.02	284.85

a \$51.08 of this amount was not actually settled by the Treasury Department during the fiscal year, and will appear in the next annual report.

SALES TO THE MILITIA.

There were sold by this Department during the fiscal year to the governors of the following States, under the act of Congress approved February 24, 1897, clothing, equipage, and other supplies to the total value of \$20,509.71, viz:

States.	Clothing and equipage.	Army transportation.
Alabama.....	\$685.68	\$17.82
Arizona.....	289.85	2.51
Michigan	11,118.50
Pennsylvania.....	8,814.50	81.85
Total	20,509.71	101.18

SALES TO THE UNITED STATES MARINE CORPS.

Notwithstanding the great demand upon the Department from the Army for tentage, the Quartermaster-General, upon the request of the Commandant of the United States Marine Corps, recommended and obtained authority from the Secretary of War to sell to said officer—

Hospital tents, complete	6
Wall tents, complete	150
Shelter tent halves, with poles and pins	2,000

Also a considerable quantity of spare parts for tentage. The total amount realized from said sale amounted to \$2,882.75, all of which has been placed to the credit of the appropriation for clothing and equipage.

SALES TO THE GEOLOGICAL SURVEY.

Under paragraph 3692, Revised Statutes, and under special authority of the Secretary of War, there were sold to the Director of the United States Geological Survey, for use of various surveying parties in the field, tents to the value of \$229.22, which amount has been placed to the credit of the appropriation for clothing and equipage.

SALES AT AUCTION.

There was realized at the general depots of the Quartermaster's Department, from sales of old pattern and condemned articles of clothing, equipage, cuttings, etc., the sum of \$8,404.24, all of which has been covered into the Treasury of the United States and credited to miscellaneous receipts as required by law. The expenses connected with making these sales amounted to \$212.76, which have been paid from the appropriation for clothing and equipage.

CLOTHING FOR DISCHARGED PRISONERS.

Under the act of Congress approved March 16, 1896, all prisoners upon release from confinement under court martial sentences are to be furnished with a suit of outer clothing to the value of \$10 per suit. Under this provision of the law there were remitted to various officers during the fiscal year \$4,370 from the appropriation for the support of the Army. The remittance on this account during the previous fiscal year amounted to \$4,221.25.

ISSUES TO INDIAN PRISONERS OF WAR.

There are held in captivity at Fort Sill, Okla., 298 Apache Indian prisoners of war, consisting of 68 men, 105 women, 70 boys, and 55 girls, the sustenance of which, except as to subsistence, falls upon the Quartermaster's Department.

The following are the expenditures connected therewith, viz:

Fuel.....	\$2,362.06
Forage	2,755.80
Transportation	746.00
Clothing and equipage.....	1,170.14
Employees.....	1,200.00
Total	8,234.00

a decrease of \$3,420.06 from the expenditures during the previous fiscal year.

Independent of the routine work connected with purchases, manufactures, and issues, much thought has been devoted to studying the questions connected with improving the quality of the clothing and equipage supplies, among which may be named the following particular items:

BLOUSES—NEW PATTERN.

As indicated in the last annual report of the clothing-supply branch, several sets of blouses of new and revised pattern, based upon actual measurements taken of several hundred men of the different arms of the service, were tried at various posts, and it was found that a satisfactory solution had been reached. The new-pattern blouses consist of nine sizes, instead of six, as heretofore. Standards and specifications were

adopted, and manufactures had just been ordered when the war with Spain began. It was found impossible at this particular time to start the new enterprise, and consequently all blouses purchased and manufactured during the last five months conformed to the old pattern.

SHOES.

Shoes made of somewhat lighter calfskins and upon lasts conforming more closely to the anatomy of the human foot have also been adopted, and contracts had been entered into just prior to the commencement of the war. Those procured are of unexceptionable quality and make, hand sewed, and many manufacturers who have carefully examined both the adopted lasts and shoes declared that they could not suggest further improvements. All shoes now being procured under the contracts awarded within the last two months conform to these new patterns, except that the soles are permitted to be sewed on the Goodyear welt machine. The advisability of substituting the latter mode of tacking the soles will form the subject of future consideration, as well as several suggestions that have been made by prominent manufacturers to permit Cordovan and Titan calfskins to enter into competition.

The shoes procured at the outbreak of hostilities, and which were found to be essential for the immediate equipment of the organizations then being mustered into the service, did not conform to the newly adopted army shoes. The latter class of shoes is not manufactured for the trade. Shoes of various descriptions had to be purchased, and it was found that as a rule they were good and serviceable. In a few instances they proved otherwise, but this could not be avoided.

CLOTHING OF LIGHTER TEXTURE FOR SOUTHERN AND TROPICAL COUNTRIES.

The question of furnishing the enlisted men of the Army stationed in the South and in tropical countries with clothing suitable for those latitudes has also formed the subject of consideration.

Pending a final conclusion, the calls from the Army for cotton clothing have been met by supplying twilled and plain duck garments to the troops in Cuba, Porto Rico, and as far as practicable to the various organizations in camp in this country.

UNDERWEAR.

The Army has been abundantly supplied with light cotton underwear, which has undoubtedly materially aided in alleviating the condition of the men. Steps have also been taken to procure an adequate supply of wool knit undershirts of a much better quality than formerly issued to the Army. The grade of wool will be much finer, the percentage of cotton will be 40 instead of 50, and they will be of light and heavy qualities, suitable for cold and warm climates.

MOSQUITO HEAD NETS, RUBBER PONCHOS, AND HAMMOCKS.

Of these articles of equipment, so necessary to protect the men in the unhealthy climate of Cuba, an entire outfit has also been procured and furnished by this Department. To what extent they have been made use of in active campaign this office has as yet not been informed.

BADGES AND DESIGNATING FLAGS.

General Orders, No. 99, c. s., published by the Adjutant-General of the Army, prescribe the badges and flags for the several brigades, divisions, and corps composing the Army. Of these a complete outfit for 8 corps has been procured and distributed.

COLORS AND GUIDONS.

Contracts for such colors and guidons as might be needed by the various volunteer organizations were also entered into. They have been procured as fast as applied for. Under existing regulations these colors should all be embroidered in silk; but it being impossible to have such work executed within a reasonable time, the Secretary of War approved the recommendation of the Quartermaster-General that the inscription and coat of arms be painted in the same manner as was done during the civil war.

BAND INSTRUMENTS.

Great difficulty was experienced in supplying the many military bands with instruments, as required by paragraph 1201, Army Regulations. They were procured by purchase in open market, of the best domestic production obtainable, and it was even found necessary to resort to the purchase of some of foreign make. It has been found impossible to supply all the regiments, and owing to the sudden cessation of hostilities all action to supply instruments to volunteer organizations will be suspended until the final status of each particular regiment shall have been determined.

GRATUITOUS ISSUES OF CLOTHING.

By direction of the Secretary of War, all the clothing of the troops returning from Cuba will be destroyed to prevent contagion, and it has been decided to issue to each of the men, free of charge, another suit in lieu of the one destroyed. Similar issue will also be made to the men in hospitals whose clothing has been destroyed for like reasons.

TENTS OF DRAB COLOR.

The advisability of changing the color of the tentage for the Army to a drab, similar to certain equipments supplied by the Ordnance Department, has been under consideration for several years. In order to ascertain whether a change would be desirable, the Depot Quartermaster at Philadelphia, on the 28th of August, 1897, was directed to dye for experimental purposes sufficient of the unbleached duck to manufacture 100 wall tents and flies. The tents thus made were distributed for trial, one to each post in the Army, and reports called for.

These reports were almost unanimous in favor of the proposed change, for the following reasons:

1. The glare of the sun will be avoided.
2. In time of hostilities the tents will be less discernible from a distance.
3. The difference in appearance between old and new canvas will be less marked, thereby decreasing to a certain extent the demand for new tentage.

4. The dyed canvas may be found to lessen damage from mildew, to which all unbleached duck, if not properly dried before storage, is subjected.

The only objection was made by a few officers who are of the opinion that the tent, when closed on dark days, is not sufficiently light on the inside for reading or writing. Many officers, however, are of distinctly opposite views. They prefer even a darker color.

On the 14th of December last a report was made to the Secretary of War recommending that the drab-colored duck for the tentage be adopted, to be of the same shade as the duck used by the Ordnance Department, and that this be also the future color for the fatigue hat, fatigue clothing, leggings, and shelter tent. In order to insure a fast and even color, it would be well to have the material dyed in the fiber.

These recommendations were approved by the Secretary of War, and the Department was contemplating how best to inaugurate the changes involved, when other and more important demands were made upon this office.

The subject, however, was never lost sight of, and considerable duck and tentage recently purchased has been of the new color. Sufficient time to obtain reports upon results has as yet not elapsed.

COMBINED SHELTER TENT AND CLOTHING ROLL.

After examining the sample of a combined shelter tent and clothing roll, submitted by Maj. Charles W. Williams, Quartermaster, U. S. A., referred to in the last annual report, and believing that the same possessed qualities equally as good as those contained in a similar tent brought to the attention of the Department by another inventor, and Major Williams consenting, this Department concluded to advise the officer named to take out letters patent. Application was made to the Secretary of War, on the 8th of November last, under paragraph 2 of the act of Congress making appropriations for sundry civil expenses for the Government for the fiscal year ending June 30, 1884, and for other purposes. A patent was granted on the 4th of January last to Major Williams, under section 4886 of the Revised Statutes, without the payment of any fee, so that the Government or any of its officers or employees in the prosecution of work for the Government or by any other person in the United States may make use of the invention without the payment of any royalty. The number of the patent is 596767. None have thus far been manufactured.

CLOTHING AND EQUIPAGE FOR TROOPS IN ALASKA.

All the troops ordered by the War Department to the Territory of Alaska during the last and present fiscal years have been supplied with sufficient quantities of clothing and equipage suitable only for the extreme cold weather prevailing in that country. Among the articles furnished were some of the improved conical wall tents, invented by Maj. Charles W. Williams, Quartermaster, U. S. A., referred to in last year's annual report.

CONCLUSION.

In concluding this report, I desire to call special attention to one important fact, which has conclusively been demonstrated during the period of the preparation for and prosecution of the war just terminating.

It has an important bearing upon the economic side of the question of providing the clothing and equipage supplies for the Army in the future.

Heretofore all the principal articles of clothing and equipage were manufactured at the general depots of the Quartermaster's Department from materials purchased under contracts. This was found to be well adapted to times of peace, but the system was not sufficiently elastic to answer fully in times of war, when the demands are sudden and great. The reason why the department was successful in coping with the difficulties of providing sufficient clothing, and which presented themselves at the commencement of the war, was principally due to purchases under contracts. The prices are entirely in favor of the contract system. All that will be necessary is a rigid and fearless inspection, so that the goods will conform strictly to specification requirements.

The manner of carrying this proposition into effect should form the subject of a very careful future study.

Very respectfully,

WM. S. PATTEN,

Colonel, Quartermaster's Department, U. S. A.

The QUARTERMASTER-GENERAL.

A.—Statement showing articles of clothing, equipage, and materials on hand at principal general depots April 30, 1898.

[illegible]

WAR DEPARTMENT,
QUARTERMASTER-GENERAL'S OFFICE,
Washington, D. C., October 20, 1898.

SIR: Under Special Orders, No. 164, Adjutant-General's Office, current series, having been assigned to duty in the office of the Quartermaster-General as one of the principal assistants, in charge of all wagon transportation, and the purchase of all cavalry and artillery horses and regular supplies, etc., while so acting to have the rank of colonel, I have the honor to submit the following report of the operations of that branch for the fiscal year 1897-98, and for period July 1, 1898, to August 31, 1898.

Respectfully,

C. P. MILLER,
Colonel, Quartermaster's Department.

The QUARTERMASTER-GENERAL OF THE ARMY.

The Quartermaster-General supervises and controls, through this branch, the equipment for the transportation service of the Army, including wagons, ambulances, and vehicles, draft and pack animals, and cavalry and artillery horses.

This branch has charge of all matters relating to the procurement and distribution of supplies, stoves, and heating apparatus, and repair and maintenance of same for heating barracks and quarters; of ranges, stoves, and apparatus for cooking; of fuel and lights for enlisted men, guards, hospitals, storehouses, and offices, and for sales to officers; of equipment of bakehouses to carry on post bakeries; of the necessary furniture, text-books, paper, and equipments for the post schools; for the tableware and mess furniture for kitchens and mess halls for enlisted men; of forage and bedding for the public animals of the Quartermaster's Department, and for the authorized number of officers' horses; of straw for soldiers' bedding; of stationery and blank books for the Quartermaster's Department, certificates for discharged soldiers, blank forms for the Paymaster's and Quartermaster's departments, and of the necessary correspondence connected with the work of this branch.

This branch has also charge of matters relating to all contracts to which the Quartermaster's Department is a party.

CONTRACTS.

During the fiscal year ended June 30, 1898, 1,404 contracts were received, examined, and filed in this office. Seven hundred and ten were for 270,543,952 pounds of coal, 61,099 cords of wood, 11,250 bushels of charcoal, 31,173,928 pounds of oats, 54,471,304 pounds of hay, 7,588,200 pounds of straw, 4,015,000 pounds of barley, 4,204,759 pounds of bran, 40,000 pounds of middlings, and 2,297,366 pounds of corn; 49 for transportation; 218 for clothing, camp, and garrison equipage; 98 for leases; 11 for roadways and sidewalks; 25 for water and water supply; 11 for telephone service; 4 for electric supplies; 3 for repair of bridges; 2 for shoeing public animals; 10 for printing; 63 for buildings and building material; 3 for sanitary work; 1 for construction of railroad platform; 2 for granolithic pavement; 2 for illuminating gas; 2 for gasoline; 2 for mineral oil; 1 for fresh beef; 26 for horses and mules; 1 for cobblestone gutters; 18 for heating apparatus; 22 for plumbing; 5 for target ranges; 2 for repair of roads; 1 for repair of wagons; 5 for sewerage system; 2 for boilers and fixtures; 9 for repair of buildings; 1 for steel

trestle and tank; 4 for garbage cremators; 3 for gas piping; 1 for machinery; 3 for drainage and grading; 2 for repair of water tanks; 2 or flagstaffs; 5 for repair of wharves; 1 for construction of wall; 1 for picket fence; 1 for repair of railroad trestle; 1 for repair of steamer; 9 for tableware and kitchen utensils; 1 for rostrum: 1 for flagging and paving blocks; 2 for ambulance harness; 1 for field filters; 1 for sinking well; 3 for field desks; 2 for packing boxes and crates; 2 for water distillers; 1 for filters; 1 for ice plant; 1 for disinfectors; 3 for typewriting machines; 1 for box lockers; 1 for headstones; and 41 for charter of vessels.

During the period from July 1, 1898, to August 15, 1898, 267 contracts were received, examined, and filed in this office. One hundred and twenty-six were for 2,628,533 pounds of oats, 4,348,320 pounds of hay, 195,833 pounds of bran, 779,800 pounds of straw, 469,000 pounds of barley, 25,833 pounds of corn, 50,875,100 pounds of coal, 16,884 cords of wood, and 1,950 bushels of charcoal; 9 for transportation; 22 for leases; 2 for constructing steam launches; 8 for buildings; 29 for charter of vessels; 6 for water system; 1 for field desks; 36 for clothing, camp, and garrison equipage; 7 for tableware and kitchen utensils; 5 for telephones; 1 for mineral oil; 2 for illuminating gas; 1 for field filter; 4 for remodeling heating apparatus; 1 for repair of buildings; 1 for plumbing; 1 for ambulances; 1 for lamps; 3 for packing boxes; and 1 for gas piping.

PURCHASES AT GENERAL DEPOTS.

Very respectfully,

C. P. MILLER,
Colonel, Quartermaster's Department, U. S. A.

WAR DEPARTMENT,
QUARTERMASTER-GENERAL'S OFFICE,
Washington, D. C., October 15, 1898.

GENERAL: I have the honor to submit my report of the work of the construction and repair division of this office during the past fiscal year:

Congress, by the act making appropriations for the support of the Army, approved March 2, 1897, under head of "Barracks and quarters," provided	\$750,000.00
And in the deficiency act of May 4, 1898, the additional sum of.....	300,000.00
Total to be accounted for	1,050,000.00
Authorized for construction and repairs.....	\$645,157.59
Expended for rent of offices, barracks, quarters, camp grounds, etc., so far as reported	98,890.32
Expended for rent of recruiting stations, lodgings for recruits, etc	19,227.70
	763,275.61
Available balance on June 30, 1898, from the appropriations above specified (approximately).....	286,724.39

NEW CONSTRUCTION.

During the year there has been authorized from the barracks and quarters appropriation, for the erection of public buildings at different military posts, consisting of barracks, officers' quarters, storehouses, stables, etc., and for temporary buildings at points where troops have been encamped, the sum of \$376,999.16.

For the construction and repair of hospitals at military posts already established and occupied, there has been authorized from the appropriation for that purpose expenditures amounting to \$74,816.84.

REPAIRS.

There has been authorized for repairs, alterations, and improvements in connection with public buildings, for the purchase of building materials and tools at various posts, for tent flooring for troops in camp, etc., from the barracks and quarters appropriation expenditures amounting to \$268,158.43.

The amounts allotted to the different military departments (as existing on June 30, 1898) and to depots, etc., are shown in the following statement:

Recapitulation of the expenditures authorized for construction, repairs, etc., from the appropriations for barracks and quarters, 1897-98.

Department, depot, etc.	Construc- tion.	Repairs.	Total.
Department of the East.....	\$71,689.39	\$78,196.34	\$149,885.73
Department of the Gulf.....	102,948.67	87,163.26	140,111.93

MILITARY POSTS.

In the act making appropriations for sundry civil expenses of the Government for the fiscal year ending June 30, 1898, Congress provided "for the construction of buildings at, and the enlargement of, such military posts as in the judgment of the Secretary of War may be necessary, \$420,000, of which not less than \$50,000 shall be expended at the military post at Spokane, Wash. And the Secretary of War may, in his discretion, use not to exceed \$20,000 of said sum to purchase the former post trader's buildings at Fort Assinniboine, in Montana."

Twenty thousand dollars has accordingly been expended for the purchase of buildings at Fort Assinniboine, as above authorized, leaving \$400,000 available for construction.

This sum has been apportioned as follows, including, under the head of "new post near Spokane," the \$50,000 specifically appropriated for that post:

PRESIDIO OF SAN FRANCISCO, CAL.

The act of Congress approved June 7, 1897, appropriated \$5,000 for "Road to national cemetery," etc.

Contract was entered into December 18, 1897, with Messrs. LeOlair & Coutts, of San Francisco, Cal., for construction of about 936 feet stone wall, measured horizontally along southern boundary of the military reservation, Presidio of San Francisco, Cal., at \$5.12 per linear foot, and for each cubic foot of additional foundation 30 cents, and for each cubic foot of additional stonework 40 cents. The work was completed March 21, 1898, to the satisfaction of the Government, and final payment was made March 31, 1898.

There was built under this contract—

844 linear feet of wall, at \$5.12 per linear foot.....	\$4, 321. 28
And 1,978½ cubic feet of extra concrete foundation, at 30 cents per cubic foot.....	593. 55

The balance of this appropriation was expended as follows:

For advertising in newspapers.....	\$47. 65	
For service of an inspector.....	37. 50	
		85. 15
Balance on hand, deposited to credit United States Treasurer with assistant treasurer, San Francisco, Cal.....		. 02
Total.....		5, 000. 00

Expenditures authorized for water supply, sewerage, plumbing, and drainage; also for roads, walks, grading, bridges, wharves, etc., chargeable to the appropriation for army transportation for 1897-98.

TARGET FUNDS.

“For shelter, shooting galleries, ranges for small-arms target practice, repairs, and expenses incident thereto,” Congress, in the act making appropriations for the support of the Army, approved March 2, 1897, provided \$10,000, which has been apportioned as follows:

Department.	Character of work.	Amount.
Department of the East	Repairs, etc.	\$3,306.94
Department of the Missouri	do	3,585.15
Department of the Platte	do	307.97
Department of Dakota	do	344.74
Department of Texas	do	1,052.32
Department of the Colorado	do	1,115.11
Department of California	do	130.04
Department of the Columbia	do	157.73
Total		10,000.00

HOSPITALS.

In the act making appropriations for the support of the Army for the fiscal year ending June 30, 1898, Congress appropriated \$75,000 for construction and repairs of hospitals at military posts already established and occupied, including the extra-duty pay of enlisted men employed on the same and including also all expenditures for construction and repairs required at the Army and Navy Hospital at Hot

Springs, Ark., except quarters for the officers. This fund has been disbursed by officers of the Quartermaster's Department, on estimates approved by the Surgeon-General of the Army, as follows:

The above statement includes the construction, plumbing, and gas piping of a post hospital at Fort Hamilton, at a cost of \$16,522; the same at Fort Hancock, N. J., at a cost of \$18,810.50, and an addition to hospital at Fort Wayne, with alterations, plumbing, and gas piping, at a cost of \$12,357. The work at Fort Hamilton is completed, and at the other two posts is under contract.

HOSPITAL STEWARDS' QUARTERS.

In the army appropriation act for the fiscal year ending June 30, 1897, Congress also appropriated \$7,000 for construction of quarters for hospital stewards at military posts already established and occupied, including the extra-duty pay of enlisted men employed on the same. This sum has been apportioned to the posts named below:

Post.	Amount.	Post.	Amount.
Fort Adams	\$152. 92	Fort Myer.....	\$16. 50
Angel Island	12. 25	Fort Niagara.....	127. 52
Fort Apache.....	31. 79	Fort Porter.....	6. 55

SUPPLEMENTARY REPORT ON PERMANENT CAMPS, DEPOTS, AND GENERAL HOSPITALS TO SEPTEMBER 30, 1898.

The construction and repair division has had general charge of renting land, erection of temporary buildings, water supply, plumbing, sinks, and other sanitary conveniences in connection with encampments of troops.

The following reports cover the expenditures authorized and the cost of the work, so far as reported by the officers on duty at the various camps.

TAMPA DEPOT, FLORIDA.

This point having been selected for mobilization and embarkation of troops and as a base of supplies for the Cuban campaign, the depot quartermaster, about April 21, 1898, proceeded to hire necessary store-

houses and offices, arrange for water supply, etc., at Tampa and Port Tampa.

The total amount paid for rent of offices, storehouses, corral, cattle pens, stables, etc., to August 15, 1898, was, approximately.....	\$17,367.43
A quartermaster's storehouse was erected at a cost of.....	13,897.50
For fencing a corral there was allotted.....	600.00
And August 23, for cleaning up vacated camps.....	3,000.00
Total.....	34,864.93

The details for supplying the camps at Tampa with water are not on record in this office. City water was purchased, meter measure.

MOBILE DEPOT, ALABAMA.

About April 24, 1898, 500 acres of land were rented for this camp at \$100 per month. The ground was reported as high, with open pine woods and ample sanitary water supply. A little later 220 acres additional were rented at \$100 per month.

On April 26, 1898, authority was given for hiring or building storehouses for subsistence or other stores, and on May 5, 1898, \$700 was allotted for connecting the camp with city water main, city water being supplied at 15 cents per 1,000 gallons. On May 24, 1898, authority was given to extend water line as new regiments arrived, if necessary, at a cost of \$250 per regiment.

A rough storehouse was constructed at a cost of \$600. Two large subsistence storehouses were hired at \$50 and \$200 per month, respectively, and another large storehouse with water power for elevators at \$165 per month. An office was rented for the quartermaster's department at \$75 per month.

Other small expenditures were made for rents, water supply, etc. The total amount paid for rent to August 15, 1898, was \$1,305.

CAMP GEO. H. THOMAS, GA.

On April 26, 1898, the Commissary-General of Subsistence requested that a storehouse be rented in Chattanooga for use of troops at this camp.

On May 11 authority was given to hire 300,000 cubic feet of storage in Chattanooga, and on May 13 this authority was extended to hire as much additional space as was necessary.

Total amount paid for rent in Chattanooga to August 15, 1898, was..... \$3,435.33

Temporary buildings were erected and other improvements made at Chickamauga Park, the approximate cost being as follows:

Storehouses for subsistence, quartermaster's and medical supplies.....	11,318.36
Shops and forges.....	900.00
Ordnance depot.....	1,600.00
Electric lighting, water, and sewer systems, and other improvements were made to the Leiter General Hospital (a building purchased by Mrs. L. Z. Leiter and turned over to the Government at the nominal rental of \$1) ..	4,997.25
10 pavilions for Sternberg General Hospital.....	2,840.40
7 pavilions for Sisters of Charity.....	1,200.00
Flooring hospital tents.....	6,079.00
Flooring other tents.....	10,250.00
Water-supply system.....	20,795.00
Miscellaneous expenditures.....	2,807.08
Total expenditures reported.....	66,222.42

CAMP ALGER, VA.

It having been decided to establish a camp near this city for mobilization of an army corps of volunteers, a tract of land of about 1,400 acres, known as Woodburn Manor, situated about 2 miles from Falls Church, Va., was leased for this purpose, on May 10, 1898, at a rental of \$300 per month. This camp was subsequently designated Camp Alger.

On May 25 a tract of about 25 acres at Dunn Loring Station, on the Southern Railroad, was leased as a site for storehouses, park for wagon trains, etc., for use in connection with Camp Alger, at \$25 per month.

Additional tracts of land in the vicinity of Camp Alger were subsequently leased for use of troops, wells were sunk for water supply, and storehouses erected at Dunn Loring, Va.

The amounts expended for improvements in connection with this camp, as reported, were approximately as follows:

For rents	\$3, 295. 50
For water supply, including sinking of wells, purchase of boilers, pumps, etc	8, 299. 87
For temporary buildings.....	10, 875. 00
For flooring tents.....	4, 500. 00
Total.....	26, 970. 37

When the first regiments arrived at the camp they used little streams and farm wells for water, which were insufficient for even culinary purposes, were of inferior if not dangerous quality, and were rapidly drying up. After the success of an experimental well, the supply of water from driven wells was determined upon, and as many plants as possible (five in all) were put to work and a good supply of water obtained, at an expense of \$8,299.87. The large number of wells which were driven was due to the movement of regiments from their camps to new ones for other reasons than water supply. The wells ran in depth from 50 to 150 feet. There were made, in all, 40 wells.

On July 8, the crowded condition of Camp Alger rendering it necessary, as an emergency, the Chittenden farm, near Dunn Loring, was engaged but on account of slowness in finding deep well water the place was not occupied until July 17, when the First Division began to move to new camps.

This camp having been abandoned, the Secretary of War, on September 27, 1898, authorized the sale of the storehouses at Dunn Loring Station.

ST. ASAPH DEPOT, VA.

The St. Asaph's race track, between Alexandria and Washington, on the Pennsylvania Railroad, about 30 acres of land, including stable room and storehouse, was leased May 16, 1898, at \$200 per month, for use as a depot for horses, mules, wagons, etc.

On September 21, 1898, \$875 was allotted for the erection of a forage storehouse at this point.

CAMP POLAND, TENN.

This camp is located near Knoxville, Tenn., and but few expenditures have been authorized or called for.

On June 11, 1898, authority was given for the hire of necessary storage room, at \$30 per month.

On September 8, for the hire of necessary rooms for paymasters, there was authorized \$60.

On September 19, hire of rooms for division headquarters, at \$15 per month, was authorized.

HUNTSVILLE, ALA.

A camp was established here the latter part of August, 1898. On August 26, Major-General Coppinger reported that water pipes had been laid and water connections made for all troops then in camp. On September 26, over 13,000 feet of water pipe which had been in use at Tampa was ordered to be shipped to this camp.

Orders were given to floor all tents, but the cost has not yet been reported. An office for the subsistence department was hired, at \$50 per month. Quartermaster's and subsistence storehouses were built, but the authority for and cost of the work are not of record in this office.

ANNISTON, ALA.

A camp was also established at this point in the latter part of August. Tents were floored at a cost of \$3,074 50, and a quartermaster's and subsistence storehouse and office were hired at \$50 per month.

CAMP AT JACKSONVILLE, FLA.

On June 11, 1898, the hire of a subsistence storehouse at this camp was authorized, at \$150 per month, and subsequently additional space was rented for same; amounting in all to \$300 per month. A quartermaster's storehouse was hired, at \$60 per month; offices for the Subsistence Department, at \$20 per month; and for the Quartermaster's Department, at \$25 per month.

Grounds and buildings for corral were also leased, at \$125 per month.

The total amount paid for rent to August 15, 1898, was \$783.00

For camp improvements allotments have been made to September 30, 1898, as follows:

For construction of 3 pavilion hospitals	4,500.00
Mess room for hospital nurses and employees	800.00
Flooring in hospital tents	522.00
Pasteurizing milk plant.....	150.00
Garbage barrels	400.00

Total	7,155.00
-------------	----------

So far as known, all arrangements for water supply were made by local officers; no specific authorization was made in this office.

MIAMI, FLA.

A camp of six regiments was established here about June 30, 1898, and the location was reported healthful, and the water supply and other camp requirements satisfactory.

On July 14, 1898, the quartermaster at this camp reported to this office that the East Coast Railroad Company had arranged to build a depot for commissary stores for this camp.

The following expenditures were authorized:

Flooring tents.....	\$250.00
Flooring for hospital tents.....	176.67

Total.....	426.67
------------	--------

CAMP WIKOFF, LONG ISLAND, NEW YORK.

On August 2, 1898, the Secretary of War authorized the following expenditures for the establishment of a camp at Montauk Point:

Rent of land to December 1, 1898 (or to June 1, 1899, \$15,000).....	\$10,000.00
Driving piles at dock.....	2,000.00
Water supply.....	12,000.00
Privies, warehouses, bakeries, etc.....	16,000.00
Total.....	40,000.00

Under this authority steps were taken to prepare the camp for the reception of troops with the greatest possible expedition. Officers of the Quartermaster's Department, with expert assistants, were sent to the camp to supervise the work.

Contract was made immediately for a large quantity of wrought-iron pipe, tanks, and pumps, and for sinking wells for water supply; and lumber was ordered for temporary buildings, etc. Pump houses were built. A large storehouse, each, was erected for the quartermaster's and subsistence departments. The two docks were repaired to receive the troops and stores. A temporary general hospital and a detention hospital were constructed.

On August 12 \$4,500 was allotted for the construction of a steam-laundry plant for the hospital.

The tract of land rented contained about 5,000 acres, and this lease included the right to use the existing docks of the Montauk Company on Fort Pond Bay. By General Order No. 120, Adjutant General's Office, the camp was designated Camp Wikoff.

On August 15, 1898, Colonel Hecker reported that water was being pumped at the rate of 250,000 gallons of well water and 200,000 gallons of pond water per day, and that arrangements were then being made for sinking another large well, and pipes were being laid to same, so that each command would have running water.

To insure a supply of good water, on August 30, 1898, \$7,000 was allotted for a filter plant, and during the month of August 165 Pasteur army filters were also furnished.

On September 21 the Surgeon General reported as follows in regard to the water supply and sanitary conditions at this camp:

The Fort Pond water is unfit for use as a potable water. The other samples are organically pure.

With this satisfactory water supply and the good sanitary condition prevailing in the regimental camps, I have no hesitancy in saying that the troops could stay on their present ground in winter quarters without such outbreak of typhoid fever as has occurred at Camp Alger and at Chickamauga Park.

Payment of certified accounts for material and labor in construction and preparation of the camp, amounting to \$33,665.11 has been authorized. Other accounts have been received for material and labor furnished for temporary buildings, water supply, tent flooring, etc. (including \$5,000 for sinking three wells), on which final action has not yet been taken by this office.

CAMP GEORGE G. MEADE.

On August 12, 1898, the Government took possession of a portion of the land known as the Young farms, near Middletown, Pa., as a camp for troops, which was afterwards designated Camp George G. Meade.

A suitable spur track and siding were laid by the Pennsylvania Railroad Company, which was authorized by the Secretary of War to

build a temporary storehouse and sink two or more wells, in addition to the artesian well already sunk and in operation, fitting them with the necessary water tanks and pumps and placing water pipe throughout the grounds for supply to troops, all work to be paid for at actual cost.

Under the authority above noted a large storehouse was erected at this camp by the railroad company, at a cost of \$7,357.08
 In addition thereto, the Quartermaster's Department erected storehouses, at a cost of 4,060.00
 The railroad company also constructed the necessary water-supply system, consisting of three wells, with two deep-well pumps and one force pump, and two 36,000-gallon water tanks, and laid the necessary pipes, at a cost (actual) of 12,229.97
 On September 20, 1898, the chief quartermaster reported that this system, supplemented by the extension of the pipes authorized by the Secretary of War on the 10th of September, was supplying an abundance of good water. The authorized expenditure for this extension was 16,000.00

In addition to the amounts above recorded there have been expended:

For flooring tents	6,750.00
For constructing post-office building	400.00
For water barrels and buckets	985.00
For miscellaneous purposes	225.00
Total, so far as reported, to September 30, 1898	48,007.05

CAMP HAMILTON, KY.

This camp is situated near Lexington, Ky., and was established early in August, 1898.

The records of this office show that authority has been given for rent of land and camp improvements, as follows:

Rent of paddock	\$150.00
Rent of land for hospital (40 acres, for ninety days)	240.00
Rent of isolation camp	3,000.00
Digging sinks	875.00
Temporary storehouses	2,451.00
Installation of hospital	575.00
Laying pipes for water supply from city mains, etc.	3,450.00
Temporary storehouses	3,821.00
Pavilion for nurses, cook houses, sinks, etc.	3,000.00
Purchase of lumber and nails and miscellaneous expenditures	4,650.00
Total	22,212.00

GENERAL HOSPITALS.

At Key West, Fla., five buildings were rented in the latter part of April, 1898, for general hospital, at the rate of \$135 per month. Office and storeroom were also hired, at \$35 per month.

Total rent paid to August 15, 1898	\$456.00
Temporary buildings were constructed for kitchens, dining rooms, water-closets, ice supply, stable, etc., and tents were floored in connection with this hospital, at a total cost of	5,975.32
Electric wiring, ranges, etc., were provided for same, at an approximate cost of	500.46

Following amounts were authorized for additional water-supply system, for the hospital and the post of Key West Barracks:

Distilling plant.....	\$8,875.50	
Shelter for same	2,000.00	
Two tanks for same.....	625.00	
Laying pipes for same	700.00	
Miscellaneous.....	1,549.97	
		<hr/>
		13,750.47
Total.....		<hr/>
		20,682.25

Instructions have recently been given to make necessary repairs to buildings and grounds of the convent, to restore same to the condition in which they were before being occupied by the Government for hospital purposes.

At Fort McPherson, Ga., many of the post buildings have been used for a general hospital.

Allotments were made by this office for flooring tents, water supply, sewer connections, erection of kitchens and sinks, plumbing, screen doors and windows, and board walks in connection therewith, at a cost, so far as reported to this office, of \$1,182.74.

At Fort Myer, Va., the drill hall and two barracks have been used as a general hospital, and a blacksmith shop was converted into a kitchen for same.

A deadhouse was constructed, additional plumbing provided in the buildings, temporary floor placed in the drill hall and other conveniences provided for the comfort of the patients, at an approximate cost of \$5,983.

At Fort Thomas, Ky., three sets of barracks have been used as a general hospital.

Plumbing, gas, water, and sewer connections authorized for same.....	\$437.43	
Authorized for flooring tents.....	50.00	
Authorized for cremator.....	2,000.00	
		<hr/>
Total.....		2,487.43

GENERAL HOSPITALS AT FORT MONROE, VA.

On July 3, 1898, instructions were given for the erection of tents and temporary buildings on the Fort Monroe Reservation for a general hospital to accommodate 500 patients and 100 attendants. The work was completed July 23, 1898, the cost (exclusive of tents) being as follows:

Mess hall	\$2,975.99	
Bath house	510.26	
Water-closets.....	171.00	
Tent floors.....	850.00	
Walks.....	87.00	
Water and sewer connections.....	241.87	
Electric mains and fixtures.....	180.00	
		<hr/>
Total.....		5,016.12

On July 20, 1898, the Secretary of War authorized the necessary expenditures for the establishment near Fort Monroe of a pavilion hospital of 1,000 beds.

A tract of land on the line of an electric railway, about 2 miles from the post, was leased at the rate of \$500 per annum, and on this

site the buildings and improvements specified below are in course of completion, the cost to September 30, 1898, being as follows:

Main buildings	\$40,500.00
Covered way	4,000.00
Plumbing and water and sewer systems	17,293.00
Electric lighting system	1,592.00
Laundry machinery	2,370.00
Side tracks, etc	1,287.00
Roads	640.00
Quarters for female nurses and medical officers	14,700.00
Plumbing same	3,039.00
Electric lighting same	235.00
Garbage cremator	1,456.00
Miscellaneous	3,164.00
Total	90,276.00

For supplying the necessary water, the United States pumping station on Mill Creek has been transferred for exclusive use of this hospital.

Very respectfully,

M. O. MARTIN,
Lieutenant-Colonel, Quartermaster's Department.

The QUARTERMASTER-GENERAL UNITED STATES ARMY,
Washington, D. C.

WAR DEPARTMENT,
QUARTERMASTER-GENERAL'S OFFICE,
Washington, October 5, 1898.

GENERAL: I have the honor to submit the annual report of the reservation branch of this office for fiscal year ending June 30, 1898.

This branch, under Special Order No. 187 of 1898, Adjutant-General's Office, is charged with providing water supply, sewerage, light, and heating of military posts, camps, and stations; collection and filing of complete title papers, and information pertaining to all lands under charge of the War Department purchased or appropriated for army or other military use, except when designed for permanent military fortifications or for arsenals, etc.

It also has charge of all correspondence and papers in connection with fire protection, post and reservation maps, surveys, topography, and other miscellaneous subjects.

Under terms of act approved July 8, 1886, General Orders, No. 52, of 1886, the grounds comprising Old Fort Brady, Mich., authorized to be sold, were duly platted, appraised, etc., and under public advertisement the buildings and fencing were disposed of at auction in October, 1893, for the sum of \$2,072.50.

Forty-five lots have thus far under the act been sold at public and private sale (at not less than appraised value), total amount realized being \$39,100, which sum (less cost attending sales) has been deposited in the Treasury.

The remaining 19 unsold lots are in charge of the quartermaster, Fort Brady, Mich., to whom application for purchase is made.

On August 25, 1897, the Secretary of War leased for five years from September 7, 1897, at nominal consideration the "cemetery lot" to the Soo Light Guards, Company G, Fifth Regiment, Michigan National Guard, for the erection thereon of an armory and for drill purposes.

Under act approved March 1, 1890, the military reservation of Old

Fort Bliss, Tex., was platted, appraised, and advertised for sale at public auction July 3, 1895.

At that sale lots Nos. 5, 6, 21, 22, 24, and 25 were disposed of, amount realized being \$2,570; lots 1, 2, 3, 4, 12, and 13 have since been disposed of at private sale at appraised valuation, amounting to \$4,828; total realized \$7,398, which sum, less expenses attending sales, has been deposited in the Treasury.

March 9, 1897, Secretary of War executed an agreement giving James R. Harper, county judge, as agent for and on behalf of the county of El Paso, Tex., option, etc., to purchase within one year from date lot 18, with appurtenances thereon at appraised valuation of \$2,920.

If not so purchased within the year, then the county was to pay an annual rental of \$150 to the quartermaster at the new post, and deliver up the property in as good condition as at time of execution of agreement.

Pending legislation looking to transfer of the property to the county, and payment of the \$150 having been made to the quartermaster, Fort Bliss, Tex., and duly deposited to credit of United States Treasurer, on request of county for renewal of option, etc., for another year, the same was granted by the Secretary of War March 9, 1898.

Remaining lots are in charge of the quartermaster at New Fort Bliss for disposal.

The act of August 9, 1894, provides that when this reservation shall have been sold, "so much of the receipts therefrom as may be necessary, not to exceed \$4,000, are hereby appropriated to the construction of a military road between the city of El Paso and New Fort Bliss, said money to be expended under the direction of the Secretary of War."

Owing to many hindrances it was not until December 8, 1897, that a contract for the road was finally made, consideration being \$3,339.35, to which should be added cost of printing and advertising, \$4.82, making \$3,344.17. Other work having been found actually necessary for safe travel, etc., over the road, there was allotted, April 7, 1898, \$632.60, making total cost, \$3,976.77.

In sundry civil act approved March 2, 1895, General Order No. 13, of 1895, the following appears:

The Secretary of War is hereby authorized within his discretion to establish a military post at such point on Puget Sound as shall, in his judgment, best subserve the public interests, provided that 640 acres of land suitable for the purpose shall be donated free of cost to the United States, or such greater quantity of land as in the opinion of the Secretary of War shall be necessary for the purpose.

Citizens of Seattle, representing the Chamber of Commerce, after much patient labor and expense, having finally succeeded in tendering a site acceptable to the War Department, including certain tide lands and right of way for wharf convenience, and United States title thereto having been favorably reported upon by Department of Justice, the work of clearing and grading certain portions of the ground was duly commenced and building operations have since followed.

Sundry civil act of March 2, 1895, General Order No. 13, of 1895, authorizes the Secretary of War, within his discretion, to establish a military post at or near the city of Bismarck, N. Dak., provided a sufficient quantity of suitable land, not less than 640 acres, be donated free of cost to the United States, and further by sundry civil act approved June 11, 1896, \$40,000 is appropriated "for beginning the construction of permanent buildings," etc.

No site in every way acceptable to the Department having thus far been tendered, no portion of the \$40,000 referred to was used, the Treasury having held that the appropriation was but an annual one, good only for use during the fiscal year to which it pertained.

In sundry civil act July 1, 1898, the following appears:

That the appropriation of \$40,000 for beginning the construction of buildings, providing for sewerage, water supply, roads, and other means of communication, and other necessary improvements at the military post at Bismarck, N. Dak., made by sundry civil appropriation act approved June 11, 1896, is hereby reappropriated and made available for the same purpose for the fiscal year 1899.

Act approved July 23, 1888, General Order No. 60, of 1888, authorizes the Secretary of War, after purchase of site and construction of new post (now known as Fort Crook, Nebr.), to sell the military reservation known as Fort Omaha.

The new post has been built, but owing to business depression, etc., of recent years, no definite steps have been taken with view to disposing of this valuable land, comprising about 80 acres.

Sundry civil act approved June 11, 1896, provides "for the purchase of land for a target range for the use of troops stationed at Jefferson Barracks, Mo., \$18,000: *Provided*, That any land purchased hereunder shall be unencumbered by any private or public ways or roads," and by sundry civil act approved June 4, 1897, the \$18,000 above referred to is "made available for expenditure during the fiscal year 1898." Deficiency act approved July 7, 1898, General Order No. 104, of 1898, page 35, further provides—

* * * That the appropriation of \$18,000 made for the purchase of land for a target range for the use of troops stationed at Jefferson Barracks, Mo., is hereby continued and made available for expenditure during the fiscal year 1899: *Provided*, That any land purchased thereunder shall be unencumbered by any private or public ways or roads.

Under orders of the Acting Secretary of War, certain desirable lands in sections 2, 3, 10, 11, and 15, township 33, range 4, aggregating some 1,100 acres, have been secured within the appropriation, United States title thereto having been favorably reported on by Department of Justice.

General Orders, Adjutant-General's Office, affecting military reservations, etc., issued during the year, are as follows:

General Order No. 54, of 1897, publishes President's order of August 21, 1897, setting apart certain lands in State of Florida "for the future military and naval defense of Pensacola Harbor."

General Order No. 59, of 1897, publishes President's order of October 20, 1897, declaring military reservation of Fort St. Michael, Alaska.

General Order No. 61, of 1897, publishes President's order of November 4, 1897, transferring the wood and timber reservation of Fort Laramie, Wyo., to the Interior Department.

General Order No. 66, of 1897, publishes President's order of November 24, 1897, directing that the two batteries of 10-inch guns on Staten Island, near Fort Wadsworth, shall be known as Fort Newton.

General Order No. 72, of 1897, announces that new fort on Delaware River at Finns Point, New Jersey, will be known as Fort Mott.

General Order No. 7, of 1898, publishes changes in territorial limits, designation and headquarters of geographical departments.

General Order No. 14, of 1898, announces that the posts of Whipple Barracks, Ariz., and Fort Missoula, Mont., will be discontinued.

General Order No. 17, of 1898, publishes President's order of March 12, 1898, designating new battery on Sullivan's Island, South Carolina, as Battery Sergeant Jasper.

General Order No. 18, of 1898, publishes President's action of April 18, 1898, modifying his order of March 12, 1898, in so far as to direct that the new battery "will hereafter be known and designated as Battery Jasper."

General Order No. 59, of 1898, Secretary of War, by direction of the President, announces that the post at Dutch Island, Narragansett Bay, Rhode Island, shall hereafter be known and designated as Fort Greble.

Custodians are employed and paid by the Quartermaster's Department in caring for the following reservations:

Old Fort Bliss, Tex., Frank E. Tusten, \$60 per month.

Madison Barracks Target Range, New York, James Fleming, \$15 per month.

Fort Omaha, Nebr., Jerry Howard and S. T. Cole, \$45 per month each.

At Fort Townsend, Wash., J. W. Brown; at Fort Davis, Tex., J. L. Janes; at Monterey, Cal., Francis Doud; at Fort Custer, Mont., H. C. Bullard and S. Harris, serve without money compensation.

The authorized expenditures at the various posts and camps for the fiscal year for water, sewer, plumbing, and drainage work amounted to \$298,175.60.

For structural lighting, heating, and steam-cooking apparatus, \$103,956.18.

After the commencement of hostilities with Spain the question of furnishing pure water to the troops in the field, by means of an efficient "field filter," which could be readily transported with the troops, was the subject of early and careful consideration.

Such pattern of filter was not on the market. After a number of tests, experiments, etc., special patterns of the Berkefeld, Maignen, and the Pasteur-Chamberland were adopted, and 1,000 of each, on recommendation of the Surgeon-General, approved by the Secretary of War, were purchased at a total cost of \$69,100.

These were distributed as follows:

Station.	Berkefeld.	Maignen.	Pasteur.
Camp Alger, Va.....	107	107
Chickamauga, Ga.....	602	602
Fernandina, Fla.....	100
Jacksonville, Fla.....	150
Miami, Fla.....	85
Middletown, Pa.....	191	191	160
Montauk Point, N. Y.....	165
Philippine Islands.....	100	100	200
Porto Rico.....	200
Total.....	1,000	1,000	1,000

The following notes are submitted in connection with the furnishing of water to the troops at various camps:

Camp Alger, Va.—In addition to data furnished in report of the construction and repair division regarding the water supply at this camp, it may be stated that during May and June, 1898, 700 water barrels were also provided. To further assist in supplying the troops with good water, 107 Berkefeld and 107 Maignen army filters of special patterns were furnished in July, 1898, at a cost of \$3,236.75.

Anniston, Ala.—Water is obtained from the city mains; it is piped from mountain springs. Quality said to be absolutely pure. Arrange-

ments made by local officers. No detailed report covering character, extent, and cost of the work yet rendered to this office.

Chickamauga, Camp Thomas, Ga.—In addition to data furnished in report of the construction and repair division, the following expenditures are noted:

August 4, 100 water barrels.....	\$175
August 6, 450 water barrels.....	1,080
August 12, 600 water barrels.....	1,440
August 6, 500 boilers for boiling water.....	500
August 8, 1,500 boilers for boiling water.....	1,500

To assist in furnishing the troops at this camp with good water, 600 Berkefeld and 600 Maignen filters of special pattern were supplied in July, 1898, at a cost of \$18,150.

Fernandina, Fla.—Mains and branches were laid, connected with water supply of the town, which is from an 8-inch artesian well 720 feet deep, with a flow of about 1,250,000 gallons per day. The cost involved in purchasing and laying pipes, \$4,707.

To assist in supplying the troops at this camp with good water 100 Pasteur army filters of special pattern were furnished in August, 1898, at a cost of \$3,885.

Huntsville (Camp Wheeler), Ala.—Arrangements made by local officers. The water is taken from the city supply, which is obtained from a bold spring within the city limits. August 13, 1898, General Coppinger reported, “* * * have ordered water pipe laid to supply troops.” August 15, 1898, General Coppinger further reported, “delighted with * * * water supply.” No detailed report covering description, cost, etc., of work yet rendered to this office.

Jacksonville, Fla.—Water distributed to the camps by the mains and branches connected with city system. Jacksonville source of supply is three 6-inch artesian wells with a natural flow of 3,500,000 gallons per day. To further assist in supplying the troops at this camp with good water, 150 Pasteur army filters of special pattern were furnished in August, 1898, at a cost of \$5,827.50.

Lexington (Camp Hamilton), Ky.—August 23, 1898, chief quartermaster authorized to hire means for hauling water from city hydrant, some 3 miles distant. September 3, 1898, for 10,000 feet 2-inch pipe and connections, for distributing water from city main, there was allotted \$1,250.

Miama, Fla.—July 5, 1898, chief quartermaster reported, “men at this camp are not suffering for water; water supply abundant; hydrants and wells throughout entire camp.” To further assist in giving the troops at this camp pure water, 85 Pasteur army filters of special pattern were supplied in July, 1898, at a cost of \$3,302.25.

Middletown (Camp Meade), Pa.—In addition to data furnished in report of construction and repair division, it may be stated that to further assist in supplying the troops at this camp with good water, 191 Berkefeld, 191 Maignen, and 100 Pasteur army filters of special patterns were furnished in August, 1898, at a cost of \$9,662.75.

Montauk (Camp Wikoff), N. Y.—In addition to data furnished in report of construction and repair division, it may be stated that on September 1, 1898, the Secretary of War accepted offer of Navy Department for free use of steamer *Iris*, with distilled water plant of 60,000 gallons capacity, for use of troops at this camp.

New Orleans, camp at.—Free use of all water given by Orleans City Railroad Company, including filter.

Tampa, Fla.—For camp purposes, purchased under direction of depot quartermaster: May 24, 1898, for regulating supply, 1 Crown meter authorized, \$250. May 22, 1898, for establishing a water plant at St. Petersburg for vessel use there was allotted \$5,500.

At certain State camps—Augusta, Ga., Camp Black, N. Y., Carson City, Nev., Camp Townsend, N. Y., etc.—some few minor expenditures on water and sewer account were duly authorized.

For distilling plant at Key West Barracks there was allotted \$12,000. For Fort St. Philip, La., \$1,200. For Philippine Islands, including machinery for taking water from tower to a higher level and providing larger camps with water from one or more sources of supply, \$20,000. For use of troops destined for Cuba 50 drive-well outfits were purchased and shipped from New York at a cost of \$1,475.

Very respectfully,

F. G. HODGSON,

Lieutenant-Colonel, Quartermaster, U. S. Volunteers.

The QUARTERMASTER-GENERAL,

Washington, D. C.

WAR DEPARTMENT,
QUARTERMASTER-GENERAL'S OFFICE,
Washington, September 15, 1898.

GENERAL: I have the honor to submit a report for the fiscal year ending June 30, 1898, concerning that portion of the work of this office which has been specially assigned to my charge.

It consists principally of such matters as relate to the personnel of the officers of the Quartermaster's Department, both regular and volunteer, the preparation and filing of their official bonds, and assignment to duty; the examination, appointment, and assignment to stations of post quartermaster-sergeants, and all matters relating to the detachment of Army service men, quartermaster's department at West Point, N. Y.; the preparation of the annual, biennial, and various other reports and returns; also all matters pertaining to the employment of the many different classes of civilian employees required in the Quartermaster's Department at large, including those governed by the civil-service rules.

In view of the war with Spain, reference will be made in this report to all important transactions on the above-mentioned topics from July 1, 1898, to the close of hostilities, August 12, 1898.

The passage of the act of Congress, approved March 2, 1898, providing a large appropriation for the national defense, was the beginning of the increase in all branches of work pertaining to this office, and from April 21, 1898, the date of the declaration of war with Spain, to the close of hostilities, the volume of this work grew to large proportions.

The act of Congress approved April 22, 1898, for temporarily increasing the military establishment of the United States in time of war, provided for the organization of the troops in the United States, whether belonging to the Regular or Volunteer Army, as far as practicable, into corps of three divisions each, divisions of three brigades each, and brigades of three or more regiments each. For each corps the law provided a chief quartermaster, with the rank of lieutenant-colonel; for each division a chief quartermaster, with the rank of major; and for each brigade an assistant quartermaster, with the rank of captain.

In accordance with this law, 7 lieutenant-colonels and corps quartermasters, 22 majors and division quartermasters, and 65 captains and brigade quartermasters were appointed.

Congress, by act approved July 7, 1898, to increase the efficiency of the Quartermaster's Department, provided as follows:

That during the existing war and for a period not exceeding one year thereafter, the Secretary of War may make such distribution of the duties and labors of the Quartermaster's Department as may be deemed for the best interests of the service, and may assign a suitable officer in charge of each of such divisions, and may assign to duty as special inspectors of the Quartermaster's Department not exceeding four officers, to be selected from the regular and volunteer officers of the Department; and such officers, and the quartermaster on the staff of the Commanding General of the Army, while so acting shall have the rank next above that held by them and not above colonel.

SEC. 2. That the President may nominate and, by and with the advice and consent of the Senate, may appoint two quartermasters of volunteers with the rank of colonel, two quartermasters of volunteers with the rank of lieutenant-colonel, three quartermasters of volunteers with the rank of major, and twenty assistant quartermasters of volunteers with the rank of captain, and the Secretary of War may assign an officer of the Quartermaster's Department in charge of each principal depot of the Quartermaster's Department, not exceeding twelve, to be selected from the regular and volunteer officers of the Quartermaster's Department; and such officers while so acting shall have the rank next above that held by them and not above colonel, and the four principal assistants of the Quartermaster-General while so acting shall have the rank of colonel. The Secretary of War may assign such of the said volunteer quartermasters as may be deemed necessary to duty in the office of the Quartermaster-General, at the various supply depots, or on other important and special work, and may continue such assignments for a period not exceeding one year after the close of the war, then to be discharged.

Under the last mentioned law 2 quartermasters with the rank of colonel, 2 quartermasters with the rank of lieutenant-colonel, 3 quartermasters with the rank of major, and 20 assistant quartermasters with the rank of captain, were appointed, making in all 2 colonels, 9 lieutenant-colonels, 25 majors, and 86 captains; or a total of 122 volunteer officers appointed in the Quartermaster's Department. Of this number, appointments were made from the officers of the Regular Army, and from civil life, as follows:

Rank.	United States Army.		Civil life.	Total.
	Quarter-master's Department.	Line.		
Colonels	1	1	2
Lieutenant-colonels.....	7	1	1	9
Majors.....	14	5	6	25
Captains.....	16	70	86
Total	22	22	78	122

It will thus be seen that 22 officers of the regular establishment of this Department received volunteer commissions as quartermasters, thus reducing the number of additional quartermasters actually available for duty in this department, under the volunteer act, to 99. This latter number includes 22 officers appointed to volunteer commissions from the line of the Regular Army.

The sudden bringing into the service of so many volunteer quartermasters, of whom a large number had no previous training in the Quartermaster's Department, and, therefore, were without any practical knowledge or experience in the varied and extensive work pertaining to this department, made it necessary and important that all

possible care and attention be given these officers at the outset in the way of preliminary instructions. Every assistance was afforded in this direction, but the urgency for the service of these officers in the field would allow but a brief period for this purpose.

Notwithstanding the inexperience of many of these volunteer quartermasters in military affairs, and their lack of knowledge as to the intricate duties which would be required of them in this department, a number of these officers very soon adapted themselves energetically to the duties with which they were charged, and performed very efficient and satisfactory service.

The officers of this department belonging to the regular establishment at close of fiscal year consisted of 57 officers in all, viz, 1 brigadier-general, 4 colonels, 8 lieutenant-colonels, 14 majors, and 30 captains. Of these, as before stated, 22 were given volunteer commissions in this department, which the law allowed them to accept without in any way interfering with their commissions in the Regular Army. The demand for the regular and experienced quartermasters for service with troops in the field was, from the beginning to the close of hostilities, far in excess of the number that could be spared for that purpose.

It has been the constant study and aim of this office to so arrange and assign the officers of this department, both regular and volunteer, as to maintain the very highest efficiency at the points of service where it was most urgently required.

ORGANIZATION—QUARTERMASTER-GENERAL'S OFFICE.

Under the act approved July 7, 1898, above referred to, the following distribution of labor in the office of the Quartermaster-General was made and officers assigned to the respective duties, as indicated below:

Col. James M. Moore, Assistant Quartermaster-General, U. S. A., principal assistant of the Quartermaster-General, in charge of all matters relating to finance, money accounts, returns for quartermasters supplies, mail and record, and national cemeteries.

Lieut. Col. James L. Botsford, quartermaster, U. S. Volunteers, assistant to Colonel Moore in matters relating to national cemeteries.

Col. Frank J. Hecker, quartermaster, U. S. Volunteers, chief of division of transportation, including rail and water transportation.

Col. Charles Bird, quartermaster, U. S. Volunteers (major and quartermaster, U. S. A.), deputy chief of division of transportation.

Col. W. S. Patten, quartermaster (major and quartermaster, U. S. A.), principal assistant of the Quartermaster-General, in charge of all matters relating to clothing, camp and garrison equipage, and while so acting to rank as colonel.

Col. O. P. Miller, quartermaster (major and quartermaster, U. S. A.), principal assistant of the Quartermaster-General, in charge of all wagon transportation, the purchase of all cavalry and artillery horses, draft and pack animals, regular supplies, etc., and while so acting to rank as colonel.

Lieut. Col. Medad C. Martin, major and quartermaster, U. S. Volunteers (captain and assistant quartermaster, U. S. A.), in charge of the hire, purchase, or construction of barracks, quarters, hospitals, storehouses, stables, roads, sidewalks, wharves, bridges, and, generally, of all structures furnished by the Quartermaster's Department for the use of the Army, including the repairs thereof, and while so acting to rank as lieutenant-colonel.

Lieut. Col. Frederick G. Hodgson, major and quartermaster, U. S.

Volunteers (captain and assistant quartermaster, U. S. A.), in charge of water supply, sewerage, lighting, and heating of military posts, camps, and stations; hire of grounds for military purposes; collecting and filing of complete title papers and information pertaining to all land under the charge of the War Department purchased or appropriated for Army or other military uses, except when designed for permanent military fortifications, or for armories, arsenals, or ordnance depots, and while so acting to rank as lieutenant-colonel.

Maj. Francis M. Schreiner (captain and assistant quartermaster, U. S. Volunteers), in charge of all matters relating to the personnel of officers of the Quartermaster's Department, both regular and volunteer; post quartermaster-sergeants, and civilian employees of the Quartermaster's Department-at-Large, etc., and while so acting to rank as major.

Maj. J. Z. Dare (captain and assistant quartermaster, U. S. Volunteers), in charge of miscellaneous war claims growing out of the war with Spain, etc., and while so acting to rank as major.

Under the provisions of the same law, the following other assignments were made:

PRINCIPAL DEPOTS (NOT EXCEEDING TWELVE).

Col. Amos S. Kimball (lieutenant-colonel and deputy quartermaster-general, U. S. A.), in charge of principal quartermaster's depot, New York City, and while so acting to rank as colonel.

Col. G. C. Smith (lieutenant-colonel and deputy quartermaster-general, U. S. A.), in charge of principal quartermaster's depot, St. Louis, Mo., and while so acting to rank as colonel.

Col. John V. Furey (lieutenant-colonel and deputy quartermaster-general, U. S. A.), in charge of principal quartermaster's depot, Philadelphia, Pa., and while so acting to rank as colonel.

Col. Charles W. Williams (lieutenant-colonel and deputy quartermaster general, U. S. A.), in charge of principal quartermaster's depot, Jeffersonville, Ind., and while so acting to rank as colonel.

Lieut. Col. John W. Pullman (major and quartermaster, U. S. A.), in charge of principal quartermaster's depot, Porto Rico, and while so acting to rank as lieutenant-colonel.

Lieut. Col. George Rublen, major and chief quartermaster, U. S. Volunteers (captain and assistant quartermaster, U. S. A.), in charge of principal quartermaster's depot, Honolulu, and while so acting to rank as lieutenant-colonel.

Lieut. Col. O. F. Long, major and chief quartermaster, U. S. Volunteers (captain and assistant quartermaster, U. S. A.), in charge of principal quartermaster's depot, San Francisco, Cal., and while so acting to rank as lieutenant-colonel.

Lieut. Col. J. B. Bellinger, major and quartermaster, U. S. Volunteers (captain and assistant quartermaster, U. S. A.), in charge of principal quartermaster's depot, Tampa, Fla., and while so acting to rank as lieutenant-colonel.

Maj. Theodore E. True (captain and assistant quartermaster, U. S. A.), in charge of principal quartermaster's depot, Washington, D. C., and while so acting to rank as major.

Maj. John McE. Hyde (captain and assistant quartermaster, U. S. A.), in charge of principal quartermaster's depot, Boston, Mass., and while so acting to rank as major.

Maj. John T. Knight (captain and assistant quartermaster, U. S. A.), in charge of the principal quartermaster's depot, Santiago, Cuba, and while so acting to rank as major.

SPECIAL INSPECTORS—QUARTERMASTER'S DEPARTMENT (NOT EXCEEDING FOUR).

Col. D. D. Wheeler, lieutenant-colonel and chief quartermaster, U. S. Volunteers (major and quartermaster, U. S. A.), assigned to duty as special inspector of the Quartermaster's Department, and while so acting to rank as colonel.

Lieut. Col. F. H. Hathaway (major and quartermaster, U. S. A.), assigned to duty as special inspector of the Quartermaster's Department, and while so acting to rank as lieutenant-colonel.

PRINCIPAL FIELD ASSIGNMENTS WITH TROOPS.

Col. J. G. O. Lee, assistant quartermaster-general, U. S. A. Chief quartermaster on duty with troops at Chickamauga Park, Ga., comprising the First, Third, and Sixth Army Corps, Gen. John Brooks, commanding.

Maj. John M. Carson, jr., chief quartermaster volunteers (captain and assistant quartermaster, U. S. A.), acting chief quartermaster, First Army Corps, Chickamauga Park, Ga., and later Porto Rico.

Lieut. Col. Guy Howard, chief quartermaster volunteers (captain and assistant quartermaster, U. S. A.), chief quartermaster, Second Army Corps, Camp Alger, Va., and later Camp Meade, Pa.

Lieut. Col. D. D. Wheeler, chief quartermaster volunteers (major and quartermaster, U. S. A.), chief quartermaster, Third Army Corps, Chickamauga Park, Ga., and now colonel and special inspector, Quartermaster's department.

Lieut. Col. Charles G. Penney, chief quartermaster volunteers (captain, Sixth Infantry, U. S. A.), chief quartermaster, Fourth Army Corps, Tampa, Fla., and later Huntsville, Ala.

Maj. Leon S. Roudiez, quartermaster volunteers (first lieutenant, First Infantry, U. S. A.), acting chief quartermaster, Fifth Army Corps, Santiago, Cuba, and later Montauk Point, N. Y.

Lieut. Col. George E. Pond, chief quartermaster volunteers (major and quartermaster, U. S. A.), chief quartermaster, Seventh Army Corps, Jacksonville, Fla.

Lieut. Col. James W. Pope, chief quartermaster volunteers (major and quartermaster, U. S. A.), chief quartermaster, Eighth Army Corps, at Philippines.

ASSIGNMENTS ON QUARTERMASTER'S TRANSPORTS.

The transport service of this department, for the transportation of troops and supplies by sea, assumed large proportions very soon after actual hostilities began. It became necessary and important, in order that this service be made efficient, to assign an officer of the Army on each of the transports which were purchased and used by the Government for this special service. The officers so assigned were, as a rule, volunteer quartermasters, who acted for both the Quartermaster's and Subsistence Departments, their principal duties being to take charge of their respective transports, and assume responsibility for quarter-

master's and subsistence supplies thereon; hire, pay, and victual the crew and other civilian employees of this department employed on the vessel. A sum not exceeding 75 cents per day for each quartermaster's employee on the transport was allowed for subsistence in addition to pay, no ration in kind being allowed. The officers in charge of these transports were also required to attend to everything on shipboard that was necessary for the comfort of the officers and troops when traveling thereon.

A list of these transports, with the names of the officers assigned to take charge of them, accompanies this report.

MILITARY STOREKEEPER.

Congress by act approved July 1, 1898, authorized the appointment of a military storekeeper in the Quartermaster's Department of the Army, and under the provisions of this act Capt. Charles D. A. Loeffler was, on July 5, 1898, appointed by the President to said position.

Capt. Edgar S. Dudley, assistant quartermaster, U. S. A., was, on May 9, 1898, commissioned by the President as lieutenant-colonel of volunteers in the Judge-Advocate-General's Department, and on June 1, 1898, he relinquished his duties in the Quartermaster's Department to assume those under his volunteer commission.

POST QUARTERMASTER-SERGEANTS.

During the fiscal year the 80 post quartermaster-sergeants provided by law performed their duties very satisfactorily.

At the beginning of hostilities it became apparent that an increase in the number of these sergeants would have to be made if the requirements of the service were to be properly met. Accordingly Congress, by act approved July 8, 1898, provided for the appointment of 25 additional post quartermaster-sergeants, and as rapidly as capable and suitable sergeants could be selected appointments were made, so that at the present time there are 98 of these sergeants in the service, who are distributed where their services are most urgently needed.

DETACHMENT OF ARMY SERVICE, QUARTERMASTER'S DEPARTMENT, WEST POINT, N. Y.

Maj. William F. Spurgin, Twenty-third United States Infantry, commanding this detachment, reports in reference thereto as follows:

Number of men in detachment July 1, 1897	112
Number of men transferred or discharged during fiscal year ending June 30, 1898.	43
	<hr/> 69
Number of men enlisted in and transferred to detachment during fiscal year ending June 30, 1898.....	56
	<hr/> 125
Total	125

On November 18, 1897, the honorable the Secretary of War, under the provisions of act approved February 10, 1897, authorized the increase of the number to be enlisted in this detachment from 116 to 125.

Major Spurgin further reports that the members of this detachment are assigned to the following duties: Six as clerks in quartermaster's and adjutant's offices, 29 as mechanics, 29 as teamsters, 37 as laborers, 6 as janitors, 4 as printers, 5 in academic departments, 1 as gas fitter,

1 as cadets' bugler, 2 as bakers, 2 in subsistence department, 2 as messengers, 1 as mail carrier; total, 125.

First sergeants	1
Sergeants	6
Corporals	7
Privates	111
Total	<u>125</u>

CIVILIAN EMPLOYEES, QUARTERMASTER'S DEPARTMENT AT LARGE.

To enable the Quartermaster's Department to perform its proper and important functions in connection with the operations of a large army in the field, it is very essential that an ample force of capable civilian assistants be employed by this Department for that purpose. The army would soon lose a large percentage of its effective force if the army wagon supply trains required by such an army were not provided with the complement of employees. Capable wagon and forage masters and teamsters are necessary to keep such trains in a proper state of efficiency; wheelwrights must be employed to repair the means of transportation; saddlers are needed constantly to look after the thousand sets of harness in use; blacksmiths are required to see that the public animals are well shod, and a corps of trained veterinary surgeons must be kept at hand for the treatment and care of all the public animals. In fact, a small army of civilian quartermaster's employees are absolutely necessary to an army in the field if that army is to have its actual needs properly and promptly supplied.

The transport service under this Department also requires a large number of expert employees, such as captains, pursers, pilots, engineers, stevedores, seamen, and various other employees, who must be selected with great care in order that none but capable and efficient men are employed. This service especially is very largely dependent upon the capacity and efficiency of the persons hired for duty in connection therewith.

The principal depots and purchasing stations of the Quartermaster's Department are also places where a large amount of important public business is transacted; especially is this the case in time of war, and to keep these depots and stations in a high state of efficiency a large number of civilian employees, many of them experts in their respective lines, must be hired.

This subject of employing the necessary civilian quartermaster's employees for duty with the army in the field, on the transports, and at the various principal quartermaster's depots and purchasing stations throughout the country, being one of much importance, was given the most careful study and consideration, and while scrutinizing all applications for employees, in order to prevent any extravagance in the expenditures for this purpose, no interest of the service was permitted to suffer on account of a lack of the necessary assistance in the way of quartermaster's employees. Every proper and reasonable request for such assistance made to this office was promptly supplied.

All employments, however, in the Quartermaster's Department at large, during the war with Spain, have been of a temporary nature, and continued only from time to time as their services seemed absolutely necessary, and, as rapidly as the conditions of the service will permit, steps will be taken to reduce the number of these temporary employees to a basis required by actual needs.

At the beginning of the war many of the regular and experienced civilian clerks of this Department were taken from their permanent stations and sent to the field, where they were required to work from fourteen to sixteen hours a day, Sundays and holidays included, and for their efficiency and devotion to their duties they are entitled to the thanks of this Department and to special consideration. Most, if not all of them, are men of family, and in going to the field they not only suffered inconvenience and hardships, but were also obliged to maintain and meet the expense of their families at home and themselves in the field without any increase in their compensation. These clerks, as well as a number of others who cheerfully rendered most valuable service to this Department at the various stations during the war, should receive some recognition in the way of additional or extra compensation. After the war of the rebellion, Congress, by special act, allowed certain civilian employees of the Government 20 per cent additional compensation over the salaries received, as a just recognition for their extra service, and it would seem just and proper that similar action should be taken on behalf of these experienced employees who have rendered extraordinary service to the Government during the war with Spain. They have, under the most trying circumstances, devoted their energies and special abilities for the public good, serving their country faithfully and well, day and night, and I cheerfully commend them to your most favorable consideration.

Very respectfully,

FRANCIS M. SCHREINER,
Major, Assistant Quartermaster, U. S. Volunteers.

The QUARTERMASTER-GENERAL OF THE ARMY.

**REPORT OF THE COMMISSARY-GENERAL
OF SUBSISTENCE.**

REPORT

OF THE

COMMISSARY-GENERAL OF SUBSISTENCE.

WAR DEPARTMENT,
OFFICE COMMISSARY-GENERAL OF SUBSISTENCE,
Washington, D. C., October 17, 1898.

SIR: I have the honor to submit the following report of the operations of the Subsistence Department for the fiscal year ending June 30, 1898, and subsequently to include the date of September 30, 1898.

RESOURCES AND EXPENDITURES.

The following statement exhibits the aggregate fiscal resources and expenditures of the department, and the balances at the close of the period mentioned:

RESOURCES.

Amounts in the Treasury to the credit of the appropriations of the Subsistence Department on June 30, 1897, as follows:			
Subsistence of the Army, 1896.....	\$194, 693. 89		
Subsistence of the Army, 1897.....	203, 849. 89		
Commutation of rations to prisoners of war in rebel States and soldiers on furlough—			
Certified claims, acts March 2, 1889, and April 4, 1890	2, 044. 11		
Certified claims, 1896, act March 2, 1895	7, 586. 73		
Certified claims, 1897, act June 11, 1896.....	485. 13		
Claim for quartermaster stores and commissary supplies, acts July 4, 1864, and March 2, 1895 08		
Relief of sufferers from overflow of Mississippi River and its tributaries, and the Red River of the North (joint resolution approved April 7, 1897)...	108, 685. 11		
			\$517, 344. 94
Amounts to the credit of officers of the Subsistence Department and of officers doing duty in the Subsistence Department with the Treasurer, assistant treasurers, and designated depositaries, and in their personal possession on June 30, 1897, as follows:			
Subsistence of the Army, 1897.....	63, 893. 77		
Commutation of rations to prisoners of war in rebel States and soldiers on furlough—			
Certified claims, 1897, act June 11, 1896.....	608. 20		
Relief of sufferers from overflow of Mississippi River and its tributaries and the Red River of the North (joint resolution approved April 7, 1897) ..	20, 639. 62		
			85, 141. 59

Amounts refunded to the Treasury near the close of the fiscal year 1897, but not carried to the credit of the appropriation by June 30, 1897, as follows:

Subsistence of the Army, 1897 \$30,958.71

Amounts appropriated for the Subsistence Department for the fiscal year ending June 30, 1898, and the period ending January 1, 1899, as follows:

Subsistence of the Army, 1898, act of March 2, 1897. \$1,650,000.00
Subsistence of the Army, January 1, 1899, act of May 4, 1898, \$2,739,643.50; act of June 8, 1898, \$5,000,000; act of July 7, 1898, \$15,367,112.28; total..... 23,106,755.78
Subsistence of the Army, 1898—
 Certified claims, act July 19, 1897..... 149.38
Commutation of rations to prisoners of war in rebel States and soldiers on furlough—
 Certified claims, 1898, act June 4, 1897..... 4,000.00
 Certified claims, 1897, act July 19, 1897..... 177.25
Relief of people in mining regions of Alaska, act of December 18, 1897..... 200,000.00
..... 24,961,082.41

Amounts collected from various sources and refunded to the appropriations of the Subsistence Department on the books of the Treasury during the fiscal year 1898, as follows:

Subsistence of the Army, 1895, and prior years..... 215.69
Subsistence of the Army, 1895, and prior years, transfer account..... 17.14
Subsistence of the Army, 1896..... 1,077.25
Subsistence of the Army, 1897..... 512.33
Subsistence of the Army, 1898..... 261.84
..... 2,084.25

Amounts received by officers of the Subsistence Department and by officers doing duty in the Subsistence Department from sales of subsistence stores to the following purchasers during the fiscal year 1898, and taken up for immediate disbursement under the following appropriations:

Subsistence of the Army, 1897: Sales to officers, \$39.46; refundment, \$32.75..... 72.21
Subsistence of the Army, 1898: Sales to officers, \$250,577.12; to enlisted men, companies, detachments, and hospitals, \$331,400.73; to post exchanges, \$29,953.31; to civilian employees, \$10,851.45; to Quartermaster's Department, \$60.74; to Indian agents, \$2,532.80; to Indian-school teachers, \$113; to Indian physician, \$276.56; to Indian Commission, \$54.13; to naval officers, \$62.88; to United States Boundary Commission, \$232.24; to Yosemite Park Commission, \$19.31; of surplus and condemned stores and property at auction, \$367.61; of boxes, barrels, etc., \$55.02; to Geological Survey, \$35.85..... 626,592.75

Amounts taken up by officers doing duty in the Subsistence Department on account of reclamations for stores lost, damaged, etc., and in correction of errors in their accounts, etc., during the fiscal year 1898..... 796.59
Relief of people in mining regions of Alaska, act of December 18, 1897: Sales, \$7,176.15; refundments, \$54.86..... 7,231.01
..... 634,692.56

Amounts charged against officers still in the service on account of funds and stores alleged to have been lost by theft, etc., for which relief can only be obtained in the Court of Claims under sections 1059 and 1062, Revised Statutes, or from Congress, as follows:
Subsistence of the Army, 1880..... 75.92
Subsistence of the Army, 1889..... 24.04
..... 99.96

Total resources 26,231,404.47

EXPENDITURES.

Amounts expended on the books of the Treasury from the appropriations of the Subsistence Department during the fiscal year 1898, as follows:

Subsistence of the Army, 1895, and prior years, transfer account	\$0.14
Subsistence of the Army, 1896.....	29.75
Subsistence of the Army, 1897.....	1,500.54
Subsistence of the Army, 1898.....	5.00
Subsistence of the Army (certified claims) act January 19, 1897	149.38
Commutation of rations to prisoners of war in rebel States and soldiers on furlough—	
Certified claims, 1897, act June 11, 1897.....	4.25
Certified claims, 1897, act July 19, 1897.....	177.25
Relief of sufferers from overflow of Mississippi River and its tributaries, and the Red River of the North, joint resolution approved April 7, 1897 ...	1,418.54

\$3,284.85

Amounts disbursed by officers of the Subsistence Department and officers doing duty in the Subsistence Department during the fiscal year 1898, as follows:

Subsistence of the Army, 1897.....	20,033.21
Subsistence of the Army, 1898.....	2,215,877.78
Subsistence of the Army, January 1, 1899.....	3,532,243.33
Commutation of rations to prisoners of war in rebel States and soldiers on furlough—	
Certified claims, 1897, act June 11, 1896.....	119.75
Certified claims, 1897, act June 4, 1897.....	1,101.01
Relief of sufferers from overflow of Mississippi River and its tributaries, and the Red River of the North, joint resolution approved April 7, 1897....	3,914.06
Relief of people in mining region of Alaska, act of December 18, 1897.....	25,630.99

5,798,920.13

Amount dropped by officers doing duty in the Subsistence Department in correction of errors in their accounts during the fiscal year 1898:

Subsistence of the Army, 1898.....	67.49
------------------------------------	-------

Amounts carried to the surplus fund on June 30, 1898:

Subsistence of the Army, 1896.....	195,711.39

Subsistence of the Army, 1889	24.04	
		<hr/> 99.96

Total balances	20,222,689.37
----------------------	---------------

THE DUTIES OF THE SUBSISTENCE DEPARTMENT.

The Subsistence Department is charged with the duty of purchasing and issuing to the Army such supplies as enter into the composition of the ration, and of procuring and keeping for sale to officers and enlisted men such articles as may from time to time be designated by the inspectors-general of the Army with the approval of the Secretary of War. Incidental to the above, it was the duty of the Department up to the year 1894 to provide bake ovens at posts and in the field, and for the repairs thereof; but by General Orders No. 40, Headquarters of the Army, August 29, 1894, the duty of building, furnishing, and repairing permanent bake ovens and procuring field ovens was transferred to the Quartermaster's Department, and the duty of issuing matches for lighting the fires and lamps for which fuel and illuminating supplies were issued by that Department was transferred to the Subsistence Department.

THE ORGANIZATION OF THE PERSONNEL OF THE SUBSISTENCE DEPARTMENT.

On April 1, 1898, the Subsistence Department of the Army consisted of the following officers, viz:

	Rank.	Number.
Commissary-General of Subsistence	Brigadier-general....	1
Assistant commissaries-general of subsistence.....	Colonel	2
Do	Lieutenant-colonel....	3
Commissaries of subsistence.....	Major.....	8
Do	Captain.....	8
Total	22

At that time there were 96 commissary sergeants in the service.

An "army corps" organized on the basis of the maximum organization prescribed by section 9 of the act for temporarily increasing the military establishment, approved April 22, 1898, consists of 3 divisions of 3 brigades each, each brigade consisting of 3 regiments of about 1,300 enlisted men each. The number of enlisted men to an army corps, therefore, would be the product of:

$$3 \times 3 \times 3 \times 1,300 = 35,100.$$

The number of subsistence officers necessary for the officering of an army corps is 13, consisting of 1 chief commissary of the army corps, 3 chief commissaries of divisions, and 9 commissaries of brigades.

Had all the officers of the Subsistence Department (22 in number, including the Commissary-General of Subsistence and the assistants in his office) been ordered into the field in April, 1898, they would have been sufficient for properly officering with subsistence officers only 1 army corps of maximum enlisted strength and 1 army corps of two-thirds maximum enlisted strength. The country was at that time divided into 8 military departments, requiring the presence of a chief commissary of subsistence at the headquarters of each, and 16 of the officers of the Department were then performing duty as purchasing and depot commissaries, some of whom were also chief commissaries.

The strength of the enlisted force of the Regular Army on the active list on April 1, 1898, was limited to 25,000 men, exclusive of the hospital corps, which consisted of 725 enlisted men. This force was distributed in garrisons ranging from Maine to Alaska.

THE RATION.

The articles composing the ration of the enlisted men of the Army are fixed by law. Section 1146, Revised Statutes, prescribes that each ration shall consist of—1½ pounds beef, or ¾ pound pork; 18 ounces bread, or 18 ounces flour, and at the rate of 10 pounds coffee, 15 pounds sugar, 2 quarts salt, 4 quarts vinegar, 4 ounces pepper, 4 pounds soap, and 1½ pounds candles to every 100 rations.

It further prescribes that—

The President may make such alterations in the component parts of the ration as a due regard to the health and comfort of the Army and economy may require.

Section 5 of the act of June 16, 1890 (26 Stat. L., 158), prescribes:

That the army ration now provided by law shall be increased by the addition thereto of one pound of vegetables, the proportion to be fixed by the Secretary of War.

Under the authority of the foregoing legislation, the ration officially established and promulgated by Army Regulations in force in April, 1898, was composed of the following kinds and quantities of articles for troops stationed where cooking was practicable:

Articles.	Quantities per ration.	
	Ounces.	Gills.
<i>Meat components.</i>		
Fresh beef.....	20
or fresh mutton, when the cost does not exceed that of beef.....	20
or pork.....	12
or bacon.....	12
or salt beef.....	22
or, when meat can not be furnished, dried fish.....	14
or pickled fish.....	18
or fresh fish.....	18
<i>Bread components.</i>		
Flour.....	18
or soft bread.....	18
or hard bread.....	16
or corn meal.....	20
Baking powder for troops in the field, when necessary to enable them to bake their own bread.....	12
<i>Vegetable components.</i>		
Beans.....	22
or pease.....	22
or rice.....	12
or hominy.....	12
Potatoes.....	16
or potatoes, 12½ ounces, and onions, 3½ ounces.....	16
or potatoes, 11½ ounces, and canned tomatoes, 4½ ounces; or 4½ ounces of other fresh vegetables not canned, when they can be obtained in the vicinity of the post or transported in a wholesome condition from a distance.....	16
<i>Coffee and sugar components.</i>		
Coffee, green.....	12
or roasted coffee.....	12
or tea, green or black.....	22
Sugar.....	22
or molasses.....		16
or cane sirup.....		16
<i>Seasoning components.</i>		
Vinegar.....		22
Salt.....	12
Pepper, black.....	22
<i>Soap and candle components.</i>		
Soap.....	22
Candles (when illuminating oil is not furnished by the Quartermaster's Department)	22

The usual rule, subject to local or temporary controlling circumstances, for the issue of the meat portion of the ration in the Army is that seven days' fresh meat shall be issued to three days' salt meat.

In the case of troops traveling otherwise than by marching, or when for short periods they were separated from cooking facilities and did not carry cooked rations, they were allowed by the Army Regulations the following articles in lieu of all components of the ordinary ration:

Articles.	Per 100 rations.
Soft bread.....pounds..	112½
or hard bread.....do....	100
Beef, canned.....do....	75
Baked beans, 1-pound cans.....number..	33
or baked beans, 3-pound cans.....do....	15
Coffee, roasted.....pounds..	8
Sugar.....do....	15

After troops had subsisted upon the travel ration for four consecutive days they were allowed canned tomatoes, in addition to the travel ration, at the rate of 1 pound of tomatoes per man per day.

The various kinds of rations, according to specific designations, issued in actual service are shown by the following tables, which also show the components of each, and the weight of 100 rations and of 1 ration each:

TABLE I.—The “Garrison” ration.

Articles.	Per 100 rations.	Articles.	Per 100 rations.
<i>Meat components.</i>	<i>Pounds.</i>	<i>Vegetable components—Continued.</i>	<i>Pounds.</i>
Fresh beef.....	125	Potatoes.....	100
or fresh mutton, when the cost does not exceed that of beef.....	125	or 30 pounds of other fresh vegetables, not canned, when they can be obtained in the vicinity of the post or transported in a wholesome condition from a distance...	30
or pork.....	75	<i>Coffee and sugar components.</i>	
or bacon.....	75	Coffee, green.....	10

Saccharin.....	180
Salt.....	4
Pepper, black.....	½
Tobacco, plug.....	3½
Bags, wrappers, etc.....	3
Weight of 100 rations, 207½ pounds.	
Weight of 1 ration, 2.07 pounds.	

STORES FOR SALES TO OFFICERS AND ENLISTED MEN.

In order that, in case of war, a definite policy should be established in respect to taking into the field supplies authorized to be kept by the Subsistence Department for sales to officers and enlisted men, under section 1144, Revised Statutes, the Acting Commissary-General of Subsistence, on April 9, 1898, addressed a letter to the Secretary of War, which resulted in the adoption of the following list of stores to be furnished for sales in the field:

All articles which are components of the ration and the following:

Apples, canned.	Tobacco, smoking, two varieties.
Apricots, dried.	Soap, toilet.
Bacon, breakfast.	Soap, laundry.
Baking powder.	Metal polish, two varieties.
Cheese, American, Edam.	Tripoli flour.
Chocolate, plain, vanilla.	Buttons, trousers.
Coffee, Java-Mocha.	Needlebooks, with needles.
Corn, green, canned.	Pins.
Crackers, three varieties.	Thread, cotton, white.
Effervescing drinks, such as ginger ale.	Thread, linen, white.
Ham, deviled, canned.	Thread, linen, black.
Ham, sugar-cured.	Envelopes.
Milk, canned.	Ink, black.
Oatmeal, one variety.	Paper, note.
Peaches, canned and evaporated.	Pencils, lead.
Pease, American, canned.	Penholders.
Preserves, Damson, canned.	Pens.
Prunes.	Basins, hand.
Sardines.	Blacking, shoe.
Soup, four varieties.	Brooms, whisk.
Sugar, white.	Brushes, blacking.
Sirup.	Brushes, hair.
Tongue, beef, canned.	Brushes, tooth.
Ginger, ground.	Can openers.
Jam, blackberry.	Combs, coarse.
Jelly, currant.	Combs, fine.
Lime juice.	Combs, pocket.
Mustard, ground.	Handkerchiefs, linen.
Pepper, red, Cayenne, Chile-Colorado.	Handkerchiefs, silk.
Pickles.	Matches, safety.
Salt, table.	Paper, toilet.
Sauce, cranberry.	Shoestrings.
Sauce, table, Worcestershire.	Towels.
Pipes, brierwood, one variety.	Toweling.
Tobacco, chewing.	

THE WAR WITH SPAIN.

Such were the conditions existing on the 20th day of April, 1898, when the joint resolution recognizing the independence of the people of Cuba and directing the President to use the land and naval forces of the United States for the purpose of carrying the resolution into effect was approved by the President of the United States.

Already, in anticipation of the actual breaking out of hostilities between the United States and Spain, the Acting Commissary-General of Subsistence had, at the beginning of the month of April, 1898, advised all chief and purchasing commissaries to have at all posts travel rations adequate to the wants of the full garrisons if ordered to move, and to ascertain and list the houses from whom articles of the ration and of the travel ration could be had at once if wanted in large quantities. By actual inspection of the returns of subsistence stores for the preceding month on file in the office of the Commissary-General of Subsistence there were found to be on hand at each post more than thirty days' supplies for the number of men at each and thirty days' supplies of stores classed as perishable, besides supplies for sales (canned goods, etc.) in equal or greater quantities. It had also at that time been recommended by the Acting Commissary-General of Subsistence that orders which might issue directing any garrison to change station should include a requirement that, if the whole garrison moved, all salted meats should be taken with it, and proportionately if only a part moved, and that at least thirty days' rations (excluding fresh beef) should be taken.

Some movements of the artillery toward the seacoast had been ordered during the month of March, 1898, but it was not until April 15, 1898, that orders were issued from the office of the Adjutant-General of the Army directing a general movement of the Regular Army from the posts scattered throughout the eight military departments, covering almost the entire area of the United States, to the places of concentration at Chickamunga National Park, New Orleans, Mobile, and Tampa. The orders issued that day required the troops in all cases to take with them thirty days' field rations, and an order of the following day directed all the articles of the ration and stores for sales at the various posts on railroads, where economy would be subserved, over and above a reasonable amount to be left for the troops retained at the posts, to be invoiced and shipped to the commissaries at the camps to which the troops of each post were transferred, the stores to follow the departure of the troops with as little delay as practicable. This was with the view of utilizing the stock of subsistence stores on hand at the posts instead of leaving them to deteriorate in the hands of the depleted garrisons.

An officer of the Subsistence Department was already on duty at New Orleans as purchasing and depot commissary, and on April 19, 1898, an order was issued assigning regular officers of the Subsistence Department to duty on the staffs of the commanding generals at Chickamunga National Park, Mobile, and Tampa. On April 22, 1898, the President approved the act to provide for temporarily increasing the military establishment, and on April 23, 1898, he issued his proclamation calling for 125,000 volunteers. On April 25 he approved the act declaring that war existed between the United States and the Kingdom of Spain, and on April 26 he approved the act for the better organization of the line of the Army, which increased the Regular Army by the addition of about 36,000 enlisted men.

The first officers to enter the Volunteer Army as subsistence officers were five officers of the regular Subsistence Department, who were given the rank of lieutenant-colonel of volunteers. As the law authorizing these appointments required the appointees to serve as chief commissaries of subsistence of volunteers in the field, the Subsistence Department would have lost the services of all of them as purchasing and depot officers if it had not been for the act of June 29, 1898 (30 Stat. L., 525), which made the assignments of the officers of the volunteer staff subject to the same rules and regulations as those of the Regular Army. Three of these officers have been continuously in the field, and the remaining two have been doing purchasing and depot duty in addition to any duty required of them in connection with their volunteer commissions.

The following is a list of all subsistence officers of volunteers appointed between the passage of the act of April 22, 1898, and August 31, 1898, with the date of acceptance of commission, date of filing of official bond, and date of first assignment to duty in each case:

Chief commissaries of subsistence.

WITH THE RANK OF LIEUTENANT-COLONEL.

[Under act approved April 22, 1898.]

Name.	Appointed from.	Date of commission.	Date of acceptance.	Date of filing official bond.	First assignment.	
					Date.	Duty.

12. Samuel N. Bridgman.	July 21	Sept. 1	Sept. 17	Sept. 27	Commissary with Sec-ond Army Corps.

The seven chief commissaries of subsistence of volunteers with the rank of lieutenant-colonel, who had been appointed from the Regular Army, were assigned to duty on the staffs of the commanding generals of the seven army corps established by General Orders, No. 46, Headquarters of the Army, May 16, 1898. Those chief commissaries of volunteers having the rank of major were as a rule assigned to the staffs of division commanders, and the commissaries having the rank of captain to the staffs of brigade commanders.

PURCHASE AND SHIPMENT OF SUBSISTENCE SUPPLIES.

By the end of April, 1898, orders had been issued sending officers of the Regular Army to the places of rendezvous designated throughout

the country for mustering into the service of the United States the volunteer troops called out by the President's proclamation of April 23. Instructions were given to all commissary officers engaged in the subsistence of these volunteers, and supplies of necessary blank forms for facilitating the transaction of commissary business were sent them in profusion from the Commissary-General's Office.

Meanwhile depots of subsistence supplies had been established by the Commissary-General at the principal points of concentration of troops, and officers of skill and experience of the regular establishment had been assigned to duty at them, in order that the chief commissaries of corps and divisions and the commissaries of brigades might not be distracted with the business of purchasing and forwarding supplies to their commands, but would be able to give their undivided attention, under the orders of their commanding officers, to the duty of drawing and issuing rations to the enlisted men in the field who had been committed to their care.

Instructions had been given by the Commissary-General of Subsistence to the purchasing and depot commissaries in the cities of New York, Baltimore, Chicago, St. Louis, Kansas City, New Orleans, and San Francisco, who were all officers of the regular establishment and some of them of long service and great experience, to purchase and ship to the depots which had been located at the several points of concentration subsistence supplies in such quantities as to meet all current demands for the subsistence of troops and for keeping on hand at those places a surplus of at least sixty days' provisions for the entire commands there assembled.

The depot commissaries at the places of concentration were also authorized to call on the Commissary-General of Subsistence for all the supplies that they might consider to be needed in carrying out this plan. These instructions have applied to all places where large bodies of troops have been assembled, and under them there has been no difficulty in procuring and shipping all subsistence supplies needed. As a measure of precaution, the commissaries on duty in charge of depots near large bodies of troops in the eastern part of the United States have been required to make weekly reports to the Commissary-General of Subsistence of the number of complete rations on hand, in order that there might be no delay or failure of replenishment by the Subsistence Department.

THE SANTIAGO CAMPAIGN.

A very serious freight blockade at and in the neighborhood of Tampa in May and June, 1898, was caused by the celerity with which the troops and their supplies were concentrated at that place in preparation for the invasion of the Island of Cuba. This blockade was a matter of grave concern to the Subsistence Department, and it was only after the most peremptory orders of the Commissary-General of Subsistence to unload the cars and to hire warehouses, if necessary, that the officers of the department on the spot were enabled, with unflagging zeal and untiring energy, to so far extricate the department as to permit the taking by the Fifth Army Corps, when it sailed on June 14, a supply of rations sufficient to last the command of 16,000 enlisted men for four months, and the sending on June 26, 27, and 28 of further supplies.

The following is a list of the subsistence stores taken on transports

with the Fifth Army Corps when it sailed on June 14, consigned to the officer acting as depot commissary in Cuba, viz:

Articles.	Weights or measures.	Equivalent in rations.	Number of days' supply for 16,000 men.
<i>Meat components.</i>			
Bacon.....pounds..	922, 888	} 2, 011, 701	125. 7

Candles.....do....	33, 785	2, 252, 333	140. 8
<i>Stores for sales to officers and enlisted men.</i>			
Plug tobacco.....pounds..	18, 000
Durham smoking tobacco.....do....	1, 000
Seal of North Carolina smoking tobacco.....do....	1, 000

Reenforcements for the Fifth Army Corps, to the extent of 6,400 enlisted men, sailed for Santiago June 22. On June 26, 27, and 28 the following subsistence stores were shipped from Tampa to the officer acting as depot commissary in Cuba, viz:

Articles.	Weights or measures.	Equivalent in rations.	Number of days' supply for 6,400 men.
<i>Meat components.</i>			
Bacon.....pounds..	113, 308	} 504, 266	78. 8
Beef:			
Fresh roast, 2-pound cans.....cans..	128, 306		
Fresh roast, 6-pound cans.....do....	1, 380		
<i>Bread components.</i>			
Flour.....pounds..	271, 100	} 490, 603	76. 7
Hard bread.....do....	249, 625		
Baking powder.....do....	9, 924		
<i>Vegetable components.</i>			
Beans.....pounds..	45, 000	} 500, 000	78. 1
Rice.....do....	20, 000		
<i>Fresh vegetable components.</i>			
Potatoes.....pounds..	278, 521	} 645, 853	100. 9
Onions.....do....	115, 418		
Tomatoes, 3-pound cans.....cans..	89, 968		
Tomatoes, gallon cans.....do....	7, 332		

Articles.	Weights or measures.	Equivalent in rations.	Number of days' supply for 16,000 men.
<i>Coffee and sugar components:</i>			
Coffee, green.....pounds..	21, 750	} 498, 125	77. 8
Coffee, roasted.....do....	22, 450		
Sugar.....do....	75, 100

Under contract entered into July 1, 1898, between the Commissary-General of Subsistence and Swift & Co., of Chicago, Ill., a cargo of refrigerated beef reached Santiago on July 21, 1898, the day after the port was opened for navigation, and was most acceptable to the troops and hospitals there. Supplies of this beef have since been furnished in plentiful quantities to meet the needs at that place.

On September 27, 1898, the purchasing and depot commissary who had been ordered to Santiago on August 1, 1898, reported the following ration articles on hand in his depot, viz:

Articles.	Weight or measures.	Equivalent in rations.
<i>Meat components.</i>		
Bacon.....	800,000
Beef, roast, canned.....	900,000
<i>Bread components.</i>		
Flour.....	800,000
Hard bread.....	700,000
Corn meal.....	1,100,000
Yeast.....	1,000,000
<i>Vegetable components.</i>		
Beans.....	1,000,000
Rice.....	700,000
<i>Fresh vegetable component.</i>		
Tomatoes.....	800,000
<i>Coffee and sugar components.</i>		
Coffee.....	2,000,000
Coffee, roasted.....	1,800,000
Sugar.....	2,000,000

Articles.	Weights or measures.	Equivalent in rations.
<i>Seasoning components.</i>		
Vinegar.....	2,000,000
Salt.....	1,300,000
Pepper.....	2,600,000
<i>Soap and candle components.</i>		
Soap.....	3,000,000
Candles.....	2,500,000

No great quantities of subsistence stores of the above kinds had been shipped to Cuba after the withdrawal of the Fifth Army Corps from that island. The garrison at Santiago at present consists of seven regiments.

It will thus be seen that all due diligence was used by the Commissary-General of Subsistence in placing subsistence stores within reach of the troops operating against Santiago. Upon landing in Cuba these stores of the expedition were subject to the orders of the general commanding, who was in paramount control of the military operations in that quarter. The relations of the commanding general of the forces and of the staff officers on duty under him to the supplies placed at their disposal are sufficiently defined by laws, regulations, and orders. The degree of diligence and efficiency with which all the subsistence officers of the staff performed their duties in supplying the troops in the immediate theater of operations was primarily within the observation and control of the general commanding. On the eve of setting out for Santiago the commanding general Fifth Army Corps issued the following order:

GENERAL ORDERS, }
No. 7. }

HEADQUARTERS FIFTH ARMY CORPS,
Tampa, Fla., June 2, 1898.

The following is published for the information and guidance of this command:

Troops will be rationed every ten days.

To accomplish this, regiments will consolidate company ration returns, brigade commissaries will in turn consolidate ration returns of the regiments of their brigades, and having obtained the approval of the chief commissary of the division to which they belong, will draw from the depot commissary in bulk, and issue to the different companies of their brigades.

Separate regiments, companies, detachments, field hospitals, or other organizations not brigaded will draw direct from the depot commissary in the way indicated for brigades.

The consolidated ration return of the brigade commissary, approved by the chief commissary, upon which issues are made, will be a proper voucher for the depot commissary.

Brigade commissaries will also provide themselves with small quantities of stores for sales, but officers and men should, as much as possible, provide for their wants from the depot.

To facilitate this work a field tool chest will be issued to each brigade, also paulins by the depot, and commissary sergeants assigned as far as practicable.

The corps stationed at Jacksonville and thereabouts will draw from the depot commissary at Jacksonville, and the corps stationed here and hereabouts from the depot commissary here.

By command of Major-General Shafter:

E. J. MCCLERNAND,
Assistant Adjutant-General.

If, with abundance of provisions ashore and afloat at the base of supplies in Cuba, the enlisted men were at any time hungry, not the Commissary-General of Subsistence, nor the entire personnel of the Subsistence Department, was at fault. A glimpse of the difficulties encountered on landing in Cuba is given by the chief commissary of the

expedition in an official letter to the Commissary-General of Subsistence, dated at Siboney, Cuba, July 7, 1898, as follows:

You are already acquainted with the loading at Tampa that I hoped to straighten out when we unloaded somewhere on the island, but the opportunity has not come, although we landed on the 22d of June. At Daiquiri first, then here, the troops were run ashore without rations, and I was directed to open depots, 200,000 rations at each, and feed soldiers, civilian employees, Cubans, etc. To do this was simply impossible, but not so to try, and we pegged away night and day meeting demands.

At Daiquiri there is a pier to which our transports could not go, but I took a lighter, transferred from transport thereto, ran in, and unloaded. Succeeded in obtaining not more than about 60,000 rations on shore and these were issued rapidly, but we kept right along. Siboney, being about 7 miles nearer to Santiago, with a bad road, became the base, although furnishing no advantage beyond propinquity, as it was in the open, no landing, everything depending on the calm of the surf, which was uncertain. Here I would proceed as before, running in the lighter as far as I could, then transferring stores into a small boat, about 10 tons, borrowed from the Navy, and pull ashore by hand. To supply an army in this way was severe, but when new regiments came, landing without a ration and increasing my work, the job looked insurmountable. I worked day and night, men getting sick, stevedores striking, new hands insufficient and inefficient, supplemented by rough sea, until I got down to 1,000 rations ashore. I got through, but the Lord knows how. Now to business.

The commanding general directed that hard bread, roasted coffee, sugar, and meat be the only components furnished. I added soap and some tomatoes. This of course leaves us with a lot of spare stuff—as vinegar, candles, pepper, flour—thus making confusion more confused. Unloading and straightening out is out of the question without Santiago, and I have an idea that even if we had it I wouldn't have time to do so. Hence, to meet such conditions, quite probable to me, I have to request that you cause to be sent the stores mentioned in telegram of yesterday and in the manner, too, as when our stores are with troops they too often help themselves, and here at least go ashore, leaving their camp and garrison, their personal and official baggage, and whatever rations, forage, etc., on hand scattered all over the ship, so that one has to work a day or two to find what he wants, and this I have no time to do. We should have transports consigned to us for duty, then we could handle our stores in a businesslike way.

Your Department has been praised plentifully. I am well.

Please send me without delay a few more commissary sergeants. This, however, I'll telegraph to-day.

It is evident from the foregoing statements that the supplies of subsistence stores shipped for the use of the Army in Cuba have been at all times in excess of immediate needs. Besides being available for our own troops, they afforded relief to the Cuban army and to the destitute population which abandoned the city of Santiago when preparations for its destruction had been made. The official returns from Cuba, showing in detail the issues made to these several classes of persons and others contemplated by law, have not yet been received, and there is not in this office any information throwing light on the subject of the provisioning of the transports which brought the Army back to Montauk Point further than that there was an abundance of subsistence stores in Santiago and vicinity.

DIET FOR THE SICK.

On May 17, 1898, on the request of the Surgeon-General and the recommendation of the Commissary-General of Subsistence, the Secretary of War granted 60 cents per day per man for subsistence of the sick in hospital at Key West, Fla., payable from the appropriation for subsistence of the Army.

On June 16, 1898, on the recommendation of the Surgeon-General and Commissary-General of Subsistence, the Secretary of War approved the allowance of 60 cents per man per day to patients carried upon the hospital train, payable from the appropriation for subsistence of the Army.

August 2, 1898, on the application of the chief surgeon, Seventh

Army Corps, for the allowance of two rations each to soldiers at recuperation camp at Pablo Beach, Fla., the Commissary-General recommended, and the Secretary of War approved on August 4, an allowance at the rate of 60 cents per man per day to the patients in the hospital camp, payable from the appropriation for subsistence of the Army.

There was doubtless little in the nature of special food for the diet of the sick to be obtained in the midst of or in the neighborhood of military operations in Cuba, and little opportunity occurred, in the short time between the landing of the troops in that island and the embarkation for home, for the accumulation there of hospital funds for the purchase by the Medical Department of special supplies needed for the sick, even had there been a market accessible.

On a telegram to the Adjutant-General from the commanding general of the Fifth Army Corps, dated at Santiago, August 2, 1898, stating that there were no hospital funds at Santiago, and requesting that \$2,000 be supplied by the Medical Department to the medical officer in charge there for the purchase of delicacies for the sick (in that instance chickens, which were there from the North), the Commissary-General of Subsistence recommended to the Secretary of War that the rations of the sick in hospital at Santiago be commuted at 75 cents per day. This recommendation was approved by the Secretary of War for the troops serving in Cuba. The Secretary had generously manifested a willingness to pay the amount called for from his own private means. A telegram was at once sent by the Commissary-General of Subsistence to the chief commissary at Santiago informing him that the Secretary of War had approved the Commissary-General's recommendation that rations of the sick in hospital at Santiago be commuted at 75 cents per day, stating that it would enable the hospitals to buy all the chickens or other things necessary, and directing him to show the telegram immediately to the commanding general.

Notwithstanding this telegram, intended as a reply to the telegram of the commanding general, medical officers who returned on the transports loaded with sick troops had evidently to rely almost exclusively, if not entirely, on the ration of the soldier for the diet of the sick during the passage.

On August 6 the Surgeon-General requested that the rations of sick and wounded men on hospital transports be commuted at 60 cents per day, to enable the medical officers to procure light diet for their patients, and this request was favorably recommended by the Commissary-General of Subsistence to the Secretary of War on August 7, payable from the appropriation for the subsistence of the Army.

On August 9, 1898, the following letter was addressed to the Adjutant-General:

WAR DEPARTMENT,
OFFICE COMMISSARY-GENERAL OF SUBSISTENCE.

August 9, 1898.

SIR: I inclose herewith draft of a general order regulating and systematizing the matter of subsisting the sick and wounded enlisted men in certain hospitals, hospital trains, and hospital transports, which I request may be approved by the honorable the Secretary of War and promulgated for the information and guidance of all concerned.

Very respectfully,

CHAS. P. EAGAN,
Commissary-General of Subsistence.

The ADJUTANT-GENERAL OF THE ARMY.

The draft which was inclosed was published as General Order No. 116, as follows:

GENERAL ORDERS, }
No. 116. }

WAR DEPARTMENT,
ADJUTANT-GENERAL'S OFFICE,
Washington, August 10, 1898.

The following is published to the Army for the information and guidance of all concerned;

Medical officers in charge of general hospitals, hospital trains, hospital transports, and the hospital at the camp at Pablo Beach, Fla., and at the hospital at the camp at Montauk Point, New York, will be allowed to expend from the appropriation "Subsistence of the Army," for the diet of the enlisted men undergoing medical treatment under their charge, at the rate of not exceeding 60 cents per man per day for the period each is undergoing treatment. The allowance so made will constitute a special fund in the hands of the medical officer in charge, from which will be purchased the entire diet of the enlisted men while undergoing medical treatment. These purchases will be restricted to articles of food, solid and liquid, the quantities and varieties of which will be determined by the medical officer in charge.

Chief commissaries of departments will transfer to medical officers in charge such subsistence funds as may be estimated for by the latter for carrying out the objects of this order.

There will be rendered monthly to the Commissary-General of Subsistence by the medical officers concerned regular accounts current, supported by vouchers, showing the application of these funds, and regular returns of subsistence stores, accounting for the articles of food purchased and issued. There will be submitted with each monthly return a tabular statement showing the number of patients present during the month as shown by the hospital records, and the money value of the articles issued to and consumed by them. The statement will be so arranged as to show the actual cost of subsistence per man per day for the month.

Transfers of subsistence funds from one hospital, train, or transport to another without authority of the commissary-general of subsistence, and the purchase from subsistence funds of articles other than food intended for the diet of the sick, are prohibited.

This order will go into effect at once, and all surplus funds in the hands of medical officers in charge, arising from the commutation of rations heretofore allowed to enlisted men undergoing treatment under their charge, will be taken up on their accounts current for the month of August, and all articles purchased from such commutation remaining on hand unconsumed on receipt hereof will be taken up on their returns of subsistence stores for that month.

By order of the Secretary of War:

H. C. CORBIN, *Adjutant-General*.

This order was afterwards extended to include all field and post hospitals, and ample provision was made for furloughing convalescents and paying them commutation of rations while traveling to and from their homes.

MONTAUK.

The army in Cuba had, by the end of July, 1898, become so afflicted with malarial fevers that the Secretary of War ordered all the troops that took part in the Santiago campaign to be returned to the United States and taken to Montauk Point, Long Island. On August 3, the cavalry detachment and recruits at Tampa, Fla., of all the regiments then in Cuba, were first ordered to Montauk Point. On August 4, the Commissary-General of Subsistence directed a subsistence officer of large experience, on duty in New York City, to proceed in person to Montauk Point and make complete report as to the probable facilities that would be afforded there for a subsistence depot for supplying the Fifth Army Corps; as to the best manner of arranging for the daily supply of fresh beef, fresh bread and vegetables, and whether they could best be obtained in New York. He was directed to report what, if any, steps had been taken to furnish a subsistence warehouse, and where, in his judgment, the subsistence warehouse or warehouses should be located; all possible information being desired as quickly as it could be gotten, as the first detachment of the Fifth Army Corps had already left Cuba.

This officer left for Montauk at 3.30 o'clock that afternoon, and reported, on his return on the morning of August 5, that the storehouses should be at the station, $1\frac{1}{2}$ miles from the camp ground; that the railroad was rushing side tracks; that he had not seen the Quartermaster's representative, but had telegraphed the president of the railroad that the Subsistence Department required three storehouses 30 by 100 feet at once; that he had advertised for beef, bread daily, and vegetables every five days, for delivery at any place or places within 3 miles of Montauk as desired by the depot commissary; that he would ship 20,000 rations August 8 and 50,000 on August 11, sending beef, bread, and vegetables when needed; that he did not expect storehouses to be completed for at least a week, probably longer, but would forward stores so there would be an abundance without congestion. He subsequently reported (same day) that the contracts for building the subsistence storehouses had been let that day, to be completed in eight days.

On August 3 an officer of the Subsistence Department at Jacksonville, Fla., was requested to be ordered to duty at Montauk Point, and the order was telegraphed him August 7, 1898.

A subsistence officer then in Washington, and a brigade commissary also there, who had been wounded at Santiago and who was willing to surrender the unexpired portion of his sick leave, were sent, the former reporting at Montauk August 8, and the latter August 10. The same officer from New York, who had visited the camp August 4, was also directed to proceed there for consultation and to place the officer who arrived there August 8 in charge and instruct him to do whatever might be necessary. The commanding officer of the camp was informed by telegraph of these dispositions on August 8, and was requested to have the Quartermaster's Department turn over a tent for each company, regiment, brigade, division, or corps for sheltering subsistence stores. The officer from Jacksonville left that city on August 9.

On August 10, the officer who visited Montauk August 8, reported that he had seen the commanding general of the camp, and, he thought, arranged matters satisfactorily; that 20,000 rations had arrived the morning of the 10th; that storehouses would be ready on August 13; that the commanding general had given orders to have tents furnished for shelter of subsistence supplies of companies, regiments, and brigades; and that stores for sales would be shipped early the next week, or as soon as preparations had been made for handling them. Subsequently, on the same day, he telegraphed that the carpenters on the subsistence storehouse were taken off to build the hospital buildings, and that he had telegraphed the subsistence officer in temporary charge to "keep stores in car and use hay platform to issue from; next to hospital, subsistence storehouse is most important, and no other buildings should have precedence over it," and to consult with the general commanding.

On August 12 orders were given from the Adjutant-General's Office to stop everything south of Washington that was en route to Montauk Point; and, in answer to an inquiry from the Commissary-General on that day, the subsistence officer at New York who had visited the camp reported that an abundance of rations, including fresh meat, bread, and vegetables, had been received thus far and would continue unless contractors broke down, which was not anticipated; that carpenters were rushing the work on building, and that the commanding general at the camp had said that the commissary building should have precedence over all but the hospital. The officer from Jacksonville assumed duty as depot commissary at the camp on August 12, and reported 50,000 rations in cars on the track. On August 13 he inquired if there was an order extant authorizing additional expenditure of 50 cents per man

per day for sick in camp, and was referred same day to General Order No. 116, dated August 10, 1898, which provided that 60 cents per man per day might be expended, and which directed the surgeon in charge to make application to the chief commissary for funds for the purpose.

The first shipload of troops of the Fifth Army Corps arrived off Camp Wikoff, Montauk Point, from Santiago, on Saturday night, August 13, and were landed on August 14. Four other transports arrived August 14, and the landing of their troops was begun on August 15. These transports were thereafter followed at short intervals by other arrivals.

Maj. Gen. Joseph Wheeler landed from Santiago on August 15 at the camp, and proceeded to Washington, returning to Camp Wikoff and assuming command on August 17.

At the request of the Commissary-General of Subsistence of August 18, the officer of the Subsistence Department who had been chief commissary of the Fifth Corps in Cuba, proceeded to Camp Wikoff on the morning of August 19, and reported from there, August 20, that Generals Young and Wheeler insisted on his remaining a week; that he informed them of the Commissary-General's wishes, and that General Young telegraphed to the Commissary-General, and General Wheeler to the Adjutant-General, on the subject. General Young did telegraph August 19, to the Commissary-General, stating that the presence of the officer for a week was essential. General Wheeler telegraphed same day to the Adjutant-General specially requesting that the officer be ordered that day to be chief commissary there, if not permanently, until organization was perfected. Request for an order of assignment was made August 20, to be transmitted by telegraph, and General Young was so informed. Subsequently, on the same day at 6.05 p. m., the depot commissary at the camp telegraphed the Commissary-General that General Wheeler had requested that he—the depot commissary—be authorized to furnish what supplies he should designate, the list of articles to be named by the chief surgeon, as the men of his command needed other articles of food than those in the ration, being in a weakened condition and needing nourishing food immediately.

On August 21, the Commissary-General, knowing that he had called the depot commissary's attention to the provision that had been made by General Order No. 116, August 10, for allowing medical officers to expend 60 cents per man per day from subsistence funds for the sick in hospital, and not knowing any reason for General Wheeler's assuming the duties of the Commissary-General in the matter of ordering disbursements of subsistence funds to be made for any purpose, telegraphed General Wheeler as follows:

Your request to Major Duval that supplies be designated by chief surgeon, other than articles of food now authorized, be purchased by him, received. I have to state that the law controls and regulates every purchase of this Department. To meet precisely such a case as you designate, General Order No. 116, dated August 10, was issued; and I am surprised that your surgeons have not availed themselves of the benefit of that order; wherein you will see that 60 cents per day is allowed for each sick man, to be expended for such articles as the surgeons in charge may designate, they to purchase the articles. Please have them act on this order at once and you will find it fully covers your views. A copy of the order will be mailed you to-day, to be sure that you have it.

On the same day the Commissary-General telegraphed the depot commissary as follows:

Your telegram covering General Wheeler's request for other articles than those of the ration has been answered by me to-day, inviting attention to General Order No. 116, which fully covers the necessities of the case. If you have not received General Order No. 116 let me know, and it will be mailed you immediately.

On the same day the depot commissary replied, quoting a telegram which the Adjutant-General had sent to General Wheeler, and a copy

of which had been sent by General Wheeler to him, and stating that on the strength of that telegram he had acted, and had ordered a large supply of stores from the purchasing commissary at New York. On the same day (August 21) the Adjutant-General furnished the Commissary-General of Subsistence with copies of the correspondence between General Wheeler and himself, which was that referred to by the depot commissary. On the same day (August 21) the Adjutant-General telegraphed the commanding general of the camp at Montauk as follows:

Having reference to telegraphic correspondence of yesterday as to the purchase of articles outside of the service ration for the troops at Montauk Point, the Secretary of War desires me to invite your attention to a telegram sent from the Commissary-General to General Wheeler. It is thought the plan outlined by the Commissary-General will meet the purposes you have in view better than any other way. Your views, however, are invited.

On August 22 the depot commissary at the camp was directed by the Commissary-General to make requisitions on the Commissary-General of Subsistence, and not direct on the purchasing commissary at New York, for such stores as he needed, except in case of rations. On the same day the following instructions from the Commissary-General were sent him by telegraph:

You are assigned to duty as purchasing and depot commissary at Montauk Point, and as such are under the orders of the Secretary of War and myself. You will not call upon anyone for any unauthorized articles of subsistence or for sales without first referring to this office. The order sent General Wheeler by the Adjutant-General has been revoked. Ascertain if the surgeons can not act upon General Order No. 116 without delay. Its enforcement and proper execution are of greater value than the illegal purchase of stores not authorized to be purchased by the Subsistence Department by law. Communicate with the surgeons and inform me promptly of their action, to the end that the real comfort of the soldiers and the supply of such articles as the surgeon in charge may deem necessary shall be furnished at once. It is presumed the medical purveyor in New York can expeditiously and promptly furnish the articles required for by the surgeons, the Subsistence Department furnishing the money, as contemplated by the general order herein referred to. Communicate with General Wheeler, whose wishes I wish to carry out to the utmost of my ability without violating law. Answer and report action.

He reported the same day as follows:

Have conferred with General Wheeler and with chief surgeon. Chief surgeon stated that articles are not necessary, upon which General Wheeler directed me to have request on Woodruff canceled, which I did.

Accordingly, the Commissary-General of Subsistence telegraphed General Wheeler on same day as follows:

Weston has been assigned as chief commissary to the troops of your command; order mailed 20th instant. Will you please direct the surgeons to call for the money immediately, to procure such special stores as your surgeons may want. I am heartily in accord with you to provide the sick with such stores as are necessary to their condition. The surgeons should be made to perform their duty to the sick in this respect. The money is ready, and they should be forced to do their duty under General Order No. 116.

On August 24 the Secretary of War, who was himself at Montauk on that day, telegraphed the Adjutant-General as follows:

I have seen General Eagan's telegram to Duval, commissary, calling attention to General Order No. 116. Notwithstanding, you will instruct him to fill Duval's requisition of August 21 on Woodruff, and any similar requisitions General Wheeler authorizes. It is absolutely essential.

Copy of the above telegram of the Secretary of War was furnished the Commissary-General of Subsistence by the Adjutant-General on August 25, on receipt of which a telegram was sent by the Commissary-General of Subsistence to the chief commissary of the camp, the portion relating to the purchase of food for the sick being as follows:

Meantime, the most important thing to do, now that you are there, is the question of providing for the troops. General Order 116 covers any and every soldier that the

surgeons consider should receive other food than the prescribed army ration. The failure of the surgeons to avail themselves of this order up to the present time is a matter of serious importance, and if continued I shall deem it my duty to appeal to the law and all that that implies, and hold each and everyone responsible for any shortcomings due to the sick being neglected by reason of the nonobservance of that order. That the order has not been carried out by the general commanding and the surgeons is entirely beyond my comprehension. The failure to carry out the order is, to me, neither more nor less than a disobedience of orders, and I shall most certainly hold each and every person concerned responsible for them. The condition stated by you, "that there are not any real men here," makes it all the more serious that the surgeons have not enforced that order, have not called for the money which is at their disposal—60 cents a day for feeding each and everyone of them with the class of food that they should have. You state that at present no men stood more in need of delicacies than the men there. Then why not take the 60 cents and feed them as they should be fed? It looks to me like criminal neglect, and somebody, and everybody if necessary, will be held to an accountability for not using the money provided. Depend upon it, I shall hold every man accountable for a failure to feed the men with the money which this Department has provided. Nothing on earth shall prevent my insisting that justice shall be done in this respect. I have ordered Woodruff to supply the stores called for by General Wheeler and that may hereafter be called for. These orders call for the expenditure of subsistence money not authorized by law. This condition is forced upon the Secretary of War and upon myself, and I most emphatically state that it is because the provisions of General Order 116 have not been carried out, and whoever is or may be responsible for this thing shall be held by me to the utmost accountability, and the people at large will hold them responsible for their failure to take the money lying there under their hands for the care of the sick, which they seem not to have done so far. You are on the ground; you are the senior officer after myself, and I require from you at once an official report upon which official action can be taken by the President, by the Secretary of War, and by the country at large, as to why this money provided for the sick has not been used and utilized.

The first requisition on the chief commissary of the Department of the East from surgeons at Montauk for funds, under General Order No. 116, was dated August 25, received August 26, and check drawn same day.

Under the authority of the Secretary of War of August 24 there have been purchased from subsistence funds by officers of the Subsistence Department and issued gratuitously to the troops at Montauk up to September 30, in addition to the ration and to the 60 cents per day provided by General Order 116, the following quantities of articles:

Ice	pounds..	1, 085, 200
Milk	gallons..	54, 860
Halibut	pounds..	3, 000
Lima beans	do....	47, 047
Tea	do....	250
Apples (canned)	3-pound cans..	6, 020
Do	gallon cans..	1, 774
Apples (evaporated)	pounds..	21, 550
Apricots (evaporated)	do....	14, 500
Butter	do....	34, 799
Corn (canned)	cans..	13, 889
Cocoa	pounds..	1, 080
Soda crackers	do....	9, 950
Ham (sugar-cured)	do....	19, 927
Evaporated cream	cans..	31, 140
Oatmeal	do....	31, 985
Peaches (evaporated)	do....	18, 025
Peaches (canned)	do....	14, 973
Pears (canned)	do....	14, 869
Pease (canned)	do....	16, 128
Prunes	pounds..	9, 925
Beef soup	cans..	7, 500
Chicken soup	do....	11, 490
Pickles	gallons..	7, 100
Oranges	crates..	300
Lemons	do....	150
Eggs	dozens..	53, 070

The following correspondence is self-explanatory:

HEADQUARTERS UNITED STATES FORCES,
Camp Wikoff, August 28, 1898.

DEAR GENERAL: I have seen a reported interview with myself in the * * * [newspaper] * * * of yesterday's date, which does you an injustice.

I took the greatest pains to explain to the reporter that the delay in filling orders for supplies was due to the fact that you thought General Orders No. 116 would cover the whole ground, you at that time not knowing that there were a good many sick in camp who could not be provided for under that order.

I make this explanation to you because I desire you to know that the interview as reported is not correct.

Very respectfully,

JOS. WHEELER,
Major-General, U. S. V., Commanding.

Gen. CHARLES P. EAGAN,
Commissary-General, Washington, D. C.

WAR DEPARTMENT,
OFFICE COMMISSARY-GENERAL OF SUBSISTENCE,
Washington, August 30, 1898.

DEAR GENERAL: I have both the honor and pleasure of acknowledging receipt of your letter of August 28, and thank you for the same.

I was animated throughout by the strongest desire to strengthen your hands in caring for the sick, and in my opinion the General Order 116 would cover those not able to eat the rations, but who might thereby be considered sick and come under the provisions of that order. I was solely animated with the wish to provide them the delicacies contemplated without obliging anyone to expend money not authorized by law. I have never understood that there was any money to meet purchases not contemplated by law. Had I understood this none of this misunderstanding could have arisen; none can regret it more than myself. For, from the first to the present and the future, my sole desire is to aid you and every other commanding officer in caring for the troops to the utmost.

Very respectfully, yours,

CHAS. P. EAGAN,
Commissary-General.

Maj. Gen. JOSEPH WHEELER,
Commanding U. S. Forces, Camp Wikoff, Montauk Point, Long Island, N. Y.

PORTO RICO.

The strength of the army dispatched to Porto Rico in July and August, 1898, was 641 officers and 16,332 enlisted men. The following quantities of subsistence stores were shipped from New York and Chicago to that island in July and August, 1898:

Articles.	Weights or measures.	Equivalent in rations.	Number of days' supply for 16,332 men.
<i>Meat components.</i>			
Bacon.....pounds..	447, 178	1, 617, 780	99+
Beef:			
Fresh roast, 1-pound cans.....cans..	984, 084		
Corned, 2-pound cans.....do....	34, 884		
Salmon, 1-pound cans.....do....	140, 016		
Brawn:			
1-pound cans.....do....	836		
2-pound cans.....do....	228		
6-pound cans.....do....	60		
14-pound cans.....do....	6		
<i>Bread components.</i>			
Flour.....pounds..	787, 528	2, 201, 945	134. 9
Hard bread.....do....	1, 501, 920		
Yeast.....do....	4, 580		
<i>Vegetable components.</i>			
Beans.....pounds..	106, 341	1, 885, 580	115. 4
Beans, baked, 3-pound cans.....cans..	71, 496		
Rice.....pounds..	70, 000		
<i>Fresh vegetable components.</i>			
Tomatoes, 3-pound cans.....cans..	100, 008	225, 018	13. 7

Articles.	Weights or measures.	Equivalent in rations.	Number of days supply for 16,322 men.
<i>Coffee and sugar components.</i>			
Coffee:			
Green.....pounds	100,053	2,907,917	178
Roasted.....do.	152,591

Bath.....	7,341		
Towelings.....yards	6,000		
Matches, safety.....boxes	20,880		
Paper, toilet.....packages	26,800		

In addition to the foregoing, contract was made with Swift & Co., of Chicago, Ill., for furnishing refrigerated beef for the entire command in the island.

HAWAIIAN ISLANDS.

The command sent to the Hawaiian Islands in August, 1898, consisted of 58 officers and 1,605 enlisted men. The following quantities of subsistence stores were shipped to the purchasing and depot commissary at Honolulu in August, 1898:

Articles.	Weights or meas- ures.	Equivalent in rations.	Number of days' supply for 1,605 men.		
<i>Meat components.</i>					
Pork.....pounds..	11,600	83,828	21		
Bacon.....do....	3,998				
Beef:					
Corned, 2-pound cans.....cans..	600				
Fresh roasted, 1-pound cans.....do....	11,520				
Salmon, 1-pound cans.....do....	15,792				
Mackerel, pickled.....kits..	5	80			
Codfish, dried.....pounds..	80				
<i>Bread components.</i>

In addition to the above, fresh beef was taken to last until the arrival of the command at the islands.

PHILIPPINE ISLANDS.

The strength of the army sent to the Philippine Islands in May, June, and July, 1898, was 641 officers and 15,056 enlisted men. The following quantities of subsistence stores were shipped to those islands from San Francisco, Cal., during the above period, being conveyed with the various expeditions which carried the men:

In addition to the foregoing food supplies a contract was made at an early date, through the assistance of the United States consul-general at Melbourne, Australia, for the furnishing of refrigerated beef and fresh vegetables to the command after arrival at Manila. En route the expedition was supplied with refrigerated beef and beef from cattle slaughtered and dressed on the voyage.

CHICKAMAUGA NATIONAL PARK.

On April 22, 1898, an officer of the regular Subsistence Department was ordered to proceed to Chickamauga National Park and report in person to the commanding general at that place for duty. Subsistence funds were immediately placed to his credit in New York. A depot was established at Chattanooga, and supplies ample for the subsistence of the troops arriving were ordered from distant purchasing and shipping commissaries, and arrangements made for furnishing fresh beef, fresh bread, and vegetables to the command.

On May 14 2,700,000 rations were ordered shipped to Chattanooga, it being the policy at that time to have at least three months' supply, exclusive of daily consumption, on hand at all times for the number of troops at the camp. This extra supply was intended for use in case of immediate forward movements.

A subdepot was established at Camp George H. Thomas, in the Chickamauga National Park, for convenience of making issues to the camp.

By the system of weekly reports to the Commissary-General of Subsistence of the number of complete field rations and of the number of complete travel rations on hand at the depot at Chattanooga and the subdepot at Camp George H. Thomas, the supplies of food at those points were kept up by regular shipments from distant purchasing commissaries until the final abandonment of the Chickamauga National Park as a camping ground.

CAMPS AT NEW ORLEANS, MOBILE, TAMPA, SAN FRANCISCO, MIAMI, JACKSONVILLE, FALLS CHURCH, MIDDLETOWN, HUNTSVILLE, ANNISTON, AND LEXINGTON.

The troops encamped at these places were supplied with subsistence stores in the same way that the troops at Chickamauga National Park were supplied. With the exception of San Francisco, the depot commissaries on duty at each of these camps were required to make periodical reports to the Commissary-General of Subsistence of the supplies of food on hand. In San Francisco the troops were supplied directly by the chief commissary of subsistence of the Department of California on duty in that city, he drawing his supplies from the depot commissary there.

COMMISSARY CHESTS.

As conveniences were needed in the field for weighing and measuring articles in making issues and sales, and for repairing, recoopering, and marking packages, etc., a commissary chest was devised and sent into the field at an early date, giving great satisfaction.

COFFEE ROASTERS.

To avoid all chances of sophistication of the materials for the making of coffee, it has been the practice of the Subsistence Department to purchase for the troops coffee in the green state, leaving the entire work of roasting and converting it into drinkable coffee to be performed by the troops themselves. By this system general uniformity of standard of quality of coffee for issue to troops can best be maintained, and, the roasting and cooking being left to the men, they are always assured of having pure coffee and made according to their taste. Finding that no facilities had been provided for roasting coffee in the

field, the Commissary-General of Subsistence, with the approval of the Secretary of War, ordered a supply of coffee roasters to be sent into the field as soon as the troops assembled, one to be issued to each company.

To meet the necessities of active campaigning, where roasting in the field was impracticable, roasted coffee was furnished in large quantities, as will be seen from the tables hereinabove given. Coffee mills were furnished by the Quartermaster's Department.

FIELD BAKE OVENS.

As the building by the troops of temporary ovens of brick or other materials for the supply of fresh bread in camps is not always successful, and the use of a specially devised portable field oven, capable of baking with certainty a given quantity of bread in a given length of time, promised advantages greatly outweighing those possessed by the field ovens constructed by the troops, the Secretary of War authorized the Commissary-General of Subsistence to procure and send into the field a supply of portable field bake ovens of approved design. The field bake ovens wherever used gave the most gratifying results. It was the duty of the Subsistence Department, prior to the issue of General Orders No. 40, Headquarters Army, August 29, 1894, to build, alter, and repair the bake ovens constructed in the bakehouses at the garrisoned posts and in the field, and to furnish the utensils for use with the same; also to purchase portable bake ovens for use of troops in the field and the utensils connected with the operation of the same. The duty was by that order transferred to the Quartermaster's Department. With the view of having the duty restored to the Subsistence Department, an item has been introduced in the annual estimate for the fiscal year 1900 looking to the performance of the duty hereafter by the Subsistence Department. The incorporation of the words of the item in the appropriation act will, by giving the money for the purpose into the control of the Subsistence Department, furnish the first step toward the restoration of the duty to that Department.

MISCELLANEOUS EXPENDITURES.

The accounts for the fiscal year 1898 thus far examined show the following miscellaneous expenditures, viz:

For liquid coffee there was expended \$71,138, an increase over previous year of \$66,852.36; for extra-duty service, \$17,442.20, a decrease of \$3,361.45; for advertising, \$2,527.67, a decrease of \$1,669.94; for meals for recruiting parties and recruits and troops moving, \$89,260.55, an increase of \$53,772.78, due to the movements of the entire Army, both regulars and volunteers. The large increase in the amount expended for liquid coffee was due to same cause, and the decrease in extra-duty expenditures to the abolishment of pay therefor during the war times by act of Congress approved April 26, 1898. The decrease in advertising was caused by the necessity for immediate purchases on account of the war with Spain.

LOSSES OF STORES AND PROPERTY.

The value of the stores lost by accident, by wastage in transportation, while in store, etc., during the year, as shown by returns so far examined, for which no one was held responsible, was \$7,624.73, being greater by \$4,866.57 than that of similar losses in the previous year,

and due, undoubtedly, to the larger quantities of supplies required and moved by reason of the largely increased army to be supplied.

Supplies lost during the year for which responsibility was fixed amounted to \$528.74, of which \$29.93 has been collected, leaving still to be collected \$498.81.

SALE OF CONDEMNED AND OBSOLETE STORES.

From the returns thus far examined, the sales in the fiscal year appear to have been as follows:

	Subsistence stores.		
	Condemned.	Obsolete.	Total.
Original cost	\$3, 134. 72	\$25. 79	\$3, 160. 51
Amounts realized from sales	259. 55	13. 61	273. 16
Loss.....	2, 875. 17	12. 18	2, 887. 35

An increase from previous year in stores condemned of \$784.02, and a decrease in obsolete stores of \$674.57. From sales of condemned subsistence property there was realized the sum of \$94.45.

CREDIT SALES.

Sales to officers in the fiscal year 1898, as shown by the accounts thus far examined, reported as made on credit and not deducted on pay accounts, amount to \$1,232.47. The sales to enlisted men on credit amounted to \$2,712.72, and the collections therefrom during the year, by the Pay Department, on muster and pay rolls and final statements, on account of credit sales in the current year and previous fiscal years, amounted to \$2,532.81.

A sale on credit to the Medical Department was made in June, 1898, in the sum of \$791.64, for which reimbursement has not yet been received.

Issues to Indians.

To whom made.	Value of issues.
Apache Indian prisoners at Fort Sill, Okla. (army appropriation act of Mar. 2, 1897)	\$10, 647. 95
Indian prisoners at Fort Grant, Ariz.....	39. 55
Indians visiting military posts (Rev. Stat., 2110)	142. 40
Total.....	10, 829. 90

Issues to Spanish prisoners of war were made in May and June, 1898, to the extent of 8,655 rations.

REGIMENTAL COMMISSARIES.

It is thought to be a defect of organization that a regimental commissary is not authorized by law, who should be specially charged with the receipt and distribution of the food supplies of the regiment.

COMMISSARY SERGEANTS.

The number of commissary sergeants in service at the beginning of the fiscal year was 90. During the year 30 were appointed, 1 died, 1

was discharged, and 10 were retired, leaving 108 in service at the end of the year. The number should be increased so as to furnish one for each regiment in service, and one for each garrisoned post.

SYSTEM OF KEEPING RECORDS.

In the business world, where business of any intricacy or magnitude is conducted on business principles, no one would think of dispensing with the daybook. The elementary treatises on bookkeeping teach that the keeping of books is necessary for the faithful and systematic record of business transactions, and that the daybook is the book of original entry, containing a consecutive history of the transactions in the *date and order of their occurrence*. As the records in this book are made when the transactions and all the circumstances connected with them are fresh in the mind, it is the only book allowed in court in cases of litigation. Its importance from this fact, and also on account of its being the basis of all the results shown by the other books or records, can not be overrated.

These considerations should be of controlling weight in a governmental office, where, for the orderly and systematic dispatch of its business, and for the purposes of a retrospect of any and all of its transactions, the consecutive history of the same should be displayed by the entries kept permanently, and where they can be visually seen in *chronological* order; where they can never be displaced; where they remain even though the papers they record may become lost, misplaced, or destroyed; where anyone else beside the actors may see visually in a connected form what has been going on. The present system, which prohibits the making of any book entries, except in regard to money accounts, and distributes the record of transactions in fragmentary shape day by day through the files, gives no history such as a daybook gives of transactions in the date and order of their occurrence.

The precipitation of actual war upon the entire War Department has put to the severest test the system of keeping records prescribed by War Department circular of May 15, 1894. The system was attempted in the Navy Department a few years ago and abandoned.

In this Bureau all possible effort was made after the war began to keep the papers on the "record card file," the "card index file," the "document file," and the "precedent file," and to cause all papers received and sent to pass in the regular prescribed order through the hands of the mail clerks, the briefing clerks, and the numbering clerks, and to have the index cards and the cross reference cards and the charge cards and the tally lists made and kept and filed in precise order.

The conducting the war by telegraph soon broke into the maintenance of this system, and before the first augmentation of the clerical force had occurred on May 12, under the national defense act, the system had yielded to the pressure of events, and on the orders of the officers on duty in the Bureau the records were thereafter largely kept by putting under rubber bands the original letters and telegrams received, and letterpress copies of replies, and placing them in assorted piles on tables and in drawers where they could be under the control of the officers immediately concerned, and the several piles placed in the custody of clerks who were to keep in memorandum form and in their heads for index purposes a complete knowledge of their individual contents, no book entries being allowed. The accidental absence of one of these clerks was a partial paralysis of business.

The keeping of records in this unsatisfactory way still continues. There being thus no chronological arrangement, such as would be given by book entries, an exhaustive connected view of any one subject embodied in correspondence could and can only be had by a painstaking examination of the original letters or telegrams and press copies of all the piles (in order that none might escape by reason of improper assortment), or, more recently, by implicit reliance on the "record card files" and the "document files," which are now being hurriedly made up by the clerks from these assorted piles and individual stray papers. The dispersed character of the record, the giving of the same file numbers to papers of widely different dates, and the misplacement of letters and replies in point of dates and subject-matter when assembled in special card files add to the confusion and make an investigation into a subject without the aid of the memories of the living clerks, who have a knowledge of the matters and of the specific cards involved and their location, a task of difficult accomplishment, and the result is never free of doubt as to possible omissions on account of the weakness of the system and the manner in which the system has had to be imperfectly maintained. I believe the experience of this Bureau is not unique in the above particulars.

CLERICAL FORCE, OFFICE COMMISSARY-GENERAL OF SUBSISTENCE.

The regular force of 32 clerks was increased by the addition, from time to time after May 12, of temporary clerks employed under the appropriation for national defense, act of March 9, 1898 (30 Stat. L., 274), the deficiency act of May 31, 1898 (30 Stat. L., 422), and the deficiency act of July 7, 1898 (30 Stat. L., 696). The net increase has been about 40 clerks, all of whom are paid on the temporary roll. While, by the act of July 7, 1898, these temporary employees may be appointed for "a term not exceeding one year," that same act made appropriation for their payment until December 31, 1898, only. This will require that Congress shall further legislate in respect to the clerical force of this Bureau before the expiration of this calendar year, and I take the opportunity thus afforded of urgently pressing upon the attention of superior authority the justness and reasonableness of a rearrangement of the salaries of the clerical force of this Bureau. With the permanent increase of the Regular Army and the continuance of the Volunteer Army in service, the clerical work in this Bureau is increased in volume and importance. The clerical force, in my opinion, should be graded in accordance with those equitable principles which are observable in the arrangement of salaries in other bureaus and departments of the Government. I have, therefore, in submitting the estimate for the clerical force for the period beginning January 1, 1899, and ending June 30, 1899, asked for a moderate increase of grades of the regular clerical force, and have estimated for these increased grades in the estimate for the fiscal year ending June 30, 1900. I hope the proposed rearrangement will meet the approval of the Secretary of War and be favorably acted upon by Congress. In connection with the subject of the clerical work of the Bureau, I beg to say that since April last it has been necessary to keep a part of the clerical force on duty beyond office hours. The extra work has been cheerfully performed, and it is thought that extra compensation should be paid for the extra work. It is hoped that the Secretary of War will give the matter his favorable consideration.

The work of examining accounts and returns for the fiscal year has been as follows:

	Accounts current.	Returns of subsistence stores.	Returns of subsistence property.	Total.
On hand June 30, 1897.....	4	40	1	45
Received during fiscal year, 1898.....	2, 267	1, 601	580	4, 448
Total	2, 271	1, 641	581	4, 498
Examined during the year.....	2, 242	1, 589	580	4, 411
On hand June 30, 1898.....	29	52	1	82

The examination of the accounts current required the verification of 35,231 vouchers; the returns of subsistence stores, 25,629 vouchers; and the returns of subsistence property, 1,447 vouchers.

In connection with the examinations, 2,888 postal cards were used, 2,319 letters and 2,146 indorsements written and recorded, and 108 papers copied.

Contracts for supplies, etc., to the number of 265 were received and acted on.

Certificates of services as acting commissary of subsistence were issued to the number of 299, and of nonindebtedness to the number of 112.

Number of claims on hand, received, and disposed of during the fiscal year ending June 30, 1898.

	Claims for commuta- tion of rations—		Total.
	While held as prisoners of war in rebel States.	While on furlough, and miscel- laneous claims.	
There were on hand June 30, 1897.....	27	21	48
Received during the fiscal year.....	845	725	1, 070
Total.....	872	746	1, 118
Disposed of during the year.....	840	389	729
On hand June 30, 1898	82	357	389

The number of letters and indorsements written during the year in connection with the above claims was 2,815.

DUTIES OF OFFICERS OF THE SUBSISTENCE DEPARTMENT.

The officers of the regular establishment have worked with unfailing zeal and unparalleled efficiency in carrying out the orders of the Commissary-General, extending their labors at times into the night and making no distinction as to office hours or Sundays. Some of them broke down and are now on sick leave because of their labors. Their work was so important that the Commissary-General was unable to spare anyone from his post of duty, and the Commissary-General has consequently been obliged to carry on the vast business of this Bureau of the War Department with but one officer as an office assistant, whereas preceding Commissary-Generals, during times of peace when

the Army of only 25,000 men was all located at well-regulated permanent posts, have generally had three office assistants, and never less than two. The work of the officers of the regular Subsistence Department has been the highest possible form of patriotism, and their quiet, honest, and successful meeting of every demand upon them entitles them to just appreciation.

The commissaries of subsistence of volunteers have, with few exceptions, been zealous, painstaking, and anxious to perform their duties, and have done marvelously well. One was wounded in action in Cuba, and others were close up to the firing line distributing as best they could subsistence supplies to the troops, and thereby incurring quite as much danger as any of them.

The list of volunteer commissaries incorporated in this report shows the dates of qualifying by each and the first duty to which assigned.

The list subjoined shows the regular officers of the Subsistence Department and their duties on October 1, 1898.

Respectfully submitted.

CHAS. P. EAGAN,
Commissary-General of Subsistence.

The SECRETARY OF WAR.

REPORT OF THE SURGEON-GENERAL.

REPORT

OF

THE SURGEON-GENERAL.

WAR DEPARTMENT, SURGEON-GENERAL'S OFFICE,
Washington, D. C., November 10, 1898.

SIR: In submitting a report of my administration of the duties of this office during the past year, I have the honor first to invite attention to the following statement of financial transactions for the fiscal year ended June 30, 1898:

Medical and Hospital Department, 1898:

Appropriated by act approved March 2, 1897	\$185,200.00
Refunded during the year	768.07

Total to be accounted for	185,968.07
---------------------------------	------------

Disbursed during the year:

Expenses of purveying depots	\$77.20
Medical supplies	70,698.06
Pay of employees	34,255.09
Expenses of recruiting	3,257.95
Medical attendance and medicines	14,415.27
Washing at post hospitals	1,296.91
Pay of nurses	1,037.26
Miscellaneous expenses	98.99
	125,181.78

Balance on hand to be accounted for June 30, 1898	10,836.34
---	-----------

In United States Treasury	31.22
---------------------------------	-------

In hands of disbursing officers:

New York	418.19
Washington	886.93

With Philippine expedition	10,000.00
	10,836.34

The above balance of \$10,836.34 remaining on hand July 1, 1898, has since been all expended.

Medical and Hospital Department, 1897:

Balance on hand July 1, 1897, act of March 6, 1896	\$54,417.24
Refunded during the year	48.54

Total to be accounted for	54,465.78
---------------------------------	-----------

Disbursed during the year:

Medical supplies	\$21,281.68
Pay of employees	100.00
Medical attendance and medicines	3,190.88
Washing at post hospitals	162.28
Miscellaneous expenses	244.22
	24,978.56

Balance on hand to be accounted for June 30, 1898	29,487.22
---	-----------

Medical and Hospital Department, 1897—Continued.

In United States Treasury	\$24,841.56	
In hands of disbursing officers:		
New York	956.53	
St. Louis	2,672.85	
Washington	1,016.28	
		<u>\$29,487.22</u>

Medical and Hospital Department, 1896:

Balance on hand July 1, 1897, act of February 12, 1895		62,344.96
Disbursed during the year	\$50.00	
Transferred to surplus fund	62,294.96	
		<u>62,344.96</u>

Medical and Hospital Department, January 1, 1899:

Appropriated by act approved May 4, 1898	50,000.00	
Appropriated by act approved June 8, 1898	50,000.00	

Total to be accounted for

100,000.00

Disbursed:

Medical supplies	\$49,344.80	
Pay of employees	856.65	
Expenses of recruiting	5,975.63	
Medical attendance and medicines	1,270.80	
Washing at post hospitals	47.44	
Miscellaneous expenses	49.18	
		<u>57,044.00</u>

Balance on hand to be accounted for June 30, 1898

42,956.00

In hands of disbursing officers:

New York	\$21,269.88	
St. Louis	13,418.30	
Washington	1,473.42	
San Francisco	1,794.40	
With Major Torney, hospital ship <i>Relief</i>	5,000.00	
		<u>42,956.00</u>

National defense (war) act of March 9, 1898:

Allotment by the President, April 16, 1898		\$20,000.00
Disbursed for medical supplies	\$19,964.39	
Balance on hand June 30, 1898	35.61	
		<u>20,000.00</u>

It is estimated that about \$120,000 of the amounts reported in the above statement as expended up to and including June 30, 1898, have been used for extraordinary war expenses.

Since July 1 the following sums have been appropriated for war expenses on account of the Medical Department of the Army, namely:

By deficiency act, July 7, 1898	\$504,000.00	
National defense (war):		
By allotment of the President, September 8, 1898	500,000.00	
By allotment of the President, October 6, 1898	500,000.00	
		<u>1,504,000.00</u>

Of this sum there are at this date (November 1, 1898) available \$395,000, all of which will be required for the payment of claims and accounts on account of war expenses now in this office and to be presented before December 31 of this year.

In addition to these sums there were also appropriated by the act approved March 15, 1898, \$115,000, being the regular annual appropriation for the Medical and Hospital Department for the fiscal year 1899. Of this appropriation it is estimated that \$50,000 have now been expended for war measures.

Artificial limbs, 1898:

Appropriated by act approved June 4, 1897.....	\$183,000.00
Disbursed during the year	159,775.27

Balance on hand June 30, 1898	23,224.73
-------------------------------------	-----------

Artificial limbs, 1897, act approved June 11, 1896:

Balance July 1, 1897	22,145.54
Disbursed during the year	12,270.34

Balance on hand June 30, 1898	9,875.20
-------------------------------------	----------

Artificial limbs, 1896, act approved March 2, 1895:

Balance July 1, 189719
Transferred to surplus fund19

Artificial limbs, certified claims, 1896:

Appropriated by deficiency act approved July 19, 1897.....	171.73
Disbursed	171.73

Appliances for disabled soldiers, 1898:

Appropriated by act approved June 4, 1897	2,000.00
Disbursed during the year	1,282.21

Balance on hand June 30, 1898	717.79
-------------------------------------	--------

Appliances for disabled soldiers, 1897, act approved June 11, 1896:

Balance July 1, 1897	954.73
Disbursed during the year	169.71

Balance on hand June 30, 1898	785.02
-------------------------------------	--------

Appliances for disabled soldiers, 1896, act approved May 2, 1895:

Balance July 1, 1897	671.85
Transferred to surplus fund	671.85

Army Medical Museum, 1898:

Appropriated by act approved March 2, 1897	5,000.00
Disbursed during the year	4,930.72

Balance on hand June 30, 1898	69.28
-------------------------------------	-------

Army Medical Museum, 1897, act approved March 16, 1896:

Balance July 1, 1897	117.24
Disbursed during the year	117.24

Army Medical Museum, 1896, act approved February 12, 1895:

Balance July 1, 189747
Transferred to surplus fund47

Library, Surgeon-General's Office, 1898:

Appropriated by act approved March 2, 1897	10,000.00
Disbursed during the year	9,746.79

Balance on hand June 30, 1898	253.21
-------------------------------------	--------

Library, Surgeon-General's Office, 1896, act approved February 12, 1895:

Balance July 1, 1897	11.10
Transferred to surplus fund	11.10

Furnishing and fitting trusses for disabled soldiers, sections 1176, 1178, R. S., act of March 3, 1879:

Expended during the year	9,032.66
--------------------------------	----------

Providence Hospital:

Appropriated by act approved June 4, 1897.....	\$19,000.00
Expended during the year	19,000.00
<hr/>	
Appropriated by act approved March 2, 1897:	
Construction and repair of hospitals.....	75,000.00
Disbursed during the year	74,816.84
<hr/>	
Balance on hand June 30, 1898.....	183.16
<hr/>	
Appropriated by act approved March 2, 1897:	
Construction and repair of quarters for hospital stewards	7,000.00
Disbursed during the year	6,957.12
<hr/>	
Balance on hand June 30, 1898.....	42.88

ARTIFICIAL LIMBS AND THEIR COMMUTATION.

Under the provisions of law relating to artificial limbs there were furnished during the year ended June 30, 1898, 32 artificial legs, 2 feet, and 1 apparatus for exsection, and commutation certificates were issued for 145 cases of amputated leg, 106 arms, 8 feet, and in 2,909 cases of loss of the use of a limb, involving an expenditure of \$172,217.59 from the available appropriations.

The cases of benefits recurring under the laws relating to artificial limbs during the fiscal year ending June 30, 1900, are those last paid in the year ended June 30, 1897. These benefits recur every three years. To cover those of the last-mentioned year the sum of \$575,000 was appropriated by the act approved June 11, 1896, and nearly the whole of this has been expended. It is considered that the sum of \$547,275 will suffice to pay all commutations and the cost of artificial limbs and of the transportation to procure them during the year ending June 30, 1900.

APPLIANCES FOR DISABLED SOLDIERS.

The number of appliances issued to disabled soldiers during the year was 197, for which was disbursed the sum of \$1,451.92.

TRUSSES.

The number of trusses issued and fitted during the year was 1,280.

PROVIDENCE HOSPITAL.

The act of Congress approved June 4, 1897, appropriated \$19,000 for the support and medical treatment of destitute patients in the city of Washington, D. C., under a contract to be made with the Providence Hospital by the Surgeon-General of the Army. The amount of relief afforded under this appropriation was as follows:

Patients in hospital July 1, 1897.....	118
Admitted during the year	1,282
<hr/>	
Total number treated.....	1,400
Average number admitted per month.....	117
Number remaining in hospital June 30, 1898.....	119
Total number of days' treatment afforded.....	40,625
Average number of days' treatment per patient.....	31
Average number of patients treated per day	111
Longest term of treatment (days)	365
Shortest term of treatment (day)	1
Number of patients in hospital during the whole year	22

ARMY AND NAVY GENERAL HOSPITAL, HOT SPRINGS, ARK.

Officers' division.—Thirty-one officers were treated during the calendar year, of whom 23 recovered sufficiently to resume their duties or were much improved, by an average treatment of forty days.

Enlisted men's division.—During the calendar year 119 cases were completed—89 by return to duty, 25 by discharge for disability, 4 by discharge on account of expiration of term of service, and 1 by death. The number treated for rheumatism was 81, of whom 63 were returned to duty, and six months after these men were so returned 55 of them were found to be doing full duty with their companies, 1 had been discharged on account of expiration of term, and 7 had been discharged on account of a recurrence of their rheumatism.

Division of honorably discharged men.—Under the provisions of General Order 26, Adjutant-General's Office, dated May 25, 1897, honorably discharged soldiers and sailors of the Regular and Volunteer Army and Navy are admitted for treatment under conditions and regulations prescribed by the Surgeon-General of the Army and approved by the Secretary of War, Circular No. 1, Surgeon-General's Office, dated May 8, 1897. Thirty-seven men were admitted under permits issued by the Surgeon-General, 17 of whom were remaining under treatment December 31, 1897.

HOSPITALS AND HOSPITAL STEWARDS' QUARTERS.

During the fiscal year ended June 30, 1898, the new hospitals at Fort Hamilton, N. Y., and Fort Monroe, Va., were completed and occupied. An additional ward for twelve beds was added to the hospital at Fort Wayne, Mich., and the interior arrangements of the administration building were increased. A third ward, for twelve beds, was provided in the hospital at Washington Barracks by completing the third floor under the mansard roof, and the hospitals at the Presidio of San Francisco and other places were placed in thorough condition. Buildings were also fitted up for temporary hospital purposes at Fort Washington, Md., Sullivans Island, S. C., Fort Delaware, Del., and funds were used in providing for general and other hospitals rendered necessary by the war with Spain.

Quarters for hospital stewards were built at Fort Bliss, Tex., and Fort Leavenworth, Kans., and additions were made to similar buildings at other posts for the purpose of making them more comfortable.

ARMY MEDICAL MUSEUM.

The total number of specimens in the Army Medical Museum at the end of the fiscal year, June 30, 1898, was 35,025. The following statement shows in detail the additions and changes in the different sections:

Pathological section:

In museum June 30, 1897	11,262
Transferred from anatomical section	1
Received during the year	183
	<hr/>
In museum June 30, 1898	11,446
	<hr/>

Anatomical section:

In museum June 30, 1897	3,710
Transferred to pathological section	1
Transferred to Dickinson College, Carlisle, Pa	1
Transferred to Smithsonian Institution	2,205
	<u>2,207</u>

Received during the year 1,503
15

In museum June 30, 1898 1,518

Section of comparative anatomy:

In museum June 30, 1897	1,689
Discarded	33
Transferred to Dickinson College, Carlisle, Pa	18
Transferred to Howard University, Washington, D. C	37
	<u>83</u>

In museum June 30, 1898 1,606

Microscopical section:

In museum June 30, 1897 12,750

In museum June 30, 1898 12,750

Miscellaneous section:

In museum June 30, 1897 2,364
Turned over to Army in field 8

Received during the year 2,356
123

In museum June 30, 1898 2,479

Provisional pathological section:

In museum June 30, 1897 1,993
Transferred 2

RECAPITULATION.

Specimens in the museum June 30, 1897 36,897
Discarded, transferred, etc 2,299

Added 34,598
427

Specimens in the museum June 30, 1898 35,025

The following are some of the more interesting specimens added to the museum collection during the fiscal year ended June 30, 1898:

1. Three normal fetuses from cattle which were killed because of tuberculosis. Contributed by the United States College of Veterinary Surgeons, Washington, D. C.
2. A two months' tubal pregnancy, removed by operation; recovery. Contributed by Dr. I. S. Stone, Washington, D. C.
3. Uterus and tumor, from a case of Cæsarian section; hysterectomy; mother and child survive. Contributed by Dr. D. H. Williams, surgeon-in-chief, Freedmen's Hospital, Washington, D. C.
4. Malformations: (1) Human fetus, showing anencephalus and spina bifida. Contributed by Dr. J. F. Moran, Washington, D. C. (2) Kitten, showing cephalo-thoracopagus. Contributed by Augustus Tracey, private, Hospital Corps, United States Army. (3) Dog, showing thoracopagus. Contributed by Dr. L. M. Hardin, physician, United States Indian Service. (4) Vestigial cyst from thorax. Contributed by Dr. D. S. Lamb, pathologist, Surgeon-General's Office.
5. Two specimens of hydrocephalus: (1) Dilatation of ventricles and tumor of cerebellum, from a child 5 years old. Contributed by Dr. S. S. Adams, Washington, D. C. (2) Hydrocephalic brain and skull, from a calf 2 days old. Contributed by United States College of Veterinary Surgeons, Washington, D. C.
6. Three cases of disease of cerebellum: (1) Endothelioma; from a boy 16 years old. Contributed by Dr. E. L. Tompkins, Washington, D. C. (2) Abscess cavity. Contributed by Dr. D. H. Williams, surgeon-in-chief, Freedmen's Hospital, Washington, D. C. (3) Abscess cavity, also perforation of temporal bone from otitis. Contributed by Dr. A. A. Snyder, Washington, D. C.
7. Five specimens from a boy 4 years old, showing general tuberculosis, especially marked as large tumors in the brain. Contributed by Dr. G. N. Acker, Washington, D. C.
8. Diseases and injuries of circulatory system: (1) Heart of dog containing entozoa, filaria immitis. Contributed by the College of Veterinary Surgeons, Washington, D. C. (2) Shot perforation of the heart, accidental. Contributed by Maj. A. C. Girard, surgeon, United States Army. (3) Shot perforation of the heart, lung, and diaphragm; suicide. Contributed by Maj. R. H. White, surgeon, United States Army. (4) Purulent pericarditis in a boy 3 years old, who had also pneumonia and had had rickets. Contributed by Dr. G. N. Acker, Washington, D. C. (5) Heart, showing recent pericarditis in a man who had also red hepatization of lung. Contributed by Dr. D. S. Lamb, pathologist, Surgeon-General's Office. (6) Heart weighing 16½ ounces, showing chronic pericarditis with hypertrophy and dilatation, from a boy 11 years old. Contributed by Dr. G. N. Acker, Washington, D. C. (7) Old transverse rupture and incipient aneurism of ascending aorta, from a man 50 years old, who died of cerebral hemorrhage. Contributed by Dr. D. S. Lamb, pathologist, Surgeon-General's Office.
9. Diseases of respiratory organs: (1) Sarcoma of lungs and mediastinal glands, apparently secondary to sarcoma of submaxillary region; from a case of hypertrophic pulmonary arthropathy in a man 50 years old. Contributed by Dr. E. M. Hasbrouck, Washington, D. C. (2) Sarcoma of lungs and mediastinal organs. Contributed by Dr. W. W. Johnston, Washington, D. C. (3) Lung and heart from a case of empyema and pericarditis. Contributed by Dr. Clifton Mayfield, Washington, D. C. (4) Three specimens from a case of typhoid ulceration of small intestine, in which diphtheritic inflammation of trachea and bronchi supervened; from a girl 9 years old. Contributed by Dr. S. S. Adams, Washington, D. C.
10. Large gumma of mediastinum; death from hemorrhage into trachea. Contributed by Dr. D. S. Lamb, pathologist, Surgeon-General's Office.
11. Series of plaster casts of dentures, showing irregularities of teeth and the appliances in situ to correct the same. Prepared under the direction of Dr. V. H. Jackson, New York, N. Y.
12. Diseases of stomach: (1) Extensive cancer not involving the orifices. Contributed by Dr. W. A. Caldwell, Washington, D. C. (2) Adeno-carcinoma from a man 79 years old; the lungs and the cervical glands were also involved. Contributed by Dr. G. W. Cook, Washington, D. C. (3) Large old ulcer which perforated, causing fatal peritonitis; from a man 60 years old. Contributed by Col. W. H. Forwood, assistant surgeon-general, United States Army.

13. Diseases and injuries of intestine: (1) Perforation of cæcum, from a soldier who was struck by a moving train. Contributed by Capt. W. C. Gorgas, assistant surgeon, United States Army. (2) Chronic inflammation of colon, from a soldier. Contributed by First Lieut. P. C. Fauntleroy, assistant surgeon, United States Army. (3) Cancer of cæcum, removed by operation; death on fifth day. Contributed by Dr. J. Ford Thompson, Washington, D. C. (4) Entozoa (*Filaria obtusa*) from intestine of mouse. Contributed by J. Barton, veterinary surgeon, Washington, D. C.
14. Diseases of the biliary organs: (1) Gall bladder, showing dilatation, thickening, and ulceration; from a man 45 years old, in whom the lesion appeared to be the result of being chilled. Contributed by Dr. A. A. Snyder, Washington, D. C. (2) Amoebic abscess of liver. Contributed by Dr. H. P. Howard, Alexandria, Va. (3) Dilatation of biliary canal from impaction of calculi in common and cystic ducts; there is also ulceration of pylorus and duodenum; from an ex-soldier 65 years old. Contributed by Col. W. H. Forwood, assistant surgeon-general, United States Army. (4) Large gall-stone, passed by a woman after five months of obstructive jaundice and three days of severe colic. Contributed by Maj. H. O. Perley, surgeon, United States Army. (5) Amyloid liver, weighing 126 ounces. Contributed by Dr. W. M. Gray, microscopist, Surgeon-General's Office. (6) Four specimens from cattle slaughtered because of tuberculosis; one shows cavernous angiomas, the other three tuberculosis. Contributed by United States College of Veterinary Surgeons, Washington, D. C.
15. Cancer of head of pancreas, with resultant dilatation of biliary passages; from a woman 74 years old. Contributed by Dr. H. C. Yarrow, Washington, D. C.
16. Spleen showing myelogenous leukemia; weight, 88 ounces; from a soldier 82 years old. Contributed by Col. W. H. Forwood, Assistant Surgeon-General United States Army.
17. Two specimens of hydronephrosis: (1) From a woman about 34 years old, who died of cerebral hemorrhage, and from whom, three years previously, had been removed an ovarian cyst. At the autopsy the ureter was found compressed by an inflammatory band. Contributed by Dr. D. H. Hazen, Washington, D. C. (2) Hydronephrosis in a child 3 years old, due to tuberculosis of ureters and bladder. Contributed by Dr. G. N. Acker, Washington, D. C.
18. Primary cancer of prostate gland, causing hydronephrosis; secondary growth of ribs, liver, and lumbar and iliac glands, from a man 63 years old. Contributed by Dr. T. C. Smith, Washington, D. C.
19. Cancer of mammary gland, with multiple hemorrhages into the growth; removed by operation. Contributed by Dr. W. P. Carr, Washington, D. C.
20. Molluscum fibrosum, weighing 6½ pounds, removed from back of white man. Contributed by Dr. D. H. Williams, surgeon-in-chief, Freedmen's Hospital, Washington, D. C.
21. Entozoön, *filaria equina*, removed from the aqueous humor of a mule; recovery with use of eye. Contributed by Mr. E. P. Flower, New Orleans, La.
22. Large polypus removed from nose of a girl 13 years old. Contributed by Dr. W. K. Butler, Washington, D. C.
23. Mouse dead of *tinea favosa*. Contributed by J. Barton, veterinary surgeon, Washington, D. C.
24. Hernia. (1) Femoral hernial sac removed by operation from an ex-soldier 71 years old, because of incarceration and strangulation; death on eighteenth day. Contributed by Col. W. H. Forwood, Assistant Surgeon-General, United States Army. (2) Inguinal hernial sac, including portion of vermiform appendix, removed because irreducible and strangulated; from a man 85 years old. Contributed by P. A. Surg. G. T. Vaughn, United States Marine Hospital Service. (3) Umbilical hernia; removal of a portion of jejunum and mesentery, because of strangulation, from a woman 50 years old; death soon after operation. Contributed by Dr. E. A. Balloch, Washington, D. C.
25. Diseases and injuries of bone. (1) Suppurative osteomyelitis with fistulae of femur, from a soldier 26 years old, who had been injured in the knee by jumping; amputation; recovery. Contributed by Maj. L. A. La Garde, surgeon, United States Army, and First Lieut. P. C. Fauntleroy, assistant surgeon, United States Army. (2) Scapula showing shot fracture, from a soldier who died of hemorrhage from lung six and a half hours after injury. Contributed by Maj. A. C. Girard, surgeon, United States Army. (3) Two

- specimens showing fracture and dislocation of third to fifth cervical vertebrae, with compression and laceration of and extensive hemorrhage into the corresponding cord; from an ex-soldier, who, while intoxicated, fell 21 feet on his head; died thirty-six hours after injury. Contributed by Maj. A. C. Girard, surgeon, United States Army. (4) Two specimens, one showing healed shot fracture of femur of Chinese pheasant (contributed by First. Lieut. Benjamin Brooke, assistant surgeon, United States Army), the other, healed fracture of tibia of red deer (contributed by Maj. H. O. Perley, surgeon, United States Army). In each case there is much deformity.
26. Keratinizing epithelioma from submaxillary region, removed by operation. Contributed by Dr. J. Ford Thompson, Washington, D. C.
27. Fragment of a 6-pound shell, weighing 12.5 grams, removed from a Spanish steersman. It was lodged in the left wall of the thorax, near to, but not involving, the pleura; recovery. Contributed by Capt. Paul Clendenin, assistant surgeon, United States Army. This was the first specimen received at the Museum from the Hispano-American war.
28. Three models of the human eye showing its anatomy in horizontal section, anterior half and posterior half. Contributed by Dr. H. O. Reik, Baltimore, Md.
29. Litter used in the Mexican army. Contributed by Gen. Epifanio Cacho, chief of the medical department, Mexican army.
30. Uniform, consisting of a coat, trousers, and cap, of hospital attendant of the Mexican army. Contributed by Gen. Epifanio Cacho, chief of the medical department, Mexican army.
31. Series of photographs of Armory Square Hospital, Washington, D. C., showing some of its buildings, rooms, personnel, and patients during the war 1861-1865. Contributed by Mrs. Gen. John A. Logan.
32. Radiograph of arm and part of forearm showing the humerus reduced to about half its length, its diameter lessened and its lower end a rounded stump; the bones of the forearm appear to be perfectly normal. This photograph was taken twenty-four years after the soldier was wounded; a primary excision of 4½ inches of lower end of humerus was performed. Contributed by W. G. Tracy, late captain and aid-de-camp, Syracuse, N. Y.

LIBRARY OF THE SURGEON-GENERAL'S OFFICE.

The following table shows the additions made to the library during the fiscal year:

Description.	On hand June 30, 1897.	Added during fiscal year.	Total June 30, 1898.
	<i>Volumes.</i>	<i>Volumes.</i>	<i>Volumes.</i>
Medical journals	36,547	1,204	37,751
Medical transactions	5,506	393	5,899
Bound theses	1,899	66	1,965
Bound pamphlets	2,645	6	2,651
Other medical books	77,327	2,845	79,672
Total.....	123,924	4,014	127,938
Medical theses	a 59,140	2,725	60,865
Medical pamphlets	151,012	4,874	155,886
Total.....	210,152	7,599	216,890

a Of the total number of theses on hand June 30, 1897, there were 912 bound in 66 volumes during the year.

There were presented to the library during the year 467 books and 9,044 pamphlets and journals.

Volume III, second series, of the Index Catalogue includes the letter "C" and forms a volume of 1,100 pages. It will be ready for distribution at the usual time. The appropriation for Volume IV, second series, having been made, the manuscript is in course of preparation for the printer.

MEDICAL OFFICERS.

During the year ended June 30, 1898, there were 124 medical officers, United States Army, and 60 contract surgeons on duty in the field.

Appointments.—Nineteen assistant surgeons with the rank of first lieutenant.

Promotions.—Two surgeons with the rank of major to be deputy surgeons-general with the rank of lieutenant-colonel; 6 assistant surgeons with the rank of captain to be surgeons with the rank of major; 10 assistant surgeons with the rank of first lieutenant to be assistant surgeons with the rank of captain.

Deaths.—One surgeon with the rank of major; 1 assistant surgeon with the rank of captain.

Retirements.—Two deputy surgeons-general with the rank of lieutenant-colonel; 2 surgeons with the rank of major; 1 assistant surgeon with the rank of first lieutenant.

Resigned.—One assistant surgeon with the rank of captain; 1 assistant surgeon with the rank of first lieutenant.

A board was convened in Washington, D. C., September 27, 1897, to examine candidates for admission into the Army Medical Department. Of 45 candidates who were authorized to appear before the board, 34 presented themselves for examination, and of these only 6 were accepted; 7 were rejected on account of physical defects. Before another board convened in the same city May 2, 1898, 136 candidates were authorized to appear. Of 97 who presented themselves for examination 13 were accepted; 16 were rejected on account of physical defects.

HOSPITAL CORPS.

On June 30, 1897, there were in service 98 hospital stewards, 99 acting hospital stewards, and 513 privates, a total of 710.

The act of March 16, 1896, fixed the number of hospital stewards thereafter at 100 (appropriation for support of Army, July 1, 1896-June 30, 1897), two vacancies existing in the grade on July 1, 1897. The act approved March 1, 1887, organizing the Hospital Corps of the Army of the United States of America (section 7) empowered the Secretary of War to detail privates of the corps as acting hospital stewards "whenever the necessities of the service required it," thus providing at all times a sufficient number of that grade for the needs of the service. The same act (section 5) empowered the Secretary of War "to enlist, or cause to be enlisted, as many privates of the Hospital Corps as the service may require, and to limit or fix the number;" and further provided that "any enlisted man in the Army shall be eligible for transfer to the Hospital Corps as a private." It also directed that "they shall perform duty as wardmasters, cooks, nurses, and attendants in hospitals, and as stretcher bearers, litter bearers, and ambulance attendants in the field, and such other duties as may by proper authority be required of them." The enacting clause directed that the corps "shall consist of hospital stewards, acting hospital stewards, and privates, and all necessary hospital service in garrison, camp, or field (including ambulance service) shall be performed by the members thereof, who shall be regularly enlisted in the military service." It also attached the Hospital Corps permanently to the Medical Department, and provided that it should

not be included in the effective strength of the Army nor counted as a part of the enlisted force provided by law. Up to January 31, 1898, the wants of the service were fully supplied by the employment of 99 hospital stewards, 100 acting hospital stewards, and 519 privates.

The discipline of the corps may be inferred from the fact that up to May 31, 1898, only 1 hospital steward and 4 privates were discharged by sentence of general court-martial. During the period from July 1, 1897, to March 31, 1898, the gains and losses balanced each other so nearly that the total number in service in the corps oscillated only between 710 on June 30, 1897, and 723 on March 31, 1898.

The act of June 16, 1890, granting three months' furlough at the end of the third year of a five-year enlistment ceased to operate on November 1, 1897. This added greatly to the efficiency of the corps.

With the view of filling existing vacancies in the grades of hospital steward and acting hospital steward, and providing an eligible list from which to meet emergencies, examinations were held in November and December, 1897. Thirty-two candidates passed the examination for the position of steward, and 22 for that of acting steward, all of whom were appointed by the end of May, 1898. To provide for any increase of hospital stewards required by the establishment of a number of military posts, and the organization of expeditions to Alaska, I recommended an increase to 115, this being thought to be the lowest number that would meet the then existing conditions of peace.

ARMY MEDICAL SCHOOL.

I submit herewith the report of Col. Charles H. Alden, president of the faculty of the Army Medical School, which shows the course of study pursued and the excellent results attained:

ARMY MEDICAL SCHOOL,
Washington, D. C., April 20, 1898.

To the SURGEON-GENERAL OF THE ARMY.

SIR: I have the honor, as required by General Orders 78, Headquarters of the Army, September 22, 1893, to submit the following detailed report of the condition of the Army Medical School, of the instruction given during the session just ended, and of the relative proficiency of the pupils as determined by examinations held at the close of the course.

This the fourth session of the school began November 10, 1897, and ended April 1, 1898. The main courses of instruction have been given as laid down in the order establishing the school in 1893, namely, duties of medical officers, military surgery, military medicine, military hygiene, sanitary chemistry, clinical and sanitary microscopy, and hospital corps drill and first aid. Under authority of the War Department and direction of Colonel Sumner, commanding, instruction in riding was given at Fort Myer, Va., every Saturday morning by Lieut. H. A. White, Sixth Cavalry. A practical course in operative surgery was conducted by the professor of military surgery, as was done last year, and the student officers attended surgical clinics at Barnes Hospital, Soldiers' Home.

Auxiliary lectures have been delivered as follows: On military law, by Lieutenant-Colonel Davis, deputy judge-advocate-general; on mental diseases at the Government Hospital for the Insane, under the direction of the superintendent, by Dr. George W. Foster, assistant; on the Army Medical Library, by Dr. Robert Fletcher, F. R. C. S., Washington, and on parasites in man, by Prof. C. W. Stiles, Ph. D., of the Agricultural Department. The extension of the time of the session of the school, hereafter referred to, gave an opportunity for instruction in optometry, which was deemed very desirable. The didactic instruction was given by Capt. George D. DeShon, assistant surgeon, United States Army, the instructor in hospital corps drill and first aid; and practical instruction at the Episcopal Eye, Ear, and Throat Hospital, by Dr. W. N. Suter, late assistant surgeon, United

States Army, who kindly offered his services. The lectures and instruction outside the regular courses have been of great interest and benefit to the class, and the thanks of the faculty are due the gentlemen who gave them for their valuable aid.

The class in attendance on the full course was composed of six newly appointed medical officers, approved by the Army medical examining board in October, 1897. In addition, there were five older medical officers, either on leave or stationed in the city or vicinity, who took part, at least, of the practical courses in the pathological and chemical laboratories.

The daily order of duties for the session just passed is appended, marked A. There has been no interruption in the work of the school, and the student officers have, as a rule, been prompt in attendance and attentive to their duties.

In accordance with the recommendation of the faculty made at the close of the last session, that more time was needed for instruction than the then time of the session, four months, allowed, the session of the school was extended to April 1 by General Orders, No. 43, Adjutant-General's Office, July 6, 1897. The additional time has been very profitably employed in extending and amplifying the courses of instruction, especially in the course in operative surgery and sanitary microscopy.

Faculty meetings have been held on the first Monday in each month, as required by orders, and at other times when necessary.

At the examination held at the close of the session the relative proficiency of the student officers was found to be as follows:

Duties of medical officers: Higley, Webber, Page, Clayton, Ashford, Rauchfuss.

Military surgery: Clayton, Higley, Page, Ashford, Rauchfuss, Webber.

Military medicine: Higley, Page, Ashford, Webber, Clayton, Rauchfuss.

Military hygiene: Higley, Page, Webber, Clayton, Ashford, Rauchfuss.

Sanitary chemistry: Higley, Webber, Page, Ashford, Clayton, Rauchfuss.

Clinical and sanitary microscopy: Higley, Webber, Clayton, Page, Ashford, Rauchfuss.

Hospital Corps drill: Higley, Ashford, Page and Clayton equal, Rauchfuss, Webber.

The relative standing and percentages attained by each, taking all the branches into account, were as follows:

1. Asst. Surg. B. S. Higley.....	91	4. Asst. Surg. B. K. Ashford.....	72
2. Asst. Surg. Henry Page.....	78	5. Asst. Surg. H. A. Webber.....	65
3. Asst. Surg. J. B. Clayton	73	6. Asst. Surg. George Rauchfuss....	49

The closing exercises of the session were held on Friday, April 1, 1898, at 8 p. m. in the library hall of the Museum building. After introductory remarks by the president of the faculty, an address to the class was delivered by Prof. P. S. Conner, M. D., of Cincinnati, Ohio. His subject was "The contributions of the Army medical staff to medical science," and was treated in a most scholarly and interesting manner. It was not only gratifying as a record of the scientific achievements of the corps, but stimulating to the new members at this the beginning of their active career.

The standing of the class was then given by the president of the faculty, and certificates of attendance were delivered to the class by Surgeon-General Sternberg, who also announced the award of the Alexander H. Hoff memorial gold medal to Asst. Surg. B. S. Higley, he having attained the highest standing in the course of 1897-98 at the school.

Attention is respectfully invited to the reports of instruction in each branch by the professor or instructor therein, hereto appended, and marked B, C, D, E, F, G, and H.

The Alexander H. Hoff memorial gold medal (value \$40), the award of which was made at the closing exercises, was founded by Maj. John Van R. Hoff, surgeon, United States Army, now stationed at Vancouver Barracks, Wash. The medal was struck at the United States mint through the courtesy of the Secretary of the Treasury, and was very appropriate and tasteful. The foundation of this prize can not fail to afford a needed stimulus to the work of the young medical officers at the school, and the founder, Major Hoff, is entitled to the hearty thanks of the Department and faculty for his generous interest.

The faculty of the school continues to be gratified by the good reports of the efficiency and high standing of the young medical officers who have passed from their instruction.

Very respectfully,

C. H. ALDEN,
Assistant Surgeon-General, United States Army,
President Army Medical School.

A.

ARMY MEDICAL SCHOOL, WASHINGTON, D. C.

[Session of 1897-98, beginning November 10, 1897, ending April 1, 1898.]

ORDER OF DUTIES.

Daily, except Saturdays, Sundays, and holidays: 9 a. m. to 12 m., instruction in pathological laboratory; 1 p. m. to 2.50 p. m., instruction in chemical laboratory; 3 p. m., lecture. Saturdays: 9 a. m. to 10.15 a. m., instruction in Hospital Corps drill and first aid at Washington Barracks, D. C.; 11 a. m. to 12 m., instruction in equitation at Fort Myer.

There are no exercises on Sundays, Thanksgiving day, December 25 to January 1, inclusive, and Washington's birthday.

The lectures will be delivered as follows: Duties of medical officers, Wednesdays; military surgery, Thursdays; military medicine, Mondays; military hygiene, Tuesdays.

Hours for instruction in operative surgery and optometry will be announced hereafter.

Auxiliary lectures.—Military law, Lt. Col. G. B. Davis, deputy judge-advocate-general, March 21 to 25, 1898, inclusive; mental diseases (clinical), at Government Hospital for Insane, Washington, alternate Fridays, beginning November 19; the Army Medical Library, Dr. Robert Fletcher, F. R. C. S., Eng., Monday, January 24, 1898; parasites in man, Prof. C. W. Stiles, Ph.D., Department of Agriculture, dates to be hereafter announced.

Due notice of any change of programme will be posted on the bulletin board.

WALTER REED,

Major and Surgeon, United States Army, Secretary of the Faculty.

B.

DUTIES OF MEDICAL OFFICERS, ARMY MEDICAL SCHOOL, SESSION 1897-98.

By Asst. Surg.-Gen. C. H. ALDEN, U. S. A.

NOTE.—The subjects taken up were substantially the same as those treated in former years, though the extension of the course enabled the lecturer to treat more fully some of the more important subjects. As in former years, the course has been a practical one as far as possible, exercises being conducted in the examination of recruits, the sanitary inspection of posts, the preparation of official reports, certificates of disability and for sick-leaves, and other papers.

Thanks are due to Asst. Surg. A. N. Stark, United States Army, Washington Barracks, D. C., for valuable assistance in the instruction of the class in the examination of recruits.

Lecture I.—Preliminary. The duties of the army medical officer as they differ from those of the civil practitioner. The importance of his sanitary and administrative work. Military discipline; its nature and necessity, how it is secured, its obligation upon the medical officer. Changes in his position in the military establishment with progress in art of war and civilization. His rank, title, and command. The Geneva Convention and its principal provisions.

Lecture II.—Organization of the United States Army; staff departments and their duties. Geographical departments and distribution of troops; the service schools. Articles of War, origin and purpose. Army Regulations, their development from first issue in 1779 especially as affecting the medical officer. Manual for the Medical Department. Orders, general and special, circulars. Official correspondence, its channels and form. Practical exercises therein.

Lecture III.—Examination of recruits. Recruiting in foreign armies. Organization of United States recruiting service. Examination of voluntary recruits and drafted men compared. Requirements of the general Regulations and Medical Manual. Outline of mode of examination. Necessity for method and thoroughness.

Lecture IV.—Examination of recruits, continued. Principal causes of rejection of recruits. Discussion of disqualifying causes by regions. Tripler's Manual. The personal identification system; its object and method explained. Outline figure cards and mode of preparation.

Lectures V and VI.—Practical exercises at Washington Barracks, D. C., in examination of recruits and making out enlistment papers; record of physical examination and outline figure cards.

Lecture VII.—Medical attendance. The provisions of Army Regulations and Medical Manual. Persons entitled to it, to issue of medicines, and to admission to hospital. Sick call, how conducted. Records and reports required. Regulations and custom as to private practice of Army surgeons.

Lecture VIII.—The sanitary duties of medical officers; their importance, origin, and development. Paragraph 1393, Army Regulations. Duties advisory, not executive. Regular monthly and emergency inspection and reports. Two classes of defects, of construction and of administration. Subjects to be looked into and reported on. Points requiring special attention in inspecting barracks and other buildings.

Lecture IX.—Practical exercises in sanitary inspection at Washington Barracks, D. C. Student officers shown method, and points requiring particular attention pointed out. Notes taken by student officers and report required for examination.

Lecture X.—Certificates of disability for discharge. Regulations. Method of procedure. Points to be specially regarded. The Pension Bureau and its work in relation to Medical Department. Importance of care, accuracy and definiteness. Practicable exercises in preparing certificates.

Lecture XI.—Disposition of insane soldiers, admission to Soldiers' Home, to Army and Navy General Hospital, Hot Springs. Transfer of enlisted men on account of health. Methods pursued and papers required.

Lecture XII.—Certificates for sick leave for officers. Regulations. Forms. Points specially demanding attention. Importance of observing them fully. Practical exercises in preparing certificates for sick leave.

Lecture XIII.—Property responsibility and accountability. Regulations referring thereto. Mode in which public property may be received and disposed of, how accountability is incurred, and how the officer is relieved from it. Vouchers and returns. Obligation resting upon the medical officer for the proper care, the economical and authorized use of public property.

Lecture XIV.—Medical property. Special regulations of Manual taken up in detail. Requisitions, invoices, receipts, returns, their forms explained. Examination of articles supplied by Medical Department on deposit in the Army Medical Museum.

Lecture XV.—Service of hospitals. Regulations governing. Sketch of daily routine. Assignment of duties. Records kept, reports and returns required. Army ration. Hospital fund, how it accrues, how it is expended. Durable hospital fund property. Statements and returns.

Lecture XVI.—Construction and repair of hospitals and hospital steward's quarters. Appropriations. Regulations. Estimates and their preparation. Inspection of work and reports thereon. Sample plans of different styles of hospitals in use shown.

Lecture XVII.—Medical officers in the field. Importance of readiness for emergencies and detached service, inspection of field equipment, etc. Duties with scouting parties and larger commands, on the march, in camp, in action. Organization of the medical department of a division, brigade, and army corps. Duties on board transports. Field reports.

Lecture XVIII.—Duties of the medical officer in command of a hospital corps detachment. Subsistence, clothing, equipment, instruction. Methods of enforcing discipline, force of example, division of duties, employment in personal service, transfer, discharge, death. Records kept. Reports and returns required.

Lecture XIX.—Malingering, including concealment, feigning, and artificial production of disabilities. The principal diseases and injuries which are the subjects of malingering and the mode of detection.

UNITED STATES SOLDIERS' HOME,
Washington, D. C., April 12, 1898.

SIR: I have the honor to submit the following brief report of the course in military surgery—didactic, operative, and clinical—during the past session of the army medical school.

The didactic course was given in eighteen lectures of one hour each on the weapons of war and the principles and practice of military surgery, including hospital administration, the details of which were similar to those published in the Surgeon-General's last annual report. (See appended note.)

The operative course embraced (1) operations on the cadaver by the student officers under direction of the instructor; (2) operations at Barnes Hospital surgical clinics where they had opportunity in turn to assist. The material for the operative course on the cadaver consisted of one female and ten male subjects in excellent condition. The total amount of time devoted to it was 34 hours on twenty different days, or an average of 1.7 hours per day during which the following operations were done:

Ligation of arteries.....	83
Amputations, excisions, and resections.....	61
Miscellaneous operations.....	71
Dissections.....	12

The surgical clinics at Barnes Hospital were on Sunday of each week in order not to interfere with the programme of the school on other days. The students were thus enabled to witness and take part in a considerable number of major and minor operations of a practical character and to have time at the hospital to study and follow up from week to week the course and results in every case. Forty-eight cases were studied in this way.

Experimental firing with the new rifle was carried on for practical study of the effects of the new small-caliber bullet on various objects, including three freshly amputated limbs which were utilized for that purpose.

Very respectfully,

W. H. FORWOOD,
Colonel, Assistant Surgeon-General, U. S. A.,
Professor Military Surgery.

PRESIDENT ARMY MEDICAL SCHOOL,
Washington, D. C.

APPENDED NOTE.

Lecture I.—Introductory. The care of sick and wounded in time of war. Early history among different nations. Evolution of modern methods. Ancient and modern campaigns. Surgical literature of the subject. Influence of warfare on the progress of surgery.

Lecture II.—Military weapons, old and new, contrasted in their relation to military surgery. Evolution of the new small-caliber firearms; the new steel-cased bullet. The new artillery field guns and missiles; lightness, mobility and range, rapidity of fire, destructive effect. Chemical and physical properties of the smokeless powders. Specimens of ancient and modern guns, pistols, and side arms, new and old missiles and powders. Target maps. Charts giving ballistic data of the small-caliber rifles now in use among different nations.

Lecture III.—Experimental effects of the new small-caliber steel-cased rifle projectile and of the old lead bullet on inanimate objects. Openings of entrance and exit and the tracks of the bullet through various substances illustrated. Effects upon open and closed vessels with gaseous, fluid, semifluid, moist, and dry contents shown. Initial velocity, rotation, penetration, active energy, and heat produced in the barrel and by impact. Hydrodynamic theory of the so-called explosive effects of missiles. The trajectory, angle of ascending and descending limb, maximum ordinate, effective range and velocity at different ranges. Practical deductions. Numerous specimens, with tables, charts, plates, and drawings.

Lecture IV.—Effects of the small-caliber steel-cased bullet as a wound-producing missile on animal structures. Modifying influence of higher or lower velocities, larger or smaller caliber, and of greater or lesser resistance in the tissue. Moist and solid structures; fluid in the hollow viscera. Stability of the bullet, deformation, rupture, lodgment, lodgment of fragments. Literature of the subject, statistics, charts, and illustrations from various sources.

Lecture V.—Explosive projectiles or those used with the artillery arms. Character and relative frequency of wounds by these missiles. The use of hollow explosive bullets with small arms; history and character; prohibition by international law. Illustrative cases and specimens.

Lecture VI.—General character of gunshot wounds made by modern firearms. Relative percentage of slight and severe wounds; mortality. Tracks of missiles through various structures. Fragments of compact bone as secondary missiles. Other secondary missiles. Lines of perforation, injury to vessels, nerves, and viscera. Influence of modern armaments on military tactics and the handling of wounded.

Lecture VII.—Hemorrhage and shock. Symptoms, comparison, and differential diagnosis. Character and frequency of gunshot hemorrhage, immediate, primary, and secondary. Regional injuries to vessels and hemorrhage; nature, diagnosis, prognosis, and treatment. Ligation in continuity and in the wound. Causes and management of secondary hemorrhage. Hemorrhage on the field, mortality, the tourniquet, asepsis. Nature, symptoms diagnosis, prognosis, and treatment of shock. Statistics, illustrations, and specimens from the museum.

Lecture VIII.—Gunshot injuries of the head and neck. General and specific characters. Symptoms, diagnosis, prognosis, and treatment of common forms. Sequelæ. Illustrative cases and specimens.

Lecture IX.—Gunshot wounds of the chest and spine; superficial, penetrating, perforating, symptoms, complications, management. Illustrative cases from recent reports of chest wounds with the new small-caliber rifles.

Lecture X.—Gunshot wounds of the abdomen; symptoms, diagnosis, prognosis, and treatment. Penetrating and perforating wounds with and without visceral lesions, methods of differential diagnosis. Wounds in the different viscera, diagnostic symptoms, relative frequency, mortality. Laparotomy, methods of dealing with intestinal, hepatic, and other abdominal gunshot wounds. Comparative mortality under operative and expectant treatment. Illustrative cases.

Lecture XI.—Gunshot wounds of the extremities; relative frequency, description, prognosis, and management. Illustrated by numerous clinical reports showing the general character, course, and results of these injuries by the new small-caliber steel-cased bullet at various ranges. Colored plates of frozen sections and specimens.

Lecture XII.—Treatment of gunshot injuries. General treatment in hospital. Treatment of special cases. Treatment on the field. At the first-dressing stations, at the ambulance stations. Resources, material, deficiencies, contingencies. The question of asepsis in field practice, the protection of wounds, methods and practical suggestions.

Lecture XIII.—First aid to the wounded. Removal from firing line. Classification. Diagnosis tags. First-dressing stations, ambulance stations, field hospitals. Means of transportation. Brigade pack mules. Advance ambulance detachment.

Lecture XIV.—Practical application of the principles of military surgery discussed in foregoing lectures. Theoretical and practical lines of medical aid. Experience gained in past wars. Importance of treating for a time all the more severely wounded at or near the battlefield. War maps and charts.

Lecture XV.—Hospital administration. General principles which underlie administrative duties. Personal knowledge of details. Organization. Frequent inspection. Habits of industry, neatness, and order. Evil effects of idle time. Practical illustrations, blanks, forms, and methods.

D.

WAR DEPARTMENT, SURGEON-GENERAL'S OFFICE,
UNITED STATES ARMY MEDICAL MUSEUM AND LIBRARY,
Washington, D. C., January 31, 1898.

SIR: I have the honor to report that I have concluded my course before the class attending the session 1897-98 of Army Medical School, on the subject of military medicine.

The course has included nine lectures, a synopsis of which is herewith appended.

In the absence of clinical facilities in connection with the school, and in view of the fact that the class has but lately finished the usual instructions furnished by medical college and hospital, I have dealt largely with the historical and geographical features of disease and epidemic invasion affecting armies in the past, as well as the enunciation of the practical principles to be observed for the prevention of disease and the conservation of the health and efficiency of our Army.

I am, very respectfully,

D. L. HUNTINGTON,
Deputy Surgeon-General, United States Army.

Col. C. H. ALDEN,

Assistant Surgeon-General, U. S. A., President Army Medical School.

MILITARY MEDICINE, COURSE 1897-98.

Lecture I.—Military medicine. Definition and application. Sketch of early history of military medicine and its literature. Modern military medicine. Consideration of the soldier as the unit of military organization with reference to qualities demanded for military service. General remarks on diseases of armies. Intimate relation of military medicine, surgery, and hygiene. Considerations affecting the health of armies in active military operations in time of war; conditions of peace; water and food supplies; climate; ochlesis; malarial influences; scorbutic influences; moral conditions; social or individual conditions, with general observations and illustrations.

Lecture II.—Diseases prevalent in armies in time of peace, and particularly with reference to the United States Army. Geographical extent of the United States; climatic features; geographical features; ethnological and sociological features; military posts, their location and purposes. Duties and occupation of soldiers in time of peace with relation to health and disease. Diseases most commonly met with at all posts; diseases of the digestive system; diseases of the respiratory system, etc.

Lecture III.—Conditions of health and disease in armies in time of peace, continued; diseases of the circulatory system; diseases of the nervous system; rheumatic affections; venereal diseases; alcoholism. General remarks on army practice.

Lecture IV.—Diseases and conditions affecting troops on field duty and during marches, whether in peace or war. Mobilization and centralization. Transportation by land or water. Conditions to be observed as affecting health and comfort of troops on marches, with general observations on marching troops, and status of active field duty.

Lecture V.—Specific infection diseases: Measles, scarlet fever, diphtheria, and smallpox. Vaccination and revaccination. Remarks on army diarrhea and dysentery. Importance of military hygiene with reference to invasion and diffusion of disease.

Lecture VI.—Specific infection diseases, continued. Malarial fevers and malarial cachexiæ, with historical sketch.

Lecture VII.—Specific infection diseases, continued. Typhoid fever in armies, epidemic influenza, dengue, and the febriculæ, with historical sketches.

Lecture VIII.—Specific infection diseases, continued. Typhus fever, yellow fever, cerebrospinal meningitis, with historical account of each.

Lecture IX.—Specific infection diseases, continued. Asiatic cholera, with historical review of epidemics. Glanders, with its relation to the military service. General observations on preventive medicine.

E.

WAR DEPARTMENT, SURGEON-GENERAL'S OFFICE,
Washington, D. C., March 29, 1898.

SIR: I have the honor to report that the course on military hygiene at the Army Medical School, session of 1897-98, was concluded on the afternoon of March 25 last.

I inclose a summary of the lectures, from which it will be seen that the whole subject of water had to be omitted on account of want of time to deal adequately with it. I endeavored, however, while at work on this subject in the laboratory course, to bring to the notice of the class all the prominent points connected with water supplies, so as to remedy the deficiencies of the lecture course.

Respectfully,

CH. SMART,
Deputy Surgeon-General, U. S. A., Professor of Military Hygiene.

Col. C. H. ALDEN,
President of the Faculty, Army Medical School.

COURSE OF LECTURES ON MILITARY HYGIENE.

1. History of hygiene, including a review of the influence of plague, leprosy, smallpox, typhus and typhoid fevers, cholera, and yellow fever on its progress. Quarantines and maritime sanitation.

2. Duties of health officers. Sick rates and mortality statistics,

3. The essentials of good camping grounds. Plans of military camps.
4. The tents and huts of field service.
5. Personal cleanliness. Marches. Physical training. Plans of permanent military posts.
6. Company barracks: Cellars, basements, and casemates. Lighting and warming of barracks.
7. Warming by open fireplaces, stoves, hot air, hot water, and steam.
8. Physical aspects of air, including pressure, light, heat, moisture, and electrical condition; general circulation and local circuits; storms; climate.
9. Medical climatology. Chemical aspects of air; respired air.
10. Ventilation; calculation of ventilation from results of analysis of air. Impurities of air.
11. Sewer air. Sewage; dry earth conservancy. Removal of liquid wastes; cesspools; pneumatic methods.
12. Removal of sewage by water carriage. The soil pipe and house drain, with the traps, vents, and overflow of the plumbing fixtures.
13. Sewers. Disposal of sewage. Pollution of public water supplies by sewage. Chemical treatment of sewage.
14. Disposal by irrigation, by methods of filtration, by electrolysis, and by special methods for promoting nitrification. Disposal of garbage; crematories.
15. Food: Its proximate principles, percentage of nitrogen, calorific value, and mechanical equivalent.
16. Calculation of the available energy in specified rations or dietaries. The emergency ration.

F.

SURGEON-GENERAL'S OFFICE, WAR DEPARTMENT,

Washington, D. C., March 29, 1898.

SIR: I have the honor to report the close of the work of the session 1897-98 in the chemical laboratory of the Army Medical School. This course occupied the hours 1 to 3 p. m. of each regular school day during the session. After some time spent in qualitative analysis to secure familiarity with laboratory methods, quantitative determinations, gravimetric and volumetric, were made of most of the substances that are of importance in medical and sanitary chemistry. Special subjects were then taken up, such as air and ventilation, potable waters, urine, urinary calculi, the proximate principles of food, milk, butter, baking powders, and the staples of the soldier's ration. Particular attention was given during the course to the separation, identification, and quantitative estimation of all notably poisonous substances.

It is gratifying to me to have to report the evident interest taken by the class in this laboratory work. As a rule the members were at work during part of their midday recess, and not infrequently experiments were completed by voluntary work on Saturday afternoons.

Capt. P. R. Egan was a regular and earnest student until the necessities of the service caused his removal for duty at Fort Hancock, N. J. Capt. M. M. Brewer spent two months of a leave of absence in attendance on the course, and Capt. A. N. Stark was present when his regular duties at Washington Barracks, D. C., did not interfere.

A written examination on the subjects studied during the course was held on the afternoon of March 28. I inclose with this the written papers of the class, a copy of the questions used, the grading of each student on these questions, and the grading given by me as the result of observation during my supervision of the laboratory work of the session.

Respectfully submitted.

CH. SMART,

Deputy Surgeon-General, U. S. A., Director of the Sanitary Laboratory.

Col. C. H. ALDEN,

President of the Faculty, Army Medical School.

G.

WAR DEPARTMENT, SURGEON-GENERAL'S OFFICE,
UNITED STATES ARMY MEDICAL MUSEUM AND LIBRARY,
Washington, April 15, 1898.

SIR: I have the honor to submit the following report of the work accomplished in the pathological laboratory of the Army Medical School for the session 1897-98:

As during the preceding year, the first three months of the session were devoted to a course in bacteriology. This embraced, in addition to the acquirement of the necessary technique, a study of pathogenic bacteria, including the microorganisms of suppuration, erysipelas, croupous pneumonia, splenic fever, diphtheria, typhoid fever, Asiatic cholera, and actinomycosis. While other pathogenic bacteria were studied, those above enumerated received particular attention by the student officers.

As in former sessions, numerous serum tubes taken from various forms of throat diseases were placed at my disposal through the courtesy of the health officer and the bacteriologist of the board of health of this District, which enabled the students to acquire thorough familiarity with this important diagnostic work, as well as confidence in their own technical skill. Widal's serum reaction received, also, special attention while the bacillus typhosus was being studied.

The latter part of the session was devoted, as heretofore, to the microscopical study of normal and pathological blood, sputum, urine, and tumors. The pathological lesions produced in tissues by various important microorganisms were also carefully examined.

I regret to have to state that the work accomplished by this class was not in all respects satisfactory. Lack of interest and superficial routine characterized the work of two of the members of the class. Feeling secure in the possession of a permanent position and income, these young medical officers have early begun to show a disposition to do as little as the regulations will allow. I am pleased to add that the work of the other members of the class was quite praiseworthy.

Very respectfully,

WALTER REED,
*Surgeon, United States Army,
Professor of Clinical and Sanitary Microscopy.*

Col. C. H. ALDEN, U. S. A.,
President of the Faculty, Army Medical School.

H.

WASHINGTON BARRACKS, D. C., *March 21, 1898.*

SIR: I have the honor to submit the following report of the course of instruction in Hospital Corps drill and first aid given during the present session of the Army Medical School.

During the first two months of the course the student officers were drilled one-half hour each day in the school of the soldier, squad, and litter.

During the remainder of the course they attended the Saturday morning inspections of the Hospital Corps company of instruction at this post.

Immediately after inspection each student officer was required to take charge of a litter squad and to drill it in all the movements provided in the drill regulations for the Hospital Corps. Particular attention was given to the carriage of each officer, to his enunciation and method of giving commands, and to his attitude toward the enlisted men under his charge.

When sufficiently advanced each officer, in turn, drilled the company as a whole and commanded it at inspection.

During inclement weather the methods employed in instructing Hospital Corps men in the principles of first aid were shown, the field equipment of the medical department was exhibited and explained, and instruction given in the manual of the sword.

It has been observed that the interest of student medical officers in the purely military features of their profession is keenest during the few months immediately following their appointment, and it is believed that during this formative period, residence in a military post under some form of surveillance would result in habits of precision and discipline which would be of great benefit in the management of hospitals and the control of men. It is further believed that residence during this period in a large city, as under the present system, results in a looseness of method

and a contentment with the same which will ever be a hindrance to a medical officer's full success. I, therefore, renew the recommendation made by my predecessors that future classes of student officers be attached to the Hospital Corps company of instruction at Washington Barracks during their course.

In addition to drill and first aid I have been charged during the present session with the instruction of the class in the principles of optometry, which was given as follows:

Didactic lectures, four hours; practical demonstration of shadow test with artificial eye, each student officer, three hours; clinical work in refraction at Episcopal Eye, Ear, and Throat Hospital (given through the kindness and in the service of Dr. W. N. Suter, late assistant surgeon, United States Army), each student officer, four hours.

Owing to the limited time assigned this subject only the most elementary instruction could be imparted. Should this course be continued it is recommended that at least one exercise a week be given throughout the session, so that each student officer might do sufficient practical work to feel some confidence in his results.

Very respectfully, your obedient servant,

G. D. DESHON,
*Captain and Assistant Surgeon, United States Army,
Instructor Army Medical School.*

The PRESIDENT, ARMY MEDICAL SCHOOL,
Washington, D. C.

RECRUITING.

The total number of men examined for enlistment during the year 1897 was 13,139, of whom 12,131 were white and 1,008 were colored. The number accepted was 9,226, or 702.19 out of every thousand examined. The physique of the colored candidates was apparently of a higher order than that of the white men, as their ratio of accepted men was 786.71 per thousand as compared with 695.16 among the white candidates. White men to the number of 33.30 and colored men to that of 16.86 per thousand declined enlistment. The rate of rejections on primary examination was 271.54 among the white and 196.43 among the colored candidates, giving a mean of 265.77 rejections per thousand of those examined. This shows an improvement in the character of the candidates, for in 1896 the ratio of rejections was 371.65; in 1895, 473.45, and in 1894, 508.50. The care taken in the examination of recruits has not in any way been relaxed during recent years.

Of every thousand candidates examined 90.19 were rejected on account of imperfect physique, under weight, under height, etc.; 37.14 for diseases of the eye, 27.55 for diseases of the circulatory system, 23.52 for diseases of the genito-urinary system, 12.48 for diseases of the digestive system, 10.80 for venereal diseases, while 10.73 were rejected on account of bad or doubtful character or unsatisfactory references, 7.15 as generally unfit or undesirable, and only 2.43 on account of illiteracy, imperfect knowledge of the English language or mental insufficiency.

Of every thousand of the accepted men 742.47 were natives of the United States, 80.53 were born in Germany, 77.28 in Ireland, 23.20 in England, 13.98 in Sweden, 13.22 in Canada, 7.48 in Denmark, and 7.05 in Austria; the remainder in various other countries.

Of the 9,226 accepted men 38 were under 20 years of age, average 17.2 years; 4,021 were between 20 and 24 years of age, average 22.1 years; 2,581 were between 25 and 29 years, average 26.7; 1,098 between 30 and 34 years, average 31.7; 735 between 35 and 39 years, average 36.8, and 753 were over 40 years of age. The average age of the whole number was 27.6 years.

The average height was 67.59 inches. The native white man was

taller, 67.75 inches, than the colored man, 67.56 inches, or the foreign-born recruit, 67.20.

The average weight was 147.07 pounds, the colored man being the heaviest, 150.28 pounds. The foreign-born recruit was slightly heavier, 147.55 pounds, than the native American, 146.47.

The average chest expansion was from 34.42 to 37.38 inches. The native white man had an expansion of 3.01, or from 34.25 to 37.26; the foreign born 2.97 inches, or from 34.84 to 37.81, and the colored man 2.73 inches, or from 34.28 to 37.01.

IDENTIFICATION OF DESERTERS AND OTHER UNDESIRABLE MEN.

During the year ending June 30, 1898, 3,075 transcripts of the identification cards of 1,406 delinquent ex-soldiers were filed among the classified descriptions of undesirable men, an average of 2.19 per man, as compared with 2.63 for the antecedent period; and 3,792 transcripts, including all those of 340 men were canceled, some to be replaced by later descriptions, but most of them withdrawn permanently, as a result of the revision of these files mentioned in my last annual report. On June 30, 1898, there remained 32,494 transcripts, an average of 2.37 each for 13,706 delinquent soldiers whose enlistment would be contrary to law.

June 30, 1897, 68,834 identification cards were on file for recruits, and 4,222 for released military convicts and soldiers discharged dishonorably or without honor. The receipts for the following twelve months were 26,231 and 586 respectively, bringing the totals, June 30, 1898, up to 95,065 and 4,808. Of the 26,231 recruit cards received, 6,488, or 25 per cent, were made out at the soldier's second or later enlistment, and took their place at once with the previous card or cards of the man in the alphabetical file; 19,743, or 75 per cent, were for first enlistments, and ordinarily would all have been compared with the transcripts before going to the alphabetical file, but the rush of these cards incident to the increase in the Regular Army, beginning in April, without corresponding increase in clerks available for the work (more cards of first enlistment were received in May, 1898, than during the whole calendar year 1897, and more in June than during the two previous calendar years) made it impracticable to compare them all. Accordingly, those of 21 years of age or less, 5,697, or 22 per cent, being the least likely to have had prior service, have been placed in the alphabetical file without the usual examination. Some of these men may thus escape identification for the present, but the number, if any, will, it is believed, be inconsiderable. The remainder of the recruit cards, 14,046, or 53 per cent, were passed for search.

From July 19, 1890, when the first identification was made, to June 30, 1898, the whole number of identifications by means of the cards was 941 (deserters, 423; soldiers dishonorably discharged from former service, 289; others, 229). In 210 cases (deserters, 131; dishonorably discharged soldiers, 38; others, 41) the identification was of value only to connect the several enlistments of men no longer in service. Three cases were applicants for enlistment identified at the instance of recruiting officers.

In 728 cases the men were in service and amenable to punishment when identified—291 as deserters, 249 as soldiers dishonorably discharged from former service, and 188 as frauds of a minor grade. Of these, 58 deserted before final disposition was made of their cases, 536 were discharged the service by sentence of court-martial or by orders

from the Adjutant-General's Office, 96 were held to service for the time being, and 38 at present await final action so far as this office is advised.

Of the whole number of identifications, 18 were made in the calendar year 1890, 111 in 1891, 215 in 1892, 104 in 1893, 110 in 1894, 121 in 1895, 108 in 1896, 68 in 1897, and 86 during the first six month of 1898. Of the identifications of men still in service, 18 were made in 1890, 88 in 1891, 123 in 1892, 88 in 1893, 80 in 1894, 101 in 1895, 95 in 1896, 52 in 1897, and 83 to June 30, 1898.

In 1895 4,929 recruit cards were examined and 121 were identified, 24.55 per thousand; in 1896, 4,658 cards, 108 identifications, 23.19 per thousand; in 1897, 4,453 cards, 68 identifications, 15.27 per thousand; and for the first six months of 1898, 4,321 cards, 86 identifications, 19.90 per thousand.

A review of the conditions prevailing in the Army which led to the adoption of the card system in 1889 is interesting. Before that year, when soldiers were practically free to desert and reenlist at will without any risk except that of accidental recognition, the desertions amounted annually to from 10 to as much as 25 per cent of the enlisted strength. Men would enlist, desert, enlist again and desert again, in a circuit around the military posts until the prevalence of the offense became notorious and the example infectious to the young recruit. The outline-figure card was devised to identify these rounders and to prevent their subsequent enlistment. It has succeeded beyond expectation; over a thousand cases of identification in the eight years to October 20, 1898, testify to its efficiency. Meanwhile, the percentage of desertions has notably diminished. The following statement of desertions for the twenty-five fiscal years from 1873 to 1897 (the latest data accessible) is drawn from the published reports of the Adjutant-General:

Year.	Num- ber of deser- tions.	Year.	Num- ber of deser- tions.	Year.	Num- ber of deser- tions.	Year.	Number of deser- tions.
1873.....	7,271	1881.....	2,361	1889.....	2,835	1894.....	1,073
1874.....	4,606	1882.....	3,741	1890.....	2,344	1895.....	1,165
1875.....	2,521	1883.....	3,578	1873-1890.....	a 52,676	1896.....	1,365
1876.....	1,844	1884.....	3,672	1886-1890.....	b 11,953	1897.....	1,051
1877.....	2,516	1885.....	2,927	1884-1890.....	c 18,552	1891-1897.....	d 9,221
1878.....	1,678	1886.....	2,090	1891.....	1,503	1891-1895.....	e 6,805
1879.....	1,965	1887.....	2,240	1892.....	1,382		
1880.....	2,043	1888.....	2,444	1893.....	1,682		

a Average, 2,926. b Average, 2,391. c Average, 2,650. d Average, 1,317. e Average, 1,361.

For nearly the whole of this period the authorized enlisted strength was in round numbers 25,000. In 1873 and 1874 it was somewhat greater. The outline-figure card of recruits was called for in June, 1889, but no identification was made by means of it until July, 1890, so that it could have no effect in discouraging desertions prior to that time. Taking, then, the fiscal year 1891 as the first of the operation of the card system, an immediate lessening in the number of desertions is noted, 1,503, against 2,344 for the preceding year. The five years, 1886 to 1890, immediately preceding the card system, furnished an average of 2,391 desertions per annum, while the five years 1891 to 1895, under the card system, give only 1,361; a difference of more

than 1,000 per annum. Again, comparing the seven years 1891 to 1897, during which the preventive value of the card might be expected to appear, with the preceding seven years, 1884 to 1890, more decided results are reached, viz, 1,317 desertions per annum with the card, against 2,650 without it, a difference of 1,300 per annum in favor of the card—over two regiments of infantry on a peace basis and more than a full regiment in time of war. Since the card was adopted the largest number of desertions for any year was 1,682, while before the card was adopted 1,678 was the lowest number for any year. Of the twenty-five years tabulated the last year, 1897, shows the smallest number of desertions.

The falling off in the rate of desertion that has followed the introduction of the outline-card system of identification is believed for the most part to be due to its influence. Other measures have without doubt contributed in some degree to this diminution. More rigorous inquiry as to the character and fitness of applicants for enlistment has resulted in a better class of recruits. Better provision has been made for housing, feeding, and entertaining the soldier at military posts. Safeguards have been established by executive order against oppressive and unequal punishments for infractions of discipline. Moreover, the privilege of purchasing discharge authorized by the law of June 16, 1890, affords an honorable method of leaving the Army to such as are dissatisfied with their position. This privilege, however, under the regulations prescribed for its exercise, is limited to the second and third years of enlistment. Remembering that soldiers forehanded enough to save money to purchase their discharge are not usually of the class who swell the statistics of desertion, and also that desertions occur chiefly among first-year men, it is obvious that the purchase of discharge is so conditioned as only remotely to influence the soldiers most likely to desert, while the liberation of those who do buy their discharge involves the presence in the Army of an increased number of first-year men to fill the vacancies so occasioned. The measures here alluded to have doubtless had some share in diminishing the rate of desertion, but they would scarcely have produced the remarkable change indicated in the table if the soldier had continued at liberty to leave the service and return to it at his own convenience.

Confirmation of this view is found in the gradually lessening number of identifications during the last few years of normal recruiting. One hundred and twenty-one in 1895, 108 in 1896, and 68 in 1897, show how well the repeater was learning the danger of fraudulent enlistment. These normal conditions continued during January and February, 1898, with 3 identifications; but in March and April, along with the additional men for two new artillery regiments, there were 22 identifications; while the extraordinary accession of recruits to place the Army on a war footing was attended by a still greater increase—33 in May, 28 in June, 33 in July, 34 in August, 26 in September, and 30 for the first twenty days in October, or 184 for the five and one-half months, a number without parallel for any other similar period during the existence of the system. The delinquents obviously believed that they could, in the rush, get back into the Army without detection, and have thus afforded the most valuable evidence as to what their general practice would be in normal times were it not for the deterrent effect of the outline card.

In this connection I quote from the Adjutant-General's report for 1891:

I beg to invite attention to the enormous expense entailed upon the Government by the crime of desertion. From January 1, 1867, to June 30, 1891, twenty-four and one-half years, the number of desertions from the Army was 88,475. It is estimated that the average expense to the Government to replace a deserter is \$260; that is to say, to replace a recruit in the status in which the deserter was at the date of his desertion. This amount is the average expense on account of pay, clothing, and subsistence received by the deserter during his service, and the cost of transportation to the place from which he deserted. As the largest number of desertions occur before the men have rendered any service of value to the Government, the expense of replacing the 88,475 men, which foots up to the enormous sum of \$23,003,500, has been an actual loss to the Government without the least compensating advantage.

It costs, therefore, a good deal to recruit an army depleted by desertion. The influence that diminishes the number of desertions diminishes the cost of recruiting. The system that prevents 1,300 desertions per annum, or a considerable proportion of 1,300, saves a large sum on recruiting account. But the identification system has a higher value in its effect on the morale of the Army. Nothing is more demoralizing to troops than frequency of desertion and immunity of the deserters from punishment. Deserters by the act of desertion prove their unreliability as soldiers. They are undesirable in the ranks, but they are not the only class of undesirable men. Among these are included men who have been expelled from the Army by dishonorable discharge or discharge without honor. One bad man may corrupt a garrison composed chiefly of youths of unformed character. The law prohibits the enlistment of these undesirable men under appropriate penalties; but the law without practical measures to carry out and enforce its provisions would effect little. These practical measures are substantially summed up in the outline-card system of identifying the delinquent soldier upon his reentering the service. The system points out the military offender for punishment, and its history justifies the claim that it is a work of serious and important value, the results of which have vindicated the judgment of those officers of the Medical Department who brought about its adoption.

HEALTH OF THE ARMY.

The health of the Army during the calendar year 1897 was excellent, as may be seen from the following statement of its sick rates: The admissions for disease and injury during the year amounted to 1,186.61 per thousand of the strength present as compared with 1,110.39 in the previous year, with 1,258.89 the average annual rate of the previous decade, and with 1,089.73 the lowest rate of our Army, recorded in the year 1894. The rate for disease was 896.53, the lowest rate, recorded in 1896, having been 830.65. The number constantly sick, or the rate of nonefficiency, was 35.85 per thousand of strength, as compared with 33.97 during the previous year, with 40.26 the average annual rate of the previous decade, and with 33.89 in 1895, the lowest recorded rate. The average number of days lost on account of sickness for each man of the Army was 13.08, as compared with 12.43 in 1896, and with 14.64 the average annual rate of the preceding decade. The rate of discharge on account of disability was 9.61, the lowest recorded rate, as compared with 10.15 in 1896 and with 19.78 the annual rate of the previous decade. The total death rate for the year, 5.11, and the death rate from disease, 3.14, were also lower than the lowest rates

heretofore recorded, 5.16 for disease and injury in 1895, and 3.83 for disease alone in 1896.

The admission rate of the white troops for the year was 1,180.84, for the colored troops 1,248.61, while the rates of nonefficiency were respectively 35.72 and 37.24 per thousand of strength. In my last annual report I noted the gradual improvement in the health of the colored troops which in 1896 culminated in rates of admission and nonefficiency considerably lower than those of the white commands. The increased rates of the past years were mainly due to venereal affections, rheumatism and myalgia, bronchitis, and disorders of the digestive system.

The total number of discharges for disability was 263, of which 208 resulted from disease and 55 from injuries. Forty-nine discharges were occasioned by diseases of the nervous system, 31 by consumption, 25 by rheumatism and myalgia, and 20 by heart disease. Excluding small posts, the largest rate of discharge, 37.27, was furnished by 6 cases at Whipple Barracks, Ariz. The largest absolute number at any one post was 10 at Fort Huachuca, Ariz, giving a rate of 33.90.

The deaths numbered 140—86 from disease and 54 from injuries. Gunshot wounds occasioned 19 deaths; typhoid fever, consumption, and disease of the heart 9 each. Five deaths, the largest number occurring at any one post, were reported from each of seven posts: Fort Riley, Kans.; the Presidio of San Francisco, Cal.; Fort Sheridan, Ill.; Fort Sam Houston, Tex.; Columbus Barracks, Ohio; Fort Meade, S. Dak., and Fort McPherson, Ga.

HEALTH OF THE MILITARY DEPARTMENTS.

The admission rate varied in the military departments from 784.44 per thousand of strength in the Department of the Columbia to 1,522.14 in the Department of Texas, and the rate of nonefficiency from 25.65 to 39.65 in these same departments; the discharge rate, from 4.59 in the Department of the Platte to 13.93 in the Department of the Colorado, and the death rate from 3.15 in the Department of California to 7.27 in the Department of the Platte.

DEPARTMENT OF THE EAST.

Average strength, 8,018 men; rate of admission, 1,260.04 per thousand of strength; nonefficiency, 35.83; discharge, 8.85; death, 5.61. These rates do not differ much save in a slight excess of admissions from the average rates of the Army, and the excess of admissions was the result of an increased prevalence of venereal diseases. Fort Barrancas had the largest rates of any post in this department—admission 2,000 and nonefficiency 77.34 per thousand of strength, the excess due to the great prevalence of malarial and venereal diseases and injuries. Fort Wadsworth had the high admission rate of 1,907.22, but its nonefficiency was only 37.17; bronchitic attacks, diarrheal diseases, and injuries constituted the excess of admissions. Fort Myer, Washington Barracks, and St. Francis Barracks followed, with 1,818.50, 1,759.32, and 1,777.78, respectively, as their admission rates, and 51.65, 47.48, and 40.41 as their rates of nonefficiency. The excess was due at the first-mentioned post chiefly to malarial diseases and injuries; at the second, to malarial diseases, and at the last, to disorders of the digestion, injuries, and malarial affections. Fort Adams had an admission rate of 1,676.06, with a nonefficiency of 51.68, and Fort Slocum had

a similar admission rate, but with only 36.92 of constant sickness. Injuries and diarrheal diseases constituted the excess at the former post, and injuries, tonsillitis, and constipation, alcoholism, and neuralgia at the latter. Forts McPherson, Thomas, and Monroe and Jefferson Barracks had both rates larger than the average of the Army, while Willets Point, West Point, and Madison Barracks had the nonefficiency comparatively small, although the admission rate was large. The rates at Columbus Barracks did not differ much from the army average. The other posts in the department had low rates. Fort Ethan Allen, for instance, had 931.62 admissions and 28.86 of constant sickness; Fort Hamilton, 742.05 and 31.32, and Fort Porter, only 546.15 and 19.18.

DEPARTMENT OF THE MISSOURI.

Average strength, 4,341 men. Rate of admission, 1,188.89 per thousand of strength; nonefficiency, 36.25; discharge rate, 6.91; death rate, 5.30. The rate for discharge is low, while the other rates are similar to those of the Army generally. Fort Riley, Jefferson Barracks, and Fort Leavenworth had the highest rates in this department, the admissions being, respectively, 1,484.08, 1,426.13, and 1,251.88, and the nonefficiency 41.70, 43.69, and 43.78. At Fort Riley the excess of admissions was due to venereal and diarrheal affections, rheumatism, boils and abscesses, and injuries; at Fort Leavenworth to malarial and venereal diseases, and at Jefferson Barracks to venereal diseases, tonsillitis, bronchitis, and injuries, while malarial and diarrheal diseases at this post were below the average. Fort Logan H. Roots had the admission rate larger and the nonefficiency smaller than the average army rates, and the reverse of this held good at Fort Wayne. The average rates prevailed at Forts Reno and Sill, while the rates at Forts Brady and Sheridan were below the average, being at the former post 760.18 and 25.75, and at the latter 903.92 and 28.05.

DEPARTMENT OF DAKOTA.

Average strength, 2,513 men. Rate of admission, 975.33 per thousand of strength; nonefficiency, 33.93; discharge rate, 9.55; death rate, 4.77. All these rates compare favorably with the average rates of the Army. Fort Keogh was the only post in this department which had high rates: Admissions, 1,615.65; nonefficiency, 59.67. Rheumatism and myalgia and injuries caused the high rates, notwithstanding lower figures than the average for malarial and venereal diseases. The best record was given by Fort Yellowstone: Admissions, 280.30; nonefficiency, 6.68.

DEPARTMENT OF THE PLATTE.

Average strength, 2,612 men. Admission rate, 1,294.41; nonefficiency, 36.99; discharge rate, 4.59; death rate, 7.27. Forts Crook and Washakie had the average rate of admission; at the former there was a slight excess of nonefficiency, due wholly to gonorrhea and syphilis, while at the latter the nonefficiency was below the average. Fort Meade had the largest admission rate of any post in this department, 1,669.47, although its constant sickness was but little above the average; its large admission rate was the result of an increased prevalence of tonsillitis, bronchitis, rheumatism, and injuries. Fort D. A. Russell followed with an admission rate of 1,547.83 and a nonefficiency of 42.79, the result of increased prevalence of alcoholism, neuralgia, coryza, tonsillitis, and injuries. Fort Robinson had 1,497.53 as an

admission rate and 47.27 expressing its nonefficiency, due to excess of venereal diseases, tonsillitis, bronchitis, and rheumatism. Malarial affections were infrequent at the two last-named posts. Fort Niobrara had the best record: Admissions, 865.50; nonefficiency, 26.96.

DEPARTMENT OF TEXAS.

Average strength, 1,762 men. Admission rate, 1,522.14; nonefficiency, 39.65; discharge rate, 7.38; death rate, 6.24. Two posts in this department had more than two entries per man on the sick report during the year. At Fort McIntosh the admission rate was 2,312.50, with a nonefficiency of 52.14, and at Fort Clark these rates were, respectively, 2,174.26 and 49.58. At the former post there was an increased prevalence of diarrheal diseases, boils and abscesses, and injuries, and the rates for venereal diseases were excessive. At the latter the high rates were caused by diarrheal diseases, bronchitis, rheumatism, injuries, and venereal affections. The rates at Camp Eagle Pass and Fort Brown were also high: Admissions, 1,890.62 and 1,741.07, respectively, and nonefficiency 54.58 and 63.70. Venereal, malarial, and diarrheal affections and injuries occasioned the large rates at the one post and malarial and venereal diseases, boils and abscesses, and injuries at the other. Fort Sam Houston had the admission rate somewhat larger and the nonefficiency somewhat smaller than the average rates of the Army. The best record in this department was given by Fort Bliss: Admission rate, 886.22; nonefficiency, 28.55.

DEPARTMENT OF THE COLORADO.

Average strength, 3,087 men. Admission rate, 1,274.05; nonefficiency, 35.66; discharge rate, 13.93; death rate, 3.56. Forts Huachuca and Douglas had the highest rates: Admissions, 1,715.42 and 1,720.84, respectively, with 50.37 and 42.70 representing their nonefficiency. At Fort Huachuca tonsillitis, bronchitis, rheumatism and myalgia, injuries, and venereal diseases constituted the excess, and at Fort Douglas bronchitis, venereal diseases, tonsillitis, colic and constipation, rheumatism, and myalgia. The rates at Fort Logan also were considerably higher than the average, notwithstanding low figures for malarial and diarrheal diseases. They were due to vaccinia, venereal diseases, tonsillitis, colic and constipation, rheumatism and myalgia, and injuries. Whipple Barracks had a low admission rate, 975.16, but a high nonefficiency, due to some prolonged cases of consumption, typhoid fever, and heart disease. Forts Apache, Bayard, and Grant had good records, the admission rates being, respectively, 842.25, 905.82, and 1,025.24, and the nonefficiency 24.33, 28.31, and 25.23.

DEPARTMENT OF CALIFORNIA.

Average strength, 1,588 men. Admission rate, 813.60; nonefficiency, 26.33; discharge rate, 6.30; death rate, 3.15. The small post of San Diego Barracks was the only post in the department having rates in excess of the average of the Army: Admissions, 1,196.97; nonefficiency, 40.60, the excess of nonefficiency being due to consumption and injuries. The Presidio of San Francisco, notwithstanding its large number of men and its proximity to the city, had an admission rate of only 887.25 and a nonefficiency of 26.10. Its rates for venereal disease and alcoholism were below the average; the only disease that prevailed in excess of the army average was conjunctivitis. Alcatraz Island had the best record, with an admission rate of 711.11 and a

nonefficiency of 24.66, for although Angel Island and Fort Mason had lower admission rates, their rates of nonefficiency were, respectively, 32.72 and 33.66.

DEPARTMENT OF THE COLUMBIA.

Average strength, 1,452 men. Admission rate, 784.44; nonefficiency, 25.65; discharge rate, 10.33; death rate, 6.20. None of the posts in this department had rates in excess of the average except in the case of deaths and discharges. The largest post, Vancouver Barracks, with a strength of 560 men, had only 801.79 admissions per thousand of strength and a nonefficiency of 22.90. The highest admission rate in the department was recorded at Fort Walla Walla, 916.67; the lowest 608.11, at Fort Canby. The highest and lowest rates of constant sickness were also recorded at these posts: Fort Walla Walla, 44.10; Fort Canby, 14.96.

HEALTH OF INDIVIDUAL POSTS.

Three posts had two or more entries on the sick report per man of their average strength. The rate of admission at Fort McIntosh, Tex., was 2,312.50; at Fort Clark, Tex., 2,174.26, and at Fort Barrancas, Fla., 2,000 per thousand of strength. The diseases which by their increased prevalence occasioned these high rates have already been mentioned in discussing the health of the departments. Fort Myer, Va., and Washington Barracks, D. C., which for several years past have recorded the highest admission rates, dropped during the past year to the sixth and eighth places on the list of posts having the highest rates of admission.

The highest rate of constant sickness, 77.34 per thousand of strength, was given by Fort Barrancas, Fla. Fort Brown, Tex., takes second place on this list, with a rate of 63.70. Nine posts recorded rates of from 50 to 60 per thousand in the order of decreasing rates, as follows: Fort Keogh, Mont.; Camp Eagle Pass, Tex.; Whipple Barracks, Ariz.; Fort Thomas, Ky.; Fort McIntosh, Tex.; Fort Adams, R. I.; Fort Myer, Va.; Jackson Barracks, New Orleans, La., and Fort Huachuca, Ariz.

Fort Yellowstone, Wyo., had the lowest admission rate, 280.30, but this was probably due to accidental or exceptional conditions. Three posts had less than 600 taken sick per thousand of strength—Fort Mason, Cal.; Fort Porter, N. Y.; and Sandy Hook Proving Ground, N. J.—and two had less than 700—Fort Canby, Wash., and Angel Island, Cal.

Sandy Hook had the lowest rate of constantly noneffective, 5.52 per thousand of strength, but was closely followed by Fort Yellowstone, Wyo., 6.68. Fort Canby, Wash., Fort Porter, N. Y., and Fort Spokane, Wash., had less than 20 men constantly sick per thousand of strength. Of the large posts, Vancouver Barracks, Wash., had the best record, an admission rate of 801.79 and a nonefficiency of 22.90.

PREVALENCE OF SPECIAL DISEASES.

SCARLET FEVER.

Six cases of this disease occurred among enlisted men of the Army during the calendar year 1897—3 at Fort Adams, R. I., and 1 each at Fort Leavenworth, Kans., Fort Niobrara, Nebr., and Plattsburg Barracks, N. Y. One case occurred in August, in the person of a

cadet at the Military Academy, West Point, N. Y., the infection having been derived from the neighboring village of Highland Falls. Children at the post were prohibited from attending school in the village. Another case of the disease occurred in March, 1898, in the family of a civilian employee at the post. Three cases among the children of two families occurred at Fort Wayne, Mich., the disease having been contracted apparently in the Belle Fontaine Public School of Detroit, Mich. Seven cases occurred at Fort Douglas, Utah, 4 in one family, all from infection introduced from outside the post; 3 cases in each of two families at Fort DuChesne, Utah, and 1 case in a family of four children at Fort Yates. Strict isolation and disinfection suppressed the disease in all these instances.

MEASLES.

This disease was reported during the calendar year as affecting the troops at 32 military posts. Fort Monroe, Va., had the largest number of cases, 52; Vancouver Barracks, Wash., had 25; Fort Leavenworth, Kans., 21, and Fort Keogh, Mont., 14. In all, 227 cases were reported. At 9 posts the disease was not permitted to spread from the man first affected. The prevalence of measles at Fort Monroe was prolonged into the present calendar year, and from this post the disease was propagated by transfer of troops to Sheridans Point, Va.; Fort Washington, Md.; Fort Caswell, N. C., and Camp Graham, Tybee Island, Ga. Correspondingly on the Pacific coast the prevalence of the infection at Vancouver Barracks gave origin to cases at Fort Canby, Wash. The existence of the disease in many parts of the country and in certain army posts in the early months of the present year led to the invasion of some of our war camps and garrisons by this infection. Special reports from Camp Black, Long Island; Camp Alger, Va.; Camp Thomas, Ga.; Camp Northen, Griffen, Ga.; Columbia, S. C.; Key West Barracks, Fla., and Camp Merritt, Cal., indicated the presence of the infection, and the active measures taken for its suppression.

The epidemic at Vancouver Barracks was thus reported by Maj. John Van R. Hoff, surgeon, United States Army:

November, 1897.—The threatened epidemic of measles, which was announced by the appearance of 3 cases of the disease early this month in A Company, Fourteenth Infantry, has thus far materialized to the extent of 6 cases in A, 1 in B, 1 in D, 2 in E, and 1 in H, these organizations having had thus far all the cases which have fallen under observation. Considering the fact that the infection has shown a decided tendency to spread within the organization where it first appeared, it is reasonable to believe that unless the utmost precaution is taken the disease will be scattered broadcast in the command. Not only should the men who are infected be quarantined, but their bunks, bedding, clothing, in fact all their property should be at once removed from the squad rooms, thoroughly aired, and all but the bunk, if the latter be required, locked up away from possible contact with the men of the company or their property. The bunks and bottoms should be aired, washed with soap and water, and then with sublimate solution. The place in the dormitory where the bunk stood and where the clothing hung should be thoroughly scrubbed with sublimate solution, and after being aired for a day or so the bunk may be returned to its proper place. The men of all the organizations should be closely watched by their officers, and carefully inspected every day, particularly with a view to the detection of this special infection. All suspected cases should at once be separated from the other men. The foregoing rules are so simple and so obvious that I presume they have already been carried out. The actual sick are quarantined in two tents of the field hospital, which have been made comfortable with floors and a box stove. As epidemics of this character usually culminate in December, it will probably be

necessary to extend the quarantine accommodations by at least two more hospital tents. The cases thus far have proved amenable to treatment.

December, 1897.—As anticipated in my last report, the epidemic of measles has continued, 13 new cases having reported for treatment from the various organizations, as follows: B company, Fourteenth Infantry, 3 cases; D, 2 cases; E, 1 case; F, 2; G, 2; H, 1, and Troop E, Fourth Cavalry, 2 cases. From this it will be seen that the disease is apparently stamped out in A, Fourteenth Infantry, where it first appeared, and while it is or has been present in eight of the nine organizations here (C company alone having escaped) it has not spread widely in any company. This is believed to be due to careful inspection, resulting in the immediate isolation of suspicious cases. Among the civilians attached the epidemic appeared during the month and has rapidly extended. This is not surprising when it is known that the neighboring town of Vancouver is reported to be filled with cases of this disease, and I am told that no effort is made to quarantine or in any way control the epidemic. Children broken out with measles are permitted to appear at school, while the various assemblages of people frequent about the holidays are freely attended by persons in all stages of the disease. Since nothing but a picket fence separates the post from the town, it is impossible to exclude so contagious a disease from that part of the reservation pertaining to the post, but when it comes among us we can, as we have done, isolate it, an example which may perhaps appeal to the more intelligent of our neighbors. The two tent wards have enabled us to most comfortably care for the infected patients, and have left the hospital free and uninfected to meet the current demands made upon it. All cases of measles up to the present time have progressed favorably.

January, 1898.—The epidemic of measles previously referred to has continued during the month with decreasing virulency among the men. One case was admitted to hospital from Company C, Fourteenth Infantry, 1 from D, 7 from F, 1 from G, and 2 from H. Every suspicious case was put in the observation tent, and if measles developed was at once transferred to the contagious ward. In comparatively few instances was the eruption manifest at the time of admission. The cases have all thus far progressed favorably. Five remain under treatment. Among the civilians attached the disease has simply run riot, until now it has culminated, there being little material left to attack. Nor is this an unexpected result. The neighboring town was literally overrun with the disease, and no precaution was taken to control it until it had passed beyond control.

February, 1898.—The epidemic of measles heretofore noted ceased during the month; the last case, which occurred in C Company, Fourteenth Infantry, having been returned to duty on the 16th. During this epidemic, which declared itself November 6, 1897, 82 cases (men, 41; civilians attached, 41) were treated. The strictest isolation was enforced, and all patients recovered. The tent wards used during this epidemic, as heretofore stated, proved a most satisfactory shelter for the sick, and wholly relieved the hospital building of a stress which would have materially interfered with its usefulness for any other purpose than the treatment of infectious diseases. As it was, the ordinary work of the hospital went on without the slightest change or inconvenience.

SMALLPOX.

Only one case of this disease occurred among the troops during the calendar year. It was reported from Madison Barracks, N. Y. In March, April, and May, 1898, reports of the occurrence of the disease among negro laborers at Forts Barrancas and Pickens, Fla., and of its prevalence in Columbia, S. C., led to the careful vaccination of volunteer troops at the time of their muster into the service of the United States, and no doubt prevented the anxiety and alarm that would have been caused by the occurrence of sporadic cases in the large national camps of the war period.

DIPHTHERIA.

Only 11 cases of diphtheria were reported among enlisted men of the Army during the calendar year. These were scattered at 9 different posts. Since then 2 cases were reported from Fort Yates, N. Dak., 1 in February and 1 in March, 1898; both recovered under the use of antitoxin. The only post at which the disease prevailed in an epidemic form was Vancouver Barracks, Wash. Only 1 enlisted man

was affected, but over 20 children and civilian attachés of the command suffered from the disease, which appears to have been propagated from a convent school and orphanage in the city of Vancouver. Concerning this epidemic Lieut. Franklin M. Kemp, assistant surgeon, United States Army, reported to the mayor of the city, August 11, 1897, as follows:

SIR: I have the honor to submit the following report as a member of the committee of physicians organized by you to inquire into the present epidemic of diphtheria in the city of Vancouver, the supposed focus of which is located in the Convent of the Sisters of Providence, and the investigation of which was confined to that institution. Pursuant to instructions we assembled at the said convent on the 6th instant, with a view to ascertaining the sanitary conditions appertaining thereto and collecting any other data that might throw light on the subject under consideration. The sanitary conditions we found excellent. The buildings throughout were scrupulously clean, the sewerage and drainage without defect, and the rooms and dormitories roomy and well ventilated. Through the courtesy of the sister superior we were furnished with such information regarding the institution as related to the present epidemic. One end of the building contains a boarding school, the other an orphan asylum, while the center is occupied by the sisters belonging to the convent. Up to date no case of diphtheria has appeared among the sisters or the attendants at the school. The orphan asylum contains about 65 inmates, ranging in age from 3 to 18 years, and up to May 17, 1897, no contagious disease of a serious nature had occurred among them for a number of years. On the latter date one of the children, Ellen Billup by name, aged 3 years, who had been an inmate for about two weeks, was taken ill and immediately transferred to the Sisters' Hospital, where she died in three days of what was diagnosed by the aid of bacteriological examination as diphtheria. Since that date 30 cases of "sore throat" have occurred in the orphanage, some of which were diagnosed as diphtheria, some of which were not. The following preventive measures were taken against the spread of the disease: All cases of illness among the children were removed as soon as attacked to an improvised ward at the east end of the building, where they were placed under close observation. From here all those that could by the naked eye be diagnosed as diphtheria were, as soon as this diagnosis was established, removed to an isolation ward in a separate building, where during their stay the most excellent preventive measures were faithfully carried out by those in charge. It seems, however, that the length of their detention in this ward was determined by the severity of the symptoms in each individual case, varying from a few days in those that were mildly attacked to two weeks or more in those that presented signs of a graver form of infection.

I have no criticism to offer as to the means employed by the physicians or attendants in charge, as they undoubtedly made use of all the facilities they possessed to stamp out the disease. The ways and means, however, were lacking, and the only reasonable explanation of the enormous ratio of 30 cases out of 60 inmates lies in the fact of the inability of the physicians without these facilities to cope with the situation scientifically—firstly, in the diagnosis of cases in the observation ward, and, secondly, in the proper quarantine of these patients in the ward to which they were subsequently removed. I therefore beg to respectfully make the following remarks upon these two apparent breaks in the otherwise excellent chain of preventive measures against the spread of the epidemic:

Dealing first with the subject of diagnosis in the observation ward, I wish to say: (a) Diphtheria is caused by a specific and well-recognized germ, and can depend on no other condition than the presence of this germ in the person attacked. (b) It is possible, and in all epidemics a rule, for some patients to present no other symptom than those of an ordinary attack of sore throat; but even in these mild cases of diphtheria the germ is there, and its presence, if proper measures be employed, can invariably be demonstrated. (c) The mildness of the above-mentioned attacks depends not necessarily on any attenuation in virulence of these organisms, but presumably upon a greater natural resistance of the patient to their inroads, and it is possible for these patients to be as capable of transmitting as severe a type of the disease as those presenting all of its grosser symptoms. (d) No case of sore throat can be distinguished from diphtheria until the presence or absence of this germ be demonstrated. It was therefore impossible without the aid of the microscope to determine which cases were and which were not true diphtheria, while it is perfectly possible, and even probable, that many cases went back among the inmates to serve as foci for further infection.

In regard to the subject of quarantine, the following facts will be of interest: According to experiments made in the case of diphtheria convalescents, it has

been found that the specific germ may be found to exist, as shown by the cultivation of scrapings from the throat, in a state of vitality for several weeks after the disappearance of all local indications of the disease; and, should these same germs fall upon suitable soil, they are as capable, even at this stage, of transmitting as severe a type of the affection as could be caught from the most virulent form of diphtheria. The need for stringency in preventive measures against the spread of the disease is therefore of far greater importance during convalescence, as this is precisely the period when there is the greatest tendency to relax them. Neither the severity nor the duration of the disease should be taken as a criterion in determining the length of time a patient should be quarantined after an attack, as it is now a well-known fact that the bacillus of diphtheria may lodge in the throats of persons apparently not as susceptible to the disease as others, resulting in a condition comparatively benign in the person thus subjected to it, but none the less dangerous to those with whom this person comes in contact. Indeed, such a case may present only the symptoms of an ordinary attack of "sore throat," apparently recovering in a few days, and yet being as dangerous to the community as one of the most severe types of diphtheria and as capable of transmitting it for as long a period into convalescence. It is therefore, in my opinion, a grave mistake to allow such apparently mild cases to have, as is often the case, in from two to five days, unrestricted intercourse with their fellows. Bacteriological examination, then, is an absolute necessity where scientific accuracy and certainty are desired, either in establishing the diagnosis or in determining the period at which the quarantine in any individual case can be raised. It is a necessity in diagnosis, because without it it is impossible in certain cases to differentiate between diphtheria and the mildest affections of the throat. The diagnosis unmade, it is impossible that all cases can be isolated; and this measure neglected, they are a source of constant menace to the community and render valueless all measures taken to prevent the spread of the disease in it. It is a necessity in determining the period at which the quarantine may be raised, because, as I have heretofore stated, the presence or absence of the germ from the throat is the only accurate knowledge we possess as to whether or not the patient is capable of transmitting the disease; but, though it is the only one, it is proof, if the germs be not found, that the throat of the patient has ceased to be an infectious focus.

Where microscopical examination is for one reason or another impracticable, it may be stated that under no circumstances should a child affected with diphtheria, however mild, be allowed to mingle with the community, school, or institution of which it is a member, until two weeks at least have elapsed since the last indication of throat mischief was visible to the naked eye. Where bacteriological investigation is possible, the diagnosis in all suspected cases should be substantiated by it; and, commencing with the fourteenth day after the disappearance of local symptoms, frequent observation should be made of scrapings from the patient's throat, until the entire absence of the germ is definitely established. Then, and then only, can the quarantine on such cases be safely raised. I understand that neither the health authorities of the city of Vancouver nor the physicians thereof are supplied with the facilities for carrying out this policy. I would therefore respectfully suggest that, as the only practicable means of combating the spread of this disease and of preventing future epidemics, that a bacteriological laboratory be established, to be placed in charge of a competent person or at the disposal of the local physicians, who could then treat with scientific accuracy problems that are at present, at the best, attended with much doubt and danger. Such an institution would cost but little to establish and less to maintain, while its value to the citizens of the community would be incalculable.

TONSILLITIS.

The cases of tonsillitis reported during the year numbered 1,056, giving a rate of 41.55 cases per thousand of strength, as compared with 40.73 in the preceding year. Fort Meade, S. Dak., had 95 cases; Fort Logan, Colo., 60; Fort Huachuca, Ariz., 57; Fort Thomas, Ky., 49; Fort D. A. Russell, Wyo., 46, and Fort Douglas, Utah, 41.

CEREBROSPINAL MENINGITIS.

No case was reported during the calendar year either among soldiers or citizens attached to or in the neighborhood of military posts; but on April 20, 1898, Capt. Thomas U. Raymond, assistant surgeon, United States Army, reported from Fort Canby, Wash., that two

cases fulminant in character had occurred in the town of Ilwaco, Wash., one terminating fatally in twenty-four, the other in eighteen, hours. A third case, also fatal, occurred a few days later at a settlement 10 miles distant from Ilwaco. No other case was reported.

DENGUE.

In his sanitary report for September, 1897, Maj. A. A. De Loffre, surgeon, United States Army, made note of the prevalence of dengue in San Antonio, Tex., and at his post, Fort Sam Houston, Tex. The disease appeared at the post August 26, 3 cases occurring during the remaining days of the month. In September, 141 cases occurred among the troops, their average strength being 522, and over 100 cases were cared for among the families of soldiers and attachés of the camp. At Fort McIntosh, Tex., also, the garrison suffered in like manner during the same month.

YELLOW FEVER.

On September 7, 1897, Capt. W. C. Gorgas, assistant surgeon, United States Army, reported from Fort Barrancas, Fla., the probable presence of yellow fever at Ocean Springs, Miss., stating that the local authorities were taking active steps for keeping the city of Pensacola in good condition, and next day he telegraphed confirmation of the existence of yellow fever at Ocean Springs. On September 12 Capt. R. S. Woodson, assistant surgeon, United States Army, announced the acknowledgment by the board of health of the presence of 6 cases of yellow fever in the city of New Orleans, La., and recommended the withdrawal of the garrison from Jackson Barracks. The troops left for Chickamauga Park on the evening of September 14, the post surgeon, one hospital steward, and one member of the hospital corps remaining with the few men who were left to take charge of the public property at the barracks. Two cases, one fatal, occurred later in the season among these men, and 2 in the family of the hospital steward. On September 15 Col. Charles H. Alden, Acting Surgeon-General, recommended that on the appearance of yellow fever in the vicinity of Fort Barrancas the troops at that station should be withdrawn to Fort McPherson or Chickamauga Park, Ga. On the same day the surgeon at Fort Barrancas reported the presence of yellow fever at Mobile, Ala., and two days later the occurrence of 2 cases in the vicinity of Fort Morgan, Ala. On September 20 the Adjutant-General directed the commanding general, Department of the East, to have the post commander of Fort Barrancas instructed to cooperate with the authorities of the Pensacola Navy-Yard in doing everything possible to guard against the approach of yellow fever, and, if thought advisable, to remove the garrison to Fort McPherson, Ga. The commanding officer made all arrangements for leaving the post on September 21, but suspended them on the representation of the post surgeon that the gravity of the situation was not as yet such as to call for a movement of this kind. He said:

Florida and Pensacola have a good system of quarantine, and after careful investigation I have come to the conclusion that there is only a remote possibility of Pensacola having the fever, and still more remote of our having it here. I am in daily and confidential communication with the State health officers, who are at present located in Pensacola, and believe that I get the most reliable information obtainable.

But even if we do become infected—the very remotest possibility—we could get aboard the cars, go to Chickamauga Park under the supervision of the Marine-Hospital Service, there go into camp of detention for ten days, and then be free

to join the command there. I can see no reason for going at present. If the fever reaches Pensacola or gets amongst us we could do exactly what you would have to do in going to-morrow, with the exception that we would have to isolate ourselves from the rest of the command for the period of ten days. I have seen the State health officer this morning, and got my information from him. He has had twenty years' experience with State and national quarantine, and is thoroughly posted as to laws and customs.

Nevertheless, on November 8, when the disease was on the wane and the removal of quarantine restrictions was under consideration, a case was discovered in Pensacola which, after death on the 14th, was recognized as one of undoubted yellow fever; and on the 12th one of the soldiers of the garrison became affected. He died on the 20th, but in the meantime three other men became sick. The command was moved into camp on the 21st, about 2 miles away from the barrack buildings. One case occurred on the 23d, but after that date there was no further development of the disease. Of the five cases which occurred two were fatal.

According to Dr. Gorgas:

Depopulation of the affected section, as has been so often proved before, was at once and entirely successful. Strict isolation of the hospital and the sick, and a good system of separation of the camp from the post was adopted. Personally, I am only in favor of these measures to a limited extent, in a garrison, against yellow fever. Depopulation is the all-important step. The fear of yellow fever is so great through all this country (much greater than of any of the other epidemic diseases), that I think keeping up of the morale of the people is more important than the slight service intra-garrison quarantines do. It can not fail to have a depressing effect upon all concerned to see the sick and their attendants avoided and looked upon with such dread, and the dead carted away at night and buried without ceremony. The risk is so small that I would have less of this grewsome business. Experience has taught that if you depopulate you can be pretty liberal in your communication with your camp and run little risk of infecting it.

TYPHOID FEVER.

One hundred and fifty-nine cases of typhoid fever were reported during the year, only 9 of which were fatal. Fort Custer, Mont., had 26 cases; Fort Bliss, Tex., 14; Fort Sill, Okla., 9; 14 cases occurred among troops in the field, and the remaining cases were scattered among 42 different military stations. Samples of blood from these cases were forwarded by medical officers to this office for a determination of the action of the serum on pure cultures of typhoid bacilli as an aid in diagnosis, the work of the previous year, as summarized on pages 68-73 of my last annual report, having established a feeling of confidence in the Widal test as an evidence of the presence of typhoid infection.

PNEUMONIA.

Eighty-one cases of pneumonia were reported during the year, resulting in 6 deaths and 2 discharges. The largest number at any one post was 9 at Fort Douglas, Utah; 8 at Fort Monroe, Va.; and 6 at Fort Meade, S. Dak. The remaining 58 cases were reported from 33 different posts.

MALARIAL DISEASES.

The rate of admission for malarial diseases was 78.88 per thousand of strength, as compared with 83.08 in the previous year, and 92.82, the average annual rate of the previous decade. The rate for the white troops was 85.79, and for the colored troops only 4.62. The

latter rate is unusually low. In 1896 it was 16.63, but the annual rate for the previous ten years, 64.50, was only slightly lower than the rate of the white troops. Washington Barracks, D. C., and Fort Myer, Va., continue to rank as the posts having the largest prevalence of malarial fevers. The former had 576.27, the latter 537.37 admissions per thousand of strength. Fort Logan H. Roots took third place on the list of malarial prevalence, with a rate of 485.07. Fort Barrancas, Fla., had the largest rate of constant sickness from these fevers, 11.72 men constantly sick, although standing fourth on the list of prevalence. The constant malarial sickness at Fort Myer was 9.25, at Washington Barracks 7.34, and at Fort Logan H. Roots 5.70, as compared with 1.63, the average rate of the Army.

RHEUMATIC AFFECTIONS.

The admission rate for these affections was 65.12 and the constant sickness 2.63, as compared with 59.68 and 2.50 during the previous year and 76.94 and 3.71 during the years of the previous decade. The colored men suffered more than the white troops, their rates for the year being 100.74 and 3.46, as compared with 61.80 and 2.55 among the white soldiers. The post having the largest admission rate, 226.67, was Rock Island Arsenal, Ill., with a constant sickness of 6.54. The post having the largest nonefficiency, 9.30, was Fort Keogh, Mont., which stood second on the list of prevalence with 183.67 admissions per thousand of strength. Other posts having relatively high rates were Fort Douglas, Utah; Fort D. A. Russell, Wyo.; Fort Robinson, Nebr.; Fort Wingate, N. Mex.; Fort Clark, Tex., and Jackson Barracks, La.

DIARRHEAL DISEASES.

The admission rate for the year was 73.77 per thousand of strength, as against 80.02 in the previous year and 113.65, the average of the years of the preceding decade. The rate for the colored troops was somewhat lower than the average of the Army. The highest admission rates were reported from Fort Clark, Tex., Fort Huachuca, Ariz., and Fort Preble, Me., 297.59, 274.58, and 200, respectively. The highest rate of constant sickness, 3.17, was given by the last named post, Fort Huachuca being second on the list, with 2.93, and St. Francis Barracks, Fla., third, with 2.51. The average duration of acute diarrheal cases was 2.94 days. The total number of cases of dysentery treated was 52, with an average duration of seventeen days; no case fatal.

Two instances of wholesale poisoning, apparently by carelessness in the cleaning of kitchen utensils, have been reported to this office. One occurred at St. Francis Barracks, Fla., September 19, 1897. All the members of Battery C, First Artillery, partook of ice cream for supper at 5.30 p. m. About 10 p. m. some of the men became suddenly and violently ill with nausea, vomiting, cramps, and purging, attended with a slight rise in temperature and extreme prostration. Before morning over 30 members of the mess, including some soldiers belonging to the band and some civilian attachés who had partaken of the ice cream, became similarly affected. Brisk purgatives were given as soon as each case came under observation. The alimentary symptoms subsided after a few hours and were succeeded by a marked rise in temperature, varying from 100° to 104° F., severe headache and rapid pulse, which in the severe cases became weak and irregular. These acute symptoms subsided at the end of forty-eight hours. The

only treatment given after the purge was phenacetin .650, with in some cases 15 c. c. of brandy. The condition of some of the cases was such as to cause grave apprehension for a time. The ice cream was prepared by the battery cooks and the harmful results were attributed by Capt. Frank J. Ives, who reported them, to an imperfect cleansing of the freezer after its previous use. Burnett's extract of vanilla, obtained from the Subsistence Department, was used in the flavoring of the cream.

The other instance, reported from Fort Walla Walla, Wash., by Acting Asst. Surg. J. E. Bingham, occurred July 28, 1898. Breakfast was served as usual about 6 a. m. The first man affected was taken sick within twenty minutes after eating, and shortly afterwards 42 men belonging to Troop A, Fourth Cavalry, became affected with choleraic symptoms. The medical officer considered the symptoms due to the hash, of which all had partaken.

VENEREAL DISEASES.

The admissions for venereal diseases during the year were equivalent to 84.59 cases in every thousand of the strength present, as compared with 78.08 in 1896 and with 76.32, the average of the preceding decade. The rate of constant sickness, 5.65 per thousand men, also was slightly in excess of the usual rate. The annual rate for 1896 and the average annual rate for the ten years preceding were identical—5.26 per thousand of strength. The rates for the colored troops, 114.60 admissions, with 6.88 of nonefficiency, were higher than the average rates of the Army as stated above, in this differing very considerably from their rates of the previous year—56.53 admissions, with 3.18 of nonefficiency. The army admission rate for syphilis was 12.04, with, 1.20 constantly sick; for gonorrhea 52.09, with 3.15 constantly sick; for chancroids and other nonspecific venereal cases 20.46, with 1.30 constantly sick. Cases of syphilis had an average duration of 36.46 days under treatment; gonorrhea 22.09 days, and other venereal cases 22.82 days. Four posts had their admission rates over 200 per thousand of strength. These were Camp Douglas, Utah, Fort Logan H. Roots, Ark., Jackson Barracks, La., and Fort McIntosh, Tex. The nonefficiency depended on the relative proportion of syphilitic cases. At Fort Brown, Tex., where the nonefficiency was highest—19.81 per thousand of strength—each case was under treatment an average of 42.64 days. Fort Douglas, with the relatively largest number of admissions, had only 11.98 constantly sick, each case having been under treatment an average of 32.62 days.

ALCOHOLISM.

The admission rate caused by alcoholism during the year 1897 was 27.86, an improvement over the rate (29.06) of the previous year, and notably so over 38.69, the average annual rate of the previous ten years. Two men died during the year from the direct effects of alcoholic excesses, as compared with 7 fatalities of the kind in 1896. As heretofore, the rate among the colored troops was much lower than among the white soldiers—4.62 admissions, compared with 30.02. Fort Warren, Mass., this year, as last year, headed the list of posts having high rates, but its rate this year was only 105.16, as compared with 152.67 in 1896. Fort Sherman, Idaho, had a rate of 100. All the other posts had lower rates, and some large posts, such as Fort Robinson, Nebr., with an average strength of 404 men, had no entry on sick report for intoxication during the year.

INJURIES.

The admission rate for injuries was 290.08 per thousand of strength, with 9.12 of constant disability. This is a slight increase over the rates of 1896, 279.75, with 8.73 of nonefficiency, and over the average annual rate of the previous decade, 252.67, with 8.64 of nonefficiency. Accidents in the gymnasium and in athletic contests are believed to have been the cause of this increase in the relative number of admissions. Contusions and sprains caused 151.40 of the 290.08 admissions for injury; wounds not gunshot, 49.69, and gunshot wounds only 2.44.

Fifty-four deaths and 55 discharges for disability were occasioned by injury during the year. Nineteen of the deaths were occasioned by gunshot wounds, 17 by drowning, 4 each by crushing and fractures, 3 by freezing, 2 by insolation, and 4 by other injuries. Inguinal hernia was the cause of 17 of the discharges; contusions, sprains, and muscular strains caused 13; gunshot wounds, 6; fractures, 5; frost-bites, 2, and other injuries, 12.

Ten cases of suicide were reported, as compared with 19 during the previous year. The largest number at any one post was 2—at Plattsburg Barracks, N. Y. Two occurred in the month of February and 1 in each of the following months: March, April, May, July, August, October, and December. Seven of the deaths resulted from wounds, 1 from leaping from a window, and 4 from morphin poisoning. In 4 cases the cause was reported as unknown, in 3 despondency from drink, 1 delirium, 1 to escape punishment for forgery, and 1 despondency on account of the suicide of a friend.

Seven of the suicides were enlisted men of the infantry, 1 of the cavalry, 1 of the recruiting service, and 1 of the Subsistence Department. One was under 25 years of age; 4, 25 to 34; 2, 35 to 44 years, and 3 over 45. One had one year's service, 1 four years, 1 six years, 1 nine years, 4 twelve years, and 2 over 20 years. Seven were natives of the United States, 2 Irish, and 1 German.

CIVILIANS ATTACHED TO THE ARMY.

The civilian attachés of the Army comprise the families of officers and enlisted men, servants, employees of the various departments and their families, and all persons not in the personnel of the Army who are allowed to reside at military stations or to accompany military commands. The average number of these present during the present year was: Adult males, 2,178; adult females, 5,710; children, 5,968; total, 13,856. The deaths that occurred among them are shown in the following statement:

Disease.	Adult males.	Adult females.	Children.	Total.
Infectious	3	8	15	26
General nutrition	3	2	5
Nervous system	1	2	3	6
Digestive system	2	3	7	12
Circulatory system	2	2	1	5
Respiratory system	6	16	22
Genito-urinary system	6	1	7
Total from disease	8	30	45	83
Total from injury	2	4	9	15
Unknown	1	1
Total from all causes	10	35	54	99

MARRIAGES AND BIRTHS.

On the reports were noted 27 marriages—10 of officers, 16 of enlisted men, 1 of civilian attachés.

The births reported numbered 416—male, 199; female, 217. Sixty-eight were children of officers, 311 of enlisted men, 37 of civilians. Twelve Indian children, 4 males and 8 females, born at Fort Sill, Okla., are included in the total.

List of special reports received from medical officers from July 1, 1897, to June 30, 1898.

MEDICAL REPORTS.

Name.	Rank.	Report.
Arthur, W. H.	Captain and assistant surgeon.	General septicæmia, result of hypodermic injection of quinine hydrochlorate, death.
Bradley, A. E.	do	Chancre of tonsil.
Brechemin, L.	Major and surgeon	Chronic enteralgia.
De Loffre, A. A.	do	Abscess of liver.
Ewing, C. B.	Captain and assistant surgeon.	Chronic interstitial nephritis.
Forwood, W. H.	Colonel and assistant surgeon-general.	Pleuro-pneumonia, death, autopsy.
Girard, A. C.	Major and surgeon	Alcoholism, report of autopsy; scarlet fever at Fort Douglas; aneurism of the aorta; report of Congress of Hygiene, Madrid.
Gorgas, W. C.	Captain and assistant surgeon.	Yellow fever at Fort Barrancas.
Hartsuff, A.	Lieutenant-colonel and deputy surgeon-general.	Arterial thrombosis of brain.
Harvey, P. F.	Major and surgeon	Five cases of typhoid fever; Woodbridge treatment.
Hoff, J. Van R.	do	Diphtheria at Vancouver Barracks.
Ives, F. J.	Captain and assistant surgeon.	Tubercular meningitis, death.
Kieffer, C. F.	do	Varioloid eruption after vaccination.
Kimball, J. P.	Major and surgeon	Cerebral tumor.
Kulp, Jno. S.	Captain and assistant surgeon.	Cerebrospinal meningitis, death.
Lippincott, H.	Lieutenant-colonel and deputy surgeon-general.	X-ray apparatus.
Maus, L. M.	Major and surgeon	Milk adulteration.
McCulloch, C. C.	Captain and assistant surgeon.	Smallpox at Fort Pickens, Fla.
McVay, H. E.	do	Pseudo-membranous rhinitis.
Munson, E. L.	do	Two cases cerebrospinal fever.
O'Reilly, R. M.	Major and surgeon	Acute gastritis, death, autopsy.
Owen, W. O.	Captain and assistant surgeon.	Pulmonary tuberculosis.
Perley, H. O.	Major and surgeon	Facial paralysis; varicose veins; chronic gastritis; muscular rheumatism; interstitial nephritis; rheumatism; malingering.
Phillips, J. L.	Captain and assistant surgeon.	Aneurism of aorta.
Robinson, S. Q.	Major and surgeon	Report on water supply of Fort Reno, Okla., essay read before Officers' Lyceum; acute mania; multiple neuritis.
Wales, P. G.	Captain and assistant surgeon.	Hodgkin's disease, death.
Waters, W. E.	Lieutenant-colonel and deputy surgeon-general.	Insolation, death, autopsy.
Willcox, Chas.	Captain and assistant surgeon.	Difficult labor, postpartum hemorrhage.
Wood, M. W.	Major and surgeon	Intestinal ulcer, death, autopsy.
Woodruff, C. E.	Captain and assistant surgeon.	Typhoid fever, death.
Woodson, R. S.	do	Smallpox in Walker County, Ala.

List of special reports received from medical officers, etc.—Continued.

SURGICAL REPORTS.

Name.	Rank.	Report.
Adair, Geo. W	Major and surgeon	Hammer toe, 2 cases.
Ashford, B. K	First lieutenant and assistant surgeon.	Hernia.
Banister, W. B	Captain and assistant surgeon.	Operation for radical cure of hernia, 10 cases; appendicitis.
Borden, W. C	do	Appendicitis, 5 cases; radical cure of hernia, 2 cases.
Bradley, A. E	do	Fractured clavicle; fatal pleuritis, death and autopsy.
Brechemin, L	Major and surgeon	Gunshot wound forearm, skiagraph accompanying.
Clarke, J. T	Captain and assistant surgeon.	Gunshot wound abdomen, death and autopsy.
Crosby, W. D	do	Operation for radical cure of hernia; appendicitis, 2 cases; gunshot wound of liver.
Davis, W. B	Major and surgeon	Amputation of thigh.
De Loffre, A. A	do	Appendicitis.
Edie, Guy L	Captain and assistant surgeon.	Operation for radical cure of hernia.
Fauntleroy, P. C	First lieutenant and assistant surgeon.	Carcinoma uteri, hysterectomy; fibroma uteri, hysterectomy, death; miscellaneous gynecological cases; gunshot wound right chest.
Flagg, C. E	do	Supra-pubic lithotomy; eczema, skin grafting; intestinal end-to-end anastomosis on 8 dogs.
Forwood, W. H	Colonel, assistant surgeon-general.	Operation for radical cure of hernia 2 cases; epithelioma of penis; appendicitis, 2 cases.
Frick, E. B	Captain and assistant surgeon.	Strangulated umbilical hernia; operation for radical cure of hernia.
Gandy, C. M	Captain and assistant surgeon.	Epithelioma of lip.
Girard, A. C	Major and surgeon	Pistol-shot wound, death and autopsy; dislocation and fracture of vertebra, death, autopsy; operation for radical cure of hernia, 5 cases; appendicitis, 4 cases.
Gorgas, W. C	Captain and assistant surgeon.	Double amputation.
Godfrey, G. C. M	First lieutenant and assistant surgeon.	Operation for strangulated hernia.
Hall, J. D	Major and surgeon	Gunshot wound left ankle.
Hallock, H. M	Captain and assistant surgeon.	Operation for radical cure of hernia, 2 cases; operation for appendicitis; impacted gall stones.
Harvey, P. F	Major and surgeon	Tuberculosis of the testicle.
Hoff, J. Van R	do	Operation for radical cure of hernia.
Kieffer, C. F	Captain and assistant surgeon.	Gunshot wound of head, death and autopsy, 2 cases; antiseptic technique in military surgery.
Kilbourne, H. S	Major and surgeon	Gunshot wound, amputation of leg.
La Garde, L. A	do	Operation for radical cure of hernia, 6 cases; acute osteomyelitis, amputation of the thigh.
Lippitt, W. F	Captain and assistant surgeon.	Operation for radical cure of hernia, 2 cases.
Mason, C. F	do	Compound comminuted fracture left leg; peritonsillar abscess; 5 cases of fracture.
Maus, L. M	Major and surgeon	Operation for radical cure of hernia.
Munday, Benj.	Captain and assistant surgeon.	Appendicitis; amputation of arm.
O'Reilly, R. M	Major and surgeon	Gunshot wound right hand.
Pilcher, J. E	Captain and assistant surgeon.	Thermograph; laparotomy, suppurative perityphlitis, death and autopsy.
Powell, J. L	do	Operation for radical cure of hernia.
Raymond, H. I	do	Cholecystotomy, death.
Robinson, S. Q	Major and surgeon	Hydrocele of the cord.
Shillock, Paul	Captain and assistant surgeon.	Gunshot wounds head and neck.
Skinner, G. A	First lieutenant and assistant surgeon.	Appendicitis, 2 cases.
Stone, J. H	do	Fracture of skull, death, autopsy.
Wells, G. M	Captain and assistant surgeon.	Two gunshot wounds.
White, R. H	Major and surgeon	Gunshot wound, suicide, death, autopsy.
Willcox, Chas	Captain and assistant surgeon.	Bullet wound right thigh, death, autopsy.
Wilcox, T. E	Major and surgeon	Appendicitis.
Woodruff, C. E	Captain and assistant surgeon.	Do.

SURGICAL OPERATIONS.

During the year 1897 the Medical Department of the Army reported 786 surgical operations, 337 of which were necessitated by injury and 449 by disease. The number, character, and results of these are shown in the following statement:

Nature of operation.	Disease or injury.	Total.	Recovered.	Died.	Remarks.
Removal of tumors.....		38			
Enucleation	Sebaceous, 10; encysted, 5; lipoma, 7; fibroid, 3; fatty, 3; warty growths, 2; fleshy, 1; papilloma, 1; epithelioma, 1; vascular, 1; cutaneous, 1; keloid, 1; chondroma, 1; rhabdomyoma, 1.	38	38	Neck, 5; hand, 4; cheek, 4; lip, 3; buttock, 2; eyelid, 2; thumb, 2; perineum, 2; loin, 1; prepuce, 1; lower jaw, 1; forearm, 1; scrotum, 1; back, 1; forehead, 1; ear, 1; face, 1; skull, 1; spermatic cord, 1; shoulder, 1; chin, 1; Scarpa's triangle, 1.
Opening of abscesses.....		91			
Incision	Adenitis, 13; cellulitis, 12; bubo, venereal, 20; bubo, non-venereal, 11; tubercular, 1; ischio-rectal, 2; perirectal, 2; periosteal, 1; venereal, 3; peritonsillar, 1; alveolar, 1; whitlow, 1; suppurating cyst, 1; subcutaneous, 11.	80	80	Groin, 36; neck, 5; buttock, 6; rectum, 4; finger, 1; cheek, 1; leg, 1; thigh, 1; scalp, 1; testicle, 1; orbit, 1; chest, 1; anus, 1; pubes, 1; loins, 2; scrotum, 1; arm, 1; alveolus, 1; tonsil, 1; jaw, 1; scapula, 1; axilla, 2; palm, 2; urethra, 1; thumb, 1; perineum, 1; sacrum, 1; face, 1; chin, 1; ear, 1.
Incised and curetted.....	Adenitis, 6; bubo, venereal, 2; perirectal, 1; ischio-rectal, 1; cellulitis, 1.	11	11	Groin, 8; rectum, 2; toe, 1.
Operations on the eye.....		26			
Enucleation		1	1	
Foreign bodies.....		6	6	
For pterygium.....		10	10	
For chalazion.....		3	3	
Removal of cataract.....		3	3	
For strabismus.....		1	1	
For staphyloma.....		1	1	
For opaque membrane of capsule.....		1	1	Iridectomy.
Operations on the nose.....		37			
For fracture of nasal bones.....		24	24	
For chronic rhinitis.....		7	7	
For hypertrophied turbinate.....		1	1	
For hypertrophied septum.....		1	1	
For exostosis, nasal bones.....		1	1	
For nasal polypi.....		2	2	
For deformed nose.....		1	1	
Operations on the mouth.....		7			
Amputation of uvula.....		1	1	
Removal of tonsils.....		4	4	
For deformed lip.....		1	1	
Removal of adenoid growths of pharynx.....		1	1	
Operations on the veins.....		29			
For varicocele		27	27	Excision, 21; resection of veins, 2; Bennett's operation, 1; ligation, 3.
For varicose veins of leg.....		2	2	Excision, 1; ligation, 1.
Operations on the digestive organs.....		150			
For fistula in ano.....		10	10	
For prolapse of rectum.....		2	2	
For rectal fistula.....		1	1	
For ulcer of rectum.....		2	2	
For fissure of anus.....		1	1	

Surgical operations—Continued.

Nature of operation.	Disease or injury.	Total.	Recov- ered.	Died.	Remarks.
Operations on the digestive organs—Continued.					
For hæmorrhoids.....		53	53	Incision, 25; ligature, 15; clamp and can- tery, 8; thermo-cau- tery, 5.
Laparotomy	Appendicitis, 20; traumatic perito- nitis, 1; intestinal perforation, 1; peritoneal ab- scess, 1; removal of gall stones, 1; gunshot wound of liver, 1; for radi- cal cure of hernia, 56.	81	77	4	Bassini's operation, 34; Bassini's modified, 1; Halsted's, 2; not stated, 19; (a) acute appendicitis (2 deaths); traumatic peritonitis, (1 death); intestinal perforation (1 death).
Operations on the respi- ratory organs.					
Aspiration of chest.....	Acute pleurisy, 2; empyema, 1.	3	3	
Thoracotomy	Pneumo-pyo-thorax.	1	1	
Operations on the lym- phatic glands.					
Removal of glands.....	Venereal, 32; bubo, nonvenereal, 4; nonspecific ade- nitis, 7; tuber- cular, 3.	46	46	
Curetting.....	Venereal, 3	3	3	
Operations on the uri- nary organs.					
For stricture of urethra:					
Internal urethrotomy....	Gonorrhea, 5.....	5	5	
External urethrotomy ...	Gonorrhea, 3.....	3	3	
Meatotomy	Gonorrhea, 1.....	1	1	
Dilatationdo	1	1	
Aspiration of bladder....	Renal calculus in membranous por- tion of urethra.	1	1	
Cystotomy.....	Chronic cystitis, 1...	1	1	
Suprapubic lithotomy	Vesical calculus, 1 ..	1	1	
Operations on the gener- ative organs.					
For phimosis.....	Congenital, 14; gon- orrhea, 3; chan- croid, 7.	24	24	
For elongated prepuce.....	Congenital, 7	7	7	
For hydrocele		10	10	Aspiration, 5; Volk- mann's operation, 4; injection of carbolic acid, 1.
For paraphimosis	Gonorrhea, 1; chan- cre, 1.	2	2	
Aspiration of testicle.....	Gonorrheal epidid- ymitis, 1.	1	1	
Removal of testicle	Tubercular testi- cle, 1.	1	1	
Trachelorrhaphy	Lacerated cervix uteri, 9; subinvo- lution and retro- flexion of uterus, 1.	10	10	Adult females, 10 (ci- vilian attachés).
Perineorrhaphy	Laceration of peri- neum, 3.	3	3	Adult females, 3.
Forcible dilatation of cervix uteri.	Stenosis os uteri, 3; endometritis, 2; abortion, reten- tion of mem- branes, 1.	6	6	Adult females, 6.
Colorrhaphy.....	Endometritis and laceration, 1.	1	1		Adult female, 1.
Abdominal hysterectomy....	Fibroid uterus, pyo- salpinx, cystic ovary, 1.	1	1	Do.
Operations on the bones.....					
Removal of portions	Necrosis, 2; exosto- sis, 1.	3	3	Phalanx third toe, 1; tibia, 1; tarsus, 1.
Incised and curetted	Osteitis, 1	1	1	Tibia, 1.
Resection of rib	Gunshot wound of chest.	1	1	

Surgical operations—Continued.

Nature of operation.	Disease or injury.	Total.	Recov- ered.	Died.	Remarks.
Operations on the bones—Continued.					
Reduction and manipulation of fractures.....		146	143	3	Sternum, 1; femur, 5; humerus, 5; lower jaw, 4; malar bone, 1; clavicle, 29 (1 death from acute pleurisy); tibia and fibula, 15; tibia, 6; fibula, 28; patella and radius, 1; radius, 19; Colles's fracture, 3; wrist, 1; ribs, 16; skull, 3 (1 death); cervical spine (died) 1; ulna, 5; radius and ulna, 2; scapula, 1.
Operations on the joints.....		52			
Reduction of dislocations.....		47	46	1	Shoulder, 29; knee, 4; clavicle, 2; elbow, 7; ankle, 2; wrist, 2; cervical vertebrae (died), 1.
Disarticulation of joint.....	Hammer toe, 1; ankylosis, 1.	2	2		Finger, 1; toe, 1.
Aspiration.....	Synovitis, 2.....	2	2		Knee, 2.
Opened and curetted.....	Bursitis, 1.....	1	1		Elbow, 1.
Operations on the limbs.....		27			
Amputation for injury:					
Fingers.....	Gunshot, 2; frost-bite, 4; lacerated wound, 7; old injury, 1.	14	14		Primary, 13; secondary, 1.
Arm.....	Gunshot, 1.....	1	1		Primary, 1.
Forearm.....	do.....	1	1		Do.
Leg.....	Gunshot, 1; compound comminuted fracture of tibia and fibula, 2.	3	3		Primary, 3.
Toe.....	Lacerated wound, 1.	1	1		Primary, 1.
Amputation for disease:

OPERATIONS FOR THE RADICAL CURE OF HERNIA.

The following cases, additional to those published in my last annual report, have been operated on for the radical cure of hernia. The increased business of the office, occasioned by the war with

Spain, has prevented me from following up their histories to determine the percentage of recurrences. This will be done hereafter.

QUARTERS.

Defective ventilation of barracks has been reported from a number of posts, notably Forts Logan, Douglas, Warren, and D. A. Russell, but in several instances this condition resulted from the occlusion, through accident or design, of the existing openings for ventilation. At several of these posts an unusually high percentage of sickness from tonsillitis and respiratory catarrhs induced a careful investigation of the sanitary conditions, Maj. A. C. Girard reporting that an immediate decrease in the number of cases of tonsillitis followed the institution of proper ventilation. Capt. R. W. Johnson, assistant surgeon, United States Army, writing from Fort D. A. Russell, Wyo., in February, 1898, states that—

A few days ago three cases of tonsillitis were admitted to the hospital from Company F, Eighth Infantry. I immediately went to the barracks for the purpose of making an investigation to ascertain, if possible, the cause of the sickness. I found all the fresh-air inlets closed, in which condition they had apparently been for some time, judging from the accumulated dust in the iron registers covering them. On removing these I discovered from a foot to a foot and a half of dust, papers, and other rubbish piled up to within a few inches of the floor. There are iron gratings at each end of the building, set in the stone foundation, through which fresh air passes, but this, in place of being conducted directly by means of suitable shafts to the openings in the floor of the squad room, first circulates, as near as I could determine, beneath the floor of the entire building. Practically no fresh air gains access to this barrack, except what passes in when the doors and windows are opened. In case these ventilators under the stoves are occasionally opened there would be free entrance to the squad room of the stagnant and impure ground air which had been imprisoned under the floor for a longer or shorter period, and which would be injurious to health. The fresh-air inlet and the outlet for foul air in the new squad room were both closed, the former having a set of three lockers placed directly against it. From the amount of dirt that had accumulated behind these lockers I judged they had not been moved for a long time, so the probabilities are the fresh-air inlet has been closed for the same length of time. During the night the air in this barrack, from the entire absence of proper ventilation, must of necessity be very foul and act as a causative agent in the production of disease. In this connection I will say that I have inspected nearly all the barracks, and found the same condition of affairs existing, viz: All the fresh-air inlets closed, with but few exceptions, and in most cases filled with dirt and debris of all kinds; no fresh-air shafts, and the closure of all foul-air outlets, except those in the ridge, which would undoubtedly also be closed if it were possible. The air in one barrack room is reported by the first sergeant as always extremely foul when he enters at reveille. During the past few weeks five cases of bronchitis were admitted to sick report from Company H, the ventilation of whose squad room I found in even worse condition than any of the other barracks inspected. The impure air, which would be certain to accumulate in the absence of proper ventilation, would readily account for these cases of sickness. I recommend that suitable shafts be put in all the barracks as soon as possible, and that when they are constructed the openings leading into the squad room be kept open all the time. If the entering air be too cold, a suitable jacket around the stove would confine it and cause it to be heated sufficiently before diffusing through the room.

In an inclosure to the sanitary report of Fort Logan, Colo., for the month ending February 15, 1898, Maj. C. E. Munn, surgeon, United States Army, remarks:

My attention has been directed, since the cold season, to the defective ventilation of the barrack dormitories of this post. Since October 1, 1897, there have been admitted to sick report about 75 cases of tonsillitis and other catarrhal affections of the throat and lungs. More than 200 similar affections were treated at sick call in men who were not excused, and in a large number of persons whose names do not appear on sick reports. These diseases are believed by sanitarians to be mainly caused by breathing the impure air surrounding aggregations of men

sleeping in close rooms. I have carefully examined the condition of these rooms and find as follows: They are about 70 by 30 by 12 feet, and average 26 bunks. This would give an air space of about 950 cubic feet per man, which would seem to be ample, but they are heated by three hot-air flues opening through the floor, and being well built, with no openings near the ceiling, they practically become filled with foul air after a few hours' occupancy at night, although earnest effort has been made to secure ventilation by dropping the windows at the top, etc. There are near the floors in each room, at each end, three openings for ventilating shafts, which originate under the verandas near the ground, and are carried in the walls to above the roof. I find that a current of air is constantly flowing from the room through them, but not sufficient to affect the needed air change. I am of the opinion, however, that by supplementing these ventilators by three small shafts, say 24 by 24 inches, leading directly from the tight ceilings to louvered openings on the ridge, efficient ventilation will be obtained. I respectfully recommend that this plan be suggested to the quartermaster as being simple, least expensive, and, considering the climate, entirely practicable. It may be that the department of construction may have some better plan, but improvement of some kind is imperatively needed before another winter.

At Fort Preble, Me., the barracks are without any system of ventilation, are old, and not worth repairing. Capt. J. R. Kean, assistant surgeon, United States Army, reports of Fort Warren, Mass., that "the casemate squad rooms are dark and ill ventilated, and the basement rooms occupied by married enlisted men are still worse." He recommends that the use of casemates for living purposes at this post be discontinued, except in an emergency, and that barracks, officers' quarters, and a hospital be constructed at an early date.

The casemates at Fort Adams, R. I., were reported as damp, ill ventilated, and insufficiently lighted, and a table has been submitted by the surgeon, Maj. C. L. Heizmann, giving the proportion of the more common diseases occurring among the soldiers of the light battery living in light and airy brick barracks as compared with the remainder of the garrison in casemates. It would seem, however, as if this comparison can not be made so as to demonstrate with precision the insanitary influences exerted by the character of the quarters occupied: (1) Because the absolute number of men in each case is so small—average annual strength of the light battery during the past three and one-half years, 66; of the other batteries, 187. (2) Because other influences affecting the men are so powerful as to overshadow by their results those effected by the character of the quarters. Nevertheless, an excess of prevalence of rheumatic affections is suggestive of the known dampness of the casemates. The annual admission rate for the three and one-half years was, for the light battery, 1,365; for the others, 1,081 per thousand of strength present, and the rate of constant sickness, respectively, 46.8 and 33.6. But it is evident that the light artillerymen were more exposed to injury than the others, for their rate for such causes of disability was 413, as compared with 235 per thousand of strength. Again, the light artillerymen had 135 venereal cases, the others only 91. Excluding venereal diseases, vaccinations, alcoholism, and injuries, the number constantly sick in both commands was about the same, 17.6 in the light battery and 17.4 in others. It is observed, however, that the men in the casemates suffered more from diarrhea, an average annual rate of 104 as against 74, and from rheumatism an average annual rate of 61 as against 30. These are the striking difficulties in a comparison of the sick rates. An investigation of the statistics of the past ten years shows that the preponderance of rheumatism among the men in the casemates is constant, the average annual rates being 84, as compared with 56 in the light battery.

At Fort Hamilton, N. Y., some of the officers' quarters were built without cellars or any means of preventing the ingress of soil atmosphere or soil dampness. Consequently, the walls during damp weather are covered with moisture, and the odor in the houses is stale and musty. This condition should be remedied.

At Fort Yellowstone, Wyo., the surgeon, Capt. A. E. Bradley, found that the new guardhouse had been built with no provision for fresh-air inlets, and that a similar condition existed in the barracks then in process of construction. These mistakes were, however, promptly remedied on representation of the facts. The removal of a row of improvised shelters occupied as quarters by the families of enlisted men at Fort Canby, Wash., has materially improved the appearance and sanitary condition of that post.

At Fort Sill, Okla., the quarters now occupied by married enlisted men are reported as being in bad sanitary condition, and the commanding officer of the post recommends that some of these hovels be torn down and replaced by better buildings. It is also desirable at this post that water-closets be provided for the families of enlisted men and for the servants of officers wherever it is found possible to connect them with the water and sewer systems.

At Fort Niagara, N. Y., the condition of the quarters is reported as good, with the exception of the cellar of the post exchange, which is wet and unwholesome from surface drainage.

Capt. Paul Clendenin, assistant surgeon, United States Army, reporting from Key West Barracks for the month of August, recommends that this post be lighted by electricity, as the oil lamps now in use heat the rooms and are prone to smoke in the free draughts produced by the universally open doors and windows. In hot climates these small considerations appear to make all the difference between comfort and discomfort. At this post, too, the old sets of officers' quarters appear to be unsafe, and, by reason of their extreme age, the roof plates and some of the timbers have become decayed and, in some instances, crumpled, so that in a high wind the roofs are in danger of being blown off.

In the sanitary report of Fort Apache, Ariz., March 15, 1897, First Lieut. William E. Richards, assistant surgeon, United States Army, remarks that part of all the company barracks underneath the floor is in bad condition. These buildings are all near the ground, and the foundation being of stone, with no gratings, the only escape for air between floors and ground is upward through the living rooms. He says:

I have only had opportunity to see the ground under G Troop barracks. It was very wet, and there is no reason to suppose that any of the others differ from this.

DRAINAGE AND SEWERAGE.

Improvements have been made during the year in the drainage and in the methods of disposing of solid and liquid wastes at many of the posts. Capt. H. I. Raymond, assistant surgeon, United States Army, reported from Fort Niagara in July, 1897, that the new drainage system of the post had been tested during the month by a rainfall of over 7 inches. No detriment to the health of the men nor serious inconvenience to travel was experienced during this exceptionally heavy rainfall, whereas, before this improvement such a fall would have converted the ground in and around the post into a swamp. In July, 1897, Maj. Ezra Woodruff reported the substitution of earth closets

at Fort Keogh, Mont., for the privy pits that had been so long in use at this post. At Fort Assinniboine, Mont., galvanized-iron boxes were recommended for the earth closets as being less absorbent of liquid excreta and more easily cleaned and handled than the wooden boxes in use.

Local obstructions and local faults in sewerage systems were occasionally noted. Thus, at Fort Huachuca, Ariz., it was found necessary to lay open portions of the sewer for the removal of obstructions. At Fort Baker, Cal., the wastes from a bath and wash room discharged on the ground, and the foul water was imperfectly drained from the side of the barrack building by a surface ditch, while a leak in a kitchen drain permitted waste water to soak into the ground beneath the building. Faults of this character were promptly remedied by the action of the local authorities.

Capt. J. R. Kean, assistant surgeon, United States Army, took exception to the construction and lighting of the closets and urinals at Fort Warren, Mass., on which estimates for slate urinals were called for, and the quartermaster was directed to make requisition for outside lamps under Army Regulations 1015. Captain Kean said:

The closets and urinals for the command are in a large cellar lighted dimly by three loopholes, each 6 inches wide, at one end. Artificial light is necessary at all times, and this is imperfectly supplied, because, as I am informed, the Quartermaster's Department does not supply lamps and oil for the purpose. It is obvious that there should be a special allowance of oil and lamps for this and other like purposes for garrisons in casemates. The closets are in fair condition. The urinal is a long, zinc-covered trough of home manufacture, and is crude, filthy, and offensive. It is well recognized by sanitarians that urinals will always become nuisances unless constructed of the best materials and with the greatest skill and care. It is submitted that the construction of urinals for a permanent fort is not a job to be performed by the extra-duty men of the command out of materials which are on hand, nor is it a proper matter in which to economize. It is therefore recommended that four stalls, at least, of polished slate or marble be put in for the use of this command, the work to be done by contract or hired expert labor in the very best manner.

In February, 1898, Maj. Henry McElderry, surgeon, United States Army, reported that at Fort Leavenworth, Kans., a crematory for the disposal of garbage, etc., began operations during the month.

The disposal of the sewage at Fort Logan, Colo., continues in an unsatisfactory condition. In the warmer months of the year it was utilized by irrigation on the farm of a citizen (Mr. Plater) who desired to make use of it, but during the remainder of the year it was directed into a pool, from which a certain part of the liquid drained into the Platte River. After repeated complaints from the health authorities of the county and city, and in consequence of a personal inspection of the conditions, the department commander directed that a pit be dug in a gravel bed near the Plater farm, into which the sewage should be run during the nonirrigating season, and from which it was expected that the liquid would ultimately filter out in a relatively harmless state. Lieut. Col. A. A. Woodhull, chief surgeon, suggested that one pit would be insufficient, and that two, or preferably three, should be constructed that the gravel through which the filtration would take place might have periods of rest for oxygenation. One pit was prepared and the sewage was turned into it on January 5, 1898, but it failed to take the whole of the flow, and the excess was permitted to run as before into the pool already mentioned. This excess amounts to 10,000 gallons a day. Additional filtering pits are needed for the disposal of this sewage.

Early in the present calendar year the reoccupation of a number of old posts led to many suggestions by medical officers for repairs, improvements, and the removal of insanitary conditions at these stations. As an illustration, the following from the sanitary report of Fort Delaware, Del., for May, 1898, may be given:

The island is a low mud bank 80 acres in area, and is supposed to be drained by a network of ditches which run in every direction and which vary in width from 2 feet to 25 feet, the amount of water being regulated by two sluice gates which open into the Delaware River, and theoretically permit of flushing at high tide and draining at ebb tide. The vegetation in these ditches and on this moist soil is characteristic of swamp ground, and the peculiar swampy atmosphere is present on still days. This odor is supplemented by the stench emitted by the mud lining the banks and bottoms, and this is of great intensity on a hot day. In the same category with the ditches is the moat, which up to the last few days, could not be drained at all, owing to impaired machinery. The stench from the stagnant waters became so great that the gates were broken open and the fresh water of the tide allowed to flow in. This improved the condition greatly, but the underlying stratum of filth and mud still furnishes a nucleus for an unhealthy condition. The few warm days we have had have served to emphasize the necessity of giving attention to both moat and ditches, the odor from which is already noticeable and will continue to increase in intensity with all the disease-breeding possibilities which it suggests, until effectual drainage is secured and the filthy bottoms of both moat and ditches are thoroughly removed.

The following, from a report dated March 1, 1898, by Lieut. Franklin M. Kemp, assistant surgeon, United States Army, gives a view of the insanitary conditions at Dyea, Alaska. The command consisted of 3 officers and about 50 men of the Fourteenth Infantry. It left Dyea shortly afterwards for the Yukon via the Dalton trail:

The command went into camp at Dyea, Alaska, February 13, 1898, at which place it still remains. The men occupy Sibley tents, averaging eight men to the tent. The officers and noncommissioned staff are supplied with the new conical wall tents, one of the latter being also used as a field hospital. The tents are arranged in a single row upon a narrow ridge of an elevation of about 5 feet and the drainage as far as the habitations of the command are concerned, is excellent. Outside of this small area, however, the ground over the greater part of Dyea is without inclination, and the water from the melting snow, unable to find its way through the frozen ground beneath, collects in large puddles which contaminated by the excreta, garbage and filth of the town, remain a constant menace to the health of the community. The latrines of the detachment are situated about 100 yards from the camp, are well covered, and afford under existing conditions the best possible means for the disposal of excreta. The town of Dyea, the center of which the camp is in, is devoid of any system of sewerage compatible with health. The privy-vault system is universally used for personal wants, but all other refuse is indiscriminately thrown on whatever happens to be the most convenient spot. This, as will be seen from the character of the soil, bears a most important relationship to the water supply. The soil consists of a shallow layer of loam overlying a deeper stratum of sand. The water supply is derived from two sources, namely, the Dyea River, a small stream that receives refuse from all the habitations along its banks, and from shallow wells. These wells are, as a rule, in close relation to privies or stables, and probably yield a water as undesirable from a sanitary standpoint as that from the river itself. On account of the above conditions all of the water used for drinking purposes by this command is previously well boiled.

The clothing of the men, in view of the fact that additional wearing apparel has been issued to meet the requirements of the severe climate in this locality, is all that can be desired.

The habits of the men are good, the food of desirable quality, though necessarily lacking somewhat in variety, and the cooking is excellent.

One of the men was attacked with measles shortly after our arrival, and this disease is commencing to appear among the civilians of the outside community. An epidemic of cerebrospinal meningitis has existed for some time in Skagway, and has recently extended to this town. There have been, according to report, about 20 deaths from this disease in Skagway, and to my personal knowledge 5 deaths in Dyea. It is of an extreme degree of virulency, carrying the patient off in from twelve hours to three days.

WATER SUPPLY.

During the year 1897 the post surgeon of Fort Myer, Va., represented the quality of the Potomac River water at the intake as not good and subject to increasing sources of contamination. In January, 1898, however, a pipe line was laid to bring the water to the post from a point 1,000 feet above the old intake, thus securing a water free from the sewage of Georgetown and other local settlements.

From Fort Columbus, N. Y., Maj. James P. Kimball, surgeon, United States Army, reported, September, 1897, that the turbidity of the water from clay and decomposed vegetable matter had been remedied and a clear water supplied by the use of filters put in by the quartermaster during the month.

Analyses of water samples from Columbus Barracks, Ohio, were made in the laboratory of this office in February last. The Alum Creek supply was regarded from the chemical point of view as of doubtful purity. The presence of fecal bacteria was not demonstrated, but saprophytic bacteria were very numerous. The Scioto River supply gave even stronger grounds for suspicion of pollution. The well near Barrack No. 53 gave good results chemically and bacteriologically. All the samples were hard from the presence of bicarbonates and sulphates of the alkaline earths.

The post of Fort Custer was abandoned in November, 1897, on account of dilapidation of quarters and insanitary conditions, chief among which was the difficulty of obtaining a pure water supply. This supply was taken from the Little Big Horn River and was originally a comparatively pure surface water, so much so that a few years ago Fort Custer was reported as the post having the smallest sick rates of any in the Army. Since then, however, many sources of contamination have been established such as the refuse from a slaughterhouse, a few miles above the post, from Indian villages 5 miles above, and from the Crow Agency school 11 miles distant, dangerous discharges from immigrants who occasionally camp on the stream, and seepage from fertilizers in gardens and farms under irrigation, the ditches being so numerous for 50 miles above that most of the water of the river was said to have run through some of these ditches before reaching the post. Typhoid fever made its appearance and diarrheas became common when the water was unusually foul. Orders were issued for the boiling of all water before its use for drinking, but it was found difficult to get the men to use the boiled water. They would drink directly from the faucets when at the post, not appreciating the danger, and when away from the garrison they drank directly from the stream. Plans and estimates were forwarded for the construction of a sand and gravel bed for slow filtration, but these were set aside in view of the possibility of getting a pure water from deep sources; but efforts in this direction failed. In September, 1897, the post surgeon reported the presence in hospital of 11 cases of typhoid fever and 1 suspected case awaiting diagnosis. The post was therefore abandoned.

Fort Harrison, Mont., has a water supply from a stream which runs past a mining village called Rimini, with an additional supply from Minnehaha Creek. Typhoid fever prevails in Helena and in the neighborhood of Fort Harrison, where this water supply is used. On account of this and of a fatal case which occurred among the troops the boiling of the drinking water was ordered. Some springs on the

reservation, described in my last annual report, were utilized subsequently to January, 1898, the water being hauled to the post in barrels.

Capt. Charles Willcox, assistant surgeon, United States Army, reported from Fort Bliss, N. Mex., in September, 1897, that from an analysis of the drinking water, made in Washington, D. C., and from personal observation, he was convinced that the typhoid fever cases occurring at the post had their origin in El Paso. The patients were enlisted men who frequently spent the night in that town on pass.

The water supply at Fort Ringgold, Tex., during the year was a source of much anxiety to the local authorities. During a rise of the river the water receded from the post, cutting into the right or Mexican bank of the stream, and the intake pipe of the water supply had to be extended until ultimately it had to be placed a short distance below the outfall of the sewers of the post. A local upward current from the sewers was believed, however, to prevent the contamination of the water pumped up for the use of the post. Further changes in the bed of the river ultimately necessitated the diversion of the sewage into a natural basin near the stream at a point above the intake. Here the sewage formed a pool of decomposing matter 25 by 75 feet, the odor from which was reported as vile, and on hot days unbearable. Capt. G. M. Wells, assistant surgeon, United States Army, recommended that a portable boiler, engine, and pump be provided to insure sufficient water for the needs of the post; that the pool of sewage be drained, and that the sewer system be extended so as to empty into the river below the intake. These recommendations were carried into effect in April, 1898.

The water supply of the post at Fort Walla Walla, Wash., is derived from springs which appear to have a dependence on the surface-water flow of a creek which is used for irrigating purposes. On this account some efforts have been made to condemn the water, with a view to bringing in the supply of the Walla Walla Water Company. Under date of February 28, 1898, Capt. F. R. Keefer, assistant surgeon, United States Army, reported on this subject as follows:

Only twice since the present system was installed (early in 1880) has doubt been cast on the quality of the water, and in neither case was the charge sustained. Major Koerper states in his sanitary report for April, 1891, that rumors were circulated to the effect that the water was impure and unfit for drinking purposes. He therefore had a chemical analysis made (the details of which I am unable to find) and also inspected the springs and their surroundings and found the water to be above suspicion. In October, 1897, the commanding officer stated in his indorsement on the sanitary report for that month his belief that certain diseases were the result of impurities in the water supply. To determine the character of this water I have recently made a careful analysis (chemical), the results of which indicate that the supply is of unusual purity. Referring to the register of sick and wounded for the past six years (January 1, 1893, to December 31, 1897, inclusive), I find that of cases of diseases among enlisted men of the command which might be charged to an impure drinking water there have been: Typhoid fever, 8; dysentery, 1; cholera morbus, 9, and acute diarrhea, 85, with only 1 fatal—a case of typhoid fever. During this period there were probably an equal number of cases of typhoid fever among civilians of the command. The average number of days lost on account of diarrhea and cholera morbus was but 2½ per case, showing the mild character of the attack and probably negating the idea of an infection. As to the typhoid fever, the town of Walla Walla has no sewer system; privies are the usual receptacles for fecal discharges, and wells are frequently close to these. As a natural consequence, typhoid fever has for years been endemic, and the cases of this disease occurring at the post can usually be traced to town sources. No medical officer who has served at this station has suggested that our water is responsible for these cases. In August, 1891, July, 1892, August, 1896, and August, 1897, the sanitary reports note a scarcity of

water. In October, 1897, the quantity was again insufficient. In this month the interesting observation was made that the springs which are the source of our supply failed when the water of Garrison Creek, a small stream several hundred yards distant, was directed into an irrigating ditch. So soon as the creek water was allowed to assume its natural channel an abundant supply of water was had at the post. This demonstrated the fact that the springs were fed by seepage from the neighboring creek. The three springs from which the water is conducted are protected by two frame houses, in which are redwood tanks, sunk to a depth of several feet around each spring. These springs are surrounded by a high, board fence, inclosing one-half acre of ground. The land surrounding the fence is unbroken meadow pasture on three sides, and on the fourth is plowed. There are but two houses in the vicinity, the nearest being about 80 yards and the other 100 yards. There is a privy near each house. That belonging to the farther house does not menace the purity of the spring waters, because of its distance from these and because the direction of flow of the ground water is directly opposite. The other privy constitutes, in my opinion, the only probable risk of contamination. This is very slight, owing to its distance from the springs. Moreover, the man of whom the Government leases the spring promises to replace this privy by a water-tight metal tank at his own expense. Now as to quantity. The quartermaster at this post informs me that during the summer he daily draws from the reservoir at the post 20,000 gallons of water for sprinkling purposes. He further states that if the water so used could be obtained from other sources the supply furnished by the springs would be ample for all purposes. To meet this requirement seems easy. During the past summer an experimental well only about 13 feet deep was dug near the quartermaster's stable, which in November yielded a quantity of water estimated at over 50,000 gallons per hour for several hours, with but slight lowering of the water level. It would seem, therefore, that a tank placed near the well and filled from it by a pump, or water pumped directly from well to sprinkler, would answer the requirement perfectly. Although the water coming from our springs is seepage from a stream of questionable purity, it must traverse about 500 yards of earth before it finds outlet. Finally, the ditch which diverted the water from Garrison Creek belongs to the man who owns the springs, and he promises to see that in future the water will be turned into the bed of the stream well above its probable point of departure on its way to the springs.

During the month of November, 1897, an extension of the water system of Jefferson Barracks, Mo., was reported by the post surgeon as having been completed under the supervision of Capt. John T. Knight, assistant quartermaster, United States Army. The water is obtained from the St. Louis city main at the city limits on South Broadway, and is conveyed for a distance of 7,445 feet to the pump on the military reservation through a 10-inch cast-iron pipe laid between 4 and 5 feet below the surface of the ground. The ground traversed by the pipe is rolling, and at the pump house is 60 feet above the level of the ground at the city limits; but the city pressure is adequate to furnish water at this point, whence it is pumped direct to the post and to a steel tank on ground about 50 feet higher than the pump. The tank holds 50,000 gallons and stands 50 feet from the ground to its bottom and 70 feet to its top. The distributing system consists of 6-inch and 4-inch cast-iron pipes, laid in lines adjacent to the buildings, with surface pipe valves and hydrants. The post at the road in front of the hospital is at about the same elevation as the pump house. The pump is capable of 500 gallons per minute at ordinary speed.

FOOD.

The food issued to the men was reported from all the posts as being ample in quantity and of excellent quality. At some posts it is stated that the diet was varied by purchases from allotments of profits from the post exchange, and in summer from the yield of the post garden.

CLOTHING.

The clothing was reported of good quality and suitable to the requirements of the climate at all the posts during the calendar year. At Fort Yellowstone an exception was made in the case of a few men who were much exposed on detached service at winter stations in the park. These stations are six in number, with a noncommissioned officer and four men at each. Their duties are arduous, as they are required to make long, exhausting trips on skis, the only means of getting about because of the deep snow. In March, 1894, a soldier lost his life while on one of these trips, and in December, 1897, another soldier died from a similar exposure. According to Capt. A. E. Bradley, assistant surgeon, United States Army, who reported the case:

Those having large experience in work of this kind advocate a blanket suit, arctic or "German" socks, with low-cut gum shoes with heels; in addition to this, I believe a knit woolen elastic cap would be more suitable than any of the head covering issued; possibly suits of blanket-lined canvas, or jeans, would be best, if not too rigid and stiff. The "knit woolen" underwear now issued is largely cotton, is stiff, harsh, and poor protection to one exposed to extreme cold; a better quality, at least for these men, should be supplied. These men now, at considerable expense, have every winter to supply themselves with additional clothing suitable to the work they are required to do. This is manifestly unjust to them. It is recommended that provision be made to issue to them a better woolen underwear, a suitable outer shirt, either blanket, or blanket-lined canvas or jeans, an elastic woolen head covering, arctic socks, and suitable gum shoes.

In his report from Key West Barracks, November, 1897, Capt. Paul Clendenin states that many of the men when not on duty wear white canvas shoes with their white clothing. Personal experience, he says, has proved this to be the most comfortable foot gear in a hot climate. The shoe is cool, well ventilated, and can easily be kept neat in appearance.

FACILITIES FOR BATHING.

Few references were made during the year to bathing facilities for the troops, from which it may be inferred that these are satisfactory. The spray bath seems to be better adapted for military use than the bath tub. Spray baths were introduced at Columbus Barracks, Ohio, in January, 1898. They consist of open stalls of galvanized iron, with iron pipes, through the perforations of which water at a desired temperature is delivered in the form of a fine spray on the person of the bather. It is an adaptation of the spray or rain bath now in use in the free public establishments of the cities of New York, Boston, and Chicago, and in the baths of the quarantine stations, where large numbers of immigrants are cleaned before being admitted into our ports. This system should be extended in preference to the iron bath tub, which is so difficult to keep clean and so costly to maintain.

HABITS.

The habits of the men have been reported as generally good. At one post the surgeon considered that the men had too many idle hours and that they would be better off with more time spent in physical exercise. Inclement weather, and the fact that the ground was deeply covered with snow, were cited as the causes of the enforced idleness, but the reply was made that compulsory physical exercise does not

necessarily imply outdoor work. It can be well supplied by systematic gymnastics under cover.

At two posts the excessive prevalence of venereal diseases led the medical officers on duty to consider measures for their repression. One proposed that the number of days lost to the Government in any case from these diseases be charged against the man affected, or, as an alternative, that charges be preferred for contracting disease through vicious habits. The objection to these procedures is that they would not really lessen the prevalence, but would lead the affected men to hide their malady and seek outside treatment. The other medical officer suggested the discharge of all men who were disabled more than thirty days, but as the fixing of a time limit is unnecessary in view of Army Regulation 140, which provides for discharge when disease is incurred by misconduct or bad habits, and as, moreover, discharge does not lessen the prevalence among the men, he subsequently entered into communication with the health authorities of the neighboring city, in which most of the cases originated, with the view of urging the institution of repressive measures. The removal of the troops from the locality, in view of a probability of active service, prevented further action on these lines.

STATISTICAL TABLES.

The statistical tables, pp. 647-687, give in detail the data on which the statements of this report are based. They are:

I. Numerical view of the effects of disease and injury on the Army during the calendar year 1897 as compared with the corresponding data for 1896 and for the decade 1886-1895.

II. Relative sickness among the troops (white and colored) in the various military departments during the year 1897.

III. Military posts in each department, alphabetically arranged, with mean strength, and admissions for disease and injury; also discharges and deaths, with ratios per thousand of strength for admissions and noneffectiveness, the averages of daily sickness, and the meteorological data for 1897.

IV. General view of the results of disease and injury at each of the military stations, arranged in the order of their mean strength.

V. Twenty posts having the highest admission rates for the year 1897; also their admission rates for the years 1892 to 1896, inclusive.

VI. Twenty posts having the lowest admission rates for the year 1897; also their admission rates for the years 1892 to 1896, inclusive.

VII. Twenty posts having the highest noneffective rates for the year 1897; also their noneffective rates for the years 1892 to 1896, inclusive.

VIII. Twenty posts having the lowest noneffective rates for the year 1897; also their noneffective rates for the years 1892 to 1896, inclusive.

IX. Twenty posts having the highest admission rates for disease, excluding venereal diseases, vaccinia, and alcoholism; also their ratios for deaths, discharges, and constant noneffectiveness, and the corresponding average rates for the Army, year 1897.

X. Twenty posts having the highest noneffective rates for disease, excluding venereal diseases, vaccinia, and alcoholism; also the average number sick daily, the average duration of each case, and the corresponding average rates of the Army, year 1897.

XI. The military posts in each department, showing the rates of admission, death, discharge, and constant noneffectiveness for disease, excluding venereal diseases, vaccinia, and alcoholism, year 1897.

XII. Ratios of admission to sick report, discharge, death, and constantly noneffective of the Army and of the troops in the several departments for the year 1897, as compared with the ratios for the Army for 1896 and for the decade 1886-1895.

XIII. Distribution of certain important diseases at United States military posts during the year 1897.

XIV. Twenty posts giving the highest admission rates for malarial diseases, rheumatism, and venereal and diarrheal diseases, respectively, during 1897.

XV. Twenty posts giving the highest noneffective rates for malarial diseases, rheumatism, and venereal and diarrheal diseases, respectively, during 1897.

XVI. Prevalence of alcoholism at the various posts and its influence on the effective force of the garrisons for the year 1897.

XVII. Causes of rejection on primary examination among 13,139 recruits physically examined during the year 1897, with corresponding ratios per thousand of each race examined.

XVIII. Number of white and colored applicants for enlistment physically examined during the year 1897, with the number accepted, rejected on primary examination, and declined, and ratios per thousand.

XIX. Nativity of white and colored recruits accepted during the year 1897, with ratios per thousand accepted.

XX. Average height, weight, and chest measure of 9,226 recruits accepted during the year 1897 (native white, 6,062; foreign born white, 2,371; colored, 793).

INTERNATIONAL TABLES.

I. Examination of recruits during the year 1897.

II. Movements of sick, by departments.

III. Movements of sick, by branches of military service and by months.

IV. Movements of sick, by large garrisons.

V. Movements of sick, according to most important diseases.

VI. Admissions of important diseases, by branches of military service.

VII. Admissions of important diseases, by months (absolute numbers).

VIII. Deaths, according to years of service and age.

TABLE I.—Numerical view of the effects of disease and injury on the Army during the calendar year 1897, as compared with the corresponding data for 1896 and for the decade 1886–1895.
